

**Transformer Cabinet Mural Project 2015**  
**Artist: Ren Burke**  
**Location: 170 Kensington Dr.**

**"Octo-Tangle"**

The design features two cartoon-y octopuses and all 16 of their tentacles twisting and weaving around the cabinet. In some cases, the tentacles may be holding something, such as a utility warning sign, identification sticker or even a rose pulled from the real rose bush growing near the cabinet.

The friendly octopi will be depicted in the same color scheme as a piano I created for Pianos About Town in 2013...bright orange and violet with coordinating pinkish suckers along the tentacles. Their bodies will feature a contrasting striped patterning to keep the design as busy as possible. The background will be an oceany aqua color with lighter-colored bubbles dotting the spaces.
