

Effective January 1, 2009

NON-RESIDENTIAL RAW WATER REQUIREMENT (RWR) SCHEDULE¹

For Water Services Not Included in the Residential Category

Raw water is required for the increase in water use created by new development and to ensure a reliable source of supply in dry years. Non-residential service shall include without limitation all commercial, industrial, public entity, group housing, nursing homes, fraternities, hotels, motels, commonly owned areas, club houses, and pools.

The minimum Raw Water Requirement (RWR) for water services up to 3-inches in diameter is shown below. The RWR for services 4-inch and larger are based on the applicant’s estimate of actual use, provided that such estimate is first approved and accepted by the General Manager. Options for satisfying the RWR include turning over water rights to the City in the form of water stock or city water certificates, OR paying the equivalent cash-in-lieu-of amount.

Meter Size (inches)	Minimum RWR (acre-feet) *	Equivalent Cash Payment at \$6,500/acre-foot	Minimum Annual Allotment (Gallons/Year)
3/4	0.90	or \$ 5,850	293,270
1	3.00	or \$ 19,500	977,550
1-1/2	6.00	or \$ 39,000	1,955,110
2	9.60	or \$ 62,400	3,128,170
3	14.40	or \$ 93,600	4,692,250
4 and above	Based on use		

* acre-foot = 325,851 gallons of water

RWR MAY BE SATISFIED BY ANY ONE, OR COMBINATION OF THE FOLLOWING:

- **Water rights (stock) acceptable to the City based on current conversion factors**
- **City of Fort Collins water certificates**
- **Cash at the rate of \$6,500 per acre-foot of RWR**

If the RWR is satisfied with water stock or city water certificates, transactions are completed at the Utilities before a water service permit is issued (refer to schedule of water rights and conversion factors acceptable to the City). If the RWR is to be satisfied with cash, payment is made at the Building and Zoning Department upon issuance of a building permit.

ANNUAL ALLOTMENT/SURCHARGE (related to Monthly Billing)

The RWR establishes an annual gallon allotment for each tap and subsequent monthly water account. A surcharge of \$3.06 per 1,000 gallons will be assessed on a customer’s monthly water bill when an account uses more water in a given calendar year than the gallons allotted for a particular tap size. The surcharge rate is billed in addition to the customer’s regular monthly tiered water rate. Once the annual allotment has been exceeded and the water surcharge appears on an account, the surcharge will continue to be billed each month through the end of that calendar year. Additional water stock, city certificates, or cash may be turned in to increase the annual allotment.

¹ Summarized from Sections 26-129, 26-149, and 26-150 of the Code of the City of Fort Collins.
