

Transformer Cabinet Mural Project 2010
Artist: Gale Whitman
Location: Parking lot of 324 Remington

When I visited the site of 'my' transformer cabinet, I noticed a lot of cement and pavement in the area. I wanted to add some color and nature to the area, and I thought a giant sunflower would fit the bill perfectly!

I intend to paint an image of a large sunflower, wrapping around the top and sides of the cabinet. The style will be loose and expressionist, with lots of bright colors and brushwork visible. Even the blue/green/purple background will be full of texture and color variations.
