

Facts and Uses of Recycled Aggregate

Any one of our Recycled Products can be used for a variety of jobs:

- *Road Resurfacing*
- *Parking Lot Resurfacing*
- *Driveway Resurfacing*
- *Material Use for Under Buildings*
- *Build-up Ground for Special Projects*

Fact:

Recycled Asphalt has good compaction, it remains inert and it is virtually dust free.

Fact:

Since **Crushed Concrete** compacts faster than any other product, it is well worth the extra \$.75/ton.

Crushed Concrete is lighter in weight, non-expansive and it has an optimum moisture of about 13 percent. The result is that it will absorb twice the amount of water before becoming saturated.

Fact:

Screened Mixed Soil consists of leaves, grass clippings, wood and dirt. This product is allowed to naturally compost. It is turned for maximum composting and once it's ready, it is screened.
