Three side panels of the cabinet

The mural on the transformers is a landscape motif of colorful, bulging trees, hills, and tree trunks . . . with nice contrasts . . lights and darks, and color hues.

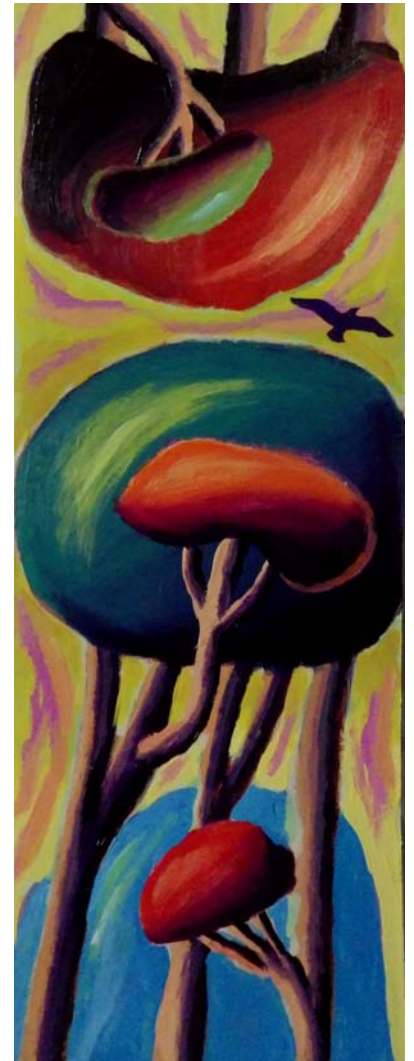

It also has a little river going through on some sides. The sky will be bright with colorful clouds.

There will be a few wild boars wandering in through the scenery with some silhouetted birds, hovering in the sky.

Everything will be kept busy to deter graffiti.
