

GREEN APARTMENT TIPS

Residents of Fort Collins are proud to maintain and enhance the environment that we live in. With just a few simple activities, you can make a marked difference in the way you affect your local community and the world at large. You can try some of these tips: 

 Install compact fluorescent light bulbs and use Energy Star appliances.

 Repair leaky faucets and toilets. 

 Take your car to a car-wash to be cleaned and avoid stormwater contamination. Car washes collect the water so it's treated before it reaches local streams and rivers.

 Participate in alternative transportation to and from work or school. 

 Shop and eat at locally owned businesses and restaurants.

 Share equipment with a neighbor and friend instead of buying your own.

 Use non-toxic cleaners and chemicals for your home cleaning.

 Humidify your living space and save energy by drying your clothes on a drying rack. 

 Install a low-flow showerhead to get the most out of your water.

 Help start an apartment-wide recycling program.

 Have regular maintenance and tune-ups performed on your car to increase gas mileage and extend the life of your car.
