

Application for On-Street Bicycle Parking Corral

Overview:

Bicycle corrals are grouped bike parking installations placed in the parking lane. The City of Fort Collins will consider on-street bike parking corrals where demand for bicycle parking is higher than can be accommodated on the sidewalk. Approximately 8-12 bikes can be parked in one car space, making bicycle corrals an efficient use of roadway space.

The City will purchase and install up to 6 on-street bicycle corrals per year. Bicycle rack design will be determined by the City of Fort Collins. Applications will be reviewed and installed according to the schedule below.

Criteria for Recommending and Approving Bicycle Corrals

Bicycle corrals will be recommended where short-term bicycle parking demand cannot be accommodated on the sidewalk and will be prioritized where:

- Demand is for five or more bicycle parking spaces
- Location does not create safety concerns

Bicycle Corrals will not be located within:

- Bus loading zone
- Fire hydrant zone
- Tow-away zones
- Designated accessible parking spaces

If not approved:

- Sidewalk racks will be installed where feasible
- Locations may be requested in the future if reasons for denial change.

Application Review and Installation Schedule:

Applications/requests will be accepted on an ongoing basis. Applications will be reviewed monthly.

Application for On-Street Bicycle Parking Corral

Contact Information

Name of contact person/property or business owner

Email address and phone number

Describe the location where the bike corral is requested. Please be as specific as possible:

Please include a photo demonstrating the demand for additional on-street bike parking at your location.

Maintenance Agreement

By signing this application, the applicant(s) agrees to regular maintenance of the bicycle corral area, including sweeping/debris removal and snow removal around the infrastructure.

Application to install an on-street bicycle parking corral has been submitted for the address described above.
