Welcome!

ClimateWise Project Reporting

August 8, 2013

Success.

Introductions

- ClimateWise team
- You!

Are you ready?

- Power?

- Internet Access?

- Navigate to:

https://secure.fcgov.com/climatewise/

Agenda

45 min   myClimateWise overview and reporting
concepts

>> Working Break / Networking <<

45 min   Project reporting / work in small groups
/ one-on-one discussion / general Q&A

myClimateWise

- myCW tour
- Requirement #3, #5, and #8

Project Reporting – Requirement #2

1. Reasons for and importance of reporting
2. What qualifies as a project?

Projects – Where do I start?

1. What kind of project was implemented?

Gadget related project:
- 'Plug-in' change
- Reported one time; benefit carried forward by myCW
- Usually energy or water related

Behavior related project:
- Project results depend on behavior related action
- Reported annually
- Ex. = recycling rates, turn off the lights, and bike commuting projects

2. How was the project implemented?

Professionally implemented
- Estimated savings already documented

Self implemented
- Data are available; simple calculation can be carried out
- More complex project requires assistance from ClimateWise staff

Project Reporting Workflow

```
Project?  →  Gadget          →  Prof. executed
              (report once)
   ↓              ↓                    ↓
Behavior   →  Self executed   →  Report Data
(report
annually)
```

What do I need to report every year?*

- Annually report recycling and/or composting.
  - What do I need?
    Bin size, type of material, % full, & frequency of pick-ups

- Annually report commuting or other transportation projects
  - What do I need?
    Track mileage, mode (i.e. SOV vs. carpool or SOV vs. bike), & frequency of alternative mode

*reporting 1 of these 2 projects is a program requirement

ClimateWise
Business Smart.

City of
Fort Collins

Data - Energy Projects

Data Required

1. Documentation of energy savings (kWhs or therms) from contractor or rebate application

OR

2. Description of equipment prior to change (e.g. number, power, watts, type, or at least age)

3. Description of new equipment (e.g. power, watts, type)

4. Operational characteristics (e.g. hours per year that equipment is in operation)

Data - Water Projects

Data Required

1. Documentation of water savings (gallons or kgal) from contractor

OR

2. Description of equipment prior to change (e.g. flow rate or flush rate)

3. Description of new equipment (e.g. flowrate or flush rate)

4. Number of users (e.g. number of employees)

5. Type of environment (e.g. office)

Data - Solid Waste Projects

Data Required

1. Documentation of solid waste diversion (pounds, tons, cubic yards, gallons) from hauler

OR

2. Practice prior to change (e.g. landfilling)

3. Practice post change (e.g. recycling)

4. Material (e.g. aluminum, paper, etc.)

5. Size of container (e.g. 3 yd., 96 gal., etc.)

6. Frequency of pickup (e.g. weekly, on-call, etc.)

Data - Transportation Projects

Data Required
1. Practice prior to change
    a. Mode
    b. Mileage
    c. Fuel Type
    d. Vehicle Type

2. Practice post change (same data as above)

Project Form Tips

- What to know about 'Don't know'
- Are <u>all</u> projects ready for review?
- Report waste reduction and/or transportation related projects <u>every year!</u>

Post Workshop Tools

- Climate Wise Annual Reporting Tools page:

http://www.fcgov.com/climatewise/annual-reporting-tools.php

- Climate Wise Google Groups / Listserv

http://groups.google.com/group/climatewise

ALL THESE LINKS AND MORE ARE LOCATED IN myClimateWise!

Thank You!

REMEMBER, project / data reporting due March 1!

Workshop survey – We want your feedback!
