

RECYCLE

CONSTRUCTION & DEMOLITION DEBRIS RECYCLING RESOURCES

The City of Fort Collins requires that wood, metal, cardboard, and aggregates (including concrete and masonry) be recycled at all new residential construction and all new commercial construction or residential or commercial additions and remodels over 2,500 square-feet. The City also requires that wood and metal be recycled from all demolition projects and where possible wood and salvageable architectural items such as doors, windows, cabinets or fixtures shall also be recycled. Project managers can either hire one full-service hauler to collect all trash and recyclables or may choose to haul materials themselves to a recycling specialist company. Resources for either option are listed below.

Note: City staff is able to assist if you have questions about implementing a construction site recycling program, please call Linda Hardin at (970) 416-2701 or Lhardin@fcgov.com.
