

# Transformer Cabinet Mural Project 2015

## Artist: Kirsten Savage

### Location: 3509 S. Mason St.

My transformer cabinet will look like a colorful bug collection of beetles and butterflies. Each insect will be painted to look like it has been pinned to a burlap background and hovers above it, neatly organized like a scientific study. The style will be realistic but large-scale. The burlap backdrop will have light fabric and darkened shadows to create areas of high contrast and the insects will be spaced close together to discourage any graffiti.
