

Transformer Cabinet Mural Project 2016
Artist: Jennifer Ivanovic
Location: 200 Walnut St. (SP56070)

STAR DUST

Comets are ancient bodies of frozen ice and **StarDust** that formed beyond the orbit of the most distant planet and contain materials that were the ancient building blocks of the solar system. A colorful, star-like pattern will wrap the transformer painted with a lasercut stencil. A striped, melting "cosmic goo" pours over the box with an obvious gravitational pull. Or, it's just a nice colorful pattern with my signature simulated poured pattern. Either way, **StarDust** is a unique visual treat.
