

Efficiency Works™ Assessment

Efficiency Works is a collaboration between Platte River Power Authority, Estes Park Light & Power, Fort Collins Utilities, Longmont Power & Communications, and Loveland Water and Power, offering assessments and rebates to help businesses increase efficiency and save energy, water and money.

Participation Rules

By submitting this application, participants acknowledge they have read, understand and agree to be bound by all program requirements and rules.

Eligibility

- Participants must be a current customer of one of the following:

[Estes Park Light & Power](#) (970-577-3583)

[Fort Collins Utilities](#) (970-221-6700)

[Longmont Power & Communications](#) (303-651-8386)

[Loveland Water and Power](#) (970-962-3000)

Process

1. Participant completes and submits the assessment application
2. Service Provider schedules the assessment with the participant
3. Service Provider performs the assessment with the participant
(Typically two to four weeks from application submittal)
4. Service Provider completes and sends a report to the participant
(Typically within 30 days of the assessment)

Confidentiality

All information gathered through this application will remain confidential and will only be provided to the participant and their designated provider(s) unless specifically authorized by the participant.

Service Provider Specific Assessment Details

Boulder County EnergySmart Expanded Assessments

Longmont Power & Communications partners with EnergySmart to help residents and businesses save money and energy. Many efficiency projects qualify for rebates, discounts or funding. Through the partnership, participants are also provided with expert Energy Advisors to assist with questions, incentive applications, project contractors, and more.

Fort Collins ClimateWise Expanded Assessments

ClimateWise partners are eligible for an expanded assessment that also includes solid waste, recycling, composting and transportation. If interested, contact ClimateWise prior to the assessment to become a partner; this would simply expand the focus of the current appointment, not postpone it.

Fort Collins Building Code Required Assessment

Fort Collins building code requires an energy assessment for alterations with a construction valuation above \$30,000. This excludes first-time interior finishes or if a previous energy assessment was performed within three years. The Efficiency Works assessment satisfies this code requirement. If completed early enough in the design process, the assessment may identify opportunities that can be incorporated into the planned project more cost effectively than if done separately. Implementation of any identified recommendations is voluntary. The assessment must be scheduled before receiving the permit and the report must be completed before receiving a Certificate of Occupancy.
