

Transformer Cabinet Mural Project 2017
Artist: Larry Tucci
Location: 1128 N. Timberline (SP77512)

My designs feature the Osprey, a beautiful fish-eating bird that is found here in Fort Collins during the breeding season. I tried to create action scenes that depict how these birds live, showing their unique beauty intimately instead of from a great distance. It is my hope that the different points of view in the paintings will feel like we are seeing through the birds' eyes.
