

Transformer Cabinet Mural Project 2016
Artist: Gale Whitman
Location: 118 W. Laurel St. (3 Cabinets: NEED SP #)

Because of the close proximity to the brand-new Music District (opening September 30) and to KRFC local radio station, I chose the theme of 'Musical Instruments' for these three cabinets. My palette is bright secondary colors, which convey excitement and positive energy. To share a sense of creativity and whimsy, I've distorted the instruments in various ways. Flowing throughout the cabinets are bars of music, notes and other musical symbols indicating the collaborative nature of music.

Designs as a group. See next page for individual cabinet designs.

The east cabinet will feature instruments used in Jazz and Rock & Roll music, including a microphone representing the human voice.

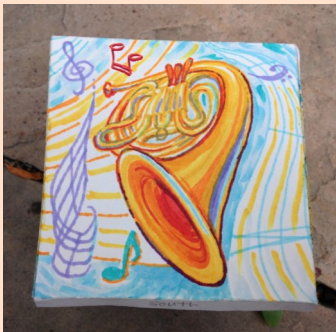

top

The center cabinet showcases concert band and classical music instruments. Also included here is an accordion, to make good use of the 'flanges' present on the cabinet's north face. The west face (with the grand piano) is partially obscured by the west cabinet.

The west cabinet is all about Bluegrass and acoustic instruments. The east face is mostly obscured by the center cabinet.
