I really don't think women are suddenly going to be walking around downtown topless. The point (made quite well by the young woman who spoke to council on Sept 1) is that by specifically calling out "women's breasts" the ordinance as it's now written demeans women and women's non-sexual body parts.

The sexualization of one and not the other is discrimination at its best, and at its worst - oppression. Using criminalization in this way is nothing more than some leftover old school male doctrine currently being used to body shame women. If men can't possibly be expected to control themselves in the presence of breasts, then the problem is not inside of our shirts. Let's finally take a look at the bizarre and puritanical laws we enforce.

Everything is over sexualized here; even breastfeeding is an issue! Let's continue to be a city that sets trends and make it the norm to see breasts as a natural body part, the same as men's chests.

As an American, I respect the ability to choose as well as for others to freely choose to express themselves while not being persecuted for something that everyone has and is merely biology.

The only reason that seeing a woman topless would be considered to be shocking is because we have sexualized women's bodies as a culture. To allow men to be shirtless, but demand that women cover themselves is to imply shamw in having breasts - that is, being a woman with the phyaicality of a woman. Allowing women to be topless does not mean that all women will suddenly run around topless. We know that all men don't. But it would definitely help our overall perception of the respect that is due anyone regardless of their body, and be a step towards equality for women of all backgrounds.

Men are allowed to walk around without a shirt and it's just absurd that women are sexualized to the point where the same option is not afforded them as it is for men. However, ideally I think it ought to be wrong for either sex to go topless- it's just crazy that in order for the sexes to be equal in this aspect that you would have to take away a 'right' from men. Regardless how you vote, I hope that at least breastfeeding women be allowed to feed their children without shame and ridicule

God intended for children to be nurtured from the mother's breast. Laws can't change genetic development. No part of the human body is intrinsically ugly or bad, needing covering except for weather. In God's eyes women's breasts are no different from men's. Women should be permitted to go topless anywhere they wish, just like men.

In the least, there should be an exception for breastfeeding mothers, which is completely natural and should not be stigmatized; however, the most fair way to approach this issue would be to allow all women to have the same rights and freedoms as men currently have in Fort Collins.

We certainly don't want to move in the opposite direction where all persons, men and women, are required to wear shirts all the time. What is most important to me here is that an exception be made in the case of a breastfeeding mother. It is vital to our public health that everything be done at a community-wide level to encourage and support breastfeeding.

It is very simple. The social stigma of it being inappropriate is a byproduct of the social inequality of women. Change must occur if we want to continue to make positive strides towards equality. Change is uncomfortable and daunting, but that is how you know it is working.

Although I am not particularly interested in seeing a lot of half nude women running around, I'm all for non-gender discrimination. Plus, can you imagine the tourism? "Come to Fort Collins, where you can get ganja AND let the girls swing free..."

Being allowed to be topless would be very empowering for those that choose to do so, and would not stop anyone else from choosing to dress conservatively. Personally, I would feel uncomfortable topless, but that shouldn't stop others from enjoying a freedom every man already possesses. I do not believe women going topless would infringe on anyone else's rights, despite some opinions I've heard expressed. I see/hear things that offend me in public all the time, but would not try to take other's rights away via outdated ordinances. Shaming women by making their bodies illegal doesn't help anyone.

Boobs should have never become so sexualized in our culture. They are not primary sex organs and are essentially the same between men and women. The only difference is the amount of fat in them but you can just as easily see that in a bikini top or a shirt with a lot of cleavage. Really, the only thing you are currently forcing women to completely cover is their nipple but those look no different than a male's nipple! It just makes no sense why a male can be shirtless but a female cannot. As a society, we should not be offended by seeing a female's boobs.

Women should have the same rights as men. In the 20's, men's nipples were banned. We need to end this idiotic law. It's about equality. Women shouldn't have to be made ashamed of their bodies.

Within a month or so, my parents told me to put my shirt back on. I asked why I had to when the boys I was hanging out with didn't and they said, "That's just how it is." Later I wanted to join the boy scouts, of which my Dad was a leader, but wasn't allowed and had to remain in Girl Scouts. I didn't like the activities of the Girl Scouts, but I liked being with my Dad and wanted to go camping, learn survival skilks, go hiking, etc. By age 11, I understood sex ism and the bias against my interests. I want to point out that I am heterosexual, not gay. I only wanted to participate in activities I wanted to do.

If men are allowed to be topless so should women be. Breasts are not a one gender body part, they are shared by all. The cultural reason this sexist law exists is because of the oversexualization and discrimination of women. Breasts are not obscene and on women are even a purposeful part of the body when used to breastfeed. Perhaps if the laws are equal it will begin to shift cultural perspectives and thus create a safer and more equal community for our women. I am a breastfeeding mother and feel that this issue is separate from the hardship nursing moms face. However, I believe that by creating equality in the laws it will positively impact nursing moms and support them in their nursing goals. And any amount of inequality or discrimination in our laws is wrong.

Why is it wrong for a normal breast to visible, but one with a three-inch nipple squirting bodily fluids fine? Or, if the general population does not want women to be able to go topless, then change the law to make it illegal for men to go topless too.

Somehow it becomes illegal. On various media, we're exposed to shootings, murders, and yet, if Janet Jackson's nipple slips at a concert, it's the freaking crime of the century. Furthermore, it would bring more responsible representations of female nudity. In mainstream culture, the only representation that I see are hyper-sexualized. It makes me question what it means to be a women in modern society. Also, the heat. Men can take off their shirts when it's hot, why can't I?

Our taboo ideals towards breasts are puritanical and outdated. Not being able to handle seeing breasts shows how emotionally immature we are a a country. Time to accept that all women have breasts and shouldn't be restricted to wearing a top at all times. If women can't be topless, neither should men. Seeing a topless man can be just as attractive or disturbing as seeing breasts. A woman should not have to feel ashamed of or afraid to show her breasts due to the mindless discomfort of others. Educate, don't repress.

Many people in the U.S. feel uncomfortable around naked female breasts because our culture has created a stronger association between breasts and sex than between breasts and their anatomical purpose--feeding a child. Women deserve the *option* to be topless in public, just like men. If people are offended by bare female breasts, they don't have to look, just like with shirtless men who show what some people would rather not see. Unfortunately, I think a some people (mostly men) would take advantage of bare female breasts and "accidentally" grope them. I do think the update should specify that only women 18 and older should be allowed to go topless and not allow children between 10 and 17 to do so. If the public nudity ordinance was updated to allow women to be topless in public, I think the number of women who would take advantage of the change would be relatively small for two reasons: 1) As a whole, our culture is still not as accepting of topless female nudity in public and that will be a bigger driver of women's actions than a legal change. 2) Going topless can be uncomfortable due to weather (the skin is very sensitive) and, depending on the size a woman's breasts, physical activity (even walking) with no support (i.e. a bra) can be painful. But I think a woman should have the choice to choose whatever is most comfortable for her. If nothing else, exceptions should be made for breastfeeding mothers. Thank you for considering my input.

I also belive that the sexualization of the female nipple is ridiculous. Yes, we are culturally conditioned to react to the female breasts - but what is the real difference between male and female tissue? There's a campaign going around called "free the nipple". People replace female nipples with photos of male nipples on photographs that would be censored for breast shots. The project is quite eye opening.

The sexualization of breasts is a cultural problem, and it will only begin to disappear when we stop treating female breast nudity as something shameful and titillating and recognize it as a basic right that men have - and women don't. Fort Collins is supposed to be a progressive town, and it needs to follow leaders like Denver and NYC in ending a ridiculous double standard and a legal restriction on body autonomy.

It is not a question of sanity - since women's breasts are the exact same as male breasts with the sole exception that one has more fat stores than others. As for the questions of morals, it was once considered immoral for men to be topless and our position on that as a society has clearly changed.

As a woman, I have always felt like I wasn't given the same opportunities as men. Even in the simplest ways, such as being in public on a hot summer day without my shirt on....like most men do. This will be a step forward in equal rights and chnging the sexualization of women.

Rules like these foster patriarchical ways of thinking. Furthermore, making female toplessness a commonplace would deter the rape-culture that is often harbored in college campuses. Changing this law is ethically and logically the right thing to do.

All the people complaining that they won't travel to/dine in FC if this change passes wouldn't know the difference if articles about this hadn't made the papers. Restaurants and public venues already have dress code requirements, so this change would primarily affect clothing choices on private property (front yards, for example) and in public places where going topless would otherwise be no big deal (near a lake or pool). City pools already have dress code requirements, so the real impact of this change would be negligible for the vast, vast majority of citizens. Might as well just change the ordinance and move on to more important issues.

I would have been labeled a sex offender at the time if the police officer had wanted to be more strict. I was even wearing pasties. It would be nice to see a change in this ordinance so I may continue my Halloween and tour de fat tradition. If not for the total toppless ordinance , I highly support the changing of this ordinance for breastfeeding mothers. Thank you

And I'm frankly shocked the breastfeeding ordinance isn't in place already. Wow. Lastly, in normalizing the nipple, it is my hope that more women will feel comfortable with choosing to breastfeed.

Breasts are organs, not sexual objects, and it's time we stop objectifying women and let them do what they want with their bodies. If a woman wants to be topless in public, let her be! Maybe if this becomes legal, it would start a public discussion about how all body types need to be respected and would allow children to grow up in a community that accepts, rather than body shames, men and women.

It is unfair to have a law targeted at and restricting women due to puritanical social opinions defining the female breast as sex organs to be hidden - they are not. Currently a woman who is sunbathing topless is breaking the policy and could be ticketed. Again, this is unfair. Most women would not choose to go topless in public but it should be a choice. Unless it also becomes against policy for a man to be topless, a women should have the same rights.

My family and I cannot believe that the city is even considering such an idea. Should this law happen, the city will become a laughing stock and bring only like people to support businesses. Old town Fort Collins (all of the city) will suffer tremendously. We would be so ashamed and embarrassed to bring any out of town visitors to restaurants and shops and any other venues. How many young families with children will frequent restaurants, shops, parades, etc., when naked women are sure to show up? Our business would go to Loveland, Windsor, Cheyenne, and Denver areas. Please do what is right and vote NO. Don't let the respectable solid citizens of this beautiful city down, by bringing in a freak show. The entire community will suffer.

Modesty is not a sexual construction, it's a personality construct and an evidence of respect for yourself and the people around you. Just because you are comfortable with your body or your own persona, doesn't mean that you should use them in ways that flaunt yourself and push your body or your ideas into the face of others demanding something of them. That demand may merely be acceptance or it may be an insistence that the world be seen your way, but presented in an immodest fashion is presented without respect. Modesty is a morality based in the heart and show through the body and the words.

I would not support women being fully topless to breastfeed.

I understand the point that it can be seen as unfair to women that men can walk topless and not women, but I don't think there is a need for that. we don't need to become the newest "topless beach without a beach".

If said society is full of women walking around naked, it not only teaches these children that its okay to act like cavemen, but also this would objectify women instead of promote the wonderful role they play in society as mothers, career women, and community voices. A women who walks around town with no shirt on would find no respect as any of these groups.

If not, that is a significant need, and I am very surprised that the city has yet to make that explicit. I oppose bare breasts in public for reasons other than breastfeeding.

I have young kids that do not need to be exposed to nudity at such a young age. If you change this policy then they would be exposed to it by default.

Women and men going topless in the U.S. is not the same thing. Generally speaking, we are not part of a culture in which nudity is part of the "norm" of day-to-day living and where being nude in public is not sexualized. With the exception of breast-feeding mothers, this is much ado about nothing.

Considering the option of public, above-the-waist nudity for women brings all of that into question. Perhaps you should all move to Boulder.

This whole thing is completely asinine and makes the city look foolish. All of this from one foolish and ignorant woman making this about equal rights. Men and women are different and a woman topless IS a sexual object. Whether she wants to be or not, although I suspect she does view things that way in her personal life. That is why men pay to go to topless clubs. You can't change biology and hormones. All this is going to do is cause unwanted attention and possibly harassment for those poor, ignorant women who choose to walk around topless. I thought this story was a joke when I heard it. Along with all my co-workers, most of whom are women. People not wanting to see women topless in public is not some sort of conditioning, as this foolish young woman (who got you even more foolish council members to go along with her foolish idea) seems to think. Where is your common sense? This is a terrible idea on so many different levels. Parents shouldn't have to worry about taking their kids to the grocery store and seeing a women topless. One woman shouldn't decide that type of thing for every parent in the city. This whole mess makes me ashamed to call this city home. And the whole idea of adding in the part about breast-feeding women is a terrible ruse. Women have breast fed in public since the beginning of time and will continue to do so until the end of time, regardless of what happens to current policy.

The timing of issue is in such poor taste .women are fighting for life and thus whipping out a breast is not an option. For some women they lost it to a terrible disease. Just because one wants a right to do something does not mean it should be acted on. Certainly breastfeeding is a natural beautiful gift a mother provides for a child. If someone wants to embrace nakedness there are nudist colonies across the country. Compare a right to smoke ok by me your choice but do not do it in public places it bleeds into non smokers rights. It has nothing to do with a person's personal choice but it is a matter of what represents choices for those ages 0 thru 101 this issue .

Being a woman who supports having equal rights, offending other people and CHILDREN doesn't even begin to put women being top less in public that category of having equal rights. It's ridiculous and shouldn't even be up for debate... Is this type of fight that "feminism" has resorted to?

Fort Collins will lose the respect of many people if this goes through. Whatever happened to modesty and maturity? And what about children who have to see topless women and perverts who will act on their sexual drives and assault more women? This is completely inappropriate and needs to be handled by serious adults who aren't thinking with their genitals. If this goes through it will cause serious problems on so many levels and those in charge will have no one to blame but themselves. Why don't they focus on more important topics and not on the opinions of stupid women that bring up these issues. Thank you for your time. Make good decisions.

Yes men don't wear shirts in public but when was the last time a woman was turned on by a man's nipples? Men and boys alike enjoy looking at breasts and I would never want my 2 young sons to be around top less women. There is a reason for 'topless bars' and that is so men can go look at women's bodys. We don't need what shows in strip clubs to be showing in public. Women are too obsessed with equal rights these days. Well guess what? I am a woman and equal rights is beyond stupid. We are not created equal. We are women, they are men. Be classy not trashy!!

Imagine, walking around Old Town with young children after a CSU football game ends, and find you and your family in a sea of bare breasts. It's inappropriate. At least with TV, movies and Internet, I am able to monitor what my children see. But, suddenly taking a stroll down College, we could be barraged with naked women. The only way to monitor this activity is to avoid it completely. That's bad for business in my opinion. However, breastfeeding mothers should have the option of feeding their children unencumbered. T

I rather wish that males would feel less free to go topless, but that it wouldn't be a crime, or a big deal, for a person of either sex to be topless. I just wish that usually people of either sex would consider it courteous to others to wear shirts. (And, since I'm expressing preferences, not those T- shirts with the sides cut away that I've seen on men, revealing too much for my taste. But I don't regard it as a matter for legislation. Can the city council express it as a wish for citizens to be thoughtful of others?)

Breastfeeding mothers are in a completely different category than anyone being allowed to be publicly indecent. That would change our city for the worse, and sadden me greatly, as I love this community and appreciate that it's now a great place to raise children. I feel very strongly that toplessness should not be allowed in our community. I am a strong and independent woman, and that change will do NOTHING for women's rights causes. Please keep the ordinance as is, not allowing toplessness, except for in cases of women breastfeeding their babies.

I was born and raised in this wonderful city and have watched it change a lot. I am generally very liberal but this would be awful to our city. We have already experienced a lot of change due to a hike in tourism for legal marijuana, and a huge increase in our populations. allowing women to expose their breasts would just be too much change at once for our cute. I have two sons and am trying to raise some good men here. This would totally trash up our city, there is a reason people buy playboy; it's to oogle over women's breasts for sexual purposes- they should not be treated the same as men's! I think allowing this to pass would cause more upset from natives and mothers like me than from the women who are fighting for "equal rights". If these advocates really wanted to fight for equal rights, they would be putting more energy into equal pay, reproductive rights, ect. So again I beg you, please please please don't let this pass!! I love my hometown and this would break my heart!

This makes people feel uncomfortable and puts undue hardship on the majority of society trying to uphold a moral standard. There is also no need to do be topless. What kind of city promotes this kind of behavior? It certainly would change Fort Collins from being a highly sought after place to live for families and the aging population to a place to avoid. So sad we even have to be worried about this for us or our children.

Try explaining it to your children. People who are for this obviously don't care about anyone else around them, and are extremely selfish for wanting to allow the discomfort of most to prove a point that they don't need to wear a shirt in public! This is an outrage!!!

But the solution is not to allow women to bare their breasts in public. The solution is to restrict men from baring their "breasts." Research shows that men get aroused by women's breasts. Some researchers believe this is a process of evolution because men desire to "mate" with a women who can provide for/feed/nurture her children. I would argue that God designed men to be attracted to women's breasts, but either way, it is a measured scientific fact that men are aroused to women's breasts. This doesn't even touch on the fact that young boys will see women's breasts and start to be exposed to soft porn on a daily basis. Studies show that after viewing porn, even non-violent/soft porn, men's attitudes toward women change negatively. Also, our brains learn better when they are sexually aroused. When you add in the focused concentration of seeing soft porn out on the streets in Fort Collins, and reinforcing what's being taught with the reward of sexual climax, it creates the perfect conditions for wiring what porn teaches into the brain. This is researched information from a secular group called "Fight the New Drug." The "drug" this group is fighting is porn, because it has a devastating effect on communities, families, and individuals.

And there are a lot of children and family oriented activities in areas where these women would be the most. We have enough problems protecting ourselves and our children from things on TV. They are losing their innocence too quickly, and topless women would be horrifying. I also question the increase in rapes and inappropriate touching. No one is allowed to whistle or cat call without the possibility of being charged with some crime. How much would that increase and these women calling the police on them? I can't believe it's even being considered.

Let's keep that to the strip joints for the few who want to participate in this behavior. I doubt that those seeking out this behavior are the ones who support most of our downtown businesses, & I have no doubt promoting public nudity will hurt businesses & our city's fine reputation.

I also feel very strongly that for most cultures, it is considered indecent to wa around topless so this regulation should be maintained. Maybe it should just be extended to men as well!

There is a need for modesty in women. As a woman, I choose to cover my body to show respect to others. Allowing public nudity not only takes away my rights by forcing me to be subject to others immodesty, it teaches my children that modesty is not respected by others, when it should be.

This woman, women can get their voyarism kicks in a nudity colony, (which a city is not) or go work in a strip club. There may be a totally new city council if this goes through. Anyone can make a proposal to turn our city into a cesspool of sexually crazed individuals just because a few want to prance around exposing themselves. Indecent exposure is against the law everywhere else in the US, why lower our town to a Las Vegas atmosphere. So, will it be, what goes on in Ft Collins stays in Fort Collins? Are you all nuts for even considering something so ludicrous? Who will want to move here or visit here other than people who want to exploit sexually. This is infuriating how you are wasting time on something of this nature. Don't we have problems that really need fixing instead of creating an atomosphere for rape and exploitation? We already have potcationers, next we can have all the sexually prevented people vacationing and moving here. I have lived here 40 years and I am so disgusted with this I can't even speak. But, I will not be silent.

I am all for equal rights but cannot support this. Unfortunately we live in a society where breasts are still viewed as a sexual part where young males cannot make the destinction on their own. We fully support breast feeding and the health benefits of that but that serves a purpose.

It needs to be considered that this type of exposure goes against some people's religious beliefs. I personally would not feel comfortable having other women walking around my husband every day with their tops off. And I honestly don't understand women who see this as a priority in life to have the ability to do this. I personally feel uncomfortable showing my body because it's mine. I don't want to show every make what I have. My body is for my husband and I only. Call me a prude, but I think if more women respected themselves enough, they wouldn't give so much away in the clothes they choose. I'm Christian and your body is a temple. It shouldn't be shown to everyone because let's face it ladies, they are an object of lust. It's just different than men. Example: men pay to go to strip clubs just to see them. And these women who are fighting that they aren't objects of lust have probably used their bodies in some way as an advantage or to get something at some point in their lives. Whether it was intentional or not. Maybe there should just be a warning system or a small fine as opposed to going to jail. If you want to be naked in your house, great. There are nudist colonies where you can be naked as well. But to subject the general public would put more strain on marriages and relationships. And then are we going to show boobs on tv? Are more issues about body image going to develop with young girls? Are they going to feel pressure to be topless and have the "perfect breasts?" I understand what the movement is trying to express, but sometimes enough is enough. I'm 8 months pregnant and I think it should be legal to breastfeed in public, however, it doesn't bother me to cover myself either to respect others. It's called being an adult and being courteous. People need to grow up and do better things with their time. Women also need to realize if they ask for this type of equality and are deemed it, then every single one of these women should be subject to be drafted into war equally like men. I read what they stand for and why they are doing this on their Facebook page: they don't want to be subjected to judgment and they want to express that their bodies aren't a symbol of lust. Do you think the passing of this law is going to make people not judge you? I'm the most understanding impartial person who doesn't judge anyone, but sorry ladies - you're going to be judged by both men and women. Because it's foolish and a waste of agenda time for real issues like helping the poor.

It opens up a can of worms for a bunch of other things. Let alone. We don't need to expose kids, teens, and possible recovering sex addicts, child, adult sex offenders. Just something to think about in the long run.

What about families with children?!?! Our rights to keep our children sheltered from this? Im a mother of a 6 yr. Old girl i would never allow my child to think its ok to walk around in public topless nor should it be condoned by a state! Expect rape cases to go up and expect fights to happen cause not everyone is ok with this! What about people who are married?!?! How this could ruin someones marriage cause of temptations? Even breastfeeding in public im not ok with. If you need to breast feed go to a bathroom or your car. As a parent i should have a right to decide what my child is exposed to and by granting public nudity you are taking my right away as a parent to raise my child the way i want her raised. All these women who are fighting for this to pass are aruging just to argue and to get attention. Be smart about this and stand up for at least the parents rights to keep their childrens eyes sheltered!

I believe that more people would be uncomfortable allowing toplessness than those who would be comfortable with it, nationwide, as well as in our amazing city. It's not an issue of rights, as it is an issue of morality and protecting women from predators. I appreciate the need to breastfeed in public, but they make SO many clothing items that are simple and convenient to use while in public, many of which are cute and made in beautiful fabrics and designs. There is no reason that women need to expose themselves in public, even to breastfeed. However, if that's the only option to prevent all toplessness, please vote for option 1, or keep the law the way it currently is, to protect women. Thank you for doing your civic duty and I urge you to make the decision that will protect women from predators, and look out for the best interest of all women everywhere in our city, state, and nation with this decision. Thank you,

Topless in public is a risk for not only the woman that does it but increases the risks for others. 2. A woman topless in public is offensive to others. A woman should respect the rights of others, their morals and modesty. 3. Inside a home or behind a tall privacy fence should be anyone's option. Fully clothed or totally nude or anything in between.

It forces other people to have to be put in uncomfortable situations and is appropriate for small children or even the average person that doesn't want to be forced to see a woman topless. I strongly stand with the current policy that Fort Collins holds. Fort Collins is a safe a family friendly environment now and if women were allowed to be topless that would drastically change.

Breast feeding is one thing, I fully support breast feeding. But that is all. As the mom of six impressionable boys and one daughter I hate to think of the conversations about modesty and the woman's body I would be having with them. Women should respect themselves and by so doing not bare it all. Have some dignity, the media has already sexualized women's body enough with our clothes on imagine now if we are topless all the time.

Those who nurse in public do not need to expose their breasts - easy to cover up. And I am not fond of seeing men without shirts walking down the street either. Perhaps the answer would be to allow nobody to go topless in public.

Allowing women to go topless blurs those boundaries. Covering private parts shows children that they are Private.

We need to keep our children protected and teach them respect of themselves and others. Why wasn't an option to make the law equal by requiring men to cover up? If people want to be equal, consider both sides, not just the more liberal, stripped down side (pun intended).

It no longer would be a place that families want to take their kids out because of the nudity that would be seen. People are calling for equality but the problem is, is that women's breasts have been sexualized.

I read one comment that stated that if men can't stop acting like 12 year old boys, it is their problem. Unfortunately, the problem is that there will be actual 12 year old boys who are exposed to this. Nudity is not something to be ashamed of, but it should not be forced upon children.

Women should be allowed to breastfeed in public without being shamed or told to go to the bathroom to feed their child. I would at least expect this to be changed. As far as topless for all, I am indifferent - it is unequal (that men can go topless and women can't) and we should again, in this day and age, be equal.

I don't know of ANYONE who takes their entire top off to breastfeed, myself included. We shouldn't be compared in anyway to this. Second of all, do you really think I want my children going out in public when there are topless women around? Especially in a college town when this will be the new fab. I don't think so. This will be a leading bad example to future generations and will lead to more sexual assaults by far. If I were you I would be more worried about cost of living, traffic and our taxes in a town that is now too big for its own good.

I am adamantly against women going topless in public, even breastfeeding (I did breastfeed all my children, it is not hard to modestly cover up in public). As a parent, a woman and a wife, I am very frustrated that this is even coming before the council, but it seems to be furthering someone's political agenda. I am concerned for children (mine and others) because of this and I am wondering who is going to protect their rights, and keep the pacification of the minority from stealing their innocence.

I also believe that women should leave at least a little for the imagination. Lastly in countries that have nude beaches I doubt they allow women to go around topless but I could be wrong.

Many of those reasons have to do with accidental injury to the breast, such as falling on sharp objects. Many of those reasons had nothing to do with sexuality.

As a parent I also do not want my children to see excessive nudity from others in which I need to explain body parts of another person. My 2 year old knows the difference of someone with clothes on or off. It will make older folks uncomfortable as well as it can deter visitors. I think by doing this is disrespectful to the female body and people should learn more modesty rather than allowing them to go nude.

Families will not be able to enjoy outings because the threat of being visually assaulted by indecent women; good men will find it even harder to shield their eyes from temptation; reckless men with will roam the streets looking for topless women, inflaming sexual desires which could lead to assaults against women. This will not bring equality to women; it will actually take away respect for women. There is no sound reason for a woman to go topless in public and many sound reasons it should not be allowed. Please do not vote to allow the few exhibitionists who want to expose themselves for a perverted thrill to ruin the reason that many people have chosen to settle here in Fort Collins. Thank you.

Fort Collins is special because of how family friendly it is, please do not allow a small group of the population ruin that for everyone else.

And not only my sons but my husband and I would absolutely not want to walk around Fort Collins and see that I already feel embarrassed and uncomfortable by how many women almost are topless. I think even nursing women should cover themselves as much as they can. I am still in shock that this is being considered. What kind of city do we want Fort Collins to be known as? If you think this will draw people into this city think again as it will also take people away.

Our culture and society is going downhill big time. Women will just be even more sexualized and objectified than they already are. It will cause a lot of body issues with women who are not comfortable with themselves seeing others who have "better" bodies than them. People need to have self respect and values. This is going too far. With the exception of breastfeeding. Mothers should be able to expose themselves because breasts were designed by nature to feed a child. Not for men to be able to stare at constantly.

It is morally wrong. The voice of a small minority, no matter how loud, should not be heeded. Whether of popular opinion or not, women's breasts, when not used for nourishing a child, are private, sexual parts of the body and should be covered. I will support ideologically and financially any group that opposes this action, including any group that takes legal action should this ordinance to allow nudity be passed.

It's nudity. And it's offensive. For the last century no one has ever had a problem with keeping women's breasts private. All the sudden some feminist decides that she doesn't like wearing shirts and she has a wide range of people following her. It's pathetic.

We moved to Fort Collins 10 years ago because of the wonderful quality of life. However, in light of the recent legalization of marihuana and now this,brad is reconsidering our retirement here in Fort Collins. If this nonsense continues we will take our hefty tax dollars elsewhere as the type of people these laws or ordinances attract are usually those who contribute little to our community. Enough is enough!

How am I going to explain this type of improper nudity to my four year old daughter. The fact that the city council is even considering this topic is concerning. This isn't good publicity for our city from a tourism, college recruiting, business, and values standpoint. Don't let a few crazy "kids" tarnish the reputation and values in our community. Stand up for the families! Do the right thing Fort Collins City Council.

Would this apply to those over 18?? Or would 15 or 16 year old girls also be allowed to walk around topless? I understand the premise upon which the ordinance is challenged but feel breasts have been so sexualized in our culture that it will be difficult to police, if enacted.

Our state is getting worse by the minute! Am a native and considering moving to a state with morals as this one is running very short on them in the last 10 years. The Bible says that in the last days before Christ's return it will be like Sodom and Gomora. Why does this state have to lead the country in everything wrong?

You really want 10 yrs olds and teenagers walking around topless? It's already a crime to be sexting... why make it ok to be topless. I think it's inmature... and this has nothing to do with being equal either... Man are different then women that's just how it is. To make us equal will never happen!

This is a college town and we have enough problems already! Even breastfeeding mothers should have the intelligence and decency to place a light blanket over their breasts while breast feeding. That is just simple common sense! Breastfeeding and toplessness are two different issues. One is nature/feeding while the other is the desire of a certain group of young women wishing to push their agenda of "equality". STOP the foolishness!!!! Thank you!

I have 3 kids that I will not raise in a city where women can walk around topless. I feel like the attacks on women will go up as well as teenage pregnancies. I think this is a horrible idea. I love living in fort Collins. I know as a female electrician there are so many other ways to be "equal" to man. I work my butt of every day to make sure that my kids know that I, their mom, and the one who takes care of them. I am mom and dad. I am as equal as I need to be. If anything, you should make the men wear shirts unless they are at the pool or gym.

Most women who breastfeed use adequate coverage. Our family and 1/2 of our neighborhood along with many many families from the Catholic Churches will leave Fort Collins and not return if the city allows this ordinance to pass. Topless is not acceptable as it teaches NO RESPECT for yourself to our children. For the future generations it needs to be left alone.

If the people advocating for women to be allowed to go topless seriously consider this an issue of equality, please consider mandating that men keep their shirts on in public. Why should this be treated as an all-or-nothing solution? If there is enough desire to go topless, create topless zones. People who don't want to see it can avoid those zones and those who aren't satisfied going topless in the privacy of their own home/property have a place they can go bare. As a side note, why in the world is breastfeeding even connected to this topic? Breastfeeding is NOT nudity. Nudity is not an acceptable option in public spaces; if individual businesses choose to allow toplessness, fine. As a city, however, this is a standard that shouldn't even be getting serious consideration from City Counsel. Ridiculous.

I however have a different stand point. As a 19 year old female who is very body positive I would never allow myself to walk into public topless. It invites unwanted attention and honestly does create distractions. I can barely stand when women's cleavage is in my face, imagine how people would feel if there was topless women waltzing around. There are very distinct differences between men and women, and breasts happen to be a major one. In some cases, yes I'd prefer if men did wear shirts, but it should be required that women do cover up. I do feel the exception for breastfeeding should be allowed however because it's the nourishment that Mother Nature intended for infants. As stated before, I am only a 19 year old female, and these views and opinions do benefit me, but this town is my everything. I only hope that my concerns help a little in the decision at hand and potentially will influence someone else's opinion as well.

We're also giving our state a bad name by legalizing pot (except medically) and now nudity! I don't want to go around town with a bunch of half naked woman.... I don't want my daughter to see that. A breastfeeding mother is using her breast for what is intended and the woman I know that nurse are very discreet even if they don't use a cover. Walking around top less is just trying to get attention and they just want to be like men. When the hell are these feminists going to realize that woman are not men! There are certain things we can't do and certain things honestly that we shouldn't do! Such as walk around topless! You will ruin fort collins if you allow woman to wall around topless.....

Is this what we want our city to be known for? Parents have the right to decide how much of the female body they wish their children to see and when. Truthfully, most men that go topless are running. Unless they are in remarkable shape, they too look better with a shirt on! Aren't there hosts of more important topics to deal with than a small group of women who want to be exhibitionists?

If the city legalized toplessness will the new title of Fort Collins be "perversity'? Our police officers work hard and I am certain this policy change will increase sexual assaults that could have been prevented by keeping a shirt on. Please use common sense and do not consider this proposed policy change.

I believe in the saying in Kenney Chesney song..No shoes, No shirt, No service! Personally when I am shopping downtown I don't want to see men shirtless either. You as representatives of our "voice" in Fort Collins should have some morals and values regarding this topic and understand that if you modify the ordinance you will be condemning the Downtown that you are trying to revitalize , to death! Families will no longer feel "welcome" downtown because women top less is not a sight I would want my children to see! Personally, I am sick of seeing this young lady on the news every single morning! If smoking was banned because it's offensive to others..then top less women downtown rates right up there only it falls into the moral decency category vs health risks! Please , please continue to follow some path of decency and morality and continue to keep Fort Collins a desirable place to live. Thank you very much for your hard work!

Womens breast can secrete fluid. And I'm not talking about breath milk. This fluid can be clear, yellow, brown, may even have blood in it. I feel sick even thinking about someone's breast fluid getting on one of my kids or myself, say, while being at a park. You don't have to or have had been pregnant for this to occur. I really hope that this isn't passed. It's gross.

Seeing people stare at another women. While she is topless can cause triggers for those of us suffering from PTSD. Not to blame or put it against women. Who have the confidence to go topless, I just don't think the world we are in right this moment is ready for that.

People come to Colorado because of its beauty and culture, allowing women to be topless in public would take away from that and give Fort Collins a bad image.

When a women is breastfeeding they are not revealing anything except for when they are latching and unlatching for a brief moment. Feeding your baby is a normal and natural process. I would perfer my children to not see people (male or female) walking around with no shirt on.

I am constantly telling my boys to be cautious of what they put in their eyes. I feel introducing this behavior in public will not only send the wrong messages to our youth about sexuality, and promiscuity. We need to allow our children to hold on to their innocents as long as we can. Having it out in everyone's face would be a mistake. I can't believe this policy change is even being considered. If this issue is about equality then have the men cover up on top as well as the women. Women and Men are equal but they are not exactly the same. As a woman I feel completely equal to Men and covering up my top half doesn't change that at all. Why aren't we focusing on more important issues instead?

Anywhere or anytime. If their baby is hungry then by all means grab a seat, whip out a boob and feed your baby. But, I agree that because of the sexual objectification that have been put on women's breasts in our culture that it would not be the best decision to walk around town topless as a woman. And due to religious and family matters not everyone would be comfortable with exposing their children or even their own eyes to partially nude women. With my own child I wouldn't care much, I am trying to bring him up to believe that breasts are for feeding babies and that they aren't something to be seen as only sexual. But that being said, people tend to only look at breasts as a sexual part of a woman's body and that is what makes it inappropriate for woman to go around topless. I feel that changing the ordinance would just cause more harm than good and would start to separate out community. I understand that women want complete equality but in this day and age and the way that our culture works as Americans I just can't see many people finding it acceptable to allow partial nudity in public whether that be for men or women

If a man can go to jail for exposing himself, why would it be ok for a woman to expose herself simply because it's from the waist up? It's still nudity. Why would it be ok for children (or adults) to be exposed to this on the street or in a store? Will a store owner or restaurant be forced to allow this even if they don't agree with the ordinance? What stops young girls from going topless in school or on the college campus? Think about the consequences because they will be extensive.

I would not want to live here anymore if that happens. We tell kids that their privates are areas covered by a swimsuit so essentially we would be setting the example for kids that it's ok for girls to be seen and touched on their breasts probably allowing for more sexual assaults to occur or go unreported by kids. It's inappropriate.

I don't have a problem w women being topless in a park per se, but I am not behind the logic that just because men can, women should be able to as well. I don't care how you slice it, MEN AND WOMEN ARE DIFFERENT biologically and no matter how many ordinances are passed, it's not gonna change that fact. I have never once in my life felt suppressed because I have to cover my breasts in public. These women need to wake up and realize this is a privileged problem to be having and maybe focus their efforts in helping those who really ARE being oppressed!

This is not about equality, this is about power and bullying. I should not be forced to parent my children differently because a few women choose to be treated as "equal" to men. Newsflash, men and women are inherently different, including body parts that should be covered. A man's chest is not equal to a woman's, hence the "inequality" in the ordinance (and it should stay that way).

That's what private, topless bars are for, as well as people's own homes. That's what porn sites are for, as well as other websites that are adult in nature. I want to have the freedom to guide my children's development about their bodies in a healthy, safe environment - not when we're going to dinner or shopping. Breast feeding? Absolutely. Topless just for the heck of it? No, it infringes on my rights in a public place. Make a special topless park or topless restaurant or topless bowling alley. But make it private. I don't let my children view topless women on the computer or anywhere else. (When they become adults, they can make that choice for themselves.) Please don't undermine my rights for the sake of being "tolerant" or "progressive." All that will show is a lack of leadership, backbone, and caving to the verbal minority when passing laws and regulations. There is a time and a place for being topless. And it's NOT in public. Ever.

I'm pretty liberal but how about we just make nudity above the waist illegal for adults? I couldn't live here if we explored nudity. It's not anywhere near world class and would certainly move Fort Collins out of that class and into one in which we were a nationwide joke. Come on, let's all grow up a bit!

Modesty is for a reason Psychologically men are arouzed by the female body, women are not. That has been proven over and over again. Modesty is also a protection both for females and males Where is this leading? With no standards of any kind our country will be destroyed . We have been the most successful country on earth with unbelievable opportunity for all. There have factors at work for 50+ years trying to destroy us in the names of fairness and political correctness.It must stop. Truth is truth even if it offends you.

I do not feel that it would be respectful to everyone who does not want to see this. If anything this women can move to where it is legal to go topless or work in a strip club but don't subject everyone to her wants and wishes of being topless. There would also be more sexual harassment charges and perhaps even rape.

I believe women should be able to breastfeed in public. From 1987-1992 I nursed 3 children. A woman should try to maintain modesty which is not always easy or possible. The majority of people passing by know what the woman is doing. So don't look if it offends you. This is entirely different than going topless. Women in America are able to wear tops that barely cover their bosom's. I do not want to see woman's breasts hanging out. We already have to put up with those who go without a bar and flail all over.

I think allowing women to go topless. will completely change these things into something that families will avoid. And it will change our family friendly town. How many families with kids who play soccer or football will want to go to city park (or any park)for games while there are women laying topless near the fields? Breastfeeding is different and should be allowed anywhere. As I women I don't feel like I'm being discriminated against because I can't take my shirt off in public. And I don't think the majority of us do? Please don't pass something that could change the good things about our town because a few are complaining.

When male breasts "develop" at puberty, can breastfeed babies, get breast cancer at the rate of women (the ribbon is pink for a reason) and need supportive garments, then we can talk about "equality." Until that time, male chests and female chests are different and because of this fact they should be treated differently. As for breastfeeding, I breastfed each of my three children for at least a year. I think mothers should be able to breastfeed in public but should do so discreetly. It is very possible and easy breastfeed without flashing the general public not to mention letting it all hang out.

Our society has sexualized women's breasts in a way that men's chests are not. It would be indecent exposure and harmful to children for women to go around topless in the city anywhere they wanted. This where a line needs to be drawn because it would be offensive to me and the children in our family. In this country one of the challenges we face is where do yor rights stop and mine begin. This would be open g up a Pandora's box just as the majuana has. For example is it okay for two people in public (where one of the two is a topless female) to be fondling each other? It would also be a health & safety hazard to have someone in a restaurant to be at a table of food and beverages both hot and cold. I would not like to try on clothes after someone who was topless had done so. I would also think it would be a safety hazard to fill up at a gas station-wearing a seat belt in a car-sitting in a chair in a movie theatre after someone- the list goes on. What about the workplace, schools, and our parks. I feel that it is not something that should not even be put on a ballot. I AM OPPOSED

I have young children and I do not want them to be exposed to women walking around topless; I don't want to be exposed to it, or my husband! If public nudity is allowed in this way, I feel like it would be nothing more than live pornography (which is already a huge problem in our world). I do not find either topless men or topless women *offensive*. However, there are plenty of times I've found topless men very unattractive. I would expect, if topless women were allowed in public, there will probably be plenty of times I will find it very unattractive. This should not have gotten this far. There are some things that just can't/shouldn't be equal between men and women, this is one of them. Please don't play into the hands of those that have nothing better to do with their time, if they want to fight for a cause they should fight for something that will really make a difference in the lives of others.

It is resonable to expect breast feeding woman to cover up while breast feeding in public. I shouldn't have to answer questions of my young children when I am in the grocery store, park or a restaurant. I breast fed both of my children and was capable of doing so in public without exposing my breast to anyone. This is ridiculous that our city is even taking the time to contemplate such a change.

If our city officials don't know the difference, this is already a doomed issue. Providing naturally for an infant and a drunken half-naked college girl shouldn't be in the same debate...ever. Admittedly, I'm baffled, with all the issues our city is facing, such as increased gang activity, as to why this has become such an urgent and important ordinance for Fort Collins. With increasing issues with Old Town nightlife and the number of alcohol related activities sponsored by the city, this is not well thought out. We should be focusing on creating more opportunities for local families, not excluding them further. Give mothers the courtesy and respect they deserve, as that is about care, health & motherhood, but, please leave the 'girls gone wild' to less dignified communities.

The public community should be a place where anyone with diverse backgrounds can feel comfortable spending time. In the same way there is resistance for children to be exposed to uncensored nudity on TV during the day, there should be resistance to exposing them to public nudity, especially in a college community that already brings challenges to maintaining a family-friendly environment.

It is not asking too much to wear a sports bra on a hot day. I do understand the challenges breastfeeding mom's make and believe supporting this is okay. However, I have small children who I feel do not need to around an environment where women are just walking around town half naked. It would greatly deter us from taking part of the activities Fort Collins offers if this were to pass. I also fear this would lead to issues of sexual harrassment and possible assult issues - I don't see how this wouldn't happen. I just do not believe this to be a good idea.

If the majority of women did not think breasts were mostly used as sexual objects, then they wouldn't be using every push up bra, padded bra, breast implants etc to show them off and try to attract the attention of someone else. Also, if breast were no big deal, then there would be no "big deal" if a woman had to have a mastectomy.

Most breastfeeding moms are very discreet and are not out to flash themselves to begin with. This notion of women going topless is just dumb. Bad, good or indifferent, the reality is - a woman's chest is viewed as a sexual item in this society. As such, a woman's chest should be placed pretty much in the same category as the other sexual body parts. People may not like this, but it is reality. I have worked with men most of my life and I know how they think. Also, and probably most important of all - why is the city wasting it's time even looking at this subject. There are so many far more important issues in this city that need to be addressed and brought out in the open. The hidden poverty that exists here is a very real problem. The inflated housing costs here, also a very real problem. The fact that wages don't come close to the cost of living here, again, a very real problem. The city needs to stop wasting time on frivolous things such as this topless issue. It's just someone trying to stir the pot and take time from other truly important issues which should be given priority in this city.

We never needed to go topless in order to feed our babies. What percentage of the population are you really trying to cater to here when most people don't even know about this? It's ridiculous that it's even a consideration. Is there really nothing more important to change or worry about than this? If it continues, this will be acity that most of us don't want to live in anymore.

They shouldn't see displays of nudity on a daily basis. This is an adult choice that shouldn't impact kids. If we chose to live in a nudist colony then we as a family are making the choice to live with daily displays of nudity. I don't feel that others choices should so drastically impact everyone. It needs to be limited to just breastfeeding since most mothers are considerate about their surroundings. If women want the right to be topless every day then they should live in a nudist colony, not a regular community.

I know of many other families that will do the same! We have enjoyed the years we have spent here raising a family. I've always enjoyed the community of acceptance and tolerance that Fort Collins stands for, but this is pushing the limits of specializing our children and young adults who have not been otherwise raised to deal with. It would be very confusing and detrimental to them. It would be different if this was apart of our society all along, but breasts (scientifically and visually) are viewed sexual in our society! We can't expect that to change overnight with this ordinance. It's disgusting!

How many other cities or towns have a policy for women to be topless? Women are pushing this too far. Since the breasts are considered part of the sexual experience and men's are not, there can not be fairness in their dress! Otherwise maybe we should just consider everyone could just go nude if they desire. That is the next step! Again, council is stupid to even consider such a proposal!!!!

If women are allowed to go topless, who will protect them in Public?? *This issue goes far beyond whether the standard of clothing is fair or not. Who can honestly guarantee that women will be safe in their daily lives, if you change this law!!!!! As we all know, Nudity can have strong effects on certain groups in society, even adults. And how will nudity in public effect other age groups such as teenagers and children and men who stalk and attack women. If changing this law to allow women to go topless, allows even one more woman to be attacked and raped, HOW CAN WE THINK THIS IS THE RIGHT THING TO DO? WE VOTE NO.

If that means seeing an occasional nipple...by all means. It isn't like they're doing it to tease or flaunt. The fact that this is such an issue is a pathetic way to waste citizen's time.

But in this society as a whole, womens breasts are mainly seen as a sexual object, and men's are not. I think allowing this would invite trouble, both for the women themselves, and women as a whole, as it would "make it ok" in a sense for women to be touched there without criminal repercussions, even if it was invited behavior, leading way to more assaults on women and for the community in that many many people, especially families with small children would no longer feel comfortable being in the town. I also think that it would cause the town to become overun with "crazy college kids" causing trouble. I think that women breast feeding should be allowed however, as long as they are being discreate about it.

It is insane to cater to the lowest common denominator, and make the entire city unfriendly to families. Consider this, how many family vacation plans would be changed, with tourists choosing to take their money elsewhere, if this ordinance was changed to allow women to go topless in public? I certainly would not be taking my family to any location where public nudity was allowed and practiced. I, myself, do not want to go or to shop where I may see this indecency at any or every turn. I may have to start shopping in Timnath and Loveland, if this ordinance is passed. I certainly would not be shopping downtown anymore.

This is a disturbing action that children will see and women will take advantage of with inappropriate behavior. If anything, men need to cover up too.

The way the world is now there are better subjects to be addressed such as poverty.medical insurance,college funds etc if women want to go around showing their breast you have that right already or work topless that's why there's topless bars for . I believe it would increase rapes, burglaries, and deaths!!!! My god, what is going on in the minds of people these days?? We legalize pot, because they couldn't controll it, so let's profit off of it???!!!! What is this really about? Women have breast feed their babies since time began, get a blanket cover up feed your baby! You don't need to show everyone, Is this about showing it out in public? I had SIX!! And yes they were breast feed!!! It's getting out of control!

The human body is a beautiful thing, but there is an extent of professionalism that needs to take place while in a public area. One needs to consider some may be offended at the sight of a topless woman. Women should have self-respect in public. It is also a sign of being professional, as appropriate attire should be worn in any professional setting (ie anywhere within the workforce, education system, etc). So, what is the difference between the workforce settings and a setting in which many strangers would see the breasts of a woman (ie the side of a street)? And, if females do not wish to respect themselves, they ought to respect others in their feelings and thoughts towards seeing women's breasts. Also, it could be considered sexual harassment for women to be topless in front of several strangers. As a 17-year-old female, I do not wish to be exposed to other nude women along the side of the street or through downtown Fort Collins. It would cause me to feel very uncomfortable, despite the fact I am a young woman and have the same body parts. I also would feel uncomfortable with many men seeing women's breasts, because women in today's society are very sexualized, and I think that culturally people will not understand and view the breasts of a woman as just a part of the human body. That, however is my personal opinion, yet it is something I would like to be considered. Thank you

We don't expose our genitals for the same reason. Passing this will greatly reduce of the use of Boyd Lake, Horsetooth Reservoir, and Old Town. Do you really want the subsequent loss of revenue? I, like many, will not frequent any place where women are topless when I am with my children, spouse or even alone! Next, we will have an artist like the one in NYC painting breasts. Do you really want to keep doing down this path? Right is right and wrong leads to greater wrongs!

The fact that women being topless brings forth feelings in some individuals that could create unsafe reactions for others is reason enough to not allow it. These feelings do not seem to occur when a women is breastfeeding. But violent predators will come to our community if the full ordinance is passed!

I canâ €™t even imagine their shock and quite frankly bit of revulsion if they were to see topless women walking around. We simply would no longer visit old town, especially with out-of-town guests. The great thing about America is all the freedoms we have, but we also have to be cognitive that our freedoms should not infringe upon other individuals freedoms. Fort Collins is a wonderful melting pot of diversity in culture and religion, I think we have to remember while one woman or small group of woman Are demanding this, the city is bigger that an one person wants or silly demands.

All for the breastfeeding part, but the feminist hippy thing, not so much.

I can't believe this is even a question (allowing mothers to breastfeed in public - that is a right). 3rd option: If equality is the question, how about no one goes topless? And last comment: Don't you have something more important to work on City Council??? Gees

We want our children to have respect for themselves & others as should all people. People think that nursing mothers are disrespectful for feeding their children in public, what does this tell you, is it all right to expose yourselves no matter what? What about women & children who are being sexually sought by predators all the time, this only encourages the predators. Wake up people, have respect for yourselves & others!! From a woman who grew up in & around the Ft. Collins area

Even breastfeeding women do not need to be topless to effectively feed their babies. There is such a thing as appropriate modesty and I hope our city council will make our city a safe place to raise our families.

Even breastfeeding moms should keep some coverage while feeding their babies (I nursed all 3 of my children for over a year each, in public, without exposing myself!)!! The only change I would make to the existing ordinance is changing the age from 10 to 4 years old for below the waist public nudity... 5 and up are school age and should be able to keep their clothes on! (4yo allows for those difficult to potty train kids) If this ordinance allows women to be topless in public you will destroy our beautiful city even further... we already have too many from the fringes of society coming here for marijuana and such. I want to be able to walk around town (with or without my children) without seeing some woman's breasts hanging out!! Disgusting! Have we lost all sense of decency!?!

On the contrary, I think the more that is shown, the more sexual behavior is encouraged; i.e. if you dress like a slut, you will be treated liked one. Also, as a mom with young boys, I am strongly opposed to this ordinance, because it is absolutely inappropriate for children to be exposed to female frontal nudity, and I should have at least be able to protect my children from it and expect we could venture out in public safely. I deserve, as a parent, the right to protect my children. This ordinance leaves no consideration for children or other men or women who feel uncomfortable seeing nudity.

In fact, I think it a very bad idea. It was bad enough seeing a picture on the front page of the paper for the ONE woman who thought she and others ought to be allowed to do this. Can you imagine women bent over riding bikes with boobs a-swinging? Really! You think texting causes a lot of wrecks! This is just asking for trouble and it lowers the respectability of women.

I don't want my children to be exposed to nudity nor do I think any child should be! Toplessness is nudity. These so called 'feminists' just like to have something to fight against. Feminism is about empowering women, not about going topless. If they want to run around topless, they can go to a topless bar, a nudist colony or one of those nudey resorts in Florida. On the streets in public, in front of families, elderly, and all people who don't want to see nudity is not the place to be showing your boobs around. I am horrified that this is even a topic up for serious discussion!

The whole issue should be avoided. No public topless allowed within the city limits. If it is approved, I will not support any elected officials that votes for this issue.

This is completely ridiculous. Women should NOT be topless in public. We need some basic public decency.I have three sons and I do not wish for them to view topless women in our town. Women who are breastfeeding are an absolute exception, but most women will at least cover up to the best of their ability while nursing. Do not allow this Fort Collins.

This causes women to become increasingly more like an object & men to become even more desensitized towards the value & esteem women should be seen & held in. It will also corrupt young children by exposing them to inappropriate things, that opens the doors to further exploration into pornography, etc. Keep our community clean! Keep our rights to enjoy fort collins as a FAMILY safe & protected from those trying to corrupt everything that is beautiful. It is not about freedom & beauty of the body. It is about pushing the limits & sexual corruption.

I wholeheartedly agree that nursing mothers have a reason to be bare chested, however I cannot think of another situation in which that would be necessary. The over sexualization of women is all over the media and internet, please don't allow this in our community.

This can be done modestly and publicly at the same time. Please, don't encourage women to flaunt their bodies in front of my children and others with a new law. The female breast has been sexualized for centuries, and it will take more than this law to end it. Even if Fort Collins passes this law, the media will still sexualize breasts and the female body overall. I think women going topless could cause more violence towards women and I would like to continue feeling safe walking, biking, and enjoying the city of Fort Collins.

Research has shown, over time, that it is more difficult for men to accept a no. Especially when men get turned on and get turned away. A research in Germany has shown that Peepshows increase the number of sexually excited men who then look for an outlet. A law, against Peepshows, was put in place and the numbers of rapes went down drastically. Allowing women to go top less puplicly is nothing but a free for all Peepshow. Breastfeeding serves a purpose and it has been done since the dawn of time. It is respectable to take care of one's child, public nudity, not so much.

Period. I am appalled that this topic is even being discussed. Has anyone ever thought of changing the current policy to state both men and women should not be able to go topless.(then you have your equality that everyone is so worried about) This town is becoming more and more liberal and is encouraging families to move out of to Fort Collins. There is a time and place for women to take off their tops, and that place is not in public.

If we want to extend protection and dignity to the females and men of all ages in our community, it will best be done with clothes on. Our computers and iPhones offer plenty of unwanted sexual "pop ups" - please keep the streets and parks in our community a place where we don't have to turn our eyes and the eyes of our children away from unwanted exposure to nudity. Thank you. Barb Myers

I do not want me and my family (children ranging from 17 to 4, all boys) down town eating dinner and my children seeing a female walking around with her top off. Are we going to have any boundaries as a society? What would you like me to tell my sons after they see a female naked? How are we suppose to teach privacy, respect for others privacy, and dignity when women's breasts are right in my children's face. There are men that have no self control and letting women walk around topless WILL causes more issues than the top less female ever wanted. The women that want to be topless in public aren't thinking of these types of consequences. Please please do not pass this! Let our children be innocent children for as long as they can!!! It's hard enough keeping them innocent in the world that we already live in. Also, protect these women that think they want to walk around with her top off in public. It is in place for a reason. Has anyone considered that allowing a 10, 12, 13 yr old girl run around with no top on might bring out the pedophiles. I for one would not want people allowing there daughter to walk around for people stare at and take the risk of a sicko looking at them and risk something happening. Whatever happened to modesty. The fact that this subject is being looked at as an option is appalling. Cover up girls, leave something to the imagination.

As a mother of a young boy, I would hate to have to limit our entertainment, social and educational options in Fort Collins for fear of some lady walking around bearing her breasts because she can and city ordinance saying it's "okay". What purpose does this serve? I don't see any logical reason to allow this to happen. Just because a small minority thinks this is okay doesn't mean our entire city needs to placate them by changing our bylaws. If they feel so strongly nothing says they have to live here, they can feel free to move somewhere else where that type of behavior is already allowed.

Is it currently illegal to breastfeed in public? The objective of breastfeeding is not to expose oneself, but to feed someone. Women who breastfeed are, for the most part, discreet. I would venture to say that the current law does not need to be changed at all. Quite clearly, a woman going topless in public is radically different than a man being topless in public. A woman's breasts are part of her sexuality. A man's chest is not strictly speaking part of his sexuality. We would be very alarmed if men wanted to wander around pantless, would we not? It is ridiculous that this is even something the city council is willing to consider. What a disservice to children especially and the public in general.

Breastfeeding should not be a free ticket to go topless however. I really don't want to see our city turn into a place where I don't feel comfortable taking my kids out in public because of naked people running around. Let's be reasonable here. Don't let a small handful of loud activists speak for or decide for the rest of us!! These 'women' DO NOT speak for me and my rights as a woman. As a woman and a mother I should have the right to take my kids around town and not have them seeing other peoples junk.

We live in a family friendly town - one which our town has worked hard to develop by investing so much in our schools, parks, and libraries. This is a move in the complete opposite direction. Being a mom of four myself, I believe in the exception for breastfeeding mothers, but this is not the place for women to be able to be topless in public. I believe that this ordinance will lower the appeal of our community for women and families.

This is a civilized society, and a civilized CITY! Have we not been embarrassed enough by our ridiculous legalization of marijuana and the fact we are using the money to fund our children's SCHOOLS of all things? What is this place coming to? I'm no prude, but for Pete's sake, do we have ANY semblance of a moral compass left as a community? This is a FAMILY-friendly town. It always has been, and I assume it wants to continue to be. I'm sick of this sudden penchant towards wanting us to be the first in the country to roll out new "insanity" laws. First pot, now nudity? Are you kidding me? NO. I grew up here, recently moved back here from years in Los Angeles, and I tell EVERYONE--I mean EVERYONE--how this is THE BEST PLACE in the world to live. Literally. But lately, I have to be honest--this city is pushing me. If this public nudity thing were to pass (I can't even imagine), I wouldn't only be upset, I would be embarrassed to live here. And frankly, I would start looking for somewhere else to live. This is ENOUGH. Just because we have some people around here who want to whine about every little thing--that doesn't mean that Fort Collins has to entertain their wishes. IT'S OK TO HAVE SOME RULES AND REGULATIONS in this city, for crying out loud. I DO NOT WANT TO SEE WOMEN WALKING AROUND TOPLESS. I already don't care to see most MEN walking around topless. As it is, there are too many people who already wear too little or too tight or otherwise ill-fitting clothing for their out-of-shape physiques. If you're not going to take care of yourself, then don't be putting all your wobbly bits out on display. NOBODY WANTS TO SEE IT, I don't care what your age or gender are. Have some respect. I mean, first it's tops...then what? PANTS? NO. We wear shoes in public, we wear pants in public, and we wear TOPS in public. Period. And if someone is seriously upset by this reality of modern life, then they need to go live somewhere else, or spend their vacation time at a nudist colony/resort with other people who have their same need to be an exhibitionist. That's what those places are for. I'm tired of people feeling entitled to shove their proclivities, fetishes, addictions and vices on EVERYBODY ELSE. Come ON. Have some respect, people. You, too, Fort Collins. Stop even riling up our citizens with issues like this. IT'S RIDICULOUS. And you're going to literally LOSE residents and visitors if you keep this up. We have had it with this nonsense.

But the freedom for women to go topless is beyond imaginable. Say goodbye to families of this becomes the "new Ft Collins". Consider who supports the city and helps maintain a welcoming,clean feel. #toplessreally?

It could cause more women to be vulnerable to sexual predators and gives the wrong impression to young girls and women that it is okay to expose yourself and not keep yourself modest. One example would be that men are more visual and it could lead to bigger problems such as rape or divorce.

Allowing women to be topless will only further define this city as a city of college age students and nothing more. I do not want to see women topless, my husband does not want to, and I want to raise my children to respect modesty, and to to respect women (NOT look at their bodies as meat). This will inevitably happen, because no matter how much women want their bodies to not turn the eyes of men, it is in human nature. Men are forced to wear clothes in stores (no shirt, no shoes, no service still exists in the majority of stores), are women expecting that they will be able to skirt around this rule? Where are they going to hang out topless? In Old Town? For an hour and a half? They cannot enter a store, it is truly pointless. We have bigger issues to be fighting than whether or not we can be topless outside.

It is well known that this type of exposure is erotic in nature and could be a factor in causing an unstable individual to be more inclined to act in this manner. It is also evident that exposing young adolescent males and pre-adolescent boys to this type of nudity impacts their sexual development making them more incline to objectify women. Responsible parents have no desire to be forced to have conversations about nudity and sexuality before their children are emotionally mature enough to process the information.

The community should do all it can to encourage mothers to breastfeed, and there is nothing sexual about breastfeeding. As for option 2 - I neither support not oppose it. I don't care if women want to be topless in public. Doesn't seem like that big of deal.

The female breast is one of those cues. I don't even want to think about the ramifications of a change in our ordinance. Fort Collins is a family-oriented city. Colorado is already the butt of many jokes with regard to marijuana. Fort Collins doesn't need the sort of publicity that toplessness would bring, and we certainly don't need the kind of "tourism" that nudity would bring. We would also lose much of our tourism trade because families would travel elsewhere. The trade-off isn't worthwhile. The woman who bared her breasts to raise "awareness" of the inequality of our ordinances supposedly wanted to be cool in summer. She's got it all wrong. In many of the hottest climates of the world (Northern Africa, the Indian subcontinent), people have worn loose clothing of natural fibers (caftans, salwar and kameez, robes) to stay cool. In addition, in areas of the developed world where people are less prudish about nudity (Europe), women don't walk around topless in public. As far as breast-feeding goes, we still should require some modesty. I managed. So can the rest of womanhood. But neither should we chastise a breast-feeding woman whose cover slips. It can happen, and it isn't the end of the world.

I have had to sit in far too many bathroom stalls. I still don't know if I would feel comfortable breastfeeding in public but I feel like that is a right that makes sense and adds value to a large demographic. Being topless just to be topless does not add any benefit to the city of Fort Collins. I hope you strongly consider the ramifications if that route is taken.

It is disturbing on many levels. Breastfeeding mothers should definately be able to feed their babies wherever they need to without any problem. Women walking around top less in a community of families is just indecent and demeaning to women. Laws and ordinances supporting modesty, should be upheld and uncorrupted.

Now Fort Collins is considering this issue? We are losing our culture that made us who we are, and made us one of the most desirable states for residency. Looking at the big picture, between legal marajuana and adding topless women in public, our population might soar....but will it be the type of people we really want? It's not discrimination to keep women from going topless, it' s just good sense and common decency.

Since when did breastfeeding become taboo?! I believe a women should have the right to feed her child the way God or whatever entity you believe in intended. However, feminist and nudist are taking this too far. I will be very ashamed of my home town if they allow this public nudity ordinance pass. My grandparents, parents and my sister and I are natives to Fort Collins and it's sad that we do not feel at home anymore.

With the exception of breastfeeding, topless women is not an option for the streets and stores of fort Collins. Why? Because of the young men and women who are also walking around. Just because you are able to see something, doesn't mean it is in the best interest of anyone to see it. I believe our culture already makes it hard for young and old minds alike to think of things that aren't related to sex, and this will not help in the least. Would you rather have a nice walk with your husband in a beautiful old town, or would you rather have him staring skywards, trying to honor you by keeping his eyes away from a topless girl, and having the image burned into his mind. I would like to make the streets a place where a man or woman can walk the streets and enjoy themselves, and not have to work overtime to see the beauty that is around them, and not lasered in to a few women who choose to go topless. Yes, you can look away if you like it, but I think it would benefit the current and future generations to keep tops for females mandatory. Have a wonderful day.

We are currently in another country, but plan to permanently reside in the Ft. Collins area for raising our children. As much as I know I cannot shelter them, I do not want my children seeing women's/men's nude bodies. There is a time and a place to be naked. Ex: appropriate clothing for swimming. It's not in public. Having lived in another country where going topless is more accepted, I have become accustomed to that culture. Do I like it? No. It still makes me uncomfortable and sorry for those women. I pray with all my heart that this ordinance does not go thru. Thank you!

Women and men have different bodies, meaning, our sexual organs have different locations. Women wear clothing to cover their breasts because they are considered a sex organ. By giving into women going topless, we are allowing the objectification of women to continue. There is a reason we haven't made this change and it should never change. Women should have more gumption and stand for being conservative if they want to be viewed as equals. Fighting to go topless is not the way for women to gain equality, it is just another way women can be objectified in this already sexist society. If women want to strive for equality, they should take it with class. Keep your clothes. As for breast feeding, keep it private. People don't enjoy watching you pull your boob out and stick it in a baby's mouth. You can find a place to feed your baby, or atlas keep it private so the whole world doesn't have to watch you feed your baby.

However, first and foremost, this is a family oriented town that needs to take that fact into account. Allowing young mothers to breastfeed their child in public without fear of being prosecuted for indecent exposure is extremely important to the security for those same families. However, allowing women of any age to walk around town topless is not supporting these families or children of this community. You will effectively be alienating these young families from community festivals and events where topless women may be prevalent.

As a city we cannot rest on our laurels because we are in the top mid sized desirable cities in the nation. There are people moving to Loveland and other cities because we are gaining the reputation of a lawless drinking college town and that is not where people want to raise children. Allowing public nudity moves us several notches down in the desirable city category. Most of those lobbying the street corners for this are not the high earning professionals or the homeowners in the city. Be careful who you cater to.

Women's breasts are bring more than men's. They serve a purpose of both nourishing our young, and attracting males. Therefore they should be free to nourish are young to ensure the child's well being and survival. However, women's breasts should not be publicly exposed, due to their sexual nature. What will I tell a teenage boy to do or feel or not do or not feel when he sees a woman's breasts freely bobbin in the sun? How will I explain this to our growing Muslim community who work so tiresomely to shield their children from exposure? I am a feminist. And you f we want to make this a feminist issue, which in my opinion, it doesn't need to be, let's prohibit men from walking around shirtless.

We need to keep our town family friendly and going topless will not do it! Men and women are different and process things differently. If a man sees a women topless he naturally has sexual feelings and instincts. It is proven in several different article with exstensive research. This is pure pornograghy! We should not have to be subjected to this if we choose not to. Research also shows the negative affects pornograghy aka a topless woman can have on the brain. This should not be legal!

Obviously women's bodies are different than men's bodies and it doesn't mean the same thing in this culture to see a mans bare chest as it does to see a woman's bare chest. If you are looking for equality, then I would rather see a law stating that both men and women cannot bare their chests in public, rather than allowing both to bare their chests. It would make me very uncomfortable and disappointed as a woman, mother, wife to see women baring their chests for no apparent reason, other than "it's not fair".

Women and men are biologically different and we should celebrate those differences. I believe that breast-feeding mothers should have the freedom to nurse their baby at will throughout our city without negative legal ramifications. However, for a woman to walk around topless is like a live version of pornography! For those that read this comment, do you have children? Grandchildren? Think of the children in our city. Would you like to know that your child or grandchild (if a girl) is either showing her breasts through "sexting" to others or (if a boy) is receiving a text/sext from a girl/woman at something so debasing as showing her breasts for attention? Studies show that the viewing of pornography, especially begun at a young age leads to major problems for that person in the future. How would this policy of women being allowed to walk around topless not be pushing that agenda of pornography? It would. Parents and grandparents and any one else with any sort of moral compass can see that this is a bad idea. It's OK for us to want to be a little different than cities like Manhattan. Or even Boulder?!? We live in Ft. Collins for many reasons, one of which is because it's such a family centered community. Please don't pass such a ridiculous policy as allowing women to walk around topless in our beautiful city of Fort Collins. If everyone is so interested in the law being equal for men and women, then swing the other way and require men to wear a shirt in public! We don't want to see those saggy, nasty, tattooed, pierced up bodies anyway. We live in such a sexualized world but we don't have to bend to those pressures. Do not let the minority rule the majority.

But public nudity is sickening. And does not promote gender equality, but simply degrades our perception of strong women.

That's not a question. Personally I don't want to see anyone's bare chest under inappropriate circumstances and that would have to be defined in writing as different people obviously have different ideas. I'm fine with nude beaches and the European model. If a few or a bunch of women want to go topless I say go for it. The novelty will wear off and then we won't have to be in the ticker tape of GMA saying "Colorado City considers allowing women to go topless". FC really needs some sociologists to chime in on some of the issues our city is facing.

I think women should be able to breastfeed, but that doesn't equate being topless (just to clarify my response - I just wouldn't want someone to not be able to breastfeed in public). This is a great place to raise a family - let's keep it that way. Women aren't less than men because they can't be topless. Fair does not mean equal - I have to tell that to my students all of the time! Adults should understand that concept.

Senior ladies may give it a try as well. Picture it... ;O) (I am a senior lady so I can say that). I don't think it is fair to children either. Actually, I am mostly concerned about safety. A female going topless in public sends a message whether she means it to or not and the male that responds will end up being punished. Doesn't sound like a good idea to me. Also, I suspect the police have enough to deal with already. Sounds like a step down for Fort Collins. Thank you for asking.

One of the most important reasons is because it is a family oriented town. Our family would not be comfortable walking down the street and seeing a topless woman gardening or attending a Fort Collins event and see topless women there. If we need to make the law include tops for men too so that everyone feels they are being treated fairly, so be it.

It almost seems like we are asking for more sexual predators and offenders to take place. I think woman want the right to be able to do this, but once it comes down to it, we will be having to defend our bodies even more. I think allowing the law to stay would be beneficial to maintaining a class filled city as well. I also think that introducing society to breastfeeding will allow for others to realize that the female breasts are natural and not just a sex piece.

If option #1 means allowing breastfeeding mothers the right to fully expose their breasts in public, then I am against the change. There are plenty of clothing options to be able to breastfeed modestly. And I am totally opposed and extremely offended by women walking around topless. Even in Europe they understand the difference between a right and public nudity. They are topless on the beach then fully clothed when they step off the beach. Also, how would this be enforced? One must be clothed in eating establishments, hospitals, court, schools, but not at the corner of Drake and Lemay? Police officers would be stopping and asking females for id, citing them at every turn rather than busy doing what we need them to do. Also, how can we brag on our public school system and think people with children would actually want to move here to be exposed to this? Doesn't someone acting on their "right" to toplessness infringe on my right to not have to see it? Lastly, our community would see a spike in people moving from Foco, in car accidents, in public outrage, in sexual crime (naturally, nudity and sex go together). There are just some things that aren't optional. Its a very slippery slope.

Us women have breast that are called private parts, a shirtless man has been around since Christ walked the earth. A shirtless man is natural but a topless woman is not natural an any way. All that is going to do is catch men's attention and them doing stupid things to females could take place. It gives it more of a higher risk.

I am opposed to either of the two options. Here is why: For the sake of children, teens, and families: According to the most recent statistics from the US census bureau (www.census.gov), Fort Collins has a 19.9% child population (persons under the age of 18), and an average household size of 2.44. Over half the population, according to census.gov, is female. According to Sperlingâ €™s Best Places, â€œ39.92% of people are married, with children, 11.82% are single, with children.â € City-data.com has recorded 25 elementary schools, eight middle schools, and six high schools in Fort Collins, over 58% of which have high to excellent ratings. You do the math. Children live here and should be protected, not exploited. In case that point is dismissed, here is another for your consideration. Denver and human trafficking: A Denver Post 2013 article states, â €œDenver ranked fourth in the number of teens rescued [from human trafficking], with nine juveniles, fewer than only San Francisco, Milwaukee and Detroitâ € (Labor and Sex Traffickers Practice Modern Slavery in Colorado, Tom McGee). With such an ordinance, the only probable outcome is an increase in human trafficking in Colorado. If the city government wants to allow the future female adult victims of sex trafficking to put themselves and others at risk (because by exploiting one woman is to exploit women), that is one thing (and do not be mistaken, I am adamantly opposed to the Public Nudity Ordinance), but to allow female CHILDREN, from 10 years old and up, to be topless in public! For Godâ€™s sake! Keep the children out of it! We as a city stand much to lose should this ordinance be approved: our dignity, our womenâ€™s safety, our childrenâ€™s safety, to name a few. I do not know what could possibly be gained from this, but no amount of economic well-being or even what people call â €œfreedomâ€ (freedom to choose, freedom to act, with NO regard for others) is worth more than the SAFETY of the people. What kind of future is best for our city? One of professionalism, success, a place of opportunity, education, and safety (for which we certainly have the potential)? Or just one more dump of prostitution, public nudity, crime, and child/human/sex trafficking?

It is nonsense to think this creates equality when if you ask me it creates a whole new problem of sexuality and women who would have chosen to go topless to claim sexual harassment, which they claim after they make the choice to wear their super short shorts or tight dresses as it is. Why compound the issue and create a completely different society?

Women have been breastfeeding for centuries without being topless. Our family was attracted to Ft. Collins over 20 years ago as a decent, nice place to live. If women are allowed to walk around half-naked, I will move away before I & my daughters are subjected to this kind of indecency. The kind of people Ft. Collins will attract to take the place of the decent people who move away, will be rapists, pedophiles, sex traffickers, and other sexual predators. How many parents will want to send their children to college here? How would this help all the sex offenders that are not allowed to have photos of females, open curtains, or internet; attend churches where anyone is under age 18; shop during the day; or a long list of other restrictions designed to reduce their temptations? If you're going to allow bare-breasted women to roam freely, you'll have to throw out all those preventative measures because they'll be useless. What in the world is wrong with this City Council that this is even a discussion item? Read up on on Sodom and Gomorrah; it didn't end well for them.

I am a big advocate of breastfeeding having breastfed all of my 5 children for 1 year each but there is no reason a woman has to be topless to do so or to have her breasts hanging out to do so. It sickens me that Fort Collins is even considering this change in policy. Why are you even giving voice this person/people who are wanting equality to go topless? Open your eyes can't you see the condition this world is getting in is caused by the lack of morals, repect and pride. And the city of Fort Collins cannot be so naive to think that women going topless is not going to open up all kinds of horrible things like rape etc... I am ashamed that the leadership of the City of Fort Collins would consider such a thing. This state didn't have the wisdom to realize that the legalization of Pot was wrong on so many levels and now to hear that this topless ordinance is going up for vote leads a person to believe that there are very few right thinking people left in Colorado.

Is breastfeeding in public currently a crime? Breastfeeding should no more be appended to this ordinance than bottle-feeding an infant in public should. The current language confuses voters and needlessly connects two different practices. I was forced to choose "Option 1" when what I really wanted to vote for was simply, "Maintain current policy." Please do not use breastfeeding to get leverage on a disparate issue.

Other than that, I prefer that all adults wear clothing over their chests as well as their lower parts. I believe this should apply to males as much as females. The convention of wearing clothing in public is long-held in most civilized societies. I see no reason to change this, except to enforce it more evenly, by making exhibitionist men cover up also.

It is common practice for breastfeeding moms to do so discretely in public and still be covered to honor those around them. I really see no need to change anything. As a breastfeeding mom, I never felt that my rights were compromised. I felt comfortable most everywhere. It would be uncomfortable to not be discreet. The all-topless option is absolutely absurd, and the fact that it is even being considered is a sign of the degradation of our community. Please stand up for what is right and honorable for Fort Collins residents, including our children. Thank you!

I believe that in this day and age , women should be free to be topless if they so desire - who are we, as a community, to prohibit this ?

If you don't legalize it eventually it will go to the supreme court and you won't have any input. If you legalize it you can put some reasonable limits in place restricting toplessness for money. Read about times square in NYC. In reality I don't expect it will be common even if it is legal. Most women still prefer modesty. What I don't like to see is some young lady doing something at 22years old after a couple of beers that will limit her future forever. The new generation just thinks different than the older folks do. Let's not make a mountain out of a molehill. A little tolerance will pay off. Even in Jesus day he probably saw such things. If you keep the money out of the equation you won't have a problem. Go to Canada. It has been legal for years and you probably just won't see anything.

The act of barring the bearing of the female breast coupled with the objectification of the female body by popular culture creates this sexualized context. In other words, this may seem shocking, but it really shouldn't.

However, look at any tribal or Indian culture. They have topless woman everywhere and it is no big deal. If anything, kids can see them and it won't be such a big mystery and will grow up with it seemingly normal and nobody would care. Not to mention I highly doubt passing the law allowing them to be topless would suddenly mean there are going to be topless women everywhere. Just like with men, most stores will still require shirts, etc. most women and men will naturally want to cover up so they aren't stared at by everybody. It's just a freedom that allows them to be equal to men. Even though they allow breastfeeding either way, I know my wife currently breast feeds and is given an evil stare every time. Perhaps if tooless women were normalized, breastfeeding women would feel more comfortable as well.

Yes, it might be uncomfortable for a bit as we adjust to a new norm. But it's time. We can grow and move into a new standard and then it will become as integrated as men riding bikes shirtless in the summer or how revealing swim wear is on anyone. Let's be mature and move past this double standard.

What is so different about women and men? Nothing. By not allowing women to have the option to be topless, that's like discriminating against heavy men not wearing a shirt. It's the same and it's wrong. Further more, you should also think about how many women would actually take advantage of this option. I feel as though for a lot of women, it would be nice to have the option available, but not as many may want to partake, but they should have the freedom and option to do so if they wish!

We have created a thought in are mind that breast are a "private" part of the body and because of such a notion, ridiculous concepts and or motives arise. Men need to respect woman more and this is one way of doing it also, by making it the silly concept we created it to be. And allowing true freedom, that are children will one day be proud of.

Women have been fighting for their rights for almost 100 years now and this is such a silly thing to keep from them. Breasts are not mandatory for conceiving a child. They are a fetish like feet and legs. Breasts have a lower "erogenous zone" level than lips. Nobody is forced to be nude or topless. But the current law is forcing women to wear tops in sweltering hot weather. Women will keep being objectified by what they're hiding under their blouse unless we change the perception of female breasts. Allowing women the same right as men is the first step.

Men were allowed to be topless or wear open shirts, but women must be covered at all times. I always believed that men and women should be equal, and if we continue to censor women's bodies as being different then they continue to be seen as sexual rather than what they are really for. If I can walk outside to get my mail or bask in the sun without a shirt then women should be allowed to do so as well.

As a man, I have the freedom to choose to go topless nearly anywhere I please. This is not seen as a sexual act. Yet women are denied the same freedom because of the sexualized status of their breasts. I am not arguing that there are not physical and biological differences in the breast of men and women, but I do think it's wrong to stigmatize one and not the other. I am subjected every year to hundreds of men I would rather not see topless. So is everybody else I'm sure. But still they are topless because they are men. Regardless of weight, age, physical health, or defining physical shape...they are topless. I think that if I have to be subjected to the sight of topless men, then it's also okay to be subjected to the sight of topless women. Regardless of weight, age, physical health, or defining physical shape. It should be up to the woman.

Treating the human body as something that should be covered and hidden teaches our youth to be ashamed of their bodies, and that their anatomy serves only a sexual purpose. Teen pregnancy and abortion rates are much lower in cultures where nudity is normalized. I hope to see Fort Collins take a proactive stance toward helping to desexualize the human body and I appreciate the opportunity to express my opinion on the matter.

If a male can go top free in public without recrimination so can a woman. It is also demeaning to men to presume that mature people wouldn't be able to control their behavior in the presence of a top free woman. Adults should be able to decide what is appropriate dress in public without the assistance or direction of any level of government.

Over a century ago, people would be offended if women's ankles had shown. Now a days, many people wear skimpy shorts and tanks tops. Bikinis in certain areas. We are in an era where people are becoming more comfortable with who we are and exposing oneself is not as much of an issue as has in the past. Over time we have become comfortable in who we are. I think we create more sexual frustrations by over reacting then reacting responsible. Maybe we can allow toplessness to initially occur in restricted areas and or certain hours like in old town after 10pm, Poudre River while rafting or sunbathing or other sorts. Can't imagine people will initially approve without some level of restriction. Even though I personally think that certain people make a bigger deal out of it then they should. Stop and think that when a woman wears a bikini in public that everyone around is practicly seeing her breast anyhow, going topless is showing off what little left that was covered exposed anyway.

It was never a big deal in the places that allowed both sexes to go topless. I believe that people need to get over this stigma of upper female body nudity. It just causes body issues to women. If I can go topless so should anyone else. Thanks for reading this.

I appreciate your time. Not too long ago in our countries history it was illegal for men to be topless in public. A group of men decided to rally to change that and were successful. Why deny woman the same right? Breasts are not sexual in nature, though in our culture we sexualize them. I think it is very absurd that we have maintained such a hypocritical double standard surrounding this issue for so long. It should also be noted that the Colorado constitution prohibits discrimination based on sex, so the law prohibiting woman being topless in public is actually unconstitutional.

Smoking bans are for health but so is decriminalizing breast feeding. It promotes mothers and families to go out even if snack time is near and it allows baby to be properly nourished. Our policies are so inconsistent, there are no victims of breast feeding and topless women are not what local government needs to be concerned with. It's a body to everyone who isn't sexist. Now divert our staff resources towards the train, drug, housing, economy, etc. problems!

If so, then women should too as both sexes have breasts with nipples. If the argument is size, some women have smaller breast than men and some men have breasts larger than the average woman's breast. So, if the law remains, it's sexism. If the law is changed to allow men and women to be equal, it's not only fair but it's also groundbreaking, and a potential economic boon.

I support the idea of breastfeeding in public. I support a few designated areas for topless or nudity, but not complete public toplessness. I feel this society is not as mature as other topless societies. I feel people are caught up with the notion of sex and would not handle themselves well. The worse I would see would be people taking pictures of others who would not want their pictures to be taken and spread across the internet. Some men and women can handle themselves well and perhaps the designated areas can be created so that they will feel welcomed and safe with no harassment. It is a shame that paintings and sculptures can be nude, people go to the movies and witness nude and sex scenes but as a society still have challenges in regards to respecting others who wish to be naked.

I think to how many guys I see without shirts on (aside from lake/rivers or maybe playing sports) and I don't recall ever being bombarded by shirtless men every turn I take. I imagine the same would be true with women... And regardless, they are just nipples, skin and fatty tissue, just like a guys chest. Who cares... Allow the equality if people want it and get over our sexually repressive american society. Maybe if boobs weren't viewed as so taboo, and weren't anything out of the norm, they wouldn't be sexualized so much as the opposition seems to imply. Also, just take Europe for example. They are doing just fine.

Women still have a choice about it. All this would do is to remove a restriction that men don't have. By the way, the preferred word is topfree rather than topless. Topless implies that something is missing that should be there. Topfree implies a lack of restriction.

Certainly women should be able to be topless, no different from men. But furthermore, full public non-sexual nudity should not be against the law in this country either. Men have men parts, women have women parts, everybody knows what they look like, and should not be the focus when meeting/conversing with someone nude.

There is a double standard that it's wholly acceptable for men to be allowed to be topless in public, but not for women. Such ideals are archaic at best, and only further set back our collective human development as we further relegate and oppress women simply for perceived morals handed down from puritanical ideologies. As we continue to fall into these patterns, we recede further and further behind other societies as they advance beyond us an our unrequited fears and doubts. I encourage the city council to move forward as a progressive and non hypocritical governing body, whose only purpose is to oppress the freedoms of half our population, while allowing the other half to go unrestrained.

It's a shame that breasts are sexualized to a point where women are discriminated against due to this fact. But either all women should be allowed to be topless or none. It would be extremely discriminatory to only allow breast feeding mom's to be topless and not all women.

NO! Gives more opportunity for more men to be falsely accused of bullshit. NO! NO! NO! "He looked at me sexually" the woman said. "He groped me" she said as she had once wrapped her arms around her male friend's chest. The answer is BLEEPING NO!!! For someone who was easily falsely accused of outrageous accusations and seeing how easy it is for any women to get away with what ever they say "goes", it is only right to keep the tops on. Unless there are strict laws that allow time to evaluate any crime that stated by any woman or man being accused of rape or sexually assaulting. A man will hit and grope another mans chest kicks, what happens when women have the same right as men. Can they now touch us men when we can't even still touch them? Equality my ass. You want equality then any persons who files for any form of sexual assault, falsely, should suffer the same punishment given to the persons they accused... that is if this passed. And I will be picketing for this action to follow. As I can see many more men or women (rare but it happens) being taken in for rape or sex assault charges.

Nudity is one of the areas that we control what our children see on TV. It defeats the purpose of not allowing nudity on public TV and parents controlling what their kids watch, but then having topless people in Old Town when we go there on the weekends. A certain level of decorum will not hurt Fort Collins. The citizens of Fort Collins do not want the city to become like Boulder. We would have moved there if that was our goal. Keep Fort Collins' identity.

I also have young children who should not be subjected or exposed to female nudity at a young age. These kids are not old enough to be admitted to a movie with nudity but might be exposed to it walking down the street, in their own neighborhood, or even at their front door if the ordinance is revised. These options are unacceptable. We need to maintain high standards of decency in Fort Collins by NOT allowing females to go topless.

Plain and simple. Their anatomy is different. It is not the same thing as a man because it is not a man. It's not a hard concept. It would be an a-moral decision. Believe it or not, morals exist whether people want to abide by them or not. As a moral person, this would be wrong.

This would create even more struggles for men and young boys in terms of purity and lusting after women who are not their wives. With the porn industry already having a strong hold on our society why would you think its appropriate to allow for even further misuse of the female body. I am a young married man that feels it would be harmful to young teens and all marriages to allow women to be topless in public. It would be foolish to let this pass.

Who would have ever thought we'd have to "vote" on something like this. It's also amazing that in this ultra PC world we live in that you would offend so many people because a small few say it's unequal. Men and women are NOT exactly the same. In truth, the public nudity will have the same effect as pornography, and lead to more promiscuity and the objectification of women. When men see breasts, they think sex. Do the married women of Ft Collins really want their husbands to view another woman's breasts? Do topless women want men to see them in this manner. Do we want our young people exposed to public nudity?Human experience informs us that societies that uphold virtue, decency, and high moral standards are more prosperous and happy than those that don't. Please don't turn Ft. Collins into Las Vegas.

Although I believe women should be allowed to walk topless in public, I feel were not ready for it as a culture. It may lead to young men being over aroused, resulting in a potential increase of rape. Although it should be equal between sexes, the woman figure has just been so over-sexualized in our society that some young men don't know how to control their urges.

Really what is the point? All these women want to be equal to men with the right to be topless in public without being observed sexually, but it's just not that simple. Men are always going to find women's breast sexual and be attracted to them and what women think is that breasts are not a sexual organ (which is true by medical standards) but to everyone in modern society they are and everyone thinks that.

Instituting a liberal dress code that challenges the sensibilities of families with minor children and businesses that wish to attract the same, seems somewhat at odds with the stated objectives of Fort Collins to be a family friendly place to live. Clearly, if the city decides that R rated nudity is permissible it is pandering to a very small minority to the detriment of a very large majority. It does so at its peril.

I believe it isnt okay for guys either. There are many moral delemas regarding this situation as well as religious delemas from several different religions. It is much better to keep the ordinance as it is. It protects more people. I believe it is my right as an American citizen to be able to go into public and not have to see something that is against my moral beliefs or religious beliefs. If somebody wants to be naked, they can do it in the privacy of thier own home rather tham subjecting an entire community to a highly controversial subject.

I have seen women do this in public and I find it acceptable. I only say this because there are women who will flaunt the law by purposely openly exposing their breasts while breast feeding to shock those nearby.

I guarantee that numbers of rape and sexual assault will go up if this is something that is allowed. This is a classic case of feminists just thinking about themselves when there is much more at hand. To be honest, I'd much rather worry about fixing the god awful afternoon traffic at the drake and college intersection in the afternoons then worry about something as pointless as a woman prancing around topless so they show everyone that they stand for the "rights of women everywhere". The difference between a male being topless in public and a female being topless in public is the fact that people aren't sexually aroused at the sight of male nipples. And; I would also like to see my first pair of boobs on a girl that I want to spend the rest of my life with, not some body confident feminist who believe all men are evil and would damn the male sex for looking at their tits.

Societal standards and prejudices still exist involving this matter and could result in a negative scenario. I fear mainly for younger women whose chances of becoming the target of sexual assault could increase. Although I hope one day women's bodies can stop being objectified and embraced as nothing shameful, I believe society needs time to incubate this idea and change perspective. So I say baby steps, for now mothers and their children.

Breast have been sexualized to no end by every one of our industries, religions and entertainment outlets. There is no way to undo that by a simple signature of a pen. Women should be able to go topless, but in this culture it is simply not feasible. The sexual connotations of displaying breasts is too high and it will end badly.

Quite frankly I find it embarrassing that this type of topic is even being addressed. What a colossal waste of time. Is there anybody on the city council with half a brain or are you all just a bunch of dimwits?

How is this even being entertained? On multiple occasions, Fort Collins has been nationally recognized as one of the best places to raise a family. Please explain how a) allowing women to be topless in public doesn't diminish this national recognition and b) the implied presumption by this "group of citizens" that those raising families (potentially here because of said recognition) should be willing to accept a social behavior that is completely foreign to the state of Colorado and generally foreign to the population of the United States. If this "group of citizens" clamors for the right of women to be topless in public, perhaps they should consider living on a different continent where this social behavior is accepted by the population.

Even if the public decency law is changed, the number of women taking advantage of the law will remain less significant. Besides, it will promote more cases of verbal sexual harassment and hence lead to more issues which will ultimately drain time and resources of the public legal system which could be used in taking care of matters which matter the most. Also it can also prove as a gateway for men to further change the law to display their genitals. They can potentially offer the argument of being in their natural state and if breasts can be considered non-sexual, the display of genitals can also be considered the same. But, excepting breastfeeding mothers from the public decency law is necessary since they find it very difficult to follow the law by having to breastfeed the kids in public restrooms and other such places. Doing so, could increase the exposure of the child to health issues or other such problems. Moreover, breastfeeding mothers are not trying to sexualize breasts and is just simply trying to feed their child who have no other option than breast milk for their hunger. But making the decency law expand to non-breastfeeding women, will potentially enable them to sexualize the display of breasts and provide a gateway for the public to consider the display of breasts during breastfeeding sexual.

A womans breasts are not only fundamentally used for feeding their young, they were also created and universally viewed as a sexual stimulant for the opposite sex. Women complain about being treated like a sex symbol and then want to go topless in public? Stupid! It's saddening that the city council even entertains such a proposal.

Are there not more important ideas and city concerns than breasts flowing all over town? Ya'll did this so enjoy the ride. Let's let the children decide. Hey kid's...do you want to see your teachers breasts at the park? Kid's-Hey mommy can we go to the park?..... Think it won't happen? Pass this and see how you'll change this town. Once you cross the decency and morality line anything is poasible. Every business will be forced to create new breast bylaws for operation. I can just see those in favor of this swarming over the idea of charging these for new 'breasts allowed to fly' busines licenses. Please use discretion and wisdom and lead in ways that promote family and goodness. Thank you.

Is the next step allowing full nudity while eating dinner at a sidewalk cafe, sex among teachers in the school cafeteria, naked jogging? I am open to many of the changes which have occurred over the past 20 years to provide equal rights to various groups. However, equal rights is not the same as public decency. Men and women are physically different and society has placed norms on the parts of the body which should be clothed in public. Women's breast have been seen as sexual items similar to both male and female genitalia over the past several thousand years and there is no need for the city to grant the "freedom" to expose themselves for the benefit of 1 or 2 people at the sacrifice of our freedom to not have to see them exposing themselves in public. A mom breastfeeding a child is completely different from the conscious decision to go topless or nude in public. I deserve the "freedom" to raise my children in a city where common sense decency is honored without being trampled on by the vast minority. I would prefer to be able to continue living in FOCO than having to move in order to raise a family in a city that respects the basic rights of most of the citizens to not have to see public nudity. What a person does in their house is their own business, public areas should reflect the norms of the population without trampling on either party's legitimate rights.

By changing this public ordnance (besides the exclusion for breastfeeding mothers), this forces one group's beliefs, however small, onto everyone else, where they have no chance of avoiding it if they wanted to (outside of not going into public). As a man, who loves topless women just as the next guy, out of decency I have no desire to have it paraded around in front of myself, friends or family as we walk the streets of Old Town or Fort Collins.

That's a human life that needs to eat. You eat on a park bench or picnic table don't you. Being a public disturbance in a family friendly town is completely different. I have younger children that shouldn't be exposed to that type of content when they are having a good time as a family.

Fort Collins has ever been a place that accepts people for who they are, but in thia circumstance, it is us, the vast majority that will be sacrificing our culture and and values system to appease the self-centered cultural inject of this new hyper vocal minority. Why then should an entire culture, as that is what we form here, submit to a slim minority when it compromises the integrity of the vast majority. Let us never forget that we are Fort Collins. We are not San Francisco or Portland or Seattle or LA or New York. We have our own identity and it does not bow to this ultra-lib mentality that permeates other parts of the country. We are Fort Collins. Lets keep it that way.

Collins just over a year ago and was drawn here by the city's reputation of having high standards and being family friendly. I'm all about women's equality. But let's address the real issues of women's equality. Let's address equal pay, equal opportunity, equal education. Being able to go out in public topless is not the kind of women's equality that matters. Frankly, the fact that toplessness is the main women's issue we're debating is quite demeaning to women.

We just moved here and purposely purchased a new home about 2.5 miles from downtown. We love going down there do to the awesome atmosphere. Allowing topless women (or men for that matter) offers no positive impact and will hurt the best focal point our city has. I wish where I used to live had such an awesome downtown like we do. Laws and ordinances are designed and implemented for the "public good". I fail to see how passing in favor of such an ordinance is in the interest of the public good. Rather it appears to address the desires of a small minority. The state of laws representing a community and supported by a community speak to the common values of that community. I urge the city council to not make the desires of a few representative of us all. Fort Collins is where we raise our children and enjoy our city. Such an ordinance would be deeply concerning to me as a father of two beautiful daughters and a wonderful son. Let's keep Fort Collins wholesome.

Society has developed moral codes over the millennia for good reason. Allowing partial nudity in public generally is a dangerous step along the slippery slope to debauchery and other unwelcome behaviors. Maybe it's a notch in the belt for feminists, but I can see no good coming from allowing topless women in the general public.

Allowing public nudity would potentially destroy the all ages atmosphere that makes old town, tour de fat, new west fest and Fort Collins in general great. It is absurd and sophomoric to argue that female toplessness is an equal rights issue as opposed to a public nudity issue. In order to not disrupt public interactions, men should clothe themselves with the minimum of swim trunks and women should clothe themselves to the minimum of a biikini, while in public. This seems reasonable.

The fact is females and males are not the same. Simple biological differences exist and therefore different rules exist. One could argue the separation of male and female bathrooms restricts equality but obviously this is a poor arguement. Please keep Fort Collins a decent and upstanding city by encouraging modesty for both males and females.

I assume the impetus for this ordinance springs from identity politics and the desire to eliminate differences between male and female and oppression of women. As a man, I am strongly in favor of not oppressing women. However it seems to me that to ignore the obvious differences between the sexes, to insist that the female breast/nipple is not a sexual organ, and to destroy boundaries which are in place for the common good and respect of all citizens is a naÃ¨ve activism against the created order. Deeply rooted social mores respect the goodness and sanctity of sex, the welfare of our children and a cohesiveness to the body politic which can't be overturned by a law which flies in the face of what most citizens have recognized and continue to recognize as public decency.

Men's nipple are not in any way involved in reproduction. There is a significant difference. This is not an issue of equality, there are very real and obvious differences physically between men and women. Additionally, considering Fort Collins is a college town, do you really believe that it is a good idea to have naked women in town? Let's not forget about the sexual assaults that have occurred very recently. This would have a significant impact on our town, and in no way shape or form would it be positive.

Men topless vs women topless is not apples to apples. Fort Collins is a wonderfully done city especially in the old town area. To have naked women walking around would demean the town and lose it's attraction to so many of us. Seriously take pride in our city it keep the clean family oriented atmosphere around. This seems like a joke and surprised it is even making it thus far that i have to comment. please don't allow this.

It is not unfair to not allow a woman to bare her breasts in public. It is no different then a man exposing his genitals. If a woman were to bare her breasts in front of a child, current state law would mandate an arrest for indecent exposure. Even in Las Vegas, you don't see women walking down the streets exposing their breasts. What's next? How do we prevent an 18 year old high school student from going topless in school? What about a female CSU student wandering around campus topless? This is not a discriminatory issue, and I fail to see how it discriminates against gays, lesbians, and trans-genders. This is nothing more than a woman trying to expose what she clearly is...a boob!

This is the kind of garbage our city government is working on when we have so many pressing challenges. You need to take a survey on whether we should allow this? Have you given any thought whatsoever to the myriad negative, unintended consequences of allowing women to go topless in F.C.? Crime against women? Unplanned "appearances" of women on the internet? The further objectivication of women in our local culture? The impact on tourism? Impact on CSU enrollment? The terribly negative press? Is there some law requiring you to administer this survey or does a gutless city government want to have survey results to hide behind? J. Cook

If this small group of self centered issue pushers want to become animals then go graze somewhere where children, married men, and decent hardworking citizens aren't affected by their hippie desires.

I don't know any woman that would feel respected or even comfortable by being topless in public. Also, I think this would cause potential serious issues with men from a sexual standpoint, which could lead to a rise in objectification of women and, God forbid, possibly worse. I understand the desire for more equality for women but I don't think this law creates that equality. It seems like a small minority of women who have something to prove rather than a large majority of women who are trying to create a better aspect of equality in a way that is healthy for all of our community. This is not a healthy law.

A small minority wants to walk around topless and we waste money entertaining this while there are real issues that need resolved. And to claim this is an equality issue is silly. However, there's obviously cultural bias that would cause some people to be offended. At a minimum the stigma of breastfeeding mothers breastfeeding in public needs to be removed and Ft Collins would be well served to create a culture and ambiance where these mothers are respected.

In other words, the law should be equal with regard to gender either way but begin with a transition phase so we may observe the impact to our community.

Whether or not that is scientifically true is a matter of debate, but when dealing with the question of decency in a civic setting, the publicâ €™s perception is more relevant to the discussion. Our city will not tend to perceive a topless male the same way we view a topless woman. In our culture, the former isnâ€™t regarded as nudity, but the latter most certainly isâ€"there are billion dollar industries that capitalize on this insight. Unlike a bare-chested man, a topless woman in public will be almost unanimously regarded by the citizens of Fort Collins as a nude woman exposing her sexual organs. Because of that, I believe that allowing this would betray the values of our great city. This is not a matter of equal rightsâ€"itâ€™s not apples to applesâ€"his arenâ€™t like hers. This is a question of whether or not we should permit something that the vast majority of our population will regard as indecent, obscene, lewd, pornographic, and improper. This issue is attempting to highjack the noble value of â €œjusticeâ€ to create a narrative that seeks to overthrow our intuitive awareness that there are beautiful distinctions between men and women that ought to be honored. Please don't be blinded by it and fail to see the reality of what's in plain view. -- Jeremey R. Houlton

Doesn't matter age or health or race or color. Clothes are designed to protect you from the sun and cover up what people don't want to see or what you don't want people to see on your status of Health and physical appearance. This isn't a third world country and we are a society of respect, ethics and following laws. There has never been any time in my life that a women or man needs to go down town shopping and be nude, topless period. At your home in your back yard or in Your house is just fine. Seriously we don't need this. It's common sense.

I agree that women should be able to breast feed in public, but I believe they should be discrete as you see today. It is my opinion that that there will be more traffic accidents from folks doing a "double take", I don't have facts to back that up. I will say that each person has the right to raise their child how they see fit. If you want to walk around naked in your house, please do. I do think the parents of the 13yr old boy next door should have a say in how they raise their son. I don't think we are going see a huge wave of women all of a sudden going topless, but the occasional circumstance will cause problems. This used to be a family friendly town, if I wanted to be subjected to this environment, I would move to Boulder.

A child would be expelled from school for possessing a picture of a topless woman, and the majority of people who work would be fired from their job for looking at an internet image of this same level of nudity. I believe it is introducing a double standard rather than perpetuating one. Further I believe it is morally wrong. If women are allowed to go topless in public in Fort Collins it will have a negative impact on families seeking to enjoy public areas such as old town, city park, etc. as they may strive to avoid such areas to protect the innocence of their children. Lastly, this would generate a lot of negative publicity nationally which would hurt the perception of our good city.

This is a family friendly community and a main reason why so many of my coworkers and friends have moved here. If it turns into a marti gras environment (which this change could open up to) then it will hurt the Fort Collins brand and attractiveness to families which is the life blood. Breastfeeding is different and should be accepted.

Breastfeeding should never be an issue - that is a natural part of child rearing. If you're allowed to feed your child anything else in a specific area, it would be respectful to allow the child to be fed naturally. This is a choice for the mother and no other. For true gender equality - it has to be one or the other for all. Or are we not truly ready for equality? Society has sexualized the female breast to a point where a subsection would create problems, not unlike guns, drugs or other stigmatizing issues we're currently dealing with. We could write this law to say beautiful people may go topless in public, but ugly people cannot. Equality at its finest?

Our City officials have to spend time and money on this issue. This is a waste of mine and every other tax paying citizens money. As your deciding if this is a good thing or not for our City you might want to look at the consequences regarding this. I will predict that the cases of Sex Assault will go up if this is passed. Harassment will also go up because the first time some guy or girl makes a lewd or unwanted comment to some young lady and she gets offended, that can lead to a charge of harassment. I would hate to see a law passed that would create an environment that young women become victims. Just imagine Drunk and stoned (because we can get high legally) making bad decisions. If this is passed you folks have lost your minds and common sense.

I do think an exception should be made for breastfeeding mothers.

Is it really that rampant here in Fort Collins? My second thought is that someone(s) on City staff has WAY too much time on their hands. There CERTAINLY has not been an overwhelming, or even majority, of the citizenry that has requested this as an ordinance. Thenâ€¦ The basis of this â€œquestionâ€ is one of mores, not legality. Historically, American cultural mores (including that of Fort Collins, Iâ€™d bet) have not viewed (no pun intended) bare-breasted women as desired/ acceptable. I challenge whomever is pushing this agenda to bring forth ANY data that even suggestsâ€" let alone proves-- this has changed. Lacking that, this is (yet another) extreme minority viewpoint and effort; and one that should not consume (any more) of the Councilâ €™s (or, City staffâ€™s) time. Personally, Iâ€™m not at all offended by nursing mothers. Nor would I be â€ ¯offendedâ€™ by â€¯bare breasts walking down the sidewalkâ€™; but I would have to wonder what (she) thinks sheâ€™s gaining (or proving) by doing so. If (someone) simply must manifest her mammaries, let her open a nudist colonyâ €¦ where she could be assured sheâ€™d be rather unanimously viewed and accepted.

What are this city's politicians thinking? This is not San Francisco. This is a very radical, disturbing, inappropriate, gateway-inducing assault on social decency and traditional morals and values that the vast majority of FC citizens believe in. How did such people get into positions of power like this, where they could enact such a drastic, image-destroying ordinance like this one, that would turn beautiful FC into a topless mecca.

I feel the true nature of her argument is being lost. A non-sexual organ, women's breasts, are viewed as sexual organs culturally. which is counter to how men's breasts are viewed. Why this discrimination? I would like council to discuss this aspect of her argument and how it may chip away at the stigma, and sexualization, of women's breasts.

That's like the little boy who thinks he needs to strip naked to use the toilet. If so, neither update is acceptable. Otherwise discreet breastfeeding in public is fine. Clothing is intended to cover gender specific body parts. The undeniable fact that our bodies have differences says nothing about equality - it's not discrimination to acknowledge and respect observable differences. I am certain of my position: neither allow women to be topless in public, nor breastfeed. I understand that children need to feed, but I support the idea of the mothers going to a public restroom or designated area, or using some sort of covering to still remain without the bare breasts exposed.

Breastfeeding mothers can choose modesty by using any of a number of very appropriate drapes or shawls. And, public nudity of any kind is distracting, can be disgusting especially when accompanied with other negative social activities, and can be dangerous: for the person in that it suggests and/or invites further negative sexual activity and, for others around her by the above mentioned distraction to those walking, riding bikes, or driving past and taking their attention off of their primary task of safely traveling on our city's sidewalks and streets. If this is an issue of male female "equality" then I suggest that the up-until-now standard of "no shoes, no shirts, no service" is a good model for all of our public areas. Please Vote to keep our City safe and friendly for Mothers, Fathers, Children, Singles, any and all of our Residents and Visitors, and not lower our values to those who would desire a public display of nudity.

And so, in India the refined lady covers her face and breasts and leaves her legs naked from the hips down, while the refined European lady covers her legs and exposes her face and her breasts. In lands inhabited by the innocent savage the refined European lady soon gets used to full-grown native stark-nakedness, and ceases to be offended by it. A highly cultivated French count and countess -- unrelated to each other -- who were marooned in their nightclothes, by shipwreck, upon an uninhabited island in the eighteenth century, were soon naked. Also ashamed -- for a week. After that their nakedness did not trouble them, and they soon ceased to think about it. Mark Twain -Letters from Earth

The public is ready for equality! Women's nipples should not be treated differently than men's nipples. Please remember it is your duty to preserve the people's rights. We all deserve to be treated equally. Thank you for discussing this topic

We will no longer take guests or visitors there whom we always taken there to enjoy shopping and dinning. The clothed beggars are troublesome enough without seeing fully exposed private body parts. This will attract the very worst perverts to Old Town and both the public and business owners will suffer. Why would City Council even consider putting this on their agenda when they should be looking to maintain a decent environment for all the citizens of this town and extended community. It is beyond comprehension to think indecent exposure needs to be redefined.

I definitely oppose "Option 2" and am sure I speak for many other citizens who have the same viewpoint. How are parents supposed to let their children even be in public anymore, in light of this bizarre "Option 2" possibly going into effect? There is something to be said for modesty, decency, class, and dignity. I hope Fort Collins upholds those principles when making a decision on this. Otherwise the city will lose many citizens who contribute to this community, because many are not going to want to be in an area that supports such nonsense. I can only imagine what this will lead to, and what other changes will take place in this city next. Fort Collins used to be a wonderful community but is going downhill fast, and if this change goes into effect, it will only accelerate the downward descent. Does Fort Collins prefer to be seen as "trashy" instead of "classy?" We will all know the answer to that when we hear the outcome on this matter.

Therefore I don't believe a change is needed period. But if you feel a protection for breastfeeding women is necessary, then please put one in. Please don't remove family-friendly laws from this city turning Fort Collins into a laughingstock of a city. This is an attempt by one or two to change the law. The council should be aware active attempts will ensue to remove them from office if the law is changed to allow women to go topless. It's hard enough raising boys to men without our city making it harder.

It would only mean decline morally, physically, in crime and appearance and be a detriment to the many people who chose to live here for contrary reasons possibly driving many away for that very reason and definitely ruling out many who would have moved here but would not with this ordinance in place. The mood and moral standard would only repulse those who are contributing to our city and instead draw in those who will only want to break down Fort Collins' great reputation down and what good has been done here to make it what it is today. It will only mean decline and drastic repercussions, in my opinion. Please continue to preserve our family-friendly, safe, wholesome, recreational environment for the future of Fort Collins as well. Thank you for listening.

Although a college town it's still a family town and I don't think it's appropriate to let this happen as we all know college students will take extreme advantage of this. Is this really how we want Fort Collins to be seen throughout the US?

Therein lies the difference.

That remains true for much, probably most, of US and Colorado culture. I certainly would not want my teenage son to have to walk through an area in Fort Collins where women were going topless. It is a bit much to ask a teenage boy to be in that environment, and at the same time ask him to give full respect for (i.e., don't consider the person in a sexual context) people dressed in this manner.

Should the City Council even put this on the agenda I will drive for ALL of my future purchases and no longer take visitors in to town. What are we coming to as a society. Really. I do not open carry , though it is legal, out of respect for other people that do not believe the same. What is this world coming to. Come on people what makes you think that women need to go around top less. I don't want to see everyone's shit. Women already get raped wouldn't you think that this would just make it more of a problem? Use your heads people.

I don't wan to see other females topless, I don't want my children and husband viewing this either. This should stay in the bedroom, not be out for anyone else to see. If this is allowed, my family will never visit your city again.
