

Zero-Waste Events and Meetings

November 6, 9 a.m.–noon

Meetings, events and celebrations can be a lot of work to organize and often create hard-to-recycle materials and trash that are difficult to clean up. Learn from caterers, conference planners and members of the hospitality industry how to host zero-waste events and reduce the environmental footprint of your meetings.

Green Industry Best Management Practices (BMPs)

December 4, 9 a.m.–noon

Learn the industry standards for water conservation and water quality protection from Green Industries of Colorado (GreenCO). Following the program, an exam covering the BMPs will be offered. Successful candidates will receive professional recognition from GreenCO.

Programs are free of charge and will be held at Café Columbine and Bakery, 802 W. Drake Rd., Suite 101 (east end of the building, near Drake Road and Shields Street).

2007 Business Environmental Program Series

Complimentary Programs
Sponsored by Fort Collins Utilities
and Natural Resources

2007 Business Environmental Program Series

Complimentary programs will be held at Café Columbine and Bakery, 802 W. Drake Rd., Suite 101

Benchmarking and Goal Setting for Energy and Water Management

September 11, 9 a.m.–noon

Every business can reap the financial and performance benefits of successful energy and water management. Explore the critical tasks of benchmarking and goal setting, identify a variety of tools and resources, and focus on best practices for getting it done.

Clean Energy Cluster Update

September 25, 9 a.m.–noon

The Northern Colorado Clean Energy Cluster is a business-led group of regional partners seeking to position Northern Colorado as the 'go to' region for smart grid technologies, renewable energy, energy efficiency, and cleaner and more efficient engines. Learn about the latest activities and projects.

Energy-Efficiency Project Evaluations

October 2, 9 a.m.–noon

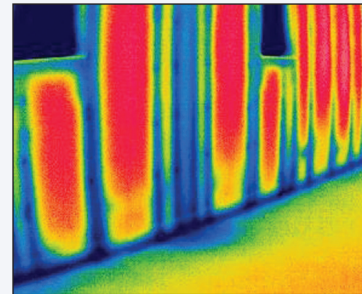

Through case studies, discover the tools for evaluating the technical and financial feasibility of energy-efficiency

projects. Learn about factors that may apply if you are thinking about net-zero energy use.

Today's Building Enclosures—Science, Materials and Details

October 16, 9 a.m.–noon

Learn about the energy loads of today's building enclosures, the science of creating an effective barrier system (environmental separation), current

assembly materials and how they are joined, and enclosure commissioning. *Presenter: Architect Kevin Knight, President of Retro-Specs Consultants from Manitoba, Canada.*

Cleaner Diesel Strategies for the Future

October 23, 9 a.m.–noon

As more fleet managers switch to biodiesel to improve engine performance and reduce reliance on foreign oil, Colorado is ramping up its biodiesel

production capacity. Learn how diesel fleets are embracing this and other strategies to reduce costs and emissions and discover how these new approaches work on a day-to-day basis.
