

Transformer Cabinet Mural Project 2019

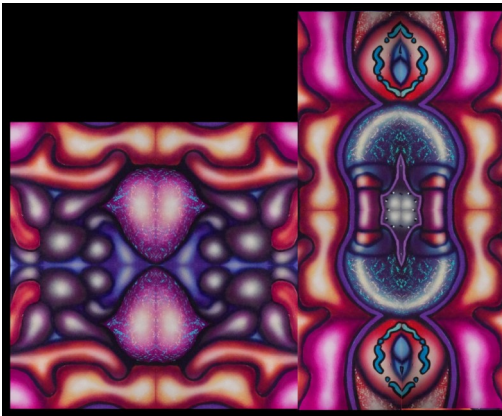

Artist: Werner Schreiber

Location: 1200 South College Ave.

Mechanical Play

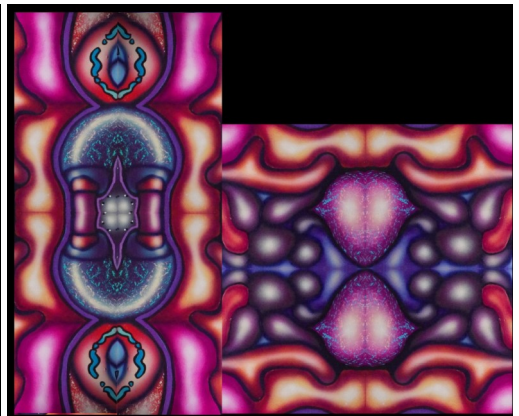

The unique style of this concept has different contrasting colors, beautiful shading and depth. Overall it is a contemporary design for a mural on a transformer cabinet box. It has a modern and futuristic flare to it, and is also very busy to deter graffiti. This new style is taking a next step from my previous transformer designs. Many new ideas are carefully composed to a final well balanced subject which should be interesting to the viewers passing by.
