

Fort Collins Utilities Residential Green Energy Agreement

*I hereby agree to participate in the Fort Collins Utilities Green Energy Program. * I understand that my electric bill will include an increase of one cent per kilowatt-hour (kWh) to help cover the costs of purchasing renewable energy. I understand I will be notified of price changes and will be given an opportunity to change my subscription at that time. I understand that if, at some time in the future, I am no longer a customer of Fort Collins Utilities for any reason, I will be under no further obligation.*

***Special Services Agreement:**

The subscriber contract period is one year, starting when customer's green energy service begins. Subscription extensions will be automatic for one-year periods from that date. To terminate the agreement, the customer must provide 30 days advance written notice to Fort Collins Utilities. The Green Energy Program may be discontinued by Fort Collins Utilities upon the giving of 30 days advance written notice. This service is provided per the *Renewable Resource* clause in the applicable rate tariff and is subject to revisions by City Council. The Green Energy product will be made up of the following new renewable resources averaged annually: 100 percent wind generated in Wyoming and Oklahoma. The remainder of the electricity contains the following mix of resources: coal (74 percent), large hydroelectric (19 percent), renewables (3 percent, as called for in the *Energy Supply Policy*), natural gas (1 percent) and other (4 percent). The Green Energy rate is subject to a 6 percent "PILOT" fee (Payment in Lieu of Taxes), which is the equivalent of the property taxes and franchise fees a private utility would pay to the City for police, fire, parks and recreation, and other services. PILOTs are set by City Council and are added to electric, green energy, water and wastewater rates.
