West Nile Virus Technical Advisory Committee
December 2, 2015 Meeting Minutes
Nix Farms Main Conference Room

Members in Attendance: Chet Moore, Broox Boze, Darrick Turner, Ann Powers, Greg McMaster, Liz Pruessner, Dana Kunze, Eric Levine

Staff in Attendance: Dan Weinheimer, Matt Parker, David Young, Tyler Marr

Welcome and Introductions

- Dan Weinheimer reviewed agenda

November 4 Minutes Approval

- Minutes were unanimously approved

Review and Prioritize Off-Season Work Plan

- Dan reviewed the task items identified at the November 4th meeting.
- McMaster suggested that his suggestion to accumulate known data in one accessible spot be added as a separate item to the task list, group agreed to look at this list.
 - Moore envisioned this as a database of known articles and other information
 - McMaster emphasized the collection/creation of graphs and tables, such as the abundance graphs he pulled from the City's website. Recommends showing City-wide information and individual zone information
- Group agreed to not create a resistance testing sub group, will be done anyways
- Group agreed to create a messaging sub-group to target community-wide sub groups
- Group agreed to have a subgroup evaluate the number and location of traps
 - Moore will do some offline analysis of what a trap reduction may look like
 - McMaster suggested that a report detailing what cost savings would look like in addition to any risks be included in the program manual
- Weinheimer suggested that we may want to look at the TAC's mission of reducing human infection in these subgroups
 - Moore suggested that the repellant messaging is important
 - Moore discussed a capstone student he is helping at CU Denver who is focusing on senior activities and where they occur in relation to the hot spots. Group seemed to like the idea of having the student present to TAC
 - Pruessner suggested placing signs in hot spots; Levine expanded the idea to look at providing repellant.
 - Messaging group will examine these possibilities

Establish or update sub-groups and assign topics

- Levine and McMaster will work on the pulling together of the various graphs and charts to be archived. Listed as the final draft of Pesticide and Repellant Literature Review in Agenda
- City staff will meet with various advisory board to discuss planned actions and looking at ways they can help in addition
- Program Manual update was agreed to be looked at on an as-needed basis.
- McMaster requested that we make annual weekly data available easily on the City's website
- Group agreed to provide input on which teams they would like to serve on before the next meeting.
- The next agenda will include an overview/vision for each sub group.

Public Comment

- There were no members of the public present.

Future Meetings

- Next meeting Dec 2nd 4:30 – 6:00 with County update in January.
