Construction Debris Recycling

Construction debris takes up 35% of our landfill space in Larimer County. Starting in 2012, project managers of new buildings in Fort Collins must develop a plan for how to recycle, at minimum:

- wood
- cardboard
- metals
- asphalt, bricks, and concrete

This flyer provides locations of places where various types of recyclables may be taken, for builders who wish to do their own hauling. It also lists several entities that accept re-usable construction materials and several local companies that offer recycling services for construction sites. The lists are not all-inclusive; the City will endeavor to continually update this information. Please also visit <http://www.fcgov.com/recycling/centers.php?ID=55>.
