

# Brinkman Partners

Our philosophy at Brinkman is to use the triple bottom line (People, Planet, Profit) as our guide to sustainability. We implemented a program called Gratis to help with these efforts and show our clients we are committed to our sustainability goals. We also help our clients with their projects by providing valuable feedback on benefits and costs of green options.

## 2010 Accomplishments:

- Purchased a new copier with additional functionality, double-sided and larger printing options, that helps reduce paper consumption and saves us approximately \$3,600 per year
- Implemented electronic faxing to increase efficiency and eliminate duplication, saving us approximately \$3,600 per year
- Developed and built the Flats at the Oval multi-use, student housing project and received a Two Green Globes designation for incorporating green aspects into the project. This building is the first multi-use building in Colorado to receive this designation.
- Continued our efforts to salvage as much as possible on construction projects and make all of our events zero-waste
