Horsetooth Under The Sea

The main idea is to have Horsetooth mountain and other landmarks from the Rockies under the sea accompanied by various sea life and an old style scuba diver. The elements for each side will most likely be moved around for the actual painting as the box itself has an awkward shape on 4 of the 5 sides. I plan on adding more elements such as fish, crabs, jellies, etc as well as making the landmarks more prominent. For now this was a basic concept just trying to show the various elements. Placement is subject to change.
