Bird Baths

The idea for this transformer theme ‘Bird Baths’ came from observing birds bathing in various places, whether it is in a bird bath structure, garden ponds, or bodies of water along a stream. I am inspired to paint colorful birds enjoying themselves in something they do in their daily world. The mural depicts whispy clouds, colorful birds, potted bird baths and natural bird baths formed by rocks. Also included are some foothills, greenery and Horse-tooth Mountain. I will use top quality colors and art paint. Some airbrushing is used, along with traditional paint brush work.
