

Transformer Cabinet Mural Project 2017
Artist: Laura Riley
Location: 4300 E. Boardwalk Dr. (Need SP#)

Blossom

The concept of my transformer lies with the beatification and celebration of the State of Colorado Flower (Blue Columbine) and bird (Lark Bunting). I chose one large scale bird surrounded by flowers for each side viewed by traffic so they would be recognizable from a distance. The heart/wreath design with two birds would be somewhat similar on the front and back (towards the field) representing love for each other, animal kind, and for the State of Colorado. On top would be large scale graphic representation of one or possibly two flowers for foot traffic to view.
