

**Transformer Cabinet Mural Project 2011**  
**Artist: Francisco Estaban**  
**Location: 4 cabinets along the Mason Trail,**  
**between Swallow and Drake**

“Bikes and More Bikes” On this repeating pattern of bicyclists, bikers will be thickly outlined over a bright 2-color transition background. Bicycle wheels will be painted off-white which will create a contrast over the rich tints and tones of the background. The bicyclist’s jerseys and helmets will be diverse in color throughout all the boxes for the project. These contrasting color schemes will create a movement over the surface and create subtle optical vibrations. For continuity in design I will paint the inside of all the wheels off-white on all 4 cabinets. This will help create an optical effect of color vibration with the jersey and helmet colors. The bikers will be traveling in opposite directions creating a second optical effect of implied lines. Viewers eyes will move smoothly over organized chaos and vibrating directions.

Detail of design
