

How Crushing Benefits You

In 2009, City of Fort Collins' crushing operations recycled more than 100,000 metric tons of material. Crushing was recognized as a national best practice sustainability project for its reduction of water, solid waste, transportation pollution, and greenhouse gas. It also generates revenues.

To save water, the City offers rebates and recycling for Water Sense toilets. Residents or businesses replacing their toilets with a low-flow toilet, can receive a \$35 rebate. If the old toilet is recycled at Resource, you can receive an additional \$15. In 2009, water savings from toilet replacements were 43,989,000 gallons, the average water needed for 270 families! For more info, visit fcgov.com/conservation.

Crushing also avoided 90,000 metric tons of greenhouse gas (GHG), more than the entire City operations generates. The manufacturing of concrete emits high amounts of GHG, so many cities require recycling of construction debris. The City is doing its part to set a great concrete recycling example.

Disposals - Now Accepting

Please consider diverting any of these useable materials from the landfill and bring them to crushing operations, at no charge.

Pit Run

Clean dirt and rock mixture.

Concrete Chunks

Small, clean chunks, no rebar or wire mesh, no wood, other contaminants or excessive dirt.

Asphalt

Clean, broken or milled asphalt.

Toilets

Porcelain only, seat cover and any metal or plastic parts must be removed. To get rebate info on toilets, please visit fcgov.com/conservation.

Trash

Please note, mixed loads or excessive dirt will NOT be accepted.

Products - Now Selling

Below is a list of the products we offer. All products are subject to availability. Prices do not include sales tax and there is a \$15 minimum on all orders.

PRODUCTS	PRICE PER TON
----------	---------------

RRB	\$4.75
<i>1-1/4" recycled asphalt</i>	

Road Base	\$4.75
<i>1-1/4" dirt & rock</i>	

CCB	\$5.50
<i>1-1/4" crushed concrete</i>	

Unscreened Fill Dirt	\$1.00
----------------------------	--------

Screened Fill Dirt	\$2.50
--------------------------	--------

Screened Mixed Soil	\$8.50
<i>Leaves, dirt & grass clippings</i>	

SERVICES	PRICE
----------	-------

Weight Checks	\$5.00/ticket
---------------------	---------------

Uses for Recycled Aggregate

Any one of our recycled products may be used for a variety of jobs:

- road resurfacing,
- parking lot resurfacing,
- driveway resurfacing,
- material use for under buildings, and
- build-up ground for special projects.

Which Product is Right for Me?

Recycled asphalt has good compaction, remains inert and is virtually dust free.

Since **crushed concrete** compacts faster than any other product, it is well worth the extra \$.75/ton. Crushed concrete is also lighter in weight, non-expansive and has an moisture content of about 13%. The result is concrete absorbs twice the amount of water before becoming saturated.

Screened mixed soil consists of leaves, grass clippings and dirt. This product is allowed to naturally compost. It is turned for maximum composting, then screened.
