

Transformer Cabinet Mural Project 2017
Artist: Werner Schreiber
Location: 3675 S. College (SP42997)

Sunbars

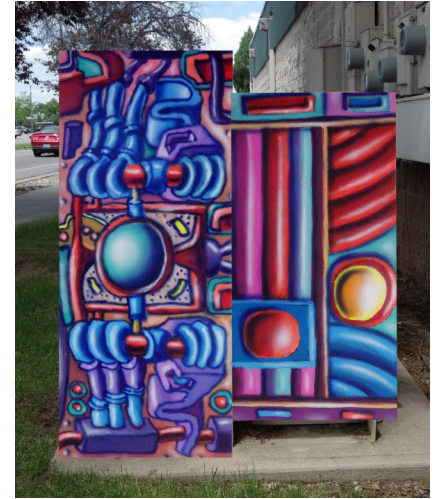

This design is busy with different shapes of objects . . . tubes, dimensional structures, and round sun bearings (balls). Everything is connected with each other. The design is an original idea which I discovered through my art explorations. I sketched a design out first with pen and paper combining forms and the layout. The final end product is a representation of these ideas.
