Offer 1.1: Engineering Core Offer

2019: $2,142,700 and 26.44 FTE, 0.00 Hourly FTE
2020: $2,155,621 and 26.44 FTE, 0.00 Hourly FTE

Offer Summary

This offer will fund the City's Engineering Department, which is made up of four divisions: Engineering Administration, Surveying, Capital Projects, and Right of Way (ROW) and Development Inspection. The Engineering Department also provides services for Traffic Operations; Streets; Community Development & Neighborhood Services; Planning, Development & Transportation Administration; FC Moves; Parks; Utilities; Police Services; Operation Services; IT; Transport; the City Attorney's Office, the City Manager's Office, and the Communications & Public Involvement Office.

Engineering provides:
- Executive oversight and coordination of all infrastructure activities within the 580 lineal miles of City ROW (Utilities both public and private), Development issues (i.e., Downtown Hotel, Midtown redevelopment, etc.)
- Quality assurance of all improvements within the ROW, which reduces long-term maintenance costs
- Surveying services to multiple City departments
- Development review coordination to identify conflicts and opportunities with private and public projects
- Technical engineering support to multiple City departments as it relates to improvement costs and benefits
- Administration of the development capital expansion fee program (Street Oversizing)
- Citywide project coordination efforts with all City departments, private utilities, major private developments and partner agencies, which helps reduce project conflicts and traffic impacts
- Coordination with the three railroads that interface with the City’s transportation system

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
✓TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
**Offer 1.1: Engineering Core Offer**

- **Engineering Administration** - Administrative support for all department functions (includes capital projects, Street Oversizing Program, Development Review, and bridge and safe routes to everywhere programs); Oversight and coordination of all infrastructure activities within the ROW, Implementation of the Land Use and Municipal Code ROW requirements. (FTE 6)

- **Surveying** - Provide surveying services to multiple City departments; Management of the surveying benchmark system; Review and preparation of legal ROW descriptions including property boundary research; Crime scene support. (FTE 5.65)

- **Capital Projects** - Design and construction of transportation capital projects with oversight of an annual 30 to 40 million dollar project budget. (FTE 10.5)

- **ROW and Development Inspection** - Inspection of construction in the City ROW; Permitting, enforcement, and management of City standards for the ROW; Assurance of conformance of development plans and specifications; Management and enforcement of the old town portable signs and right of way encroachments; Management and implementation of the Pedestrian Program. (FTE 5)

- This offer includes a contractual employee titled: Construction Inspector.

**Links to Further Details:**

- [http://www.fcgov.com/engineering](http://www.fcgov.com/engineering)

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

- **TRAN 6.1** - Improve safety for all modes of travel: Engineering improves the safety of all modes of travel. This is a very high priority for the Engineering Department. For example, the reconstruction of arterial intersections such as College and Prospect.

- **TRAN 6.2** - Manage traffic congestion and improve high-priority intersections: Engineering works interdepartmentally to identify and construct capital projects that decrease traffic congestion and improve high priority intersections.

- **TRAN 6.5** - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The Engineering Department oversees a multitude of programs and projects that improves or replaces transportation infrastructure in the transportation network.

**Improvements & Efficiencies**

- Identify projects to be grant ready.

- Continue to identify the appropriate project delivery mechanism for different projects. This includes the Construction Manager General Contractor (CMGC) process which allows us to select the contractor on qualifications as well as cost. It also allows the contractor and designer to work through the design resulting in better and more efficient projects.
Offer 1.1: Engineering Core Offer

- Work with Transport & FC Moves to administer the bus stop accessibility program and Safe Routes to school program.

- Continue to implement a methodology and analysis program used to prioritize pedestrian projects for safe, sustainable walking within City limits.

- Coordinate interdepartmentally for asset management and to complete improvements concurrently for cost savings to departments, and reduce the impacts to neighborhoods by eliminating multiple projects.

- Continue to coordinate closely with Community Development and Neighborhood Services (CDNS) on updates to the Development Review Process.

Personnel Changes

- N/A

Differences from Prior Budget Cycles

- A new addition to this offer is the cost of vehicle replacement. The Engineering Department has 22 vehicles in its fleet. We are now programming the replacement of four vehicles in this two year budget.

Explanation of Any Adjustments to Personnel Costs using object 519999

- Required per the budget manual, page 18, 1986 Early Retirement Enhancement, Engineering $867.00.

Summary of Changes Requested by BFO Teams or the Budget Lead Team

Changed three vehicles in the 2 year budget to four vehicles in the 2 year budget.

Data As Of: 3/7/19 at 3:03:35PM
**Offer 1.2: Transportation Capital Expansion Fee Program**

2019: $3,303,437 and 1.50 FTE, 0.00 Hourly FTE  
2020: $3,310,359 and 1.50 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will operationalize the City’s Transportation Capital Expansion Fee (TCEF) Program.

The Transportation Capital Expansion Fee program is the primary mechanism that the City uses to ensure that new growth pays for its proportional impact on the City’s transportation system.

The program accomplishes the following:
- Implements Council’s policy of growth paying its fair share of transportation infrastructure
- Determines and collects impact fees for new development projects
- Contributes funding to growth-related City Capital Projects (with appropriations through separate offers for this budget cycle) and provides project oversight and management, including review, construction and inspection
- Reimburses development for constructing roadway improvements above the local street access standards

TCEF is a one-time fee, collected upon development, and is used to fund system improvements related to growth. A minor amount of General Funds are included in the offer to fund improvements addressing existing deficiencies identified as a priority by the City during the development process. This offer appropriates the funds and authorizes staff to administer the TCEF program.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:  
✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

**Additional Information**

- Expected deliverables for this program include adding capacity to the transportation system throughout the City, and reimbursing development for constructing roadway improvements above the local street access standards. Future, ongoing operations and maintenance costs are not a part of the core program offer, and have been addressed in specific project offers.

- IMPACT TO PROJECTED REVENUE: This program is “self-funded” via the collection of a fee charged to developers based directly on the developments’ estimated impact to the transportation system. The amount of this offer is based on the estimated fee collection. Over half of the City’s arterial and collector streets (56%) have been constructed through participation in the TCEF Program.
**Offer 1.2: Transportation Capital Expansion Fee Program**

- Implements the Council’s policy of growth paying its fair share of transportation infrastructure. Impact fees are one-time payments that fund the expansion of public facilities needed to accommodate new development, ensuring that development pays its fair share of the costs of additional infrastructure.

- This offer is scalable by not awarding the general fund contribution of $250,000 / year to the program. Scaling this offer would result in the potential to miss opportunities to partner with developments to construct improvements aimed at addressing existing deficiencies. Historically, this general fund contribution has been included in the program's appropriation.

- The Transportation Capital Expansion Fee (TCEF) Program (formerly Street Oversizing), instituted by ordinance in 1979, was established to manage the construction of new arterial and collector streets, and is an “Impact Fee” funded program. The TCEF Program determines and collects impact fees for new development projects.

**Links to Further Details:**

- [https://www.fcgov.com/engineering/tcef.php](https://www.fcgov.com/engineering/tcef.php)

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✔)*

✔ TRAN 6.1 - Improve safety for all modes of travel: The TCEF Program is the funding mechanism for ensuring that transportation improvements are constructed along with new development.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: The TCEF Program builds new arterial and collector streets in newly developing areas, including bike lanes sidewalks and transit stops. The TCEF Program is the main funding, design, and construction program for constructing the needed transportation infrastructure in all growing areas of the City.

**Improvements & Efficiencies**

- TCEF Program funds are commonly combined with other project funds for leverage and efficiencies.

- The TCEF Program is flexible, efficient, and can either reimburse developers for eligible improvements or to build and manage them with the Capital Projects group.

**Performance Metrics**

- TRAN 21. Transportation Capital Projects On-Time and On-Budget

**Funding Source Total**: 3,303,437 3,310,359 0.2%
**Offer 1.3: KFCG City Bridge Program**

2019: $1,700,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $1,700,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will continue the City's Bridge Program, which includes ongoing bridge inspection, emergency repair, minor maintenance and bridge reconstruction for the City's transportation network.

The City has 287 bridges in its inventory. Of these, more than 50 are older than their design life, meaning the likelihood of their needing to be replaced is high. Note that age is a very high-level evaluation and actual programming of bridge replacements is based on many detailed factors that comprise the specific condition of each bridge.

Staff have used data from bridge inspections and a customized asset management tool to create a bridge maintenance and replacement optimization schedule, and based on this analysis, recommend a funding level necessary to design and replace at least two typical bridges per year, plus inspection and records maintenance. The level of funding needed is $2.3M per year, which will be used to repair and/or replace bridges throughout the City network.

This offer includes funding for repairs and replacements, and for inspections each year. In the 2015/2016 and 2017/2018 budget cycles bridges were funded through this core offer ($1.7M/year and an enhancement offer [$600,000/year] totaling $2.3M/year). This offer will continue bridge funding at a level similar to what has been used since 2015 through 2018.

Creating long-term, ongoing funding will add flexibility and predictability to the program. This will allow Engineering to coordinate projects with Utilities, Street Maintenance, Parks, Larimer County, Colorado Department of Transportation and other City departments.

Bridge projects in this budget cycle will be prioritized based upon: bridge condition and safety, partnership opportunities, and leveraging bridge funds for federal grants.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓):*

- ✓ TRAN 6.1 - Improve safety for all modes of travel
- - TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**
Offer 1.3: KFCG City Bridge Program

- Expected deliverables for this funding include: construction funding for the Drake Bridge replacement (near Research Boulevard), construction funding for the Vine Bridge replacement (west of Timberline), design funding for two bridges on Laporte Avenue, and ongoing bridge maintenance and inspections.

- Adequate maintenance and replacement of bridges is a critical, fundamental task required to maintain the current transportation infrastructure. Bridges support all modes of traffic including; vehicular, pedestrian, bicycle, and transit. Many of the gaps in our multi-modal network are due to sub-standard bridge widths.

- Future, ongoing operations and maintenance costs will be maintained through the ongoing funding of the Bridge Program.

Links to Further Details:
- Not applicable

Linkage to Strategic Objectives
(the primary objective is marked with a ✔)

✔ TRAN 6.1 - Improve safety for all modes of travel: If neglected, bridges can fail catastrophically. Narrow bridges cause unsafe conditions especially for pedestrians and bicyclists.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The bridge program has been funded for the last several budget cycles, and many of our worst bridges have received partial grant funds. Long-term certainty gives the program the ability to plan and coordinate projects over longer time frames and react to collaborative opportunities with other projects and departments.

Improvements & Efficiencies

- The City has had great success over the years with using Bridge Funds to match federal grants, with the most recent grant of $1,100,000 towards the replacement of Riverside Bridge over Spring Creek.

Offer 1.4: ENHANCEMENT: Design for Linden Street Bridge and Multimodal Improvements

2019: $200,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $300,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will provide funding for feasibility analysis and conceptual-level design for aesthetic and multi-modal enhancements to the Linden Bridge over the Poudre River and to evaluate sidewalk gaps on Linden Street from the Poudre River to Vine Drive.

Major components included in the feasibility and conceptual-level design effort include:
- separating the at-grade Poudre Trail from Linden Street (in conjunction with Park Planning)
- adding sidewalks on Linden Street from the Poudre River to Vine Drive
- landscaping and urban design opportunities for Linden Street and the Linden Street Bridge over the Poudre River

This offer will fund feasibility analysis and conceptual-level design as a collaborative effort among the City's Engineering, FC Moves, Utilities and Parks Departments. The Engineering Department, through this offer, will analyze potential aesthetic enhancements for the bridge and potential to complete bicycle and pedestrian gaps along Linden Street. Park Planning and Utilities (through Offers 32.7 and 11.12) will analyze the potential for constructing the Poudre River Trail under the exiting Linden Street Bridge.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information

- This is a collaborative project supporting multiple strategic objectives across several City Departments.

- This analysis will build upon recent multi-modal and streetscape improvements completed on Linden Street between Jefferson Street and the Poudre River.

- This analysis will evaluate opportunities for this area as redevelopment continues to occur in the River District and surrounding areas.

- Expected deliverables for this project include: preliminary design for multi-modal and urban design improvements along Linden Street and cost estimates for future budget cycles.

- There is no additional funding needs, at this time, for ongoing operations and maintenance.
**Offer 1.4: ENHANCEMENT: Design for Linden Street Bridge and Multimodal Improvements**

**Impact to Ongoing Expenses**
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: 
  
  $0

**Scalability and explanation**
This project is scalable, and if scaled, would result in less specific designs and a wider range (contingency) on the cost estimates.

**Links to Further Details:**
- Not applicable

**Linkage to Strategic Objectives**
*(the primary objective is marked with a ✓)*

✓ TRAN 6.1 - Improve safety for all modes of travel: This project would study multi-modal improvements along Linden Street, and potential crossing locations as the number of bicyclists and pedestrians increase in this area.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project would address preliminary design efforts to: complete two lengthy sidewalk gaps on Linden Street, analyze the potential of grade-separating the Poudre River Trail under the existing Linden Bridge (in conjunction with Park Planning and Utilities), and provide options for urban design/streetscape improvements similar to the Jefferson to Willow block of Linden Street.

**Offer 1.5: ENHANCEMENT: CCIP - Arterial Intersections**

2019: $400,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $400,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will deliver ballot-mandated improvements to arterial intersections throughout Fort Collins. This program is funded through the Community Capital Improvement Program (CCIP) ¼-cent sales tax passed in the fall of 2014.

The goal of this program is to make prioritized safety, operational and congestion improvements to arterial intersections throughout the community. This offer is a continuation of a 10-year program funded through Building on Basics. The projects are prioritized based on the 2011 Arterial Intersection Prioritization Study, which included a wide variety of data such as traffic volume, accident rates, intersection delay, pedestrian/bicycle safety and transit operations. The results of the Study are aligned with Key Strategic Outcome areas and focus on providing safe and reliable multi-modal travel throughout Fort Collins. The Study is being updated in 2018.

2017 funds were used for the design and construction of the College/Prospect intersection improvements. 2018 funds are being used for the design and construction of the College/Horsetooth intersection improvements.

2019 funds will be used for preliminary design of the College/Drake intersection. The 2020 funds will be used as matching funds for a $2.25M safety grant, funding improvements to the intersection of College/Trilby. Both intersections are high priority needs from the Study.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- This offer includes grant matching funds for planned safety improvements to the College/Trilby intersection.
- This offer includes preliminary design funding for the College/Drake intersection.
- This offer takes the data driven, cost/benefit analysis from the Study and constructs safety and congestion improvements to the City’s highest ranking arterial intersections.
- Expected deliverables for this project include: completing the design and right-of-way acquisitions for the College/Trilby intersection, and completing the preliminary design and construction cost estimate for the College/Drake intersection.
**Offer 1.5: ENHANCEMENT: CCIP - Arterial Intersections**

- Future, ongoing operations and maintenance costs include: asphalt and concrete pavements, sidewalks, underground utilities, traffic signals, traffic signs and striping, snow clearing operations, and landscaping/urban design improvements. These items will be maintained through existing operating budgets by multiple City departments.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

As proposed, this offer is not scalable.

**Links to Further Details:**

- [http://www.fcgov.com/engineering/aips](http://www.fcgov.com/engineering/aips)

**Linkage to Strategic Objectives**

(*the primary objective is marked with a ✓*)

- **TRAN 6.1 - Improve safety for all modes of travel:** The most common accident types which showed up in the Study were rear-end collisions and left turning movements across oncoming traffic. These accident types have been significantly reduced by constructing dedicated turn lanes and optimizing traffic signal phasing. Bicycle and pedestrian safety has been improved through enhanced crosswalks, pork chop islands at right turns, signing and striping.

- **TRAN 6.2 - Manage traffic congestion and improve high-priority intersections:** Typical projects focus on constructing turn lanes to add capacity and reduce vehicle wait time. The projects also improve bicycle, pedestrian, and transit facilities by installing enhanced amenities and signage for all users.

- **TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins:** Most of the intersection projects add turn lanes and increase the life span of existing pavements. The projects also improve crosswalks, ramps, and transit facilities to meet current Americans with Disabilities Act (ADA) standards. Typically, traffic signal systems, street signs, and striping are replaced and/or enhanced which addresses other components of the City’s aging infrastructure.

**Performance Metrics**

**Offer 1.6: KFCG ENHANCEMENT: Laporte Avenue Bridges and Multimodal Improvements**

2019: $600,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $600,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund design and construction of multi-modal improvements, bridge maintenance and turn-lane improvements on Laporte Avenue. The project is approximately one mile long on Laporte Avenue from Fishback Avenue to Sunset Street (approximately one-half mile on each side of Taft Hill Road).

This is a collaborative effort between the City’s Engineering and FC Moves departments with a majority of the funding coming from these departments.

Major components included in the design and construction effort include:
- implementing a key bicycle infrastructure route in the City’s Big Jump area  
- replacing two bridges on Laporte, east of Taft Hill  
- adding sidewalks and bike lanes to the gaps in the system  
- improving existing bus stops  
- urban design opportunities

Of the two bridges on Laporte Avenue, both are “functionally obsolete” (lacking adequate bicycle and pedestrian facilities) and one is “structurally deficient.”

The total project cost is estimated at $3M. This offer is highly leveraged with the following contributions: $1.5M is eligible for funding through Engineering’s Bridge Program (this will cover the cost of constructing the two bridges), $200,000 is eligible from Engineering’s Pedestrian Program, and $100,000 is eligible from FC Moves. The remaining $1.2M would need to be fronted through a capital project to cover design costs for the bridges and one mile of roadway, and to cover the construction costs of pavement widening and restriping.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections  
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: a recommended roadway alternative, project design, and construction by the end of 2020.
Offer 1.6: KFCG ENHANCEMENT: Laporte Avenue Bridges and Multimodal Improvements

- Future, ongoing operations and maintenance costs include: asphalt and concrete pavements, sidewalks, underground utilities, traffic signs and striping, snow clearing operations, two new bridges which will be built to a 75-year design life, and urban design improvements. These items will be maintained through existing operating budgets by multiple City departments.

- This project leverages existing department funding to meet multiple objectives (bridge replacements, bicycle lane improvements, reduce sidewalk gaps).

- The City of Fort Collins is one of ten cities involved in the Big Jump Project and aims to double bicycle ridership in northwest Fort Collins.

- This project will improve multi-modal safety and provide more accessible alternatives for students of Poudre High School and the Poudre Community Academy, as well as local residents.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $3,000

Scalability and explanation

This offer includes design and construction funding for the proposed Laporte Avenue improvements. Scaling this offer has the potential to reduce the width of bicycle and sidewalk facilities.

Links to Further Details:

- Big Jump Project website: https://peopleforbikes.org/placesforbikes/the-big-jump-project/

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel. Vehicular traffic will be analyzed along the corridor with turn lane modifications incorporated where space allows. Bicycle and pedestrian improvements will be provided by filling in the existing network gaps. Existing transit stops will be upgraded and sidewalk connections accommodated.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Traffic can routinely back up on Laporte Avenue between Impala and Taft Hill Road. This project will resolve this issue by modifying turn lanes, where feasible, and focusing efforts to increase bicycle ridership in the area as detailed in the Big Jump Project.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will replace a structurally deficient bridge and a functionally obsolete bridge. Replacing these types of structures are the highest priority of the Bridge Program. This project will address the lack of multi-modal infrastructure for one-mile of Laporte Avenue (Fishback Avenue to Sunset Street).

**Offer 1.9: ENHANCEMENT: CCIP - Willow Street - River District Construction**

2019: $2,667,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund the construction of improvements to Willow Street between College Avenue and Linden Street as identified in the River District Infrastructure Plan and the Willow Street Improvements Conceptual Design Report. This project is identified in the Community Capital Improvement Program (CCIP) ¼-cent sales tax passed in the fall of 2014. The project is currently under design, using 2018 CCIP funds. The 2019 funds are intended for construction.

The project will complement recently constructed improvements along Linden Street, with the goal of enhancing Willow Street in a similar manner. In addition, the project will maximize on-street parking, recognizing the need for additional parking in the area.

Project opportunities include:
- Potential for Low Impact Development solutions
- Emphasis on enhancements to pedestrian and bicycle mobility
- Significant urban design enhancements with features focusing on the historic and cultural significance of the River District
- A plaza area enhanced with Art in Public Places elements
- Addition of substantial on-street parking

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

 ✓ TRAN 6.1 - Improve safety for all modes of travel
 ✓ TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
 ✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods

**Additional Information**

- Expected deliverables for this project include: completion of construction by the end of 2019.
- Future, ongoing operations and maintenance costs include: asphalt and concrete pavements, sidewalks, underground utilities, traffic signs and striping, snow clearing operations, and landscaping / urban design improvements. These items will be maintained through existing operating budgets by multiple City departments.
- Construction of multimodal improvements focusing on connectivity to Old Town. The design and improvements will support current and future redevelopment.
Offer 1.9: ENHANCEMENT: CCIP - Willow Street - River District

Construction
- Significant urban design enhancements complementing River District standards, with the addition of on-street parking.
- Collaboration between City Departments and other entities to maximize improvements during one project

Impact to Ongoing Expenses
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: 
  $11,000

Scalability and explanation
This offer is not scalable as it is a dedicated construction funding from the CCIP project list.

Links to Further Details:
- Downtown River District website: http://www.fcgov.com/riverdistrict/

Linkage to Strategic Objectives
(the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: The Willow Street improvements will improve deficient facilities for all modes, but most specifically for bicycles and pedestrians.
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The Willow Street improvements will complete gaps in the sidewalk network and improve the aesthetics through urban design, landscaping, and Art in Public Places.
- TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods: A primary goal of the Willow Street improvements is to increase on-street parking. The project will add approximately 70 permanent parking spaces.

**Offer 1.10: ENHANCEMENT: CCIP - Linden Street Renovation Design and Construction**

2019: $563,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $2,898,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund improvements to Linden Street between Jefferson Street and Walnut Street. This project is identified in the Community Capital Improvement Program (CCIP) ¼-cent sales tax passed in the fall of 2014. The 2019 funds will be used for design and public outreach; the 2020 funds are intended for construction.

The project will complement recently constructed improvements along Linden Street (north of Jefferson Street) and the renovation of Old Town Square. The project will improve aging infrastructure and focus on a “convertible street” design.

Project opportunities include:
- Potential for Low Impact Development solutions
- Emphasis on enhancements to pedestrian and bicycle mobility
- Urban design and landscaping enhancements
- A hybrid street concept whereby the entire street becomes a flexible space for all travel modes

Future, ongoing operations and maintenance costs are estimated at $12,000 per year and include: pavements, sidewalks, utilities, traffic signs and striping, snow clearing operations and landscaping/urban design improvements.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: design of the project in 2019 and completion of construction by the end of 2020.

- Construction of multimodal improvements focusing on connectivity between Old Town and the Downtown River District. Urban design and landscaping enhancements will tie Old Town Square to the River District.

- Collaboration between City Departments and other entities will maximize improvements during one project.

- Design and construction improvements will provide for a flexible street space.
Offer 1.10: ENHANCEMENT: CCIP - Linden Street Renovation Design and Construction

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $12,000

Scalability and explanation

This offer is not scalable as it is dedicated design and construction funding from the CCIP project list.

Offer 1.11: ENHANCEMENT: CCIP - Bike/Ped Grade-Separated Crossing Fund

2019: $2,000,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will deliver ballot-mandated improvements to construct bicycle and pedestrian grade separated crossings (underpasses and overpasses). This is one of the programs specifically funded through the Community Capital Improvement Program (CCIP) ¼-cent sales tax passed in the fall of 2014. The goal of this program is to make prioritized safety improvements at key conflict locations throughout the City.

The projects are prioritized based on the 2018 Bicycle and Pedestrian Grade Separation Prioritization Study, which includes a wide variety of data to develop recommendations including demand, connectivity, safety, public support, social equity and opportunities for grants or other funding partners. The results of the Study are aligned with Key Strategic Outcome areas and focus on providing safe and reliable multi-modal travel throughout Fort Collins.

The 2016 funds were used as local match and overmatch for a Transportation Alternatives Program (TAP) grant for the proposed Power Trail grade separation at Harmony Road. The 2019 funds will be used as matching funds for other grant opportunities for the top five crossing locations from the Study and as partial construction funding for the Harmony/Power Trail project. Other top-ranked locations from the Study include: Mail Creek crossing at Union Pacific, Mason Trail at Drake Road, Power Trail to Caribou at Union Pacific, and Mason Trail at Horsetooth.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel

Additional Information

- Expected deliverables for this project include: completing the design and construction of the Harmony Road/Power Trail grade-separation and advancing preliminary designs and cost estimates for other top ranked locations.

- No additional funding is being requested for ongoing operations and maintenance with this offer.

- This offer includes potential grant matching funds for planned bicycle/pedestrian grade separation projects, and funding for preliminary design of the top ranked crossing projects.

- This offer includes construction funding for a planned grade separation of the Power Trail at Harmony Road.
Offer 1.11: ENHANCEMENT: CCIP - Bike/Ped Grade-Separated Crossing Fund

- This offer takes the data driven, cost/benefit analysis from the Study and constructs safety and mobility improvements to the City’s highest ranking bicycle/pedestrian grade separation locations.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $0

Scalability and explanation

This offer is not scalable as it is dedicated design and construction funding from the CCIP list.

Links to Further Details:

- Not applicable

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for grade separations for bicyclists and pedestrians. This will create a safer environment for all modes, by reducing the number of at-grade crossings with arterial streets and railroad crossings.

Offer 1.12: ENHANCEMENT: South Timberline Improvements  Stetson Creek Drive to Trilby Road (Right-of-Way, Grant Match and Partial Construction)

2019: $2,300,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will complete the right-of-way, provide grant matching funds, and complete the modified four lane arterial section of Timberline Road from Stetson Creek Drive to Trilby Road with limited urban design and no raised, landscaped medians. Offer 1.13 constructs standard urban design and raised, landscaped medians.

This project includes the following elements:
- Completing a modified for Timberline Road from Stetson Creek Drive to Trilby Road
- Intersection and capacity improvements at the intersections of Timberline with Kechter and Zephyr
- Completing gaps in bicycle and pedestrian facilities
- Limited landscaping improvements

A portion of the funding for this project will come from a Surface Transportation Block Grant (STBG) and the Transportation Capital Expansion Fee (TCEF) program; $500,000 in design funding for this project was appropriated in 2018 from the TCEF program.

The right of way and construction cost for this section of Timberline Road has a concept-level estimate of $6.5M. Of this, $2.3M is eligible for funding through the TCEF program (2019 funding and will be appropriated with this offer), and $2.2M comes from the STBG grant. The $2.2M grant funding will be appropriated in 2020 through separate Council action. The remaining $2M was requested from KFCG (linked to a separate offer 1.13) for standard landscaped medians and urban design elements.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
- ✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information

- Expected deliverables for this project include: completing the right-of-way acquisitions and construction by the end of 2020 through context sensitive design solutions.
- Future, ongoing operations and maintenance costs are estimated at $22,000 per year and include: pavement, sidewalks, utilities, traffic signals, traffic signs and striping, snow clearing operations, and landscaping/urban design improvements.
Offer 1.12: ENHANCEMENT: South Timberline Improvements  Stetson Creek Drive to Trilby Road (Right-of-Way, Grant Match and Partial Construction)

- This project will ultimately solve mobility, access, and safety issues for nearby, existing neighborhoods that have been impacted by the growth in traffic and congestion along Timberline.

- This offer will fund the right of way, federal grant match, and construction.

- $500,000 has already been appropriated from the TCEF program to begin design work in 2018.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $14,000

Scalability and explanation

Since this funding is coming from Transportation Capital Expansion Fee (TCEF) reserves, we are not proposing to scale this offer. The funding that we are bringing from TCEF is the minimum program requirement to complete the local street portion of the project.

- Not applicable

Linkage to Strategic Objectives

(the primary objective is marked with a √)

√ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel. Vehicular crashes are expected to be reduced by adding capacity to the transportation system and by making intersection improvements. Bicycle and pedestrian improvements will be brought up to standards and connected throughout the corridor.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Traffic can routinely back up Timberline during peak travel times, which creates difficulty for left-turning vehicles along the corridor. The project will resolve this issue by: improving the existing Kechter intersection, signalizing the Zephyr intersection, and installing strategically placed medians for vehicle safety.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will address the lack of transportation and utility infrastructure for approximately 1.5 miles of Timberline Road from Stetson Creek Drive to Trilby Road. Where applicable, existing pavement life will be extended through various pavement treatments.

Offer 1.13: KFCG ENHANCEMENT: South Timberline Improvements
Stetson Creek Drive to Trilby Road (Construction Enhancement)

2019: $1,000,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $1,000,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will complete the standard urban design and raised, landscaped median construction of Timberline Road from Stetson Creek Drive to Trilby Road. Offer 1.12 constructs the four-lane arterial roadway with limited urban design and no raised, landscaped medians.

This project includes the following elements:
- Completing the four lane arterial standards for Timberline Road from Stetson Creek Drive to Trilby Road
- Intersection and capacity improvements at the intersection of Timberline with Kechter and Zephyr
- Completing gaps in bicycle and pedestrian facilities
- Constructing raised, landscaped medians for a majority of the corridor
- Urban design elements

A portion of the funding for this project will come from a Surface Transportation Block Grant (STBG) and the Transportation Capital Expansion Fee (TCEF) program. $500,000 in design funding for this project was appropriated in 2018 from the TCEF program.

The right of way and construction cost for this section of Timberline Road has a concept-level estimate of $6.5M. Of this cost $2.3M is eligible for funding through the TCEF program (2019 funding, which is linked to a separate offer [1.12] submitted for TCEF) and $2.2M comes from the STBG grant. The $2.2M grant funding will be appropriated in 2020 through separate Council action.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information

- Expected deliverables for this project include: completing the right-of-way acquisitions and construction by the end of 2020 through context sensitive design solutions.

- Future, ongoing operations and maintenance costs with this offer are estimated at $8,000 per year and include: landscaping/urban design improvements.

- This project will ultimately solve mobility, access, and safety issues for nearby, existing neighborhoods that have been impacted by the growth in traffic and congestion along Timberline.
**Offer 1.13: KFCG ENHANCEMENT: South Timberline Improvements**

*Stetson Creek Drive to Trilby Road (Construction Enhancement)*

- This offer will fund the right-of-way and construction phases.
- $500,000 has already been appropriated from the TCEF program to begin design work in 2018.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $8,000

**Scalability and explanation**

Based on recent similar projects, this is a minimum amount necessary to accomplish the project goals. If this amount is reduced, a majority of the landscaped median improvements would have to be eliminated.

**Offer 1.14: ENHANCEMENT: College Avenue and Trilby Road Intersection Improvements (Design and Right-of-Way)**

2019: $600,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this Offer from Transportation Capital Expansion Fee (TCEF) reserves will complete the design, final construction estimate, and right of way acquisition for the College Avenue and Trilby Road Intersection.

The City has applied for and received a $2.25M safety grant for this intersection. The matching funds for the grant (approximately $225,000) will come from TCEF reserves. When factoring in intersection geometry and traffic volumes, this intersection experiences the second highest rate of crashes in the City.

This project includes the following elements: (1) Adding dual northbound and southbound left turn lanes on College Avenue, (2) Adding a dedicated right turn lane from eastbound Trilby to southbound College Avenue, (3) Replacing the existing traffic signal system, (4) Adding raised medians and bicycle/pedestrian improvements and, (5) landscaping and urban design elements.

The total project cost for this intersection has a concept-level estimate of $5.0 M. Of this cost $600,000 is eligible for funding through the Transportation Capital Expansion Fee (TCEF) program (which will be funded with this offer as the maximum development contribution to this project), $550,000 will be allocated from the Arterial Intersections CCIP funding, and $2.25 M comes from the federal safety grant. The project team will complete the design, final estimate, and position the project for construction in the 2021 / 2022 budget cycle.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓):*

✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

**Additional Information**

- Expected deliverables for this project include: completing the design, creating a final construction estimate, and right of way acquisition by the end of 2020.

- This project will address safety and operational improvements at this intersection which has a higher than expected rate of vehicle crashes. This project will also address multi-modal issues by constructing bicycle, pedestrian, and ADA compliant improvements.

- This offer will leverage the significant $2.25 M federal safety grant and will position the project for constructing the improvements in the 2021 / 2022 budget cycle.
Offer 1.14: ENHANCEMENT: College Avenue and Trilby Road Intersection Improvements (Design and Right-of-Way)

- Approximately 46,000 vehicles utilize this intersection on a daily basis. On average, this intersection experiences 33 crashes per year, with 11 crashes being severe. When factoring in intersection geometry and traffic volumes, this intersection experiences the second highest rate of crashes in the City.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $0

Scalability and Explanation

This offer would make the total project budget $3.4M. Based on recent similar projects, the minimum amount necessary to accomplish the project goals is estimated at $5.0M. If this amount is reduced, some proposed improvements would have to be eliminated.

Links to Further Details:

- Not applicable

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel. Left turn approach crashes are prevalent at this intersection. This issue will be addressed with the addition of dual left turn lanes on College Avenue. Bicycle, pedestrian, and transit (where applicable) improvements will be provided throughout the footprint of the proposed improvements.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: This intersection is one of the most congested locations within the City and experiences a higher than expected rate of crashes. The project will resolve this issue by: constructing multiple auxiliary turn lanes, replacing the traffic signal system and, installing raised medians where feasible.

Offer 1.15: KFCG ENHANCEMENT: College Avenue and Trilby Road Intersection Improvements (Construction)

2019: $800,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $800,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this Offer will complete the construction of improvements to the College Avenue and Trilby Road Intersection.

The City has applied for and received a $2.25 M safety grant for this intersection. The matching funds for the grant (approximately $225,000) will come from the Transportation Capital Expansion Fee (TCEF) reserves.

This project includes the following elements: (1) Adding dual northbound and southbound left turn lanes on College Avenue, (2) Adding a dedicated right turn lane from eastbound Trilby to southbound College Avenue, (3) Replacing the existing traffic signal system, (4) Adding raised medians and bicycle/pedestrian improvements and, (5) landscaping and urban design elements.

The total project cost for this intersection has a concept-level estimate of $5.0 M. Of this cost $600,000 is eligible for funding through the Transportation Capital Expansion Fee (TCEF) program (which will be funded with offer 1.14 as the maximum development contribution to this project), $550,000 will be allocated from the Arterial Intersections CCIP funding, and $2.25 M comes from the federal safety grant. The project team will complete the design, final estimate, and position the project for construction in the 2021 / 2022 budget cycle if additional funds are available in future years.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information

- Expected deliverables for this project include: completing the design, right-of-way acquisition, and construction of the project by the end of 2020.

- Future, ongoing operations and maintenance costs are estimated at $6,000 per year and include: pavement, sidewalks, utilities, traffic signals, traffic signs and striping, snow clearing operations, and landscaping/urban design improvements.

- This project will address safety and operational improvements at this intersection which has a higher than expected rate of vehicle crashes. This project will also address multi-modal issues by constructing bicycle, pedestrian, and ADA compliant improvements.
**Offer 1.15: KFCG ENHANCEMENT: College Avenue and Trilby Road Intersection Improvements (Construction)**

- This offer will leverage the significant $2.25 M federal safety grant and position the project for constructing the improvements in the 2021 / 2022 budget cycle.

- Approximately 46,000 vehicles utilize this intersection on a daily basis. On average, this intersection experiences 33 crashes per year, with 11 crashes being severe. When factoring in intersection geometry and traffic volumes, this intersection experiences the second highest rate of crashes in the City.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $6,000

**Scalability and explanation**

This offer would make the total project budget $5M. Based on recent similar projects, this is a minimum amount necessary to accomplish the project goals. If this amount is reduced, some proposed improvements would have to be eliminated.

Offer 1.16: KFCG ENHANCEMENT: Arthur Ditch Safety Improvements

2019: $250,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $250,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will build upon the initial findings of the Arthur Ditch Alternatives Analysis study completed by the City in 2017. This study identified several conceptual-level alternatives to address the covered section of the ditch between Wood Street and Laurel Street. This offer proposes to refine this study; identifying the preferred alternatives, performing a more thorough feasibility analysis on the preferred alternatives, and completing preliminary engineering and cost estimates for the preferred alternatives.

The Arthur Ditch was put underground in a concrete culvert through Fort Collins from Wood Street to Laurel Street around 1933. The culvert passes through public right-of-way (ROW) and approximately 67 private properties. Neither the City nor the ditch company agreed to maintain the culvert in private property, and it is now more than 80 years old. The culvert has not been regularly maintained or inspected. The ditch is in a prescriptive easement that is not specifically described or listed in property records. It is likely that many property owners are not aware of its presence under their property.

The culvert is well past its expected useful life and has been rapidly failing in the right-of-way where the City has the responsibility to repair and replace it. While many sections of the Arthur Ditch have been replaced in the public ROW, there are still streets and alleys with the original Arthur Ditch, which is now structurally deficient.

After witnessing the condition of the ditch in the right-of-way, staff have become increasingly concerned that the ditch will begin to fail on private property.

In some cases, the cost to replace the culvert on private property in a traditional manner may exceed the value of the property.

Because the cost to replace the ditch is so high and because of the public ROW and private property owners affected (approximately 67), staff have identified this as a significant public health and safety threat.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):
✔ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
Offer 1.16: KFCG ENHANCEMENT: Arthur Ditch Safety Improvements

- Expected deliverables for this project include: public engagement and awareness related to the location and status of the Arthur Ditch, safety improvement recommendations, and potentially constructed projects.

- No additional funding is being requested for ongoing operations and maintenance.

- This offer is a pro-active approach to a complex problem potentially affecting the City, private property owners and the ditch company.

- It is only a matter of time before this culvert begins to fail on private property; this offer takes the initiative to have a solution in place before that happens. This offer seeks an efficient, innovative solution that creates a win-win for all stakeholders.

- This offer will provide needed information to inform an educated decision about the risks, liabilities, and solutions to the long term maintenance of the Arthur Ditch.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

Scalability and explanation

Due to the potential ancillary reduction of liability to the bridge program, this offer could be reduced and would result in less progress with evaluating the top alternatives for permanent solutions as recommended with the Arthur Ditch study effort.

Links to Further Details:

- Not applicable

Linkage to Strategic Objectives

(The primary objective is marked with a ✔)

✔ TRAN 6.1 - Improve safety for all modes of travel: This project will ultimately provide quality infrastructure for all modes of travel, similar to numerous Arthur Ditch projects completed over the past 10 years by the City’s Bridge Program.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The Arthur Ditch was put underground in a concrete culvert through Fort Collins from Wood Street to Laurel Street around 1933, and the culvert has not been regularly maintained or inspected. Currently, 8 locations have been identified as structurally deficient within the City’s right-of-way.

**Offer 1.17: ENHANCEMENT: Harmony/Power Trail Grade-Separated Crossing and Trail Extension**

2019: $400,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the design and construction of a bicycle and pedestrian grade separation of Harmony Road.

This is a crucial bicycle and pedestrian infrastructure need at the local and regional level as identified in the 2013 North Front Range MPO Bicycle Master Plan, the 2013 City of Fort Collins Paved Recreational Trail Master Plan and the 2014 City of Fort Collins Bicycle Plan.

The existing Power Trail is a 10-foot-wide, multi-use, paved concrete trail running north and south through Fort Collins. The northern end of the trail begins at the Edora Pool and Ice Center (EPIC) and ties into the City's Spring Creek Trail (east-west). A majority of the Power Trail parallels, and is within, the Union Pacific Railroad (UPRR) right-of-way. The trail merges with the Fossil Creek Trail, passes under Trilby Road and Carpenter Road, and connects to the City of Loveland.

The total project cost is estimated at $5M. Of this, $400,000 is eligible for funding through the Transportation Capital Expansion Fee (TCEF) program (which will be funded with this offer), $2M will be allocated from the Bicycle/Pedestrian Grade Separation CCIP funding (which includes $1.1M from 2016 funding [already appropriated], and $0.9M from 2019 funding), and $800,000 comes from a Transportation Alternatives Program (TAP) grant. The remaining $1.8M will need to be funded through a capital project (linked to a separate offer [1.18] submitted for KFCG).

This offer is being submitted in conjunction with a Parks Planning and Development offer (32.1) to complete the existing three-quarter mile gap in the Power Trail, north and south of Harmony Road.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Staff issued a design Request for Proposals (RFP) in the spring of 2018 to secure a consultant team for alternatives analysis and design documents.

- Expected deliverables for this project include: an alternatives analysis study, public outreach, right-of-way, and completing construction by the end of 2020.
**Offer 1.17: ENHANCEMENT: Harmony/Power Trail Grade-Separated Crossing and Trail Extension**

- Future, ongoing operations and maintenance costs are estimated at $5,000 per year and include: pavement, sidewalks, utilities, traffic signs and striping, snow clearing operations, a grade-separated structure which will be built to a 75-year design life, and landscaping/urban design improvements.

- This offer includes grant matching funds for planned bicycle/pedestrian grade separation projects. This offer includes construction funding for a planned grade separation of the Power Trail at Harmony Road.

- This offer takes the data driven, cost/benefit analysis from the Study and constructs safety and mobility improvements to the City’s highest-ranking bicycle/pedestrian grade separation locations.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $5,000

**Scalability and explanation**

As proposed, this offer is not scalable.

**Offer 1.18: KFCG ENHANCEMENT: Harmony/Power Trail Grade-Separated Crossing and Trail Extension**

2019: $500,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $1,300,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the design and construction of a bicycle and pedestrian grade separation of Harmony Road.

This is a crucial bicycle and pedestrian infrastructure need at the local and regional level as identified in the 2013 North Front Range MPO Bicycle Master Plan, the 2013 City of Fort Collins Paved Recreational Trail Master Plan and the 2014 City of Fort Collins Bicycle Plan.

The existing Power Trail is a 10-feet-wide, multi-use, paved concrete trail running north and south through Fort Collins. The northern end of the trail begins at the Edora Pool and Ice Center (EPIC) and ties into the City’s Spring Creek Trail (east-west). A majority of the Power Trail parallels, and is within, the Union Pacific Railroad (UPRR) right-of-way. The trail merges with the Fossil Creek Trail, passes under Trilby Road and Carpenter Road, and connects to the City of Loveland.

The existing Power Trail has approximately a three-quarter mile gap in it, north and south of Harmony Road. The detour route is approximately 1.5 miles long and requires users to cross Harmony Road at grade at McMurry Avenue. This offer proposes to provide a grade separation at Harmony Road and to complete the three-quarter mile gap in the Power Trail.

The total project cost is estimated at $5M. Of this cost $400,000 is eligible for funding through the Transportation Capital Expansion Fee (TCEF) program (linked to a separate offer [1.17] submitted for TCEF funding), $2M will be allocated from the Bicycle/Pedestrian Grade Separation CCIP funding (which includes $1.1M from 2016 funding [already appropriated] and $0.9M from 2019 funding), and $800,000 comes from a Transportation Alternatives Program (TAP) grant. The remaining $1.8M will need to be funded through a capital project (this offer).

This offer is being submitted in conjunction with a Parks Planning and Development offer (32.1) to complete the existing three-quarter mile gap in the Power Trail, north and south of Harmony Road.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel

**Offer 1.19: ENHANCEMENT: Jefferson Street Final Design - College to Lincoln**

2019: $300,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund the right-of-way acquisition phase for Jefferson Street from College Avenue to Linden Street. This is a collaborative effort between the City’s Engineering and Utilities departments.

The preliminary design was completed in 2018, and the City received clearance from the Colorado Department of Transportation (CDOT) to proceed to the right-of-way acquisition phase.

The primary goals of the project are:
- improve multi-modal facilities
- formalize on-street parking in the area
- replace underground utilities that are nearing the end of their design life
- improve safety by constructing raised medians
- install urban design/landscape improvements

Funding the right-of-way phase will allow:
- an opportunity for final design for the roadway, wet utilities and dry utilities in the 2021/2022 budget cycle
- refinement of the construction cost estimate, which is currently in the $12-14M range
- getting the project “grant ready” for construction funding opportunities
- evaluating construction alternatives and phasing to minimize impact to local businesses and the travelling public

Current funding includes the following: $1M Congestion Mitigation and Air Quality (CMAQ) federal grant and $250,000 from the Building on Basics (BOB) intersection funds (this funding was used for an alternatives analysis of the street cross-section, preliminary design and environmental/historical clearances). Additional funding is being requested to complete the right-of-way phase.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✔*):

✔ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: completing the right-of-way phase, searching for construction funding grant opportunities, and refining the construction cost estimate to position the project for construction funding in the 2021/2022 budget cycle.
Offer 1.19: ENHANCEMENT: Jefferson Street Final Design - College to Lincoln
- No additional funding is being requested for ongoing operations and maintenance.
- This project leverages grant funds to continue progress toward having the project shovel-ready.
- This is a collaborative project supporting multiple strategic objectives across several City Departments.
- The primary goals of the project are safety improvements for all modes, aesthetic improvements consistent with the Poudre River District design standards, and replacing aging utility infrastructure.

Impact to Ongoing Expenses
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $0

Scalability and explanation
This offer is not scalable since this is the required amount of money to complete the right-of-way phase.

Links to Further Details:
- Not applicable

Linkage to Strategic Objectives
(the primary objective is marked with a ✓)
✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel by: installing bicycle facilities which do not currently exist, improving sidewalks and making routes ADA accessible, and installing raised medians in key locations to reduce the number of vehicular crashes.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will install bike lanes which do not currently exist, replace aging and undersized wet utilities, resurface the roadway to extend the pavement life, and formalize the existing on-street parking.

**Offer 1.20: ENHANCEMENT: Debt Service for Lemay Realignment and Suniga Road Improvements Project**

2019: $808,750 and 0.00 FTE, 0.00 Hourly FTE  
2020: $808,500 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the final design and construction of the Lemay Realignment (Lincoln to Conifer), a grade-separated roadway bridge over the Burlington Northern Santa Fe (BNSF) Railway and Vine Drive, and the new intersection of Suniga Road and the Lemay Realignment.

This project includes the following elements:
- Completing the four-lane arterial standards for Lemay Avenue at the intersection with Lincoln Street  
- Extending Buckingham Street from Ninth Street to the Lemay Realignment  
- Building a four-lane roadway bridge over the BNSF Railway and Vine Drive  
- Constructing a new arterial-arterial intersection of Lemay Avenue and Suniga Road, northeast of the current Vine Drive and Lemay Avenue intersection  
- Completing the Lemay Realignment at the existing intersection with Conifer Street.

The project provides a wide range of benefits, but three important ones are:
- A solution to congestion, access and livability problems for historic neighborhoods near Lemay Avenue (Ninth Street) and Vine Drive  
- Improvements to traffic/train-switching delays and safety for the traveling public  
- Key improvements to deficient and lacking infrastructure including sidewalks, bike lanes, bridges and pavement

This high priority transportation capital project is ranked in the top ten on the Capital Improvement Projects (CIP) list within the adopted Transportation Master Plan. This offer includes final design and construction funding and is highly leveraged with previous BFO offers and the City’s Transportation Capital Expansion Fee (TCEF) program.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections  
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: completing the final design, hiring a general contractor to assist with constructability and phasing, and completing construction by the end of 2020. 60% project design and construction estimating were completed in 2018.
**Offer 1.20: ENHANCEMENT: Debt Service for Lemay Realignment and Suniga Road Improvements Project**

- Future, ongoing operations and maintenance costs include: asphalt and concrete pavements, sidewalks, underground utilities, traffic signals, traffic signs and striping, snow clearing operations, a roadway bridge which will be built to a 75-year design life, and landscaping/urban design improvements. Many of these items will be maintained through existing operating budgets by multiple City depts.

- Since this is such a large capital project, with a large landscaping component, additional funding is being requested for ongoing operations and maintenance in the amount of $20,000 per year.

- This project will address critical long-term existing deficiencies for all modes of travel that are only worsening with additional development in the area. This project will ultimately solve mobility, access, and emergency services problems for nearby, existing neighborhoods that have been disproportionately impacted by the growth in traffic and congestion near Vine and Lemay.

- Funding sources for this $22 M project:
  - Previous BFO (2015 - 2018) - $2 M
  - TCEF - $10 M ($1.4 M already appropriated, $8.6 M future appropriation)
  - Debt Financing - $10 M
  - Interest on Debt Financing - $6 M (repaid at $800k per year for 20 years)

  Total cost to the City - $28 M

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $820,000

**Scalability and explanation**

This offer includes final design and construction funding for the proposed Realignment of Lemay, intersection improvements at multiple locations, bridge construction, and landscape / urban design improvements. Scaling this offer would have a negative impact on the aesthetics and landscape buffers currently proposed with the project. Future TCEF appropriations may be requested in 2018 to complete critical path work items, these funds would come from the $8.6 M TCEF allocation.

**Links to Further Details:**

**Linkage to Strategic Objectives**

(\textit{the primary objective is marked with a} ✓)
Offer 1.20: ENHANCEMENT: Debt Service for Lemay Realignment and Suniga Road Improvements Project

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel. Vehicular traffic will be placed on the Lemay Realignment, with local access being maintained for residents near the existing Vine/Lemay intersection. Bicycle and pedestrian improvements will be provided on the Lemay Realignment and at the existing at-grade Vine/Lemay intersection.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Traffic can routinely back up south on Lemay Avenue nearly a mile to Mulberry when a train is present. Because of switching operations and substandard street width, this location has some of the worst train delays in the City. The project will resolve this issue by constructing the roadway bridge over the BNSF Railway.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project, along with completing Suniga Road, is the most critical, high-priority transportation project for the City to be prepared for additional growth in northeast Fort Collins. This project will address the lack of transportation and utility infrastructure for one-mile of the Lemay Avenue corridor (Lincoln Street to Conifer Street).

Offer 1.24: ENHANCEMENT: CCIP - Pedestrian Sidewalk Accessibility Improvements

2019: $1,100,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $1,100,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will fund the Pedestrian Sidewalk and ADA Compliance Program. To date, the sidewalk program has been funded by the 2005 Building on Basics (BOB) and Keep Fort Collins Great (KFCG) taxes. In the 2015 Community Capital Improvement Program (CCIP) ballot initiative, Safe Routes to Everywhere was approved to continue this program for installation of pedestrian improvements Citywide to eliminate hazards and remove obstacles, along with improvements to bus stops and the bicycle network.

With the cost of Pedestrian Sidewalk and Americans with Disabilities Act (ADA) Compliance Program needs increasing to $156 million, a sustainable and predictable revenue source is recommended to implement the overall cost of construction.

This offer:
- Supports the recently updated Climate Action Plan to achieve climate action goals
- Supports the recently updated Transportation Master Plan; approximately $1.4M per year through 2025 has been allocated for pedestrian improvement projects
- Seeks to implement recommendations from the pedestrian needs assessment completed in 2013, and later updated in 2017, which identifies missing or substandard sidewalks and ramps that do not comply with the ADA
- Seeks to incorporate the pedestrian improvement program ADA transition plan into the citywide ADA transition plan
- Provides level-of-service compliance
- Supports prioritization of infrastructure management software

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

Additional Information

- Addresses City-wide sidewalk needs objectively, comprehensively, and provide for the ability to coordinate sidewalk construction with other departments to construct sidewalks as quickly as possible, seek cost efficiencies, and meet City transportation goals.
- Supports quality of the pedestrian environment and potential pedestrian activity levels by creating a safe and convenient mode of transportation and recreation.
Offer 1.24: ENHANCEMENT: CCIP - Pedestrian Sidewalk Accessibility Improvements

- Use of prioritization software provides ability to focus resources in areas of high pedestrian volumes where conditions may be difficult and pose the greatest threat to the pedestrian.

- Encourages alternative modes of travel.

**Offer 1.26: KFCG ENHANCEMENT: Railroad Crossing Maintenance**

2019: $125,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $125,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer supports safe, quality infrastructure and smooth traffic flow across the City’s transportation system by replacing broken and dangerous railroad crossings and maintaining adjacent roadway infrastructure. The Colorado Public Utilities Commission (PUC) requires railroads and local municipalities to share the material and labor costs (50/50 split) for replacement and repair of railroad crossings. This is referenced in the PUC as Code 4 of Colorado Regulations 723-7. Damaged railroad crossings pose a significant safety risk to motorists, bicyclists and pedestrians, as well as the potential for liability claims against the City.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Improves and maintains the 53 track crossing locations; 19 on arterial streets with a life expectancy of 20 years, and 34 minor crossings with a life expectancy of 50 years.
- In 2017 staff conducted a condition assessment of the 19 arterial crossings and results show that 2 to 3 arterial replacements will be needed per year to keep up with the rate of deterioration, in addition to other maintenance and repair requirements and needed periodic replacements on the minor crossings.
- The funding level request in this offer matches the physical conditions and replacement schedule for 2019 and 2020.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

This offer is not scalable.

**Links to Further Details:**

- Not applicable
Offer 1.26: KFCG ENHANCEMENT: Railroad Crossing Maintenance

Linkage to Strategic Objectives

(\textit{the primary objective is marked with a ⚫})

- \textbf{TRAN 6.1} - Improve safety for all modes of travel: This offer improves safety for all modes of travel by ensuring safe and reliable railroad crossings, and maintaining adjacent streets infrastructure. This offer also ensures funding to conduct adequate condition assessments, which allows staff to plan for replacement projects and avoid emergency repair situations.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Dilapidated and inadequate railroad crossings can exacerbate traffic congestion, as 19 of the 72 existing crossings exist on arterial roadways currently. This offer provides funding to better manage delays caused by congestion at train crossings.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: Improving the infrastructure at intersections is a high priority for the Fort Collins community, and this offer addresses the aging infrastructure of train crossings which exist at many intersections. As previously stated, the PUC requires railroads and local municipalities to share the material and labor costs (50/50 split) for replacement and repair of railroad crossings.

**Offer 1.27: ENHANCEMENT: Vine Drive Design - College Avenue to Linden Street**

2019: $300,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the preliminary design for Vine Drive from College Avenue to Linden Street, which is approximately 0.4 miles.

This project includes the following elements:
- Preliminary (30%) design
- Analyzing recent development frontages (including RMI and the City’s whitewater park) and preparing for further redevelopment in this area
- Construction estimating to prepare for the 2021/2022 budget cycle
- Analyzing traffic patterns and projected vehicular trips as the Suniga Road corridor continues to be built
- Urban design/landscaping improvements

This offer is being requested in response to recent developments along this corridor, including the upcoming whitewater park, and to prepare for upcoming redevelopments along Vine Drive, College Avenue and Linden Street. Currently, Vine Drive is proposed as a two-lane arterial street. This project will analyze the gaps in the sidewalk and bike lane network, and determine if additional on-street parking is needed.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✅)*:

- ✅TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: completing a preliminary design and construction cost estimate.
- No additional funding is being requested for ongoing operations and maintenance.
- This project will complete a preliminary, multi-modal design and analyze the need for on-street parking.
- This offer will produce a 30% level construction cost estimate.
**Offer 1.27: ENHANCEMENT: Vine Drive Design - College Avenue to Linden Street**

### Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $0

### Scalability and explanation

This offer is not scalable since this is the minimum requirement needed to complete the preliminary design.

### Links to Further Details:

- Not applicable

### Linkage to Strategic Objectives

*(the primary objective is marked with a ✓)*

- TRAN 6.1 - Improve safety for all modes of travel: This project will provide a preliminary design, for all travel modes, which can be taken to final design and construction through a future City capital project, or by future developments along Vine Drive.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will address the lack of multi-modal transportation infrastructure on Vine Drive from College Avenue to Linden Street.

Offer 1.28: ENHANCEMENT: Horsetooth Road and Strauss Cabin Road Design

2019: $0 and 0.00 FTE, 0.00 Hourly FTE
2020: $250,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will complete the preliminary design for Horsetooth Road and Strauss Cabin Road from the intersection of Horsetooth and Ziegler to the intersection of Strauss Cabin and Harmony, which is approximately two miles.

This project includes the following elements:
- Preliminary (30%) design
- Analyzing potential development frontages and existing Natural Areas frontages
- Construction estimating to prepare for future budget cycles
- Providing context-sensitive design solutions for the proposed two-lane collector street section
- Urban design/landscaping opportunities

Currently, this section of roadway is a gravel road with no facilities for bicycles/pedestrians and is in Larimer County. This project will analyze the proposed street section and initiate stakeholder and community discussions about future improvements in this area. This design funding will also initiate conversations with Larimer County about the timing of annexing portions or all roadway segments into the City.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
- Expected deliverables for this project include: completing a preliminary design and construction cost estimate.
- No additional funding is being requested for ongoing operations and maintenance.
- This project will complete a preliminary, multi-modal, context sensitive design.
- This offer will produce a 30% level construction cost estimate.

Impact to Ongoing Expenses
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0
**Offer 1.28: ENHANCEMENT: Horsetooth Road and Strauss Cabin Road Design**

**Scalability and explanation**

**Offer 1.29: ENHANCEMENT: North Mason Street Design - Alpine Street to Hickory Street**

2019: $500,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $200,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the preliminary design for North Mason Street (Alpine Street to Hickory Street), along with Alpine Street, Pinon Street and Hemlock Street (Mason Street to North College Avenue), which total approximately 3,000 feet of street.

This project includes the following elements:
- Preliminary (30%) design
- Analyzing existing and proposed right-of-way lines
- Analyzing utility alignments for design and construction of a proposed stormwater backbone project
- Construction estimating to prepare for future budget cycles or development in the area

This offer includes funding from the URA and is in conjunction with Stormwater Offer 11.13. In recent years the North College Urban Renewal Authority (URA) and members of the North College Citizens Advisory Group (CAG) have expressed interest in implementing stormwater and roadway improvements in this area. The URA is funding half of the estimated $600,000 design cost, which includes preliminary design for the entire North College Drainage Improvement District (NCDID) storm system (from the Poudre River to the Larimer and Weld Canal, north of Hickory Road along the Mason Street alignment) and final design for the portion of the system south of Hickory Road. The stormwater infrastructure improvements are needed to promote development and re-development of the area.

Funding this offer will allow Engineering staff to finalize roadway alignments and complete preliminary grading plans (2019), followed by right-of-way and/or easement acquisitions for the proposed roadways (2020).

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✅)*:

- **TRAN 6.1 - Improve safety for all modes of travel**
- **TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins**

**Additional Information**

- Expected deliverables for this project include: completing a preliminary design and construction cost estimate.
- No additional funding is being requested for ongoing operations and maintenance.
**Offer 1.29: ENHANCEMENT: North Mason Street Design - Alpine Street to Hickory Street**

- This project will complete a preliminary (30%) roadway design and finalize stormwater utility alignments.

- This offer will produce a preliminary level construction cost estimate for future roadway improvements built with development projects of City capital projects.

- This project is a partnership between Engineering, Stormwater, Economic Health, and the URA.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

This offer is not scalable since this is the minimum requirement needed to complete the preliminary design and necessary acquisitions.

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

- **TRAN 6.1 - Improve safety for all modes of travel:** This project will provide a preliminary design, for all travel modes, which can be taken to final design and construction through a future City capital project, or by future developments in the area.

- **TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins:** This project will address the lack of multi-modal transportation and stormwater infrastructure along this section of Mason Street.

**Offer 1.30: ENHANCEMENT: TCEF Great Western Railway Crossings at Timberline Road and Sharp Point Drive**

2019: $300,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete safety and maintenance improvements where the Great Western Railway crosses with Timberline Road and Sharp Point Drive.

This project includes the following elements:  
- Replacing the railroad signal system and crossing material extension to accommodate the six-lane section of Timberline Road (south of Prospect Road)  
- Installing a new railroad signal system and crossing material at Sharp Point Drive  
- Completing the concrete and asphalt roadways at both crossings  
- Completing bicycle and pedestrian gaps along both roadways  
- Analyzing a future quiet zone along this stretch of the Great Western Railway as requested by numerous residents in the area

This offer is being requested in response to the lengthy negotiations between the City and Great Western Railway, which began in 2015 for both crossing locations. The railroad construction estimates were completed in early 2016. The City is responsible for the full cost of the railroad construction work at both locations as part of the capital improvements agreements. The City has requested Great Western Railway complete their portion of the projects by the end of 2018, as part of the ongoing negotiations and settlement agreement.

Funding this offer will appropriate $150,000 to the Timberline/Great Western crossing from Transportation Capital Expansion Fee (TCEF) reserves, and appropriate $150,000 to the Sharp Point/Great Western crossing from TCEF reserves.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):  
✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: completion of the Great Western work for new signal systems and surface crossing material, completion of asphalt paving and bicycle and pedestrian facilities, and analyzing the potential for a future quiet zone.
  
- This project will complete safety and maintenance improvements for the existing Timberline/Great Western crossing, and the new Sharp Point/Great Western crossing.
Offer 1.30: ENHANCEMENT: TCEF Great Western Railway Crossings at Timberline Road and Sharp Point Drive

- This offer is leveraged with funding collected from adjacent developments through prior appropriations.
- This project will complete sub-standard and missing bicycle and pedestrian connections and provide for safer and direct access to the Poudre River Trail system. This offer will provide funding to analyze a potential, future quiet zone which has been requested by numerous residents in the area.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $8,000

Scalability and explanation

This offer is not scalable since this is the minimum requirement needed to complete the construction and quiet zone analysis.

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✔ TRAN 6.1 - Improve safety for all modes of travel: This connection will provide a safer environment, meeting Railroad and Public Utilities Commission standards, for all modes of travel on Sharp Point Drive. Additionally, the project will provide a safer at-grade crossing for all modes at the Timberline/Great Western crossing.
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will complete sub-standard and missing bicycle and pedestrian connections and provide for safer and direct access to the Poudre River Trail system.

**Offer 1.31: ENHANCEMENT: Harmony Road Medians**

2019: $1,000,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $5,250,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this Offer will replace the existing flush or depressed median on Harmony Road width raised, landscaped medians between College and I-25.

This project includes the following elements: (1) New double curb or splash block design (2) Landscaping in the median (new median widths range from 10’ to 22’) (3) Storm sewer improvements due to the elimination of the existing open swale for storm water conveyance (4) All design and construction costs.

This offer will improve safety and aesthetics on Harmony Road between College and I-25. While some medians on Harmony Road have been constructed, the majority of Harmony Road has a grass swale or flush paved median with striping.

Funding this offer will appropriate $1,000,000 to the design of the medians and appropriate $5,250,000 to the construction of the medians from Harmony Road Reserve.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:  
✓ TRAN 6.1 - Improve safety for all modes of travel  
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- This project will complete safety and aesthetic improvements for the Harmony Road medians.  
- This offer does not include funding for long-term maintenance.  
- This offer will fund the design and construction phases.  
- No right-of-way is anticipated for this offer.  
- Expected deliverable for this project include: completion of Harmony Road median design and construction by the end of 2020 through context sensitive design solutions.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:  
  $30,000
**Offer 1.31: ENHANCEMENT: Harmony Road Medians**

**Scalability and explanation**
The offer could be reduced based on a cost of $2,500,000/mile for median replacement.

**Links to Further Details:**
- Not applicable

**Linkage to Strategic Objectives**
*(the primary objective is marked with a ✓)*

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will complete a raised median on Harmony Road from College to I-25 resulting in a safer environment due to the possible result of lower speeds of Harmony Road with the new raised medians. Additionally, safety will increase in certain areas with flush medians due to the elimination of vehicular crash possibilities.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project will complete sub-standard and missing medians on Harmony Road providing a safer and more aesthetically pleasing roadway.

Data As Of: 3/7/19 at 3:03:35PM  2.2.03 Package and Offer Detail  Page 95 of 343
Offer 1.32: ENHANCEMENT: City Bridge Program

2019: $600,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $600,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this Offer will continue the City's Bridge Program which includes on-going bridge inspection, emergency repair, minor maintenance, and bridge reconstruction for the City’s transportation network.

The City has 287 bridges in its inventory. Of these, more than 50 are older than their design life, meaning the likelihood of their needing to be replaced is high. Note that age is a very high-level evaluation, and actual programming of bridge replacements is based on many detailed factors which comprises the specific condition of each bridge.

We have used data from our bridge inspections and a customized asset management tool to create a bridge maintenance and replacement optimization schedule. With this analysis, we recommend a funding level necessary to design and replace at least two typical bridges per year, plus inspection and records maintenance. This level of funding needed is $2.3 M per year, which will be used for repairs and/or replacement of bridges throughout the city network.

This offer includes funding for repairs and replacements, and for inspections each year. In the 2015/2016 and in the 2017/2018 budget cycle bridges were funded through this core offer ($1.7 M/year and an enhancement offer ($600,000/year) totaling $2.3 M/year. This offer will continue bridge funding at a similar level which we have had from 2015 through 2018.

Creating long-term, on-going funding will add flexibility and predictability to the program. This will allow the City to coordinate with other projects in Utilities, Street Maintenance, Parks, Larimer County, Colorado Department of Transportation and other City Projects.

Bridge projects in this budget cycle will be prioritized based upon: Bridge Condition and Safety, Partnership Opportunities, and Leveraging bridge funds for federal grants.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
**Offer 1.32: ENHANCEMENT: City Bridge Program**

- Expected deliverables for this funding include: construction funding for the Drake Bridge replacement (near Research Boulevard), construction funding for the Vine Bridge replacement (west of Timberline), design funding for two bridges on Laporte Avenue, and ongoing bridge maintenance and inspections.

- Adequate maintenance and replacement of bridges is a critical, fundamental task required to maintain the current transportation infrastructure. Bridges support all modes of traffic including; vehicular, pedestrian, bicycle, and transit. Many of the gaps in our multi-modal network are due to sub-standard bridge widths.

- Future, ongoing operations and maintenance costs will be maintained through the ongoing funding of the Bridge Program.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

N/A

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.1 - Improve safety for all modes of travel: If neglected, bridges can fail catastrophically. Narrow bridges cause unsafe conditions especially for pedestrians and bicyclists.

✓ TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The bridge program has been funded for the last several budget cycles, and many of our worst bridges have received partial grant funds. Long-term certainty gives the program the ability to plan and coordinate projects over longer time frames and react to collaborative opportunities with other projects and departments.

Offer 6.1: Transportation Planning Services

2019: $485,315 and 4.00 FTE, 0.00 Hourly FTE
2020: $498,347 and 4.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue provision of transportation planning services managed by the FC Moves Department in the Planning, Development & Transportation Service Area. Services include: corridor plans, Master Street Plan, pedestrian planning, capital improvement planning, travel demand modeling, active modes planning, street standard development and maintenance, and development review. These plans, policies and services guide and inform how the City’s transportation systems are built, operated and maintained. Transportation Planning is a key component of a healthy, efficient, innovative, safe and sustainable community and economy. The other functions within FC Moves are the Safe Routes to School Program and FC Bikes; those functions are funded through separate offers (6.3 and 6.4).

This offer includes annual membership in the North Front Range Metropolitan Planning Organization (NFRMPO). Fort Collins has been a member of the NFRMPO since its inception in 1988. Membership in the NFRMPO is required in order to secure regional, state and federal transportation funds, and to ensure consistency between local and regional plans.

The 2019-20 Transportation Planning work plan may include:
- Enhanced Travel Corridor Master Plans for the North College/Mountain Vista and Prospect Road corridors
- Development of local, regional, state and federal grant applications to fund multimodal transportation plans, programs, and projects
- Travel demand model maintenance, updates and support
- On-going management and updates to the City’s Master Street Plan and multimodal Capital Improvement Plan
- Development review services to support implementation of the City’s transportation plans
- Supporting the City’s energy, climate action and sustainability goals
- Program management for FC Bikes and Safe Routes to School

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
**Offer 6.1: Transportation Planning Services**

- Transportation planning staff are committed to close coordination with other key departments. Partners include Engineering, Traffic Operations, Streets, Planning, Social Sustainability, Environmental Health, Economic Health, Utilities, and community organizations and stakeholders.

- In addition to plan development, transportation planning staff work on project implementation such as green streets, automated bike share, infrastructure demonstration projects, school area infrastructure improvements, and development of capital projects.

- In 2019-2020, transportation planning staff will work as project managers for several major initiatives. Depending on other BFO funding, these may include Enhanced Travel Corridor Plans and the launch of new programs such as trip reduction and efficiency and FC Walks.

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: FC Moves develops long range transportation plans for local and regional transportation networks. These plans ensure adequate capacity for all modes of travel.

- TRAN 6.1 - Improve safety for all modes of travel: Plans and projects consider safety a top priority for all modes, and include recommendations for improving travel safety.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: Enhanced Travel Corridor Plans and other area transportation plans focus on network needs, including aging or missing infrastructure. Plans ensure that these inadequacies are identified and addressed.

**Improvements & Efficiencies**

- Transportation plans are developed using a project management model that leverages limited personnel resources to manage teams of staff and consultants. Some projects are completed by internal teams, some projects are supplemented by consulting teams.

- The efforts of FC Moves staff have resulted in the City's designation as a Silver level Walk Friendly Community and a Platinum Level Bicycle Friendly Community, and most recently a Platinum Bicycle Friendly Business (for the City organization.)

- The FC Moves model combines transportation planning and active modes/vehicle trip reduction functions into one department. This is an innovative approach shared with only a few other communities that ensures a functional link between sustainable transportation strategies and long range plans and policies.
**Offer 6.1: Transportation Planning Services**

**Performance Metrics**

Offer 6.2: ENHANCEMENT: CCIP - Bicycle Infrastructure

2019: $350,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $350,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will apply the 2015 Community Capital Improvement Program (CCIP) annual funding allocated for bicycle improvement projects for 2019-2020. The approved CCIP tax package includes $350,000 in 2019 and 2020 for bicycle improvement projects to implement the adopted 2014 Bicycle Master Plan. This provides funding for capital projects such as on-street bike lanes, connections between on- and off-street facilities, wayfinding signage, bicycle parking and street crossings to promote cycling and safety.

The voter-approved CCIP Bicycle Plan implementation ballot initiative set aside $5 million over 10 years to be spent on capital expenditures (infrastructure design, construction and matching grants). Projects using the CCIP Bicycle Plan funds implement the Bicycle Plan and are important elements in achieving the goals that are set forth in City Council policies as articulated in City Plan and the Transportation Master Plan.

The CCIP Bicycle Plan funds are used to increase the capacity and safety of the City’s bicycle network. Examples of projects that will be considered as part of the 2019-2020 project selection process are:
- Low-Stress Network Implementation: The primary infrastructure recommendation from the 2014 Bicycle Master Plan is the development of a low-stress network of bikeways across Fort Collins. These routes use existing streets and trails, and improvements are focused on intersections and enhancement to high-stress segments.
- Intersection Improvements: Possible improvements at signalized and unsignalized intersections to proactively address needs throughout Fort Collins.
- Bicycle Parking: An effort to improve City-provided bicycle parking in high-use areas.
- Bicycle Counters and data collection equipment: Permanent and mobile counters to deploy as needed to assess bicycle system use to more effectively plan for facilities.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

 ✓ TRAN 6.1 - Improve safety for all modes of travel

Additional Information

- The funds for this offer come from the voter approved sales tax initiative known as the Community Capital Improvement Program (CCIP).
- Past years of Bicycle Plan Implementation funding have been leveraged to obtain grant funding for multimodal projects with a strong bicycling element.
- Project funding decisions are guided by the 2014 Bicycle Master Plan.
Offer 6.2: ENHANCEMENT: CCIP - Bicycle Infrastructure

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $10,000

Scalability and explanation

This offer is not scalable. The total amount allocated to bicycle improvements is a part of the ballot initiative, and the annual allocation has been determined based on the distribution of funds to all programs and projects listed in the initiative.

Offer 6.3: Safe Routes to School Program

2019: $169,807 and 1.00 FTE, 0.00 Hourly FTE
2020: $178,810 and 1.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue the City’s Safe Routes to School (SRTS) program housed within the FC Moves Department.

The SRTS program is part of a nationwide effort encouraging more children to walk and bike to school, benefiting their health, academic achievement and the environment. A long-term goal of the City’s program is to get 50 percent of K-12 schoolchildren safely biking or walking to school. SRTS is considered a best practice by top transportation, mobility and health organizations — from the American Planning Association, to the Federal Highway Administration, to the Centers for Disease Control and Prevention. SRTS emphasizes the Six Es of transportation and mobility services: Education, Encouragement, Engineering, Enforcement, Evaluation and Equity. The City’s SRTS program leads education, encouragement, evaluation and equity activities while collaborating with other City departments to address engineering and enforcement issues.

SRTS is highly collaborative and supports key City departments and programs including Transportation Planning, FC Bikes, Traffic Operations, Engineering, Police Services, Recreation, Parks and Sustainability. Non-City partners include the Colorado Department of Transportation, Poudre School District, Bike Fort Collins, Safe Kids Larimer County, BASE Camp, Boy Scouts and Girl Scouts, Boys and Girls Clubs, NFRMPO Bike & Ped Collaborative, local health organizations, and bike shops and other businesses.

Funding associated with this offer will provide office supplies, equipment, bike helmets for low-income students, educational giveaways, equipment maintenance, contractor services and other operating expenses. Funding will also cover staff salary and benefits. Grant funding provides additional resources for new and replacement equipment as well as new programming in response to community requests.

Program staff include an SRTS Coordinator and SRTS Assistant. Local nonprofit organizations are contracted to help deliver the education program.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- NLSH 1.4 - Co-create a more inclusive and equitable community that promotes unity and honors diversity
Offer 6.3: Safe Routes to School Program

Additional Information

- The City's SRTS program provides bike-ped safety education and encouragement activities to Fort Collins K-12 students and their parents. In 2017, the program reached more than 13,400 students and 1,700 adults. That's more than 15,000 people, compared to just 2,000 when the program started 11 years ago. This program has garnered national attention as a leader in innovative and equitable methods.

- Education is key to keeping kids safe. The entire community shares responsibility — parents, teachers, businesses, community agencies and government. SRTS emphasizes safety education related to the two modes of travel that kids can do independently. Much of the built environment that children must navigate is created and maintained by the City, making it essential to provide safety education.

- The SRTS School Rotation Schedule is a plan to teach bike-ped safety to all public-school students at strategic times during their educational development. In 2017 more than 7,600 students at 27 local schools received instruction, and 113 adults learned how to teach safe biking and walking through train-the-trainer events. Assistance was provided by 515 volunteers donating 1,600 volunteer hours.

- In 2017 SRTS distributed more than 400 free bike helmets to K-12 students and their parents, focusing on families with limited financial resources. The program also performed bike-safety checks and minor repairs on an estimated 4,000 students’ bicycles. This is part of the SRTS program’s support for public-health initiatives related to injury prevention and active-transportation health strategies.

- SRTS coordinates major events such as International Walk to School Day and National Bike to School Day (plus “Bike Week” at many schools), for which Fort Collins is a recognized leader in Colorado. SRTS also assists with walking school buses and bike trains (groups of kids who walk or bike together for safety) as well as ever-popular bike field trips and biking/walking camps and clubs.

- [http://saferoutesinfo.org](http://saferoutesinfo.org)
- [http://www.saferoutespartnership.org](http://www.saferoutespartnership.org)

Linkage to Strategic Objectives

(thes primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This offer serves nearly 25 percent of Fort Collins' population, namely, youth under 18 years of age. Most of these youth can only travel independently by walking or biking, making it imperative that City streets be designed for safe travel by all modes and that bicycle and pedestrian safety education be provided to all youth and their parents.
Offer 6.3: Safe Routes to School Program

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: A significant proportion, perhaps as much as 15 percent, of early morning and mid-afternoon traffic congestion is due to parents driving their children to and from school. One strategy for reducing traffic congestion and improving traffic flow can be through getting more kids biking and walking to school so their parents do not clog the streets with unnecessary trips in the family car.

- NLSH 1.4 - Co-create a more inclusive and equitable community that promotes unity and honors diversity: This program strives for equitable treatment of all students by emphasizing inclusion of disabled children during every type of program. For example, adaptive equipment is used to ensure disabled students are included with their classmates on bike field trips. The disabled children ride along on tandem bikes or in trailers and tagalongs pulled by teachers, SRTS instructors, parents and volunteers.

Improvements & Efficiencies

- SRTS has solidified its ability to provide bike-ped safety education to 7,500 to 8,000 students annually. The School Rotation Schedule, pilot-tested through a CDOT grant in 2015, now ensures that all students at public schools have multiple opportunities to learn bike-ped safety during PE classes and other school activities during their K-12 education.

- The SRTS fleet grew in 2017 to include 178 total vehicles (cargo van, bicycles, tagalongs and trailers), an increase of 48% over 2016. A new CDOT grant received in early 2018 will expand the fleet by 29 more vehicles, including a cargo trailer to be stationed at Olander Elementary and equipped specifically for bike field trips and adaptive equipment for inclusion of children with disabilities.

- The SRTS train-the-trainer program taught 133 adults how to teach bike-ped safety to children in 2017, far surpassing the goal of training 100 adults annually.

- SRTS has leveraged multiple new initiatives in the community. Examples include after-school and summer biking and walking camps/clubs, weeklong “Bike Week” celebrations, bike-ped infrastructure improvements in the vicinity of schools, satellite bike fleets at schools, school bike field trips, bike fix-it stations at schools and adoption of the SRTS curriculum by school PE teachers.

- SRTS is a key component of Fort Collins’ status as a “Bicycle Friendly Community” and “Walk Friendly Community.” The City likely would not maintain its status as a Platinum Bicycle Friendly Community without this comprehensive youth education program led by SRTS.

- SRTS has begun recruiting more volunteers, with 515 volunteers (mostly parents at schools) logging more than 1,600 volunteer hours in support of SRTS programming in 2017.

- Feedback from teachers, principals and parents is overwhelmingly positive, with 100% of participating teachers reporting high satisfaction with program content and delivery.
Offer 6.3: Safe Routes to School Program

- Fort Collins can be proud to have the first public high school and first public middle school in the nation to be designated Bicycle Friendly Businesses (BFBs) by the League of American Bicyclists. Both of these schools were inspired through SRTS programs to apply for BFB status. Fort Collins High School is a silver-level BFB, and Lesher Middle School is a gold-level BFB.

Offer 6.4: FC Bikes

2019: $435,494 and 3.00 FTE, 0.00 Hourly FTE
2020: $445,060 and 3.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will maintain the current staffing and services of the City's FC Bikes Program. FC Bikes implements a comprehensive set of strategies to improve safety and education for all transportation system users, while enhancing the accessibility of bicycling for people of all backgrounds across the community. The work of FC Bikes has contributed to Fort Collins’ designation as a Platinum Bicycle Friendly Community (one of only five in the country) an upward trend in bicycle ridership and a decrease in bicycle crashes. In 2017, Fort Collins was one of only 10 cities in the country selected to participate in the national Big Jump Program, a reflection of the City’s ongoing support of bicycling.

Specific FC Bikes services include:
- Coordinating with City departments and the community to implement the 2014 Bicycle Master Plan
- Planning low-stress bike network and other bike infrastructure improvements
- Bike parking management
- Bike safety initiatives including extensive bicycle and motorist education
- Bicycle Ambassador Program
- Enforcement initiatives with Police Services
- Business outreach
- Bike Share
- Bike to Work Days and Open Streets
- Fort Collins Bike Map
- Ongoing program and project evaluation and data collection

This offer also provides resources to sponsor the Fort Collins Bike Share system, which increases the accessibility of bicycling and public transit by providing bikes available for checkout 24/7 at convenient stations around town (owned and operated by Zagster). As one of several local sponsors, the City’s contribution to the Fort Collins Bike Share Program is decreasing every year while the system continues to expand, and this trend is expected to continue in 2019 and 2020.

The Bike Plan sets a 20% bicycle ridership goal and a goal to reduce bicycle injuries and eliminate fatalities by 2020. Maintaining a comprehensive set of bicycle programs designed to reach new riders and improve safety supports the City’s various sustainability and Climate Action Plan goals.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
Offer 6.4: FC Bikes

Additional Information

- FC Bikes staff coordinate with multiple City departments and community stakeholders to offer innovative and inclusive bicycle programs and services for residents and visitors of Fort Collins.

- Since 2012, the number and severity of bicycle crashes has decreased; the FC Bikes Program seeks to offer a comprehensive set of programs designed to reduce bicycle crashes in Fort Collins and improve transportation safety for all.

- In 2019-2020, FC Bikes staff will oversee the implementation of multiple initiatives, including: Bicycle Ambassador Program, Bicycle Friendly Driver Program, Open Streets, Bike to Work Day, Ride Smart Drive Smart, low-stress bicycle network implementation, bike parking, and bike share.

- Builds on the City’s Platinum Bicycle Friendly Community designation to implement a comprehensive approach to promoting bicycling as a healthy, safe, and economically viable form of transportation for people of all ages and abilities across the community.

- Participation in FC Bikes programs increases every year. In 2017, Bike to Work Day and Open Streets events combined attracted nearly 25,000 participants, and FC Bikes educated over 5,000 people through classes and events. This offer includes a contractual position titled: Bikes Program Specialist.

Links to Further Details:

- FC Bikes Program Website: http://www.fcgov.com/fcbikes
- Fort Collins Bike Share Website: http://zagster.com/fortcollins/
- Big Jump Program: https://www.fcgov.com/bicycling/bigjump.php

Linkage to Strategic Objectives

(the primary objective is marked with a ⬤)

- TRAN 6.1 - Improve safety for all modes of travel: Implements a comprehensive set of strategies to reduce bicycle-vehicle collisions in Fort Collins through education, enforcement, encouragement, engineering and evaluation.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: This offer funds bicycle infrastructure planning and programs to promote alternative forms of transportation.

Improvements & Efficiencies

- FC Bikes balances full-time and part-time staff with the use of interns, volunteers and consultants to achieve the most productivity with the best use of resources.

- FC Bikes implements a train-the-trainer model to effectively reach more people through its bicycle safety education and outreach programs. Over 100 Bicycle Ambassadors have been trained to teach classes, attend events or support community outreach, effectively expanding the reach of FC Bikes three full-time staff.
Offer 6.4: FC Bikes

- The opening of the Walk & Wheel Skills Hub, a unique public/private partnership, has resulted in operational improvements and cost savings. An educational training course (e.g., bike rodeo) would normally require extensive set-up time and multiple staff/volunteers to manage operations. With the Skills Hub, minimal set up time is required, and a large group can be instructed with one staff member.

- FC Bikes and Police Services partnered to repurpose a former SWAT van to be utilized and branded as the Ride Smart Drive Smart vehicle. This vehicle provides storage for bikes and event equipment and has effectively reduced event prep and take-down time by 50-75%.

Performance Metrics

Data As Of: 3/7/19 at 3:03:35PM
**Offer 6.5: Travel Behavior Survey**

2019: $0 and 0.00 FTE, 0.00 Hourly FTE  
2020: $75,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will continue an annual community-wide travel behavior survey program that collects comprehensive and accurate data on resident and employee multimodal travel.

This program helps the City determine if transportation projects and programs are having the desired impacts and supports data analysis of key transportation indicators. The data adds to the City's understanding of travel behavior, Vehicle Miles Traveled and the modes of transportation being used, all of which are critical to the City's greenhouse gas calculations for the Climate Action Plan. The data provides a comprehensive way of tracking mode shift, which the City uses in metrics reporting. In the first two years of the survey, one round of resident information was collected in 2017 and one round of information about people working within City limits will be collected in 2018. This data is already being used to inform the City Plan Trends and Forces Report, as well as to update Climate Action Plan project charters. The surveys are conducted in three-year cycles: resident survey, employee survey, no survey. For this budget, 2019 will be an off year with no funding and 2020 will be a resident-survey year.

The program includes distribution of a mobile application and companion hard-copy survey that collect the following:
- Trips by mode (biking, walking, transit, driving, etc.) and purpose (work, shopping, school, etc.)
- Telecommuting trends
- Trip characteristics by mode
- Vehicle occupancy
- Vehicle ownership and availability
- Trip distance
- Trip start times
- Traveler demographics (age, occupation, gender, etc.)

Without this program, estimating mode share and other travel behavior relies on regional or census surveys that are infrequent, not always statistically valid and lacking in critical areas, such as non-work trips.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓):*

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections  
- HPG 7.6 - Leverage data, technology, metrics and benchmarks to guide decisions, improve results, and enhance service delivery
**Offer 6.5: Travel Behavior Survey**

**Additional Information**
- Important addition to transportation analysis that helps the City determine if transportation projects and programs are having the desired impacts.
- Provides comprehensive data collection program for trip-making, including survey development, app development, distribution of survey, and analysis of results.
- Collects valuable travel behavior data that the City does not currently have to support planning efforts (e.g., Climate Action Plan, Transportation Master Plan).
- Supports the tracking of key indicators such as Vehicle Miles Traveled (VMT) (used in Climate Action Plan greenhouse gas emission calculations) and mode share (part of BFO Metrics Reporting).

**Links to Further Details:**

**Linkage to Strategic Objectives** *(the primary objective is marked with a ✓)*
- ✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Collecting this data supports long-term planning efforts, such as corridor plans and the Transportation Master Plan update.
- HPG 7.6 - Leverage data, technology, metrics and benchmarks to guide decisions, improve results, and enhance service delivery: This survey data helps inform planning studies, but also allows the City to track progress and report on performance metrics.

**Improvements & Efficiencies**
- In the first cycle of the survey, an app was developed to make submitting data easier and more convenient. In this second cycle of surveys, the app can be updated and reused, allowing more of the program resources to go to increasing the reach of the program and getting more responses.

**Performance Metrics**
- TRAN 65. % Commute Mode Share
  [https://publish.clearpointstrategy.com/594/Measures/scorecardId=7269&object=measure&objectId=516908.html](https://publish.clearpointstrategy.com/594/Measures/scorecardId=7269&object=measure&objectId=516908.html)

**Personnel Changes**
- NA

**Differences from Prior Budget Cycles**
- Because this study occurs in 3 year cycles, the first year (2019) does not require any funding. In the last cycle, both 2017 and 2018 required funding for surveys.
Offer 6.5: Travel Behavior Survey

**Explanation of Any Adjustments to Personnel Costs using object 519999**

- Not applicable

**Summary of Changes Requested by BFO Teams or the Budget Lead Team**

2020 cost changed from $100,000 to $75,000 at the request of BFO team.
The narrative was amended to clarify that the surveys follow a 3 year cycle.

Data As Of: 3/7/19 at 3:03:35PM
Offer 6.7: KFCG ENHANCEMENT: Hampshire Low-stress Bikeway

2019: $300,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $300,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will supplement Community Capital Improvement Program (CCIP) funds in order to complete the Hampshire Bikeway, a four-mile low-stress bicycle route recommended in the 2014 Bicycle Master Plan. The Hampshire Bikeway is a north-south route connecting five schools and other destinations from West Vine Drive to the Spring Creek Trail. This offer will complete improvements at three major arterial crossings along the corridor, and signage and striping enhancements.

The Bike Plan recommends a 2020 low-stress bike network to strategically advance safe and comfortable bicycling opportunities across the community. This network leverages existing low-traffic and low-speed streets, and identifies key arterial crossing improvements to help people safely navigate the network. This network is composed of more than 50 corridors; each corridor includes recommended projects related to improving intersection crossings, striping and wayfinding signage. The Pitkin Bikeway Corridor Project provides an example of the type of corridor project that will be supported through this funding.

This offer will supplement CCIP funding in order to complete three arterial crossing improvements by 2020 at the following locations along the Hampshire Bikeway: W. Elizabeth St. at Ponderosa Dr., W. Prospect Rd. at Fuqua Dr./Hampshire Rd., and W. Drake Rd. at Hampshire Rd. In addition, bicycle wayfinding and striping enhancements will be installed to provide a seamless and intuitive Citywide bikeway.

The City’s arterial street system provides direct connections for people bicycling; however, research shows that most people do not feel comfortable bicycling on streets with high traffic volumes and speeds. Establishing accessible bicycling routes by enhancing the local and collector street system holds significant potential to achieve the City’s goals of a 20% bicycle mode share, zero bicycle fatalities and fewer annual bicycle-related injuries, while offering other environmental, economic and social sustainability benefits.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.1 - Improve safety for all modes of travel
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals
- ✓ TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
**Offer 6.7: KFCG ENHANCEMENT: Hampshire Low-stress Bikeway**

- Builds on the City’s Platinum Bicycle Friendly Community designation to implement a comprehensive approach to promoting bicycling as a healthy, safe, and economically viable form of transportation for people of all ages and abilities across the community.

- Connects five K-12 schools as well as several trails and parks along a low-stress bikeway corridor. Creates an integrated bicycle network leveraging low-traffic and low-speed streets with the goal of increasing bicycle ridership to 20% and reducing injuries from bicycle versus motor vehicle crashes.

- This project will improve multimodal safety and provide more accessible alternatives for students of Poudre High School, Poudre Community Academy, Bauder Elementary, Olander Elementary and Blevins Middle School, as well as local residents.

- Fort Collins is one of 10 cities involved in the Big Jump Project and aims to double bicycle ridership in northwest Fort Collins. The Hampshire Bikeway is an integral north-south route connecting the Big Jump neighborhoods to key destinations, including schools.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $0

**Scalability and explanation**

The Pitkin Bikeway Project demonstrates the level of investment necessary for a low stress corridor project where improvements are needed at multiple arterial crossings. The estimated cost for this corridor was approximately $900,000. This offer can be scaled to provide more or less supplementary funding to complete the 2020 low-stress bicycle network. The amount of funding provided will directly impact the number and type of Bicycle Master Plan projects implemented.

**Links to Further Details:**

- Big Jump Project website: [https://peopleforbikes.org/placesforbikes/the-big-jump-project/](https://peopleforbikes.org/placesforbikes/the-big-jump-project/)

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

✓ TRAN 6.1 - Improve safety for all modes of travel: Provides a connected bikeway of low-traffic and low-speed streets and improves intersection crossings to facilitate direct and safe connections to community destinations.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: This offer supports this objective by promoting walking and bicycling as a means of travel. This improves individual health and by reducing auto traffic reduces air pollution and greenhouse gas emissions.
**Offer 6.7: KFCG ENHANCEMENT: Hampshire Low-stress Bikeway**

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This offer funds signalized pedestrian and bicycle crossings at arterials along the Hampshire Bikeway. Today, these arterial streets serve as significant barriers and safety hazards to walking and bicycling.

**Performance Metrics**

Offer 6.9: School Crossing Guard Program

2019: $94,350 and 0.00 FTE, 0.00 Hourly FTE
2020: $94,350 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue the School Crossing Guard Program, operated through an intergovernmental agreement (IGA) with Poudre School District (PSD). Per the IGA, PSD assumes all responsibility for the establishment, operation and administration of the School Crossing Guard Program. The City’s contribution is an annual payment to PSD of $94,350. PSD pays directly for the balance of program costs (up to an additional $94,350).

The School Crossing Guard Program provides safe student crossings at major roadways located near PSD schools, primarily elementary schools. These roadways have a high volume of traffic and higher speeds, resulting in the need for crossing guards. The physical presence of the crossing guards is essential for the students to feel confident and safe in crossing busy streets to and from school. When surveyed, many parents have indicated they would not allow their students to bike or walk to school without the presence of crossing guards.

Providing for the safety of K-8 students crossing these roadways supports the City’s goals as stated in:
- Bicycle and pedestrian safety as part of the City’s Safe Routes to School program
- Council-adopted Bicycle Plan, Pedestrian Plan and Transportation Master Plan

Currently 10 crossing-guard locations are staffed by 13 crossing guards, benefiting the following schools: Bauder, Beattie, Cache la Poudre, Dunn, Kinard, Laurel, O’Dea, Olander and Rifenburgh. Most are staffed twice a day, and some justify additional midday staffing for half-day kindergarten students. Because of the close interaction among crossing guards, students and school staff, the program is most efficiently administered by PSD, including school principals at affected schools. PSD provides all training, uniforms, scheduling, supervision and personnel for this program.

This program is a cost-effective way to support a vital community safety service serving more than 1,000 children each day.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information
**Offer 6.9: School Crossing Guard Program**

- The school crossing guards are a visible presence of safety personnel that directly influence driver behavior and traffic safety at the crossing points for K-8 students to and from school. This program also has a strong safety education component for the students in learning how to cross the street safely and increases their awareness of traffic dangers.

- The partnership with Poudre School District is a cost-effective approach to managing the School Crossing Guard Program and is essential in providing this important safety service to K-8 students.

- The signs used by the school crossing guards and the crossing guards' physical presence contribute to slower speeds of approaching traffic and voluntary speed compliance by motorists.

- According to National Center for Safe Routes to School survey results, many local parents indicate that they would not allow their students to bike or walk to school without the presence of school crossing guards.

- Crossing-guard locations are determined in partnership with the City's Traffic Operations Department based on crash data, traffic volume, traffic speed and other variables indicating higher risk for students.

**Links to Further Details:**
- fcgov.com/saferoutes
- psdschools.org
- www.coloradodot.info/programs/bikeped/safe-routes/training/crossing-guard

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.1 - Improve safety for all modes of travel: School crossing guards are an essential component of an overall safety program to help K-8 students get to and from school safely. The crossing guards address both perceived and very real safety issues of concern to parents.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Up to 15% to 20% of morning traffic congestion is due to parents driving their students to school. Programs such as this provide enhanced safety to help persuade parents to allow their students to walk instead of being driven, thereby reducing unnecessary trips by car.

**Improvements & Efficiencies**

- This program continues to exemplify an effective partnership between the City and Poudre School District.

- Poudre School District has agreed to cover new program expenses up to equal what the City is contributing, ensuring adequate room for program flexibility and growth to meet the needs of the community.
**Offer 6.9: School Crossing Guard Program**

**Offer 6.10: ENHANCEMENT: Pedestrian Master Plan and FC Walks Program**

2019: $249,233 and 0.00 FTE, 0.00 Hourly FTE
2020: $100,335 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund an update to the City's Pedestrian Plan and add staff to implement a walking program. Last updated in 2011, the Fort Collins Pedestrian Plan has guided the creation of a safe and efficient pedestrian network to improve conditions so walking can be a viable transportation choice to aid in congestion relief and community livability. The focus of the first two plans has been on pedestrian infrastructure including sidewalks, curb ramps and crossings. As a result, the City has a robust pedestrian infrastructure program, funded by the Community Capital Improvement Program (CCIP) quarter-cent tax, which targets and rebuilds, fixes or builds new curb ramps and sidewalks throughout the City.

Master plans, such as the Pedestrian Plan, are typically updated every five years. With the update of the Transportation Master Plan (TMP) being completed in 2019, the Pedestrian Plan is perfectly timed to follow on with an update that will help implement the TMP.

The first year of funding (2019) is for a consultant contract to prepare a Pedestrian Master Plan, as well as a 0.5 hourly position to coordinate the plan. The Plan will be scoped to address the overall vision for walking in Fort Collins, including:
- Safety issues and improvements
- Pedestrian demand and priority areas
- Updates to the Pedestrian Level of Service methodology
- Crossing policy review and update
- Walking education and promotion
- Pedestrian project list
- Funding strategies and action plan

The second year of funding (2020) is to implement an education and promotion program focused on walking using the 0.5 hourly position. This type of program is a critical companion to the infrastructure work, to educate people on the benefits of walking and to encourage behavior change, with efforts such as:
- Walk-to-work programs
- Walking maps
- Marketing campaign promoting walking
- International Walk to School Day
- Educational and historical walks
- Strengthening partnerships
**Offer 6.10: ENHANCEMENT: Pedestrian Master Plan and FC Walks Program**

- Data collection and assessing pedestrian safety issues

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- **TRAN 6.1** - Improve safety for all modes of travel
- **ENV 4.1** - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals
- **TRAN 6.5** - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- In 2013, Fort Collins was designated as a bronze-level Walk Friendly Community, and was recently re-designated in 2018 as a silver-level community. The Plan update and FC Walks program will build upon the successes that led to this designation and will work to advance the City's rating even further.

- FC Walks will be responsible for coordinating and implementing action items from the updated Plan. This includes education and encouragement efforts, that are reflected in the ongoing costs.

- Pedestrian-related issues are currently covered by a number of departments, including Engineering and Streets, who design, construct and maintain pedestrian facilities based on formal plans for pedestrian infrastructure. The FC Walks program will coordinate these related functions together in a collaborative, outcome-oriented approach.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $60,000

**Scalability and explanation**

This offer is scalable to a limited extent. We anticipate that the 0.5 hourly position is the minimum necessary to provide the basic programming and support described in this offer. Some scalability of the other program funds may be possible. Reductions would likely mean fewer or smaller scale events, fewer promotional materials, and potentially an inability to fund mapping and printing.

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives** *(the primary objective is marked with a ✓)*

- **TRAN 6.1** - Improve safety for all modes of travel: There is a missing gap in education and promotion targeting walking. Everyone at some point in their trip is a pedestrian, encouraging walking and creating a safe walking environment is fundamental to a healthy city.
Offer 6.10: ENHANCEMENT: Pedestrian Master Plan and FC Walks Program

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: Secondary level: Reducing vehicle miles traveled is a key strategy for reducing transportation related GHG emissions. A fundamental way to do this is to shift trips from driving to other modes, like walking. To facilitate this shift requires planning and building the right infrastructure, while also educating and encouraging the public to walk more and drive less when possible.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: One of the biggest barriers to walking are gaps in the sidewalk network, which this planning effort will help to address.

Offer 6.11: ENHANCEMENT: Transportation Options Plan and Program

2019: $149,233 and 0.00 FTE, 0.00 Hourly FTE
2020: $125,335 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will fund the development of a program to promote and incentivize innovative transportation options and trip efficiency solutions across Fort Collins (historically known as Travel Demand Management). Reducing the demand on our roads and parking infrastructure (from single-occupancy automobiles) is a proven nationwide strategy to address congestion.

The City currently tackles congestion through intersection improvements (better turn lanes), state-of-the-art traffic management systems and traveler information on FC Trip. A Transportation Options Program complements infrastructure investment by helping and incentivizing people to more efficiently use the transportation system by taking transit, ridesharing, walking, biking and teleworking, instead of driving alone.

Strategies that may be implemented include:
- Incentives for telework and flex schedules
- Improved or subsidized access to transit
- Parking management strategies
- Promotion of bicycling and reducing barriers
- Promotion of walking and reducing barriers
- Ridesharing (vanpool, carpool, car share, bike share)
- Technology applications including programming for mobile devices and intelligent transportation systems

Roadway space is finite; as such it should be managed as a valuable resource. With population growth comes increased demand on the roads, which in most parts of Fort Collins will not be widened to absorb more traffic. Road widening in built-out areas impacts neighborhoods and typically has been shown to induce more travel. A Transportation Options program, as funded by this offer, proactively works to shift trips to more efficient (meaning better use of limited street space) modes like transit, bicycling, walking and ridesharing.

The funds are envisioned to initially (2019) develop a plan laying out the program elements and structure. The second year (2020) would fund program operations (including a 0.5 hourly position), education events and incentives.
Offer 6.11: ENHANCEMENT: Transportation Options Plan and Program

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals
- TRAN 6.3 - Improve transit availability and grow ridership

Additional Information

- This offer supports the City's goals in the Climate Action Plan and the Strategic Plan by reducing mobile emissions and their contribution to Greenhouse Gases.
- This planning effort will assess how to expand the availability of alternatives to single occupancy vehicles, through City programs and policies, such as FC Bikes and Transfort.
- This planning effort will address how to improve incentives for sustainable travel and investigate the true cost (and potential pricing) for automobile use

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $100,000

Scalability and explanation

The scope of this proposed program is consistent with other similar programs throughout the country for cities the size of Fort Collins. A smaller budget would reduce the amount of programs that could be deployed with limited public outreach. A larger budget would allow a more comprehensive effort with more public outreach.

Links to Further Details:

- What is TDM? (Mobility Lab resource info) https://mobilitylab.org/about-us/what-is-tdm/

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Managing travel demand is a proven congestion relief strategy.
Offer 6.11: ENHANCEMENT: Transportation Options Plan and Program

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: Reducing Vehicle Miles Traveled (VMT), particularly from people driving alone, is a key strategy for reducing transportation related GHG emissions. The program described in this offer is focused on shifting drivers, driving alone, to more efficient travel modes like transit, bicycling, walking, or ride sharing. Not driving alone even one or two days a week can significantly help reduce VMT.

- TRAN 6.3 - Improve transit availability and grow ridership: Supporting and promoting transit ridership is typically a key element of this type of program.

Performance Metrics

**Offer 6.12: ENHANCEMENT: North College/Mountain Vista Enhanced Travel Corridor Master Plan**

2019: $325,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund a consultant contract to conduct the North College/Mountain Vista Enhanced Travel Corridor (ETC) Plan. This proposed effort is an action item identified in City Plan, the Transportation Master Plan (TMP) and the Mountain Vista Subarea Plan. ETCs are uniquely designed corridors that are planned for high-frequency transit, bicycling and walking. Enhancements to these corridors may include improved vehicular and transit operations and improved infrastructure, such as dedicated bike lanes, transit, pedestrian or bike priority signalization at intersections, under/overpasses and multi-use sidewalks.

Residents and businesses have long called for better mobility for northeast Fort Collins and improved connections to the rest of the community. With the success of the MAX bus service in Downtown, Midtown and south Fort Collins, advocates in north Fort Collins have called for similar high-frequency transit to serve their needs.

The North College/Mountain Vista corridor is projected to accommodate a significant portion of Fort Collins’ future local and regional development, which will notably increase travel demand within the corridor, from I-25 to the west. Significant developments are currently underway or proposed that will dramatically impact travel in northeast Fort Collins. This study will be a comprehensive corridor plan that will include a corridor vision, alternative context-sensitive designs, costs and a phasing and implementation plan. The goal is to enhance mobility and economic health within northeast Fort Collins and provide connections to existing and future businesses, residences and major employment centers. This offer will help support high-quality economic development opportunities for mixed-use, transit-oriented development and support Fort Collins’ active lifestyles and environmental goals outlined in the Climate Action Plan.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.3 - Improve transit availability and grow ridership

**Additional Information**

- The current update to the Transportation Master Plan (City Plan) will likely address at a high level this corridor (as one of a number of City-wide corridors). However the Mountain Vista / North College ETC will focus, in detail, on future options for high-frequency transit (MAX-like service), enhanced bicycle, and pedestrian facilities for this corridor specifically.
Offer 6.12: ENHANCEMENT: North College/Mountain Vista Enhanced Travel Corridor Master Plan
- The project will promote equitable outcomes for existing neighborhoods in northeast Fort Collins. Residents in these neighborhoods experience inequitable access to transportation options and are largely car dependent due to substandard bus stops and low-frequency service, low-quality or non-existent bicycle and pedestrian facilities.
- The City and private property owners have been working cooperatively for the past several years to encourage higher-quality commercial, residential, and industrial development, mainly through the North College Urban Renewal Authority. The ETC would support redevelopment and growth, through high-quality infrastructure and improved access.
- The corridor plan would identify how the City and community want to enhance our street design beyond the minimum engineering and design requirements to support mobility and access for all modes of travel.

Impact to Ongoing Expenses
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

Scalability and explanation
The budget for this planning project is consistent with other recent projects including the Harmony Road ETC, the College Avenue Transportation Study and the Lincoln Corridor Plan. The budget allows for a 12 to 18 month long project with the support of a consultant. If the study were scaled down, the design would include less detail with less public involvement. Additional budget would allow the project to be developed to a conceptual engineering design level with more intense public outreach.

Offer 6.13: KFCG ENHANCEMENT: Motorist Education to Protect Vulnerable Road Users

2019: $25,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $25,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will expand the reach of the City’s FC Bikes Bicycle Ambassador Program (BAP) and Safe Routes to School (SRTS) program housed within the FC Moves Department. Working together, BAP and SRTS will increase bicycle, pedestrian and motor-vehicle driver educational offerings to high-school students and will offer the Bicycle Friendly Driver course to teachers, parents and administrators at K-12 schools.

BAP is the adult education branch of the City’s FC Bikes program. BAP aims to make Northern Colorado the safest and best place to ride a bicycle by using BAP members to teach others how to bicycle safely, and how to operate motor vehicles safely when people on bicycles are present. BAP currently has more than 100 members who teach nearly 100 classes and offer bicycle-related educational activities at more than 50 events each year.

The City’s SRTS program is also housed in the FC Moves department and has a long-term goal of having 50% of K-12 children safely biking or walking to school. SRTS provides programming at Poudre School District schools in Fort Collins on a specified schedule that ensures all K-8 students receive bike-ped safety education at key stages of their educational development.

In December 2015, FC Bikes launched a motorist-focused course titled Bicycle Friendly Driver (BFD) that has since reached more than 3,900 people in Northern Colorado. BFD is a 90-minute course taught by Bicycle Ambassadors in which motor-vehicle drivers learn how to safely share the road with bicyclists.

With this offer, SRTS and BAP will collaborate to offer Bicycle Friendly Driver to an additional 2,200 people annually -- 1,600 teenage drivers at high schools, as well as 600 parents, teachers and administrators at K-12 schools. Building on the success of SRTS in PSD schools, this will allow the two programs to expand their reach and provide safety education to all members of the family, making the roadways safer for all users. Funding will provide contractual services, office supplies and program supplies.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information
Offer 6.13: KFCG ENHANCEMENT: Motorist Education to Protect Vulnerable Road Users

- This offer will help protect vulnerable road users including K-12 students biking and walking to school as well as new teenage drivers. According to the Centers for Disease Control and Prevention, motor-vehicle crashes are a leading cause of death and serious injury among children and teenagers, both as bicyclists/pedestrians who are vulnerable to getting hit by cars and as new drivers.

- BAP reaches more than 4,000 people annually through bicycle-related classes and events. By training Bicycle Ambassadors to teach others about bicycling, bicycling safety and sharing the road with people who ride bicycles, BAP helps to create a safer environment where more people can and will choose to use a bicycle as a form of transportation.

- Education is key to keeping road users safe. Prior to the creation of the BFD, the majority of bicycling education was focused on teaching bicyclists how to ride safely and ignored the fact that 50% of crashes involving bicyclists and motor vehicles are the result of motorists’ errors. The Bicycle Friendly Driver program was created to address this gap in roadway safety education.

- FC Bikes piloted a School Bicycle Ambassador Program in 2016-17 during which Bicycle Friendly Driver was taught to students at four local high schools. Through the pilot, FC Bikes was able to reach more than 1,000 students and test the concept of teaching motor-vehicle safety to teenagers. This offer builds on the success of the pilot program.

- The SRTS School Rotation Schedule is a plan to teach bike-ped safety to all public-school students at strategic times during their educational development. This plan has proven successful at reaching over 7,600 students annually. The opportunity exists to educate more members of the community by offering roadway-safety education to students’ parents and teachers as well as new teenage drivers.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $20,000

Scalability and explanation

This offer is scalable by reaching fewer students with less funding.

- bicycleambassadordprogram.org
- fcgov.com/bicyclefriendlydriver
- fcgov.com/saferoutes

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)
Offer 6.13: KFCG ENHANCEMENT: Motorist Education to Protect Vulnerable Road Users

- TRAN 6.1 - Improve safety for all modes of travel: The BFD program curriculum is data-driven and focuses on teaching motorists and bicyclists how to avoid being involved in the most common bicycle/motor-vehicle crashes that occur in Fort Collins. Education initiatives such as BFD have likely contributed to the 22% decrease in bicycle/motor-vehicle crashes since 2012. This offer aims to continue the trend in reducing the number of crashes.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: As people feel more safe and confident riding bicycles and motorists better understand how to share the roadway with bicyclists, bicycle mode share is likely to increase. Increased bicycle ridership will help reduce traffic congestion by replacing car trips with trips by bicycle.

Offer 6.15: ENHANCEMENT: Downtown Mountain Avenue Reshaping Project

2019: $0 and 0.00 FTE, 0.00 Hourly FTE
2020: $100,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This Offer funds the planning and concept design of a street reshaping project along Mountain Avenue, between Howes Street and the Lincoln Avenue Bridge. This project will redesign the four lane corridor to create a vibrant, multimodal corridor through the center of Old Town Fort Collins. Today, this section of Mountain Avenue has more travel lanes than necessary for the current and projected traffic volumes; a redesign will allow better utilization of the street space to establish a complete and sustainable street, offering benefits for mobility, the downtown, and the environment.

Through this process, design alternatives will be developed and evaluated through extensive public outreach for the downtown Mountain Avenue corridor, building on recommendations from recent planning efforts. The concept design will include streetscape, pedestrian and bicycle facility improvements, new landscaping, innovative intersection upgrades at Walnut/Mountain and Jefferson/Mountain, and vehicle access improvements to key destinations downtown including the adjacent parking garages.

Funds will be utilized for concept design and outreach in 2020, with an offer for final design and implementation anticipated for the 2021-2022 budget cycle.

This project addresses an east-west downtown bicycle connectivity gap while creating first/last mile connections to transit (MAX), recent improvements along Lincoln Ave., and existing north-south bikeways (Mason and Remington). Further, this project capitalizes on the opportunity to convert this integral street through Old Town Fort Collins into a vibrant gateway accessible to all users, while also piloting innovative infrastructure designs proven successful in other communities around the world.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✅):

- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

Additional Information

- Addresses a downtown bicycle connectivity gap (currently there are limited east-west bikeway connections through downtown, where sidewalk riding is prohibited). Provides the opportunity to promote bicycling and walking for short trips, while better connecting first/last mile transit.
**Offer 6.15: ENHANCEMENT: Downtown Mountain Avenue Reshaping Project**

- Implements adopted plan recommendations and integrates current / upcoming downtown street projects.

- Showcases and tests new and innovative infrastructure designs to improve safety and operations for all modes, including a possible Dutch Roundabout at the intersection of Walnut and Mountain.

- Utilizes extra street capacity along Mountain Ave., between Howes and Jefferson to improve access to downtown Fort Collins for all users while incorporating innovative public space design and street greening improvements.

- Considers opportunities to improve access to on-street parking and two downtown parking garages.

### Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $5,000

### Scalability and explanation

Scale Down: only fund the conceptual design and public outreach.

Scale Up: Option #1 would include an additional $1M, on top of the base offer, to implement improvements along the corridor, less the intersections of Walnut / Mountain and Jefferson Mountain. Option #2 would include $4M, on top of the base offer to implement improvements along the entire corridor and all intersections.

### Links to Further Details:

- [2014 Bicycle Master Plan](https://www.fcgov.com/bicycling/bike-plan.php)
- [Example of a Dutch-style Roundabout](https://www.youtube.com/watch?v=FR5l48_h5Eo)

**Offer 31.1: Streetscape Maintenance**

2019: $760,604 and 2.01 FTE, 2.14 Hourly FTE  
2020: $778,357 and 2.01 FTE, 2.14 Hourly FTE

**Offer Summary**

Funding this offer maintains more than 396 streetscapes (medians and parkways) totaling 85 acres. Streetscapes help provide safe, functional and visually appealing streets for the community.

The Parks Department assumes responsibility for new streetscape maintenance from the Engineering Department after a two-year, post-construction warranty period is complete. Basic maintenance for turf, low-density planting areas and hardscapes are provided by a private contractor. Contractual duties include maintaining irrigation systems, mowing, trimming, weeding and cleaning. Outsourcing this maintenance operation has kept maintenance costs low for these areas that require routine basic maintenance. The Forestry Division provides tree care for all streetscapes.

In 2013, new Fort Collins Streetscape Standards were implemented. These new standards require more in-depth maintenance with an emphasis on horticulture and plant survival. Local contractors are not equipped to handle the higher level of maintenance required for these areas. Subsequently the Parks Department horticulture staff has assumed responsibility for 14.44 acres of new and renovated medians with high-density plantings. This approach has been a success in keeping plant life alive and thriving under difficult conditions. The horticulture crew will continue to maintain all new streetscapes developed under the new standards with high-density planting to ensure the success of these locations.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- - HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

**Additional Information**

- Plants in commercial landscapes, both annual and perennial, are heavily impacted by the public and automobile traffic. It is necessary to continually coordinate horticultural renovations if plant diversity and enhanced aesthetics are desired within the community. Currently enhanced coordination with Engineering is essential to stabilize the streetscape landscape before turnover to Parks.

- A new Trained Observer performance measure was implemented in 2017. This program rates the visual quality of the streetscapes along major arterials from a citizen’s perspective.
Offer 31.1: Streetscape Maintenance

- Most enhanced streetscapes are located along well-traveled corridors. This requires additional resources for traffic control during maintenance activities. Traffic control takes significant time to coordinate and schedule, and is integral to employee safety and meeting City safety goals.

- Streetscapes must be well maintained to look and function as designed. Poor maintenance is the primary cause for failure of green infrastructure.

Links to Further Details:

Linkage to Strategic Objectives
(the primary objective is marked with a ✓)

✓ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: This offer directly correlates to maintaining the current level of service for streetscapes and infrastructure. Streetscapes built previous to 2013 are maintained at the level designed and streetscapes designed based on the 2013 Streetscape Standards are maintained at the new level.

HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility: Streetscapes are maintained at the level designed with the intent to provide plant life and irrigation systems that can survive harsh conditions and are reliable.

Improvements & Efficiencies

- The new streetscape standards have enriched the look of medians and parkways. The skill set required to maintain high density planted areas is not available from maintenance contractors. The current contract is for mowing, weeding and irrigation repair. For improved maintenance Parks is using staff’s horticulture expertise to address the higher level of maintenance needed for these areas.

- In 2017 new irrigation controllers were installed in high water use streetscapes to more effectively manage irrigation systems. The new controllers will allow the irrigation systems to be operated remotely from an app or computer, adjusts watering needs based on weather conditions, notifies technicians of irrigation system problems and allows immediate reporting of water usage.

- In 2017 Parks staff created the Plant ID Reference Guide. This guide is intended as a resource for individuals responsible for plant care and plant maintenance throughout the parks system. The guide is a compilation of plants inventoried within the parks and streetscape programs. Each plant description provides specific information for employees in choosing the best variety for each location.
**Offer 31.1: Streetscape Maintenance**

- Plant inventory information is also used to prioritize plant replacement ensuring the streetscapes follow the intended look of the original design. Plant mortality is also tracked to identify health trends of plants. Employees make the necessary changes to ensure they are using the best-suited-plants for each location.

- Coordinated efforts are in place between the Streetscapes staff team, the Forestry Division and the streetscape contractor to share traffic control operations whenever possible. This collaboration reduces traffic control costs for the department by occupying the same footprint for multiple projects. By consolidating traffic control plans, the impact on citizen’s commute is reduced.

- Parks utilizes a GIS system to track streetscape infrastructure, including maintenance responsibility, square footage, water accounts, and locations of infrastructure. This enhanced tracking allows for analysis of water usage, efficient deployment of staff to locations, and better tracking and communication for contracts.

- Parks participated in an FC Lean process to improve the quality of maintenance on the contracted streetscapes. Results of that process are being incorporated into a 2019 contract update.

Data As Of: 3/7/19 at 3:03:35PM
**Offer 31.2: ENHANCEMENT: 1.0 FTE - Park Technician and New Streetscapes**

2019: $162,833 and 1.00 FTE, 0.00 Hourly FTE
2020: $234,599 and 1.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will provide resources for new streetscape maintenance responsibilities in 2019 and 2020. Capacity to absorb additional properties is unavailable without maintenance resources and new support personnel.

The Parks Department is tasked with maintaining the City’s streetscape system. This program will be required to maintain an additional 265,267 square feet of property in 2019 and 180,076 square feet in 2020. The additional properties necessitate hiring a Park Technician in 2019. The new medians referenced in this offer have already been built through City Capital Improvement Projects. Examples of projects include the Lincoln Corridor (Lemay to Willow), the Prospect and Timberline intersection, Mulberry Bridge, the College and Prospect intersection and the Elizabeth/Shields underpass. The Parks Department assumes responsibility for maintaining these sites after Engineering’s two year warranty period is complete.

Streetscape maintenance is requiring more technical expertise in irrigation system water management and conservation, GIS mapping, specialized horticultural knowledge of landscapes, and plant inventory and mortality analysis. It is a year round program and needs appropriate staffing to meet those obligations. The Park Technician is required to manage the horticulture aspects as well as the irrigation management. The goal of this enhancement is to properly resource and staff for additional streetscape maintenance responsibilities and year round demands placed on the program. Maintaining the new streetscapes as designed under the 2013 Streetscape Standards is the goal of the program.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- **TRAN 6.6** - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- **HPG 7.8** - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

**Additional Information**

- Annual flower beds and pots are now being incorporated into many gateway and intersection projects per the Streetscape Standard. This requires a significant increase in maintenance resources and horticulture knowledge.
Offer 31.2: ENHANCEMENT: 1.0 FTE - Park Technician and New Streetscapes

- Plants in commercial landscapes, both annual and perennial, are heavily impacted by the public and automobile traffic. It is necessary to continually coordinate horticultural renovations with plant diversity and enhanced aesthetics that are desired by the community. Currently enhanced coordination with Engineering is essential to stabilize the streetscape landscape before turnover to Parks.

- Most enhanced medians are located along well-traveled corridors. This requires additional resources for traffic control. Traffic control takes significant time to coordinate and schedule, and is integral to employee safety and meeting City safety goals.

- Streetscapes must be well maintained to look and function as designed. Poor maintenance is the primary cause of failure of green infrastructure.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $236,000

Scalability and explanation

This offer is not scalable. Personnel position requested in this offer are imperative to Parks continuing to provide the current level of service. With the changes in City policies regarding use of hourly workers, an hourly workforce is no longer a sustainable option and fulltime staff is needed.

Links to Further Details:

Linkage to Strategic Objectives

(the primary objective is marked with a ✅)

✅ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: This offer supports maintaining the City's streetscapes as designed to be visually appealing public spaces that contribute to Fort Collins' distinct identity.

- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility: This offer supports maintaining assets to reduce lifecycle costs while improving reliability. A goal of the program is to evaluate and promote plant life in medians that is sustainable and reliable in a harsh environment.

Data As Of: 3/7/19 at 3:03:35PM  
2.2.03 Package and Offer Detail  
Page 156 of 343
**Offer 31.3: ENHANCEMENT: 1.0 FTE - Streetscapes/Horticulture Crew Chief**

2019: $82,288 and 1.00 FTE, 0.00 Hourly FTE
2020: $103,436 and 1.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will provide necessary supervision and contract oversight for the expanding streetscapes and horticultural program within the Parks Department. The growth of this program is driven by continual construction of new streetscapes and by the 2013 Streetscape Standards, which has resulted in additional complex planting areas. Currently, this staffing resource is being provided by the Parks Project Manager in charge of the Parks Lifecycle program and a Parks Supervisor. This staffing model is diverting resources away from several essential programs and is not sustainable.

This position’s responsibilities will be:
- Oversight of the streetscape maintenance contract. The contractor maintains 75 acres of turf, low-density plantings and hardscape medians and parkways.
- Supervise the internally staffed Enhanced Streetscape Horticultural Program (implementation of the 2013 Streetscape Standards for streetscapes with high-density plantings). Since its inception in 2013, this program has expanded to 14.44 acres without the needed supervision of a Crew Chief.
- Coordination with Engineering on enhanced streetscape projects and working with the Streetscape Standards team (five to six projects per year)
- Coordinate the Parks Horticultural Program that supports planted areas in Parks, Facilities, Cemeteries and Golf (approximately 515,000 square feet in 663 planting areas)
- Supervise two Park Technicians and 11 hourly positions
- Maintenance of related technical resources (i.e., GIS mapping)
- Outreach and coordination with the CSU Horticultural Program
- Water management of all contracted and enhanced streetscape sites, includes 115 potable water taps and irrigation repairs
- Assistance with median renovations that are managed through the Parks Lifecycle Program (one to two projects per year)

This position will provide needed vision, direction and supervision for this program and will allow resources to be reallocated in other areas of the Parks Department.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✅)*:

- TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

**Additional Information**
Offer 31.3: ENHANCEMENT: 1.0 FTE - Streetscapes/Horticulture Crew Chief

- Areas of maintenance responsibility for this program have expanded to gateway entrances to the City, including I-25/392 interchange and high-density plantings at College/Harmony, and Mulberry Bridge will be added in 2019. Additionally, underpasses at Foothills Mall and CSU (Elizabeth and Shields) will be added to this program in 2019.

- In 2019 and 2020, an additional 445,343 sq. ft. of new streetscapes will be added to the streetscape maintenance inventory, further increasing staff and the need for more direct supervision for this program.

- The management and tracking of this program has increased the need for technical GIS expertise. All medians have been measured and mapped with associated water taps on the City’s GIS system. This position will need the technical expertise to continue this process as new medians are added to the system.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $103,295

Scalability and explanation

This offer is not scalable.

Offer 31.4: ENHANCEMENT: Streetscape Renovations

2019: $400,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $400,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide $400,000 per year for Streetscape renovations that involve irrigation, landscape and decorative hardscape treatments.

The City of Fort Collins is charged with maintaining approximately 85 acres of land in the public right-of-way. Approximately 50 acres of streetscapes are irrigated and in need of major renovations. Streetscapes use more than 24 million gallons of water, with a cost of more than $145,000. These streetscapes support more than 3,000 trees within the urban forest and are located on major arterials, which help enhance the community character. There are more than 120 irrigation taps spread over three different water utility districts (Fort Collins Utilities, ELCO, Fort Collins/Loveland Water District). Streetscapes renovated through this offer will be converted to meet the 2013 Streetscape Standards, and to promote water conservation techniques and the use of Colorado-specific plant material.

Focus areas include partnering with the Downtown Development Authority (DDA) on planned improvements to Downtown streetscapes; safety improvements for visibility along Foxtail that were requested, but not funded, through the Vibrant Neighborhood Grant process; and completing plantings along the West Drake Parkway project that was underfunded due to changing water tap fees. Water conservation-focused sites include areas with a poor history of water usage (consistent pattern of using more than the water budget or extreme due to irreparable irrigation system damage that affects plant mortality) and sites with installation dates of more than 30 years old. Examples of areas include sections along Drake Road, Shields Street, Taft Hill Road, Mountain Avenue, Willox Lane, Timberline Road near Harmony, and West Harmony Road. Additionally, installing centrally controlled irrigation controllers in strategic areas will improve water conservation.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information

- The DDA board has allocated funding to design and install micro-space projects in downtown starting in 2020. Nature in the City and Water Conservation departments are interested in contributing monies to these projects. The Parks Department is interested in contributing a portion of the Streetscapes Renovation offer towards the downtown micro-spaces project if funded.
**Offer 31.4: ENHANCEMENT: Streetscape Renovations**

- Irrigation improvements can conserve water by approximately 20-30%. This could yield approximately 5 - 7 million gallons of water savings.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:  
  
  $0

**Scalability and explanation**

This offer can be scalable between years as was done in the previous budget cycle. The offer could also be reduced based on the funding available.

**Offer 31.5: REDUCTION: Contractual Median Maintenance**

2019: $-25,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $-25,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will reduce funding for contractual median maintenance by $25,000. The median maintenance contract will be rebid in 2019, and is anticipated to have a significant increase due to increased contractor labor costs. With less funding for the median maintenance contract and cost increases, the number of months medians are maintained will need to be reduced. Currently medians are maintained for nine months. This would need to be reduced to eight or seven months, depending on the bid price, which would delay sprinkler system turn-on, affecting plant health; delay spring clean-up and weeding; and negatively affect the overall look of the medians in the spring.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

* ✓ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure  
  - HPG  7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

**Additional Information**

- Not applicable

**Impact to Ongoing Expenses**

- No ongoing expense associated with this Offer.

**Scalability and explanation**

N/A

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives** *(the primary objective is marked with a ✓)*

* ✓ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: This offer directly correlates to maintaining the current level of service for streetscapes and infrastructure. Streetscapes built previous to 2013 are maintained at the level designed and streetscapes designed based on the 2013 Streetscape Standards are maintained at the new level.
Offer 31.5: REDUCTION: Contractual Median Maintenance

- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility: Streetscapes are maintained at the level designed with the intent to provide plant life and irrigation systems that can survive harsh conditions and are reliable.

**Offer 34.1: Traffic Operations**

2019: $3,324,079 and 23.60 FTE, 2.60 Hourly FTE  
2020: $3,252,750 and 23.60 FTE, 2.60 Hourly FTE

**Offer Summary**

This offer provides ongoing management, maintenance, repair and improvement of the City's traffic infrastructure, helping to ensure a safe and efficient transportation system for all users.

There are three areas of focus: Traffic Signal Maintenance, Signs/Pavement Markings and Traffic Engineering.

**Traffic Signal Maintenance**: Includes the continued maintenance, repair and upgrade of the traffic signal system. This includes the signal infrastructure, hardware, software and the traffic signal communication system. Operation and maintenance of the City's signal system is an essential safety service as well as an important element in minimizing travel delays, fuel consumption and air pollution.  
2019: $878,658; KFCG: $0  
2020: $904,402; KFCG: $0

**Signs and Pavement Markings**: Includes the fabrication, installation, repair and maintenance of traffic signs and pavement markings on the public roadways in Fort Collins. Signs and pavement markings are used to inform, guide, warn and regulate all modes of travel. Proper signing/marking maintenance is critical for public safety and the efficiency of the transportation system.  
2019: $1,044,536; KFCG: $64,151  
2020: $1,079,004; KFCG: $64,151

**Traffic Engineering**: Includes traffic signal timing, staffing the Traffic Operations Center, traffic data collection, traffic safety data management and analysis, work area traffic control, neighborhood traffic mitigation, development review and department administration. Traffic Engineering provides support to City Council, the Planning and Zoning Board, the Transportation Board and the North Front Range Metropolitan Planning Organization. Lastly, Traffic Engineering provides support for other City departments including, but not limited to, FC Moves, Engineering, Streets, Parking, Police Services, Community Development & Neighborhood Services and the City Manager's Office.  
2019: $1,194,046  
2020: $1,207,125

Total KFCG requested:  
2019: $64,151  
2020: $64,151
Offer 34.1: Traffic Operations

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information

- Traffic Operations maintains 182 traffic signals, 48 pedestrian signals, 49 school zones, 4 fire station signals and 59 radar speed displays. We utilize preventative maintenance methods to reduce more costly, reactive maintenance caused by malfunctions or equipment failures. The signal response overtime performance measure (call outs after hours) is used to evaluate effectiveness of the program.

- Traffic Signals - Maintains 40 closed-circuit television cameras, 412 video detection cameras and 40 Bluetooth readers for travel time and congestion monitoring. 35 miles of fiber-optics tie this system together and allow remote traffic management from the City’s Traffic Operations Center.

- Signs and Pavement Markings – Responsible for yearly painting of 835 lane miles of ‘long line’ striping and maintenance of more than 30,000 traffic signs (about 2,500 are replaced annually). Install long lasting durable pavement markings for crosswalks, arrows, bike lanes and railroad markings. Provides signing and striping support to projects through Streets, Engineering, Transport, and FCMoves.

Links to Further Details:

Linkage to Strategic Objectives

( the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: Traffic Engineering - Leads the citywide traffic safety program using a data driven approach. Analyzes crash data to identify crash patterns and high crash locations. Implements low cost safety measures and informs safety projects in Engineering, FCMoves, Police Services and other community based organizations.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Traffic Operations provides ongoing management and optimization of signal timings on major arterial street corridors. Implements state of the art signal control technologies including traffic adaptive control. Utilizes real-time and historical travel data to monitor, evaluate and improve travel throughout the City. Since Q4 '14 travel times decreased by 6% while traffic volumes increased 10%.

Improvements & Efficiencies
**Offer 34.1: Traffic Operations**

- Traffic Operations has modified signal maintenance strategies to minimize response maintenance during off hours. Performance measure TRAN 38 - Traffic Signal Response Overtime is being used to measure effectiveness. The goal is to reduce overtime hours for emergency repairs by utilizing modern equipment and best practice preventative maintenance techniques.

- Traffic Operations is continuing to deploy tools to collect real-time and historical travel time data 24 hours a day, 7 days a week and 365 days a year. This allows for statistically valid measurements to be used with Performance Measure TRAN 36 - Average Travel Speeds/Times on Arterial Streets. It also provides a means to accurately quantify benefits from signal timing changes, projects etc.

- Traffic Operations is continuing to refine the type of durable pavement markings used with the goal of utilizing materials that are the least expensive to install and maintain, minimize environmental impacts, and provide the longest life and highest benefit/cost ratio.

- Work completed in previous years has laid the groundwork for deployment of new adaptive control strategies for our traffic signal system. Adaptive control provides a means for traffic signals to more effectively respond automatically to varying traffic patterns in order to minimize stops, delays and vehicle emissions. (See offer 34.3)

- Ongoing efforts to reduce congestion and improve transportation system efficiency through signal timing refinements and other projects result in measurable reductions in motorist delay and greenhouse gases.

**Performance Metrics**

- SAFE 6. Number of Injury/Fatal Crashes  
  https://publish.clearpointstrategy.com/594/Measures/scorecardId=6349&object=measure&objectId=91504.html

- TRAN 28. Average Travel Speeds/Times on Arterial Streets  
  https://publish.clearpointstrategy.com/594/Measures/scorecardId=6349&object=measure&objectId=260446.html

- TRAN 38. Traffic Signal Response Overtime  
  https://publish.clearpointstrategy.com/594/Measures/scorecardId=6349&object=measure&objectId=104454.html

**Personnel Changes**

- Administrative position change - conversion of 3.5 full time hourly positions to Classified. Adjusted the FTE Distribution percentage of several Traffic employees (including 0.5 full time hourly position) in this offer into our Traffic Construction offer in anticipation of increased project work in 2019 and 2020.

**Differences from Prior Budget Cycles**

- Safety, Security and Risk Management (SSRM) transfer charges have been moved and are being centralized into PDT Administration.

Data As Of: 3/7/19 at 3:03:35PM
Offer 34.2: Traffic Operations Equipment

2019: $238,715 and 0.00 FTE, 0.00 Hourly FTE
2020: $206,191 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

The City's total investment in traffic signal infrastructure is estimated to be approximately $28M. Much of this infrastructure was installed as long ago as the 1970s and 1980s, and is in need of replacement or upgrade. In 2011, funds were allocated to Traffic Operations for equipment replacement/upgrade through both the Transportation Fund and KFCG funds. This offer continues that funding. KFCG funding has been used to replace critical traffic signal infrastructure including conduit, wiring, signal poles, etc., and to upgrade signals to improve performance. Transportation Fund money has been used to replace aging traffic signal infrastructure, upgrade the video wall in the Traffic Operations Center, replace communication servers and desktop workstations in the Traffic Operations Center, replace vehicles that were past their service life, and purchase/upgrade other needed equipment to provide core services.

Without this funding, maintenance activities will go back to a less cost-effective reactionary mode where items are only replaced when they fail. This tends to be less cost-effective in the long run and has greater implications for users of the transportation system. It is also less strategic as decisions about equipment replacement are driven by immediate needs versus long-term planned asset management goals. By maintaining this funding for equipment replacement, Traffic Operations will be able to continue the proactive maintenance approach created with this funding.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
- ✓TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information

- Traffic Signals - Currently, Traffic Operations maintains 182 traffic signals, 48 pedestrian signals, 49 school zones, 4 fire station signals and 59 radar speed displays. This infrastructure requires ongoing maintenance and repairs to maintain proper operation.

- Traffic Signals - Maintain 48 closed-circuit television cameras, 422 video detection cameras and 40 Bluetooth readers for travel time and congestion monitoring. 35 miles of fiber-optics tie this system together and allow remote traffic management from the City's Traffic Operations Center.
**Offer 34.2: Traffic Operations Equipment**

- Examples of Projects completed in the past two years with this funding include: New pedestrian signals on Mulberry at Sherwood and on Drake at Brookwood, new signal poles for JFK/Horsetooth, new signal cabinet at Loomis/Laurel, new signal pole at College/Jefferson, new signal poles for College/Troutman, signal upgrades at Shields/Laporte, new left turn signals at Snow Mesa/Harmony.

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: Maintenance of transportation infrastructure is critical to the ongoing safe and efficient operation of the transportation system.

- TRAN 6.1 - Improve safety for all modes of travel: The proper function and operation of traffic signal systems are critical for the safety of our transportation system.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: The proper function and operation of traffic signal systems are critical for managing congestion.

**Improvements & Efficiencies**

- Traffic Operations purchased a portable traffic signal in 2017 to be used in the event of signal pole knockdowns or other situations where temporary signal control is needed. Traffic signal controller upgrades are providing new features to enhance safety and operations. Specifically, peer-to-peer capabilities that allow signal controllers to share data and functions.

Offer 34.3: KFCG ENHANCEMENT: Adaptive Signal System Expansion

2019: $57,581 and 0.00 FTE, 0.00 Hourly FTE  
2020: $28,281 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will expand the use of adaptive signal control in Fort Collins. In 2017, work began to install an adaptive signal control system on Harmony Road from Lady Moon to College. That project was completed in early 2018. A second adaptive system is slated for Timberline Road later this year.

Adaptive signal control is a state-of-the-art signal timing strategy intended to minimize stops, delays, air pollution and fuel consumption at signalized intersections. In most locations, the City uses pre-programmed signal timing plans that run by time of day. Those plans are developed based on past traffic counts. They work well where traffic volumes and patterns remain relatively consistent from day to day. Where patterns are less consistent, adaptive signal control uses vehicle detectors placed strategically to allow the signal system to collect data in near real-time and adapt the signal timing automatically to account for changing traffic patterns.

Staff’s experience with adaptive control on Harmony Road has helped target other specific locations that may benefit most from its use. Staff is proposing the use of adaptive control strategically at intersections on Lemay, Shields, Taft Hill and College. Based on the installation cost on Harmony, the requested $150,000/year would provide for adaptive control at approximately 10 intersections per year.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- ENV 4.2 - Improve indoor and outdoor air quality

Additional Information

- Adaptive control at ten signalized intersections per year on key arterial streets in Fort Collins. The project will primarily entail installation of new controllers and additional detection in advance of intersections to supplement existing stop line detection that is already in place.

- This project builds upon previous projects funded through prior BFO cycles. In particular, the installation of centralized signal control software and video detection that allows for the implementation of adaptive control technology very cost effectively.

- Appendix F in the latest Community Survey benchmarks different services against other communities in Colorado and nationally. "Ease of Driving" and "Traffic Congestion" are two of only a handful where the City rates "Much Lower" when compared to other benchmark cities. Adaptive signal control is a strategy intended to reduce congestion.
**Offer 34.3: KFCG ENHANCEMENT: Adaptive Signal System Expansion**

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

This offer is scalable. We could implement adaptive control at less intersections, but it would maximize the benefit to install at all locations.

**Links to Further Details:**

- [https://www.fhwa.dot.gov/innovation/everydaycounts/edc-1/asct.cfm](https://www.fhwa.dot.gov/innovation/everydaycounts/edc-1/asct.cfm)

**Linkage to Strategic Objectives**

(\textit{the primary objective is marked with a \checkmark})

- **TRAN 6.2** - Manage traffic congestion and improve high-priority intersections: This offer would target high priority intersections for implementation of adaptive control.
- **ENV 4.2** - Improve indoor and outdoor air quality: Reducing congestion decreases fuel consumption and emissions from motor vehicles.

**Performance Metrics**

- **TRAN 28.** Average Travel Speeds/Times on Arterial Streets

Offer 34.4: Signal Pole Inspection and Maintenance

2019: $100,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $100,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue the signal pole inspection program started in 2017 and replace signal poles identified through that program. Starting in 2017, a structural engineering firm was retained to inspect signal poles throughout Fort Collins. To date, about half (250) of the City's signal poles have been inspected and six have been identified as in need of replacement. As inspections continue in 2018, staff anticipate that there will be more poles identified for replacement.

This inspection/replacement cycle should be an ongoing part of a traffic signal asset management program. Staff envision signal pole inspections on an industry standard four-year cycle (every other budget cycle) with funds from this offer during non-inspection years going toward replacing signal poles identified during the previous inspection cycle. That being the case, staff anticipate that the $100,000 of KFCG Funds per year in this offer will be used primarily for signal pole replacements identified in 2017/2018. At approximately $18,000 per pole, this offer would about cover the replacement of the six poles identified thus far in 2017/2018. Additional poles identified in 2018 would be replaced in 2020.

Maintaining this program also allows the City to retain the structural engineering firm on a standby basis to conduct inspections as the result of unforeseen circumstances. Traffic signal poles are sometimes damaged in traffic accidents. It will be beneficial to have a specialist on call who can inspect these poles to determine if they are fit to remain in operation or if they need to be replaced immediately.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- ✓TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
- TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- TRAN 6.1 - Improve safety for all modes of travel

Additional Information

- The City has invested $28 million in traffic signal infrastructure. Maintenance of this investment is a high priority. This program was started in 2017 - 2018. This offer is for the continuation of that program.

- Traffic Operations is working with the Engineering Department to utilize asset management software (Deighton) to analyze and develop an optimized traffic signal pole maintenance and replacement schedule.
**Offer 34.4: Signal Pole Inspection and Maintenance**

- Maintains critical transportation infrastructure in a data-driven, pro-active, cost-effective manner.

**Links to Further Details:**
- Not applicable

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

- **TRAN 6.5** - Improve aging and/or missing transportation infrastructure that serves Fort Collins:
  Some of the traffic signal infrastructure that is being inspected through this program was installed in the 1970's or 1980's. Some of this aging infrastructure is in need of replacement.

- **TRAN 6.6** - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: Traffic signals are a critical part of the overall transportation system infrastructure.

- **TRAN 6.1** - Improve safety for all modes of travel: Proper traffic signal operation is critical to safety of the transportation system.

**Improvements & Efficiencies**

- This program represents an improvement to past reactive methods which relied on failure or visible damage to signal poles to force replacement. This proactive approach better ensures the safety of the public and reduces costs by replacing poles with a more structured, planned approach.

**Performance Metrics**

- **TRAN 38. Traffic Signal Response Overtime**

Offer 34.5: Neighborhood Traffic Mitigation Program

2019: $150,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $150,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue the City's Neighborhood Traffic Mitigation Program at current funding levels. The program is coordinated through the City's Traffic Operations Department.

Speeding and cut-through traffic in residential neighborhoods are common concerns expressed by Fort Collins residents. Prior to 2010, the City's Neighborhood Traffic Mitigation Program was limited in scope ($20,000) - providing portable radar speed trailers, yard signs and radio advertisements reminding drivers to slow down in neighborhoods, school areas, etc. In 2010, City Council authorized a one-time expenditure of an additional $100,000 of General Fund money to implement physical traffic-calming devices based on specific evaluation criteria. In 2011-2012, funds from the Traffic Calming Surcharge were used to continue the program. In 2013, an additional $30,000 of Traffic Calming Surcharge funding was provided, bringing the total annual program funding to $150,000.

Since 2010, traffic mitigation projects have been completed on about 40 residential streets (five to six streets per year). Projects have included road diets (converting a street from four lanes to three lanes, including a center turn lane), radar speed displays, dynamic school speed limit signs and speed humps. These devices are applied based on screening criteria along with an extensive consensus-building process within each neighborhood. This offer proposes to continue the Neighborhood Traffic Mitigation Program at current funding levels, using $150,000/year from the Traffic Calming Surcharge.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
- NLSH 1.6 - Protect and preserve the quality of life in neighborhoods
  ✓TRAN 6.1 - Improve safety for all modes of travel

Additional Information

- Both speed humps and radar speed display signs have been shown to be effective at reducing travel speeds.

Links to Further Details:

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)
**Offer 34.5: Neighborhood Traffic Mitigation Program**

- **NLSH 1.6 - Protect and preserve the quality of life in neighborhoods:** Traffic impacts in residential areas negatively affect quality of life in neighborhoods. Mitigating those impacts through traffic calming as proven to be an effective way of enhancing neighborhood livability.

- **TRAN 6.1 - Improve safety for all modes of travel:** While traffic calming is usually intended to enhance neighborhood livability, there can be positive safety benefits in some circumstances. For example, speed humps were used to mitigate speeds on W. Swallow in 2017 in response to an identified crash history in the area.

**Improvements & Efficiencies**

- Coordinate with the Street Maintenance Program to implement traffic mitigation on streets scheduled for repaving. This reduces cost by providing economies of scale.

**Performance Metrics**

- **TRAN 37. Average Speed on Neighborhood Streets**
  [https://publish.clearpointstrategy.com/594/Measures/scorecardId=6349&object=measure&objectId=104451.html](https://publish.clearpointstrategy.com/594/Measures/scorecardId=6349&object=measure&objectId=104451.html)

Offer 34.7: ENHANCEMENT: Bicycle and Pedestrian Infrastructure Maintenance

2019: $0 and 0.00 FTE, 0.00 Hourly FTE  
2020: $52,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This is a joint offer between the Traffic Operations and Streets departments requesting additional funding to maintain new bicycle and pedestrian infrastructure. There are significant maintenance costs associated with bike and pedestrian facilities that are above and beyond current budgeted resources.

The following types of maintenance for new bike/ped facilities would be funded by this offer:
- Pavement - crack repair and potholes
- Sweeping and litter removal
- Snow removal
- Traffic signals
- Pavement markings
- Traffic signs

New bike facilities require different maintenance strategies. First, the need for arterial street crossings on the City's low-stress bicycle network has resulted in the installation of new traffic signals at a higher rate than in previous budget cycles. By the end of 2018, eight to ten new signals will have been installed in the past two years along with associated pavement markings, often including green-colored markings and extensive directional and wayfinding markings. Protected bike lanes are being added that require new, more expensive maintenance methods. Access to the pavement in the protected areas for repair, sweeping and snow removal requires special equipment and more labor leading to increased cost. This offer is intended to fund these increased costs. The amount was calculated based on actual excess maintenance costs from previously completed bike and traffic signal projects.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel

Additional Information
- Not applicable

Impact to Ongoing Expenses
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $52,000
Offer 34.7: ENHANCEMENT: Bicycle and Pedestrian Infrastructure Maintenance

Scalability and explanation
The amount of this offer is dependent on the amount of new bike facilities installed.

Links to Further Details:
- Not applicable

Linkage to Strategic Objectives
(they primary objective is marked with a ✓)
✓TRAN 6.1 - Improve safety for all modes of travel: The City is in the process of implementing the 2014 bike plan that includes significant improvements to complete build out of a 2020 low stress network as well as pilot protected bike lane projects.

Performance Metrics
- SAFE 6. Number of Injury/Fatal Crashes

Offer 35.1: Street Maintenance Program

2019: $15,885,512 and 19.50 FTE, 5.00 Hourly FTE  
2020: $16,192,355 and 19.50 FTE, 5.00 Hourly FTE

Offer Summary

Funding this offer provides roadway maintenance for 1,957 lane miles of roads. A pavement management system has been implemented and used to analyze pavement conditions and optimize the use of available funding, selecting the right maintenance treatment at the right time on the right street, for maximum benefit and protection of the City's ever-increasing infrastructure investment. Maintaining the existing infrastructure must always be the number-one focus.

Pavement conditions deteriorate over time. The cost of maintenance also increases with the age of the pavement. The Street Maintenance Program (SMP) takes advantage of this simple principle and uses pavement preservation techniques to distribute available funding on routine and preventative maintenance treatments before pavement deterioration requires rehabilitation treatments that can cost eight to ten times as much.

Additionally, construction costs continue to rise approximately 5% annually, which has long-term impacts on how much maintenance can be performed on a yearly basis if budgets are not increased at the same levels.

The SMP manages a variety of projects including asphalt repairs, crack sealing, overlays, surface treatments and concrete repairs. Project coordination is a vital component of the program, requiring collaboration with internal City departments and external utility agencies, schools and special interest groups.

This offer provides maintenance for safe, well-maintained infrastructure such as streets, curb and gutter, sidewalks, bike lanes and pedestrian access ramps. It is a legal requirement to make pedestrian access ramps Americans With Disabilities Act (ADA) compliant adjacent to streets scheduled for resurfacing.

The Alley Maintenance program is now included in the SMP to maintain 241 blocks of alleys. This includes routine maintenance of once-a-year blading in every unpaved alley, reconstruction of select alleys to improve drainage, cure problematic locations, and restore aggregate surface.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✗):

- ✗ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure
- Tran 6.1 - Improve safety for all modes of travel
- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility
Offer 35.1: Street Maintenance Program

Additional Information

- Keep Fort Collins Great (KFCG) Funding amounts included in this offer are:
  KFCG Funding - 2019 - $7,132,700
  KFCG Funding - 2020 - $7,365,800

- Since the inception of KFCG funding in 2011, SMP has been able to complete an additional 371 lane miles for a total of 859 lane miles. The program is averaging 123 lane miles per year with the additional KFCG funding. Prior to this additional funding, an average of 70 lane miles annually were completed. Of concern, KFCG sunsets at the end of 2020, representing half of the overall SMP budget.

- The SMP set a yearly performance goal of 125 total lane miles of road to resurface in 2017. The goal was exceeded with a total of 129 lane miles resurfaced.

- Street maintenance extends the life of the pavement, protecting the taxpayer’s $1 billion dollar infrastructure investment. Street maintenance also improves skid resistance (making roads safer), ridability, drainage, and aesthetics.

- The SMP has received four national and state awards since 2013 for overlay projects.

Links to Further Details:

Linkage to Strategic Objectives

(the primary objective is marked with a ✔)

✔ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: The City of Fort Collins has set a goal to achieve and maintain an average Pavement Condition Index (PCI) of 70 to 85 for all city streets which equates to Level of Service "B" or "Good".

- TRAN 6.1 - Improve safety for all modes of travel: SMP staff collaborates on all projects with other City departments such as FC Moves, Traffic Operations, and Engineering to implement safety opportunities that exist for all modes of travel.

- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility: Using the PCI as a foundation, staff uses software to model the projected network condition and the estimated life cycle costs. The software also helps identify maintenance and rehabilitation requirements for budgeting and planning.

Improvements & Efficiencies
**Offer 35.1: Street Maintenance Program**

- Data in the pavement management system is updated as paving activities are completed each year. To calibrate the data, street maintenance uses a third party to collect actual street condition data every three years. The next collection will occur at the end of 2018.

- The target PCI is a Level of Service "B" or "Good" (70 or better on a 100 scale) average rating for the network. The most recent PCI assessment in 2015 was 75.8, an improvement over the 2012 rating of 70.9. For 2018, the projected PCI is 79.7. This indicates that street maintenance is effective in improving pavement conditions.

- In 2017, SMP started utilizing the Nextdoor social media as another communication tool to help inform the public about street maintenance work in their area. Nextdoor is a private social network for neighborhoods. This communication is in addition to other social networking tools that are utilized such as Facebook and Twitter.

- To ensure overall safety of our projects, SMP began yearly work coordination with the Forestry and Code Compliance Departments. City Code states that trees shall be pruned to 8 feet above the sidewalk and 14 feet above the street. This proactive approach allows pruning to be accomplished prior to street maintenance work to ensure project safety and protection of city trees.

- SMP has upgraded two positions to project management level positions. This allows for better project oversight, improved communications, and an increased level of customer service to businesses, citizens, and other City departments.

- Ground penetrating radar (GPR) equipment is an efficient and non-destructive way to survey a large inventory of roadways with minimal traffic impacts. It provides existing pavement thicknesses which allows better accuracy when creating cost estimates/scheduling/scope of work of projects. Another GPR improvement is the ability to visualize data in Google maps.

- In 2017, SMP utilized a surface treatment called HA5 for the first time. A test area was performed on select residential streets. So far HA5 has proven to be another cost effective maintenance treatment option that we hope to continue to add to our maintenance toolbox. In 2018, HA5 will be installed on a much larger scale, including an arterial roadway which has higher traffic volumes.

- SMP issued a bid award to a new contractor that specializes in sidewalk trip hazard removal and inspections. The new contractor was not only the lowest bidder but has proven that their methods are more efficient and less disruptive to property owners and pedestrians. Additionally their patented machine (cutter) removes trip hazards while being below OSHA requirements for airborne silica dust.

- Concrete repairs are generally performed one year in advance of the resurfacing efforts which create scheduling efficiencies.

**Performance Metrics**

- TRAN 4. Pavement condition: average Pavement Condition Index (PCI)- OVERALL
**Offer 35.1: Street Maintenance Program**

Offer 35.2: Snow and Ice Removal

2019: $1,422,891 and 3.00 FTE, 0.00 Hourly FTE
2020: $1,423,586 and 3.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide high quality snow and ice removal services for all modes of transportation through the Snow and Ice Program. A well planned and executed winter operations plan is imperative. This plan strives to maximize services while minimizing the impact to the environment and remain cost-efficient. The goal is to remove snow and ice from streets, bike lanes, sidewalks and pedestrian access ramps 24 hours after a storm. While the severity of each winter storm is unpredictable, the Streets Department will continue to work within its resources to maintain the highest level of customer service possible while balancing efficiency in snow and ice control.

When a storm is forecasted, City crews and contractors are readied and equipment can be mobilized quickly to plow and de-ice streets and sidewalks. No two storms are identical, and weather conditions can vary significantly during the winter months. Different conditions require different tactics and corresponding strategies.

During the snow season, crews are assigned to shifts to be able to respond 24/7 to weather events. Plow teams are assigned routes. First they concentrate on major arterial streets, then collector streets and school routes. If deemed necessary, residential streets are next, but only if snow depth warrants plowing. In some cases, the first response to a winter snow and ice storm may be de-icing treatments before full plowing operations begin. After the storm, in the cleanup phase, crews go back to finish bike lanes and contractors clear sidewalks and pedestrian access ramps. Downtown snow removal is an intensive process and is performed as needed according to conditions. It is generally done at night to minimize the impact to traffic and parking. It requires multiple pieces of heavy equipment and snow must be picked up and hauled to a designated snow dump site.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.1 - Improve safety for all modes of travel
- SAFE 5.4 - Improve emergency management and preparedness
- HPG 7.1 - Provide world-class municipal services to residents and businesses

Additional Information

- The Streets Department snow removal program encompasses vital snow and ice operations along 1,257 lane miles of city streets, as well as bike lanes, sidewalks, pedestrian access ramps, pedestrian trails (including the Mason Trail), parking lots and the Downtown area. This program includes deicing materials, labor and equipment costs needed to respond to snow/ice events.

- Preparation of staff includes a two-day intensive training every year on challenges, equipment readiness, personnel, plow routes, technology, and materials.
**Offer 35.2: Snow and Ice Removal**

- Public safety: Snow removal services are offered 24 hours a day, 7 days a week with the goal of providing a safe transportation network for emergency services, motorists, bicyclists, and pedestrians. To provide quality customer service, all requests are tracked and responded to accordingly.

- City-wide economic, environmental, and financial sustainability: Commerce can thrive year-round by providing access for all modes of transportation. Snow and ice removal services promote fuel conservation by preventing wheel slippage, decreasing emissions and preventing damage to vehicles.

- Snow and ice removal for 39 unclaimed pedestrian connectors: These walkways are scattered throughout the community. They are considered a risk to public safety, especially for school children who utilize neighborhood walkways frequently.

**Links to Further Details:**

**Linkage to Strategic Objectives**

(the primary objective is marked with a ✅)

✅ TRAN 6.1 - Improve safety for all modes of travel: The Streets Department provides efficient and timely snow removal services. Studies show snow and ice control operations reduce vehicle accidents and may prevent serious injuries.

- SAFE 5.4 - Improve emergency management and preparedness: The Streets Department developed a comprehensive Master Snow Removal Plan handbook that includes an emergency plan. This handbook is a City Council approved document. It is updated annually, and a yearly two-day training is conducted to be prepared for snow emergencies. The Streets Department collaborates with other City departments and other emergency services agencies and providers.

- HPG 7.1 - Provide world-class municipal services to residents and businesses: It is vital to keep traffic flowing no matter what the weather conditions. Commerce can continue to thrive when snow and ice are cleared from roadways, bike lanes, and sidewalks.

**Improvements & Efficiencies**

- Roadway Weather Information Systems as a Service – A new approach to roadway weather is being utilized at 4 locations throughout the city. The concept of the service model is that the vendor owns and maintains the equipment while charging us a monthly fee. The benefit is that we can get the latest roadway weather technology to assist us during snow removal without a high upfront capital cost.

- Ice breaker equipment was purchased for faster and more efficient ice cutting operations. This new equipment uses less energy and minimizes concrete and pavement damage.
Offer 35.2: Snow and Ice Removal

- A new salt brine maker was purchased. It provides a more consistent production of salt brine. It is also 100% automated and expels large debris through a discharge chute. It provides remote access by LAN and cellular connection to blend salt brine from any location.

Performance Metrics

- TRAN 8. Snow removal: average hours to bare pavement after snow ends - ARTERIAL
  https://publish.clearpointstrategy.com/594/Measures/scorecardId=6351&object=measure&objectId=91512.html

Personnel Changes

- None

Differences from Prior Budget Cycles

- Enhancement offers were submitted in the last 3 budget cycles and were not been approved. Streets has consistently needed to go to Council for additional appropriation to cover actual costs. Spending trends justify the additional appropriation for snow and ice removal due to the City’s growth and expanded services.

Explanation of Any Adjustments to Personnel Costs using object 519999

- None

**Offer 35.3: Essential Street Operations**

2019: $3,114,863 and 12.00 FTE, 2.89 Hourly FTE  
2020: $3,162,174 and 12.00 FTE, 2.89 Hourly FTE

**Offer Summary**

Funding this offer will allow the Streets Department to manage and provide a high level of service for maintenance activities to enhance quality of life and preserve the quality of neighborhoods and business districts.

Maintenance programs include: mowing, barrow ditches, unpaved roads, potholes, crack sealing, road shoulders, guard rails, asphalt patching, concrete repairs, the MAX corridor, pedestrian lighting, pedestrian underpasses and the adopt-a-street program. This offer also provides 24/7 on-call staff for emergency calls for support on any safety concerns, such as debris in the road or pavement failures.

The support functions are Administration and Information Technology and are vital to maintain a diverse department that represents more than 60 staff encompassing the following programs: Street Maintenance Program, Snow Operations, Emergency Responses, Graffiti, Sweeping, Alleys, Mowing & Road Shoulders, Crushing/Recycling, Traffic Control, Rehab Crew and Patch Crew.

The administration group provides leadership, coordination and support for all Streets programs. Support services include work planning, billing and budget management, public outreach, personnel safety and training, world-class customer service, environmental compliance, technology innovation and building maintenance. This team is also integral in coordinating the work of hired contractors, managing service requests from the public and processing Human Resources documentation for hiring, disciplinary actions and separations.

Ongoing debt service for capital purchases made through lease payments are being funded from Keep Fort Collins Great (KFCG) Other Transportation Revenues in the amount of $210,515 (2019) and $210,515 (2020).

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- ✓TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins
- TRAN 6.1 - Improve safety for all modes of travel
- HPG 7.6 - Leverage data, technology, metrics and benchmarks to guide decisions, improve results, and enhance service delivery

**Additional Information**

- This offer is critical for planning, budgeting, and managing all Streets operations including tracking costs, collecting and analyzing data, customer requests, performance measurements, equipment management, facility oversight, and building a culture of safety.
**Offer 35.3: Essential Street Operations**

- Essential Street Operations provide internal and external customer service. Collaborate and coordinate with Larimer County, State agencies, utility companies, school districts, Colorado State University, other City departments, media, businesses, and residents.

- Roadway system maintenance addresses potholes, repairing pavement edge failures, bridge maintenance, guard rail maintenance and cleaning, smoothing depressions and ruts, street patching, and crack sealing.

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: Street maintenance is a high priority for the citizens of Fort Collins to provide quality services.

- TRAN 6.1 - Improve safety for all modes of travel: Providing safe, well maintained roadways is a critical mission of the Essential Street Operations.

- HPG 7.6 - Leverage data, technology, metrics and benchmarks to guide decisions, improve results, and enhance service delivery: The Streets Department optimizes the use of the latest technology to enhance data-driven decision making, create efficiencies, manage costs, and assist with continual improvement processes. Citizen requests are tracked and measured in specialized software to provide world class customer service.

**Improvements & Efficiencies**

- LED lights are being installed inside and outside the Streets facility to reduce energy usage.

- The Streets Department continues to reduce energy usage in the building and have reduced carbon emissions by 26.89% over 2005 baseline numbers. This represents an additional 10% reduction from 2015 and shows good progress towards the goal.

- In 2017, the Streets Department achieved certification of our Environmental Management System (EMS). This entailed meeting the new requirements of the latest International Organization for Standardization (ISO) 14001:2015 standard. This system provides a framework to ensure environmental compliance, reduce environmental impacts, and to continually improve the Streets operation.

**Funding Source Total**: 3,114,863 3,162,174 1.5%
Offer 35.4: Street Sweeping

2019: $711,077 and 4.25 FTE, 1.56 Hourly FTE
2020: $724,551 and 4.25 FTE, 1.56 Hourly FTE

Offer Summary

Funding this offer provides strategic sweeping operations on streets and bike lanes throughout Fort Collins. As part of the street sweeping program, arterial streets (e.g., Horsetooth, Shields, Prospect) and their adjoining bike lanes are scheduled for sweeping once every two weeks. The Downtown area is swept two times per week. Residential and collector streets are swept four times per year.

Other components of the sweeping program include compliance with the Fugitive Dust Policy, bike lane sweeping, MAX/BRT sweeping, Mason Trail sweeping, and 24-hour emergency response for street and bike lane hazards.

Regular street sweeping is important for safety and overall air and water quality by removing debris. Regular street sweeping keeps debris out of the storm drains, improving the water quality and preventing street flooding by keeping storm drains open. Aesthetics is also an important consideration. Street sweeping has always been a demand from the public and the need will only increase as the street network expands with added lane miles and new residential areas.

Another benefit of sweeping is that it promotes the City as a bicycle-friendly community by providing safe traveling surfaces for bicycle commuters. Without regular bike lane sweeping, debris such as dirt and glass from the roadway is forced into the bike lanes and road shoulders.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

✓ TRAN 6.1 - Improve safety for all modes of travel
- ENV 4.2 - Improve indoor and outdoor air quality
- ENV 4.9 - Sustain and improve the health of the Cache la Poudre River and its watershed

Additional Information

- The sweeping program assists the Utilities Department with sweeping services for water main breaks. The sweeping program also provides accident clean-up assistance to the Police and Fire Departments.

- The Stormwater Department contributes $220,000 per year towards this program, which is included in this offer.

- Streets will continue to partner with the Parks Department to ensure pedestrian walkways and bridges remain free of debris. This partnership is also important for collaboration in the Downtown area. Parks and Streets coordinate Downtown cleaning schedules so Parks can efficiently blow litter into the roadway for street sweepers to clean-up immediately.
**Offer 35.4: Street Sweeping**

**Links to Further Details:**

**Linkage to Strategic Objectives**
*(the primary objective is marked with a ✓)*

- **TRAN 6.1 - Improve safety for all modes of travel:** The sweeping program supports emergency services to clean up accident debris and dumped loads on the roads. Streets are kept clean and free of debris for safety and aesthetics of our city.
- **ENV 4.2 - Improve indoor and outdoor air quality:** Street sweeping reduces fugitive dust from getting in the air by capturing the particulate matter so that it does not become airborne.
- **ENV 4.9 - Sustain and improve the health of the Cache la Poudre River and its watershed:** This offer helps prevent hazardous material and debris from getting into the runoff to the Poudre River.

**Improvements & Efficiencies**

- Streets and Forestry collaborate to provide safe and timely removal of tree debris on city streets after Forestry operations to trim City trees.
- During fall street sweeping, leaves are collected and taken to the Crushing/Recycling Facility for composting. This reduces the amount of leaves taken to the landfill, reduces haul time to the landfill, and eliminates tipping fees. The compost material is used by other City departments.
- In 2018, a study will be initiated to evaluate the effectiveness of the street sweeping program through new data collection technology installed on the street sweepers.
- A new sweeper was purchased in 2017 with articulating front mounted broom equipment which allows sweeping in the tops of medians, tight corners, and roundabouts. This type of sweeping had to be done by hand previously. This has led to more efficient, higher quality sweeping in difficult areas.
- An Innovation Fund award was given to Streets in early 2018 to build a sweeper clean-out station to help reduce the amount of debris captured in the wash bay. This station uses compressed air to clear debris from street sweepers prior to being washed in the wash bay. This will significantly reduce wash bay drain clean-out costs and hazardous material disposal.

Offer 35.5: Planning, Development & Transportation (PDT) Work for Others

2019: $4,128,205 and 15.60 FTE, 5.45 Hourly FTE
2020: $4,162,695 and 15.60 FTE, 5.45 Hourly FTE

Offer Summary

This collaborative offer is an opportunity for City departments, Colorado State University, Poudre School District, developers and public agencies to purchase high quality goods and services at competitive prices from the Streets, Traffic and Engineering departments. This program pays for itself through revenue generated from the following services:

- Street Patching
- Traffic Control
- Snow Removal
- Road Construction
- Crushing Operations
- Contract Sweeping
- Signs and Pavement Marking Installation
- Traffic Signal Construction

This program provides others with a quality product at a reduced cost while using City equipment and employee expertise. Through this program, the Streets Department provides street patching services for the Water, Wastewater and Light & Power departments, and maintenance and construction of new roads for Natural Areas and Wastewater. The program provides sweeping and snow removal services for the Civic Center Parking Structure, the Old Town Parking Structure, Police Services parking lots and various other City parking lots.

The Streets Department also provides traffic control services to all City departments on a full-time and emergency basis 24 hours a day, 365 days per year. Maintaining a high level of consistent, dedicated staff is critical to provide safe work zones for the traveling public and workers, no matter what the situation.

Traffic Operations typically builds or upgrades about four traffic signals per year for development or the City’s Capital Improvement Projects. In addition, numerous signing and marking projects occur through this program. Funding for these projects comes from other jurisdictions, developers and other City departments.

Also included in this offer is the operation of the crushing/recycling facility. Through the crushing facility, the City avoids landfill fees by recycling material from street projects. The crushing facility accepts clean material from contractors and the public for free.
Offer 35.5: Planning, Development & Transportation (PDT) Work for Others

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

☑ TRAN 6.1 - Improve safety for all modes of travel
- HPG 7.1 - Provide world-class municipal services to residents and businesses
- ENV 4.4 - Achieve the 2020 Road to Zero Waste goals and work toward 2030 zero waste goals

Additional Information

- This program represents a collaborative effort between other City Departments as well as Colorado State University, Poudre School District, Larimer County, Platte River Power Authority and Poudre Valley Hospital. Work performed for these entities helps ensure consistency of design and materials which promotes efficient maintenance of critical infrastructure and compliance with design standards.

- The work area traffic control group sets up all devices (barricades and cones) utilized to safely guide traffic around paving and patching projects, Engineering projects, Utilities capital projects, water main breaks, and Police and Fire emergency situations.

- The Work for Others (WFO) program promotes environmental sustainability practices by operating the City’s crushing/recycling facility. This facility recycles materials such as asphalt and concrete from City street projects along with accepting those materials without charge from private sources.

- Environmental sustainability is achieved by reducing landfill utilization where the materials would go otherwise. The materials are crushed and recycled to create usable products that can be purchased by the public or other City departments to resurface roads, driveways, parking lots and building projects.

- The Streets patching group works collaboratively with the Utilities Department to perform temporary and permanent patches after utilities work in the street, including water main breaks. This provides a faster turnaround on street repairs and less impact to the traveling public at a competitive price.

Scalability and explanation

None

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)
**Offer 35.5: Planning, Development & Transportation (PDT) Work for Others**

- **TRAN 6.1** - Improve safety for all modes of travel: Traffic control establishes safe work zones and protects workers and the traveling public from hazards.

- **HPG 7.1** - Provide world-class municipal services to residents and businesses: This program provides the citizens of Fort Collins with quality and reliable traffic control services and products installed by highly trained staff at a reduced cost. This ensures consistency of design and materials which promote efficient maintenance of critical infrastructure and compliance with design standards.

- **ENV 4.4** - Achieve the 2020 Road to Zero Waste goals and work toward 2030 zero waste goals: The Crushing/Recycling/Composting Facility helps advance the sustainability goals of the City of Fort Collins by taking products that would normally go to the landfill and processing for reuse in the community. Specific examples include: asphalt, concrete, toilets, leaves and other organic materials from other City departments.

**Improvements & Efficiencies**

- By combining all "Work for Others" activities in Planning, Development, and Transportation, this unique program becomes easier to understand and manage on a budgetary basis.

- This program is a cost effective way to provide quality traffic construction services to the public at a reduced cost. For example, the average contractor built traffic signal costs approximately $250K in comparison to city crews constructing a traffic signal at approximately $180K.

**Performance Metrics**

- **TRAN 8.** Snow removal: average hours to bare pavement after snow ends- ARTERIAL  
  [https://publish.clearpointstrategy.com/594/Measures/scorecardId=6351&object=measure&objectId=91512.html](https://publish.clearpointstrategy.com/594/Measures/scorecardId=6351&object=measure&objectId=91512.html)

- **TRAN 9.** Street sweeping: number of lane miles swept  
  [https://publish.clearpointstrategy.com/594/Measures/scorecardId=6351&object=measure&objectId=91513.html](https://publish.clearpointstrategy.com/594/Measures/scorecardId=6351&object=measure&objectId=91513.html)

**Personnel Changes**

- Increased FTE Distribution of Traffic employees into this program in anticipation of increased Work for Others projects in 2019 and 2020.

**Differences from Prior Budget Cycles**

- The amount of the offer has increased from the last budget cycle due to anticipated increases in the Work for Others revenue projections. This is a dollar-in, dollar-out program, so if there is not as much revenue collected, then the expenditures will not be spent either.

**Explanation of Any Adjustments to Personnel Costs using object 519999**
**Offer 35.5: Planning, Development & Transportation (PDT) Work for Others**

- Correct total compensation calculation for 3 contractual Traffic Control Supervisor positions.

**Offer 35.6: ENHANCEMENT: Alley Maintenance**

2019: $75,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $75,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This is a collaborative offer between the Streets and Forestry departments to provide safe and well maintained alleys for a total yearly cost of $200,000. The remaining funding for this program is in offer 35.11.

As part of alley maintenance, there is a need to prune or remove woody vegetation for clear passage of high profile vehicles. It will require $75,000 each year in the 2019/2020 budget cycle broken out as follows: $25,000 for alley right-of-way surveys and $50,000 to clear approximately 35 blocks of alley right-of-way each year. Thirty-five blocks of alley clearance per year would translate to a seven-year woody vegetation clearance rotation. This offer is scalable as to the amount of clearance work, but the cost to survey alley rights-of-way is fixed.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- TRAN 6.1 - Improve safety for all modes of travel
- HPG 7.1 - Provide world-class municipal services to residents and businesses
- NLSH 1.6 - Protect and preserve the quality of life in neighborhoods

**Additional Information**

- This offer addresses dust issues; with rejuvenated surfaces using higher quality material, dust is greatly reduced.
- Enhances quality of life perspectives with improved driving surfaces.
- Drainage issues can be mitigated for properties along alleys.
- Helps eliminate water collection habitat for insects such as mosquitos.
- Provides safe access, quick response, and clear passage for emergency vehicles. Also minimizes damage by high profile vehicles such as garbage collection trucks.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: 
  $200,000

**Scalability and explanation**

Offer is scalable based on funding.
Offer 35.6: ENHANCEMENT: Alley Maintenance

Links to Further Details:

Linkage to Strategic Objectives
*(the primary objective is marked with a ✓)*

- **TRAN 6.1** - Improve safety for all modes of travel: Quality infrastructure is dependent upon well-maintained alleys. It is imperative that emergency equipment has clear passage in alleys for rapid response.

- **HPG 7.1** - Provide world-class municipal services to residents and businesses: This request restores funding to provide alley maintenance in response to numerous citizen complaints.

- **NLSH 1.6** - Protect and preserve the quality of life in neighborhoods: Well-cared-for alleys help create a feeling that people use the area, and adds to the comfort level of the neighborhood. Well-maintained alleys can be a deterrent to crime and provides a safe environment, whereas uncared for alleys can appear to be abandoned.

**Offer 35.7: ENHANCEMENT: Restore Street Maintenance Program Funding**

2019: $250,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $500,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

One of the City’s most valuable transportation assets is the street network, consisting of 1,957 lane miles of pavement, with an estimated replacement value of approximately $1B. The City has established a goal of maintaining an overall Level of Service (LOS) “B” or “Good,” or a pavement condition index (PCI) range of 70-85. In 2018, funding was reduced by $900,000 as an ongoing reduction. This has a significant impact to the program and the level of service that can be provided. This offer attempts to partially restore the reduction on an incremental basis of $250,000 in 2019 and $500,000 in 2020. Over the three-year period of 2018-2020 this equates to a total reduction of $1.95M if this enhancement is funded. If not, the total reduction to the Street Maintenance Program will be $2.7M.

While conditions on the overall street network have been improving, if the funding reduction continues, over time it will cause decline in the overall PCI and create a backlog of deferred maintenance that will cost significantly more in future dollars.

While past investments have increased the PCI system-wide, the long-term outlook for the street system is that it will rapidly deteriorate. The program would be forced to focus more on arterial and collector streets, and residential streets would be compromised. It is estimated that the overall PCI will drop approximately one point per year, and by 2029 the PCI would be at a LOS “C” or “Fair,” with a PCI rating of 56-69.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

✓ TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure  
- TRAN 6.1 - Improve safety for all modes of travel  
- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility

**Additional Information**

- Construction costs are increasing an average of 5% annually, and the sales tax projections are only increasing 2% annually. In addition, the street network is growing due to annexations and new development.

- Good roads cost less to maintain. If the street network is allowed to deteriorate to fair, it will cost significantly more to return to a condition of LOS "B" or "Good".

- Studies have shown that every $1 spent on pavement preservation can save $8-$10 or more in future rehabilitation costs.
**Offer 35.7: ENHANCEMENT: Restore Street Maintenance Program Funding**

**Impact to Ongoing Expenses**
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**
Offer is scalable based on funding.

Offer 35.9: ENHANCEMENT: Backup Generators for Streets Facility and Traffic Facility (Traffic portion)

2019: $110,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

The Streets and Traffic Operations departments need emergency generators specifically for emergency situations where there is a complete loss of power. The Streets facility has a backup generator that is now 40 years old and no longer works. Repairs are cost-prohibitive due to the age and condition of the generator. The snow command center and material storage facility for granular and liquid use for winter operations has no backup power.

Traffic Operations operates and maintains 182 traffic signals located throughout Fort Collins. Signals can be managed in real-time from the Traffic Operations Center. Using CCTV cameras and other technologies to monitor and evaluate traffic conditions, staff is able to remotely adjust signal timing to maximize traffic flow and reduce congestion resulting from unanticipated events such as work zones, traffic crashes, trains, weather, floods, etc. In order to ensure continuity of operations, Traffic is requesting a backup generator that will allow the continued monitoring and adjustment of traffic signals during a localized power outage that affects the Traffic Operations Center.

The mere thought of a power outage can be daunting for these operations. The generators would allow the facilities to have enough power to operate critical systems. The community counts on the City to provide basic core services. These backup power generators serve to support these basic services as a source of alternative energy in times of crisis and to ensure operations continue despite power grid failures and power supply shortages.

Acting decisively and quickly during emergency situations, especially during times of natural disasters, is imperative to operations. Backup power will also help Streets and Traffic continue important administrative tasks that help manage or keep offices open to handle requests.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel  
- SAFE 5.4 - Improve emergency management and preparedness

Additional Information

- This also benefits the crews that need electricity to power lights at night for safety. With this in mind, back-up power generators should be seen as a critical element.

- The Streets portion of this offer is $230,000 and is in offer 35.10 utilizing KFCG Street Maintenance funds. The Traffic Operations portion is $110,000.

Offer 35.12: ENHANCEMENT: Snow and Ice Removal

2019: $800,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $800,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide high quality snow and ice removal services for all modes of transportation through the Snow and Ice Program. A well planned and executed winter operations plan is imperative. This plan strives to maximize services while minimizing the impact to the environment as well as being cost efficient. The goal is to remove snow and ice from streets, bike lanes, sidewalks and pedestrian access ramps 24 hours after the storm. While the severity of each winter storm is unpredictable, the Streets Department will continue to work within its resources to maintain the highest level of customer service possible while balancing efficiency in snow and ice control.

When a storm is forecasted, City crews and contractors are readied and equipment can be mobilized quickly to plow and de-ice streets and sidewalks. No two storms are identical, and weather conditions can vary significantly during the winter months. Different conditions require different tactics and corresponding strategies.

During the snow season, crews are assigned to shifts to be able to respond 24/7 to weather events. Plow teams are assigned routes. First they concentrate on major arterial streets, then collector streets and school routes. If deemed necessary, residential streets are next, but only if snow depth warrants plowing. In some cases, the first response to a winter snow and ice storm may be de-icing treatments before full plowing operations begin. After the storm, in the cleanup phase, crews go back to finish bike lanes, and contractors clear sidewalks and pedestrian access ramps. Downtown snow removal is an intensive process and is performed as needed according to conditions. It is generally done at night to minimize the impact to traffic and parking. It requires multiple pieces of heavy equipment, and snow must be picked up and hauled to a designated snow dump site.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- SAFE 5.4 - Improve emergency management and preparedness
- HPG 7.1 - Provide world-class municipal services to residents and businesses

Additional Information

- The Streets Department snow removal program encompasses vital snow and ice operations along 1,257 lane miles of city streets, as well as bike lanes, sidewalks, pedestrian access ramps, pedestrian trails (including the Mason Trail), parking lots and the Downtown area. This program includes deicing materials, labor and equipment costs needed to respond to snow/ice events.
**Offer 35.12: ENHANCEMENT: Snow and Ice Removal**

- Preparation of staff includes a two-day intensive training every year on challenges, equipment readiness, personnel, plow routes, technology, and materials.

- Public safety: Snow removal services are offered 24 hours a day, 7 days a week with the goal of providing a safe transportation network for emergency services, motorists, bicyclists, and pedestrians. To provide quality customer service, all requests are tracked and responded to accordingly.

- City-wide economic, environmental, and financial sustainability: Commerce can thrive year-round by providing access for all modes of transportation. Snow and ice removal services promote fuel conservation by preventing wheel slippage, decreasing emissions and preventing damage to vehicles.

- Snow and ice removal for 39 unclaimed pedestrian connectors: These walkways are scattered throughout the community. They are considered a risk to public safety, especially for school children who utilize neighborhood walkways frequently.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

N/A

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

- ✓ TRAN 6.1 - Improve safety for all modes of travel: The Streets Department provides efficient and timely snow removal services. Studies show snow and ice control operations reduce vehicle accidents and may prevent serious injuries.

- SAFE 5.4 - Improve emergency management and preparedness: The Streets Department developed a comprehensive Master Snow Removal Plan handbook that includes an emergency plan. This handbook is a City Council approved document. It is updated annually, and a yearly two-day training is conducted to be prepared for snow emergencies. The Streets Department collaborates with other City departments and other emergency services agencies and providers.

- HPG 7.1 - Provide world-class municipal services to residents and businesses: It is vital to keep traffic flowing no matter what the weather conditions. Commerce can continue to thrive when snow and ice are cleared from roadways, bike lanes, and sidewalks.

Offer 36.1: Harmony Road Maintenance

2019: $272,347 and 0.00 FTE, 0.00 Hourly FTE
2020: $272,641 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will support ongoing maintenance and operation of a key city arterial to ensure quality infrastructure and smooth traffic flow.

Harmony Road is a major arterial road that links I-25 to U.S. Highway 287. In 2006, the City received funding from the Colorado Department of Transportation (CDOT) to own and maintain Harmony Road. The funding is currently part of the 292 fund and is identified as the Harmony Road Maintenance Fund. This is a joint offer between the Streets and Traffic departments to provide routine maintenance such as sweeping, snow and ice removal, pothole repair, traffic signs and signal repairs, pavement markings, and mowing the road shoulders and medians. The expenditures for these activities are drawn directly from the Harmony Road Reserve.

This offer also includes the landscaping, maintenance and utility costs for the Harmony Transfer Center, also known as the Harmony Park and Ride, and the Harmony/I-25 interchange. This facility serves a variety of multi-modes and socio-economic groups: carpoolers, shuttle riders to and from Denver International Airport, and bicyclists. Located on East Harmony Road near I-25, the Harmony Transfer Center serves as a primary hub for carpoolers and shuttle services to and from Denver International Airport. The Streets Department provides sweeping, mowing, patching, striping, signage, trash removal, snow and ice removal, and other maintenance activities at the Transfer Center. The Streets Department also maintains an information kiosk and leases covered bike lockers at the facility. Beyond the Harmony Transfer Center, this offer also includes regular landscaping, mowing, trash removal and other maintenance activities throughout the entire Harmony/I-25 interchange, and adjoining medians and rights-of-way.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.1 - Improve safety for all modes of travel
- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility
- TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure

Additional Information

- This offer funds the ongoing maintenance and operation of Harmony Road from College Avenue to I-25 to assure quality infrastructure and smooth traffic flow. Harmony Road is a major entrance point into Fort Collins and a primary route for commuters and travelers going to and from the Denver metropolitan area and other communities along the Front Range.
Offer 36.1: Harmony Road Maintenance

- The Harmony/I-25 interchange is an important gateway to the city. Annual and attentive maintenance of this area enhances overall perception of a clean, attractive city.

- The Harmony Transfer Center serves as a primary hub for carpoolers, CDOT Bustang service, and shuttle service to and from Denver International Airport.

- The Harmony Transfer parking lot is highly utilized most of the time and is the only City-maintained parking lot facility that supports a variety of multi-modal alternatives including airport shutles, carpoolers and bicyclists. This transportation hub offers a regional network that enhances citizens’ mobility.

Linkage to Strategic Objectives (the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This is the southerly entrance into Fort Collins and a primary route for commuters and travelers going to and from the Denver metro area and other communities along the Front Range. This offer supports the ongoing maintenance and operation to assure quality infrastructure and smooth traffic flow.

- HPG 7.8 - Maintain assets to reduce lifecycle costs while improving reliability and accessibility: The City utilizes preventative maintenance programs to ensure quality infrastructure in a cost effective manner.

- TRAN 6.6 - Maintain Level of Service ‘B’ for City streets and the current level of service for medians and associated infrastructure: The City of Fort Collins has set a goal to achieve and maintain an average PCI of 70 or higher for all city streets which equates to Level of Service "B".

Improvements & Efficiencies

- Traffic Operations will be updating thermoplastic pavement markings on Harmony Road in 2019/2020. These durable markings were installed 5 - 7 years ago and are scheduled for repair/replacement.

- Collaborated with Colorado Department of Transportation and installed restroom facilities at the Harmony Park and Ride.

2.2.03 Package and Offer Detail
**Offer 45.1: Transit Local Fixed Route Network**

2019: $17,837,194 and 113.45 FTE, 33.93 Hourly FTE  
2020: $18,234,628 and 113.45 FTE, 33.93 Hourly FTE

**Offer Summary**

Funding this offer will provide fixed route transit service within the City of Fort Collins and regional service. This offer is a request for Transfort to continue to provide the following transportation options for the City's community; transit service throughout the City along 22 routes, that include the MAX, FLEX (Regional service to Loveland/Longmont/Boulder), Around the Horn, Gold, and 18 local routes. This offer also includes continued Transfort 365 Service (Sundays and holidays) at the current level funded in 2017 and 2018. Six routes (MAX, 2, 3, 8, 14, and 16) currently operate on Sundays and holidays.

This proposal will pay for salaries and benefits, feet maintenance, fuel, insurance, uniforms, support services & including a contractual transit planner position. Anticipated levels of ridership are more than 4 million trips per year. Over the last year, fixed route ridership has increased by 6% and from 2013 to 2016 transit ridership in Fort Collins increased by 78%. This offer also addresses support services such as: road supervision, dispatching/scheduling, customer service, facility maintenance, utility costs, service development and public outreach, administrative staffing, communication expenses (telephone, wireless etc.), passenger safety and code enforcement, supplies, and liability insurance.

Funding for this offer will come from a variety of sources:
- Federal Transit Administration (FTA) Section 5307 grants (~$5M)
- State funding from FASTER (~$400k)
- Advertising fees from buses and bus shelters (~$300K)
- Fare and pass revenue and grant funding from the Bohemian Foundation (that allows the youth population to travel free of charge on all routes), (~$600k)
- An Agreement with Colorado State University and the Associated Students of Colorado State University to provide enhanced transit services to campus and surrounding areas (~$2M),
- The General Fund or other City sources (~$9M).

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

✓ TRAN 6.3 - Improve transit availability and grow ridership  
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections  
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

**Additional Information**
**Offer 45.1: Transit Local Fixed Route Network**

- Transfort operates 22 fixed-routes throughout the City of Fort Collins and one regional route that services Fort Collins, Loveland, Berthoud, Longmont and Boulder (provided with contributions from each community).

- Generally, transit service operates between 6:30AM-7PM, with six routes operating later evening service until 10:30PM and MAX BRT route operating from 5:30AM-12:30AM.

- Route frequencies vary. MAX BRT and two CSU routes operate on 10 minute frequencies, other routes operate at either 30 minute or hourly frequencies.

- A Transit Manager contractual position was added in early 2018, per an Inter-governmental Agreement with the City of Loveland to help run the COLT route between the 2 Cities. The IGA includes the provision that the costs will be reimbursed to the City of Fort Collins by the City of Loveland monthly.

**Links to Further Details:**

- Transfort homepage [http://www.ridetransfort.com](http://www.ridetransfort.com)

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

✓ **TRAN 6.3 - Improve transit availability and grow ridership:** This offer provides the community’s base fixed-route transit services including a regional route (FLEX) and a Bus Rapid Transit Route (MAX).

- **TRAN 6.2 - Manage traffic congestion and improve high-priority intersections:** This offer provides the community’s base fixed route transit service to provide modal options to driving. Public transportation is effective in reducing traffic congestion.

- **ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals:** A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

**Improvements & Efficiencies**

- Total Fixed Route Ridership increased by 6%
- Passengers per Revenue Mile increased by 7.5%
- Passengers per Revenue Hour increased by 5.1%
- Net Expense per Passenger decreased by 5%
**Offer 45.1: Transit Local Fixed Route Network**

- Converted all intra-departmental (parking and transit) forms from paper and Word Doc processes to a fully integrated, web-based forms portal. No additional purchases were required for this project as the portal is part of an existing platform. The process change supports workflow processes and allows for analysis of the data captured from this enhanced process.

- Fully implemented a network monitoring system that actively monitors over 500 transit network devices for connectivity status. The system was purchased through a CDOT FASTER grant. The product allows staff to pre-empt network failures to ensure our passenger information and security systems are consistently on-line.

| Funding Source Total | 17,837,194 | 18,234,628 | 2.2% |
**Offer 45.3: Dial-A-Ride Service**

2019: $2,088,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $2,123,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will provide the federally-mandated Dial-A-Ride paratransit service to Americans with Disabilities Act (ADA) eligible individuals within a 3/4-mile radius of an existing transit fixed route, Dial-A-Taxi service that provides taxi vouchers to Dial-A-Ride clients, and specialized shuttle service for individuals with a disability accessing Foothills Gateway, Inc.

The Americans with Disabilities Act of 1990 stipulates that any transit agency offering fixed route service must also provide paratransit service to eligible passengers within 3/4 of a mile of the fixed route service area during the same hours of service, and that the paratransit fare must not be more than twice the fixed route regular fare. Passengers are pre-certified for this door-to-door, on-demand service based on their inability to access fixed route bus services due to a disability.

Dial-A-Ride is the name used for Transfort’s paratransit service and 100% of the service is provided by a third-party vendor. The budget amounts referenced in this offer are a sum of the vendor’s contracted per-passenger rates plus a monthly stipend for a dispatch function. The existing contract rate includes increases each year. The existing contract for Dial-A-Ride expires in 2018 and the new per trip rate will be negotiated in 2019. This offer also includes appropriation of funds for Dial-A-Taxi vouchers. Each Dial-A-Taxi voucher is $20, regardless of trip length, and is paid for at an 80%/20% match of federal and local funds. Dial-A-Taxi trips must start in the service area, but can end at any location.

This offer will specifically pay for contract-provider expenses, based on a per-passenger charge and inclusive of a dispatch function, and for the Transfort staff that are employed to manage the Dial-A-Ride program. Funding for this offer is anticipated from three major sources: federal funding (Federal Transit Administration Section 5307 and Section 5310 grant funding), passenger fares ($2.50 per trip) and the City’s General Fund.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- ✓TRAN 6.3 - Improve transit availability and grow ridership  
- NLSH 1.3 - Improve accessibility to City and community programs and services to low and moderate income populations  
- NLSH 1.4 - Co-create a more inclusive and equitable community that promotes unity and honors diversity

**Additional Information**

- 100% turnkey contract operation with provider.
**Offer 45.3: Dial-A-Ride Service**

- This is a Federally-mandated service plus grandfathered clients.
- Set rate per passenger plus monthly stipend for dispatch services.
- The increase in cost from the 2017-2018 budget cycle is due to the addition of providing Dial-A-Ride paratransit service for Loveland.
- Funding this offer will allow for a continued shuttle service for Foothills Gateway Dial-A-Ride passengers. This service picks up clients at their homes and transports them to Foothills Gateway. In the afternoon, the shuttle picks up the clients at Foothills Gateway and drops them off at their residence.

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

- **TRAN 6.3** - Improve transit availability and grow ridership: Public transportation provides personal mobility and freedom for people from every walk of life. Public transportation improves access to education and employment, which in turn leads to better long-term economic opportunities. Public transportation lessens financial burdens by alleviating the need to operate individual vehicles which also supports public health.
- **NLSH 1.3** - Improve accessibility to City and community programs and services to low and moderate income populations: Funding this offer will allow individuals with disabilities the freedom of mobility to participate in our community for work, shopping, medical, school and social activities.
- **NLSH 1.4** - Co-create a more inclusive and equitable community that promotes unity and honors diversity: Paratransit ensures that our disabled community has the same access public transportation as all others do.

**Improvements & Efficiencies**

- Replaced an antiquated, legacy in-vehicle computer system for our Dial-A-Ride service using an FTA grant. This project improves the reliability and decreases the amount of overhead required by technology and maintenance staff. The net effect is improved reliability for our Dial-A-Ride passengers.

**Performance Metrics**

- **TRAN 15. Operating expense per passenger**

Offer 45.6: ENHANCEMENT: 5.0 FTE (4 Bus Operators, 1 Supervisor) - Additional Transfort 365 Service

2019: $182,889 and 5.00 FTE, 0.00 Hourly FTE
2020: $501,862 and 5.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will expand Transfort 365 service to include additional key routes. Six routes currently operate on Sundays and holidays, including MAX, from 8 a.m. to 7 p.m. The level of service that began in August 2017 includes contributions from Colorado State University (CSU) and the Associated Students of Colorado State University (ASCSU) in the amounts of $105k/year each. The existing service is proposed to be continued in Offer 45.1. This offer closes the funding gap for the cost of the existing service ($71K) and expands paratransit service to the weekday service area on Sundays and holidays ($80K).

365 service has exceeded ridership projections by 52%, for a total of approximately 2,000 passenger trips on an average Sunday. The addition of Sunday and holiday service has provided options, flexibility and basic mobility to those who depend on transit for their daily needs. The service has also helped to accommodate demand by visitors to Fort Collins and CSU, and for people traveling to Downtown for events. The year-round, consistent paratransit service will address citizen requests to increase mobility options for individuals with disabilities who are unable to use the fixed route system.

Based on the demand for existing routes, this offer requests funding to operate additional routes on Sundays and holidays. Routes that have been identified for expansion include 5 (Lemay), 7 (Drake), 9-10 (Old Town West), 18 (Riverside/Prospect) and HORN (CSU campus). Funding this offer will also expand the Dial-A-Ride service area on Sundays. Dial-A-Ride is a federally mandated paratransit service for individuals who are unable to use the fixed route bus system due to a disability. Adding these routes is expected to provide 700 additional daily passenger trips.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.3 - Improve transit availability and grow ridership
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

Additional Information

- Closes a funding gap for the existing Transfort 365 service.
- Includes the most requested additional services including Routes 5, 7, 9, 10, 18 and HORN.
Offer 45.6: ENHANCEMENT: 5.0 FTE (4 Bus Operators, 1 Supervisor) -
Additional Transport 365 Service

- Expands complementary Americans with Disabilities Act paratransit to core Monday-Saturday service area (ongoing annual Dial-A-Ride cost $80K).
- Hours of service would be 8 AM – 7 PM and service would operate at 30 and 60 minute frequencies.
- Service would start in August 2019 (pro-rated cost $238K, ongoing annual fixed route cost $509K).

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $589,621

Scalability and explanation

The offer can be scaled in the following ways:
1. Expand or reduce the number of routes included in the offer.
2. Provide funding only to close the gap for the cost of the existing service ($71K).
3. Provide funding only to expand Dial-A-Ride paratransit to the minimum required area ($80K).
4. Provide funding only for the funding gap and Dial-A-Ride paratransit service ($152K).

- Transport website http://www.ridetransfort.com/365

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓TRAN 6.3 - Improve transit availability and grow ridership: This offer directly supports this strategic objective by providing increased transit availability on Sundays and holidays. Service on these days enhances local business and sales tax generation, makes Fort Collins more attractive for conventions and weekend events, and provides mobility for transit dependent individuals.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Sunday service helps to solve related parking and congestion issues for large events. Without transit service to Midtown and the downtown area, additional parking would be necessary to accommodate the thousands of extra trips each day into this area. If 100 passenger trips were accommodated on buses from people who ordinarily drive, 100 fewer parking spaces would be needed.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.
Offer 45.6: ENHANCEMENT: 5.0 FTE (4 Bus Operators, 1 Supervisor) - Additional Transport 365 Service

**Funding Source Total:** 182,889 501,862 174.4%
**Offer 45.8: ENHANCEMENT: 3.0 FTE - Bus Operators - Southeast Transit Fixed Route and Dial-A-Ride Service**

2019: $560,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $347,018 and 3.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer would provide new fixed route transit service and demand response paratransit service (Dial-A-Ride) to a portion of the southeast area of Fort Collins. Currently, there is limited transit and paratransit service in areas south of Harmony Road along College, Trilby and Lemay. Residents and social service agencies regularly request service to the area.

This offer would provide access to a fixed route and paratransit for low-income residents in communities such as Provincetowne, clients of social service entities such as Foothills Gateway, senior housing residents, and others living and working along the College, Trilby and Lemay corridors. Fixed route service would operate every 30 minutes, Monday through Saturday from 6:30 a.m. to 6:30 p.m.

A significant portion of the cost of this offer is for Americans with Disabilities Act (ADA)-mandated demand response service required within ¾-mile of the fixed route (cost is approximately 50% fixed route and 50% paratransit, not including a new bus). Dial-A-Ride is expected to be heavily used by Foothills Gateway clients based on past usage. City staff is engaged in discussions with Foothills Gateway about partnering, and while to date Foothills Gateway remains non-committal about funding, it may be willing to contribute in the future.

Projected ridership for the fixed route would be 11 passengers per hour on weekdays (136 per day) and eight passengers per hour on Saturdays (100 per day). Approximately 44 daily trips are anticipated for Dial-A-Ride.

This offer includes buying one Compressed Natural Gas bus in 2019 to allow service to start in August 2020. To expedite the start of the service, fixed route service could be temporarily contracted out.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.3 - Improve transit availability and grow ridership  
- NLSH 1.7 - Guide development through community planning, historic preservation, and efficient and effective development review  
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

**Additional Information**
**Offer 45.8: ENHANCEMENT: 3.0 FTE - Bus Operators - Southeast Transit**  
**Fixed Route and Dial-A-Ride Service**

- Service would begin in August 2020 (pro-rated fixed-route cost $349K, ongoing annual fixed-route cost $439K).
- Includes complementary Dial-A-Ride paratransit service (pro-rated cost $186K, ongoing cost $504K).
- Includes the purchase of one bus in 2019 ($560K).
- A large source of transit demand is for paratransit service to social service agencies including Foothills Gateway, Spirit Crossing, Elderhaus, and Summit Stone Health Partners.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $943,209

**Scalability and explanation**

1. It would be difficult to scale fixed-route service other than eliminating the service or providing minor changes in span of service, such as eliminating Saturdays or ending earlier in the evening. Paratransit is mandatory and can only be scaled along with the fixed-route.
2. A partnership with Foothills Gateway involving funding would reduce the cost of this offer.
3. A paratransit-only option could be included; such as offering a partnership with social service agencies to split the cost.

**Links to Further Details:**

- Transfort homepage http://www.ridetransfort.com

**Linkage to Strategic Objectives**

(All primary objectives are marked with a ✓)

✓ TRAN 6.3 - Improve transit availability and grow ridership: The service proposed in this offer fills gaps in the Fort Collins transit network, specifically in the southeast Lemay area. The fulfillment of this offer will link southeast Lemay neighborhoods to the South Transit Center and activity centers.

- NLSH 1.7 - Guide development through community planning, historic preservation, and efficient and effective development review: Providing service to the unserved area of southeast Lemay makes participation in city programs and facilities a realistic option for residents in Southeast Fort Collins. Public transportation provides personal mobility and freedom for people from every walk of life. Public transportation improves access to education and employment, which in turn leads to better long-term economic opportunities.
**Offer 45.8: ENHANCEMENT: 3.0 FTE - Bus Operators - Southeast Transit**

**Fixed Route and Dial-A-Ride Service**

- **ENV 4.1** - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

**Offer 45.10: ENHANCEMENT: Dial-A-Taxi Increase Service Availability**

2019: $109,500 and 0.00 FTE, 0.00 Hourly FTE
2020: $109,500 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will allow 15 additional Dial-A-Taxi trips per day for Dial-A-Ride customers. Dial-A-Taxi is a supplemental program that provides voucher subsidies for Dial-A-Ride passengers, individuals who are unable to use the fixed route bus system as a result of a disability. The cost of adding 15 additional Dial-A-Taxi trips per day is $109,500 annually. An eligibility process is used to determine if someone is eligible for the service. This process includes an application and a health care provider determination.

The voucher program assists in expanding the level of service available through Dial-A-Ride. Specifically, Dial-A-Taxi allows passengers to traverse beyond the limited Dial-A-Ride service area, to travel at any time of day and any day of the week, regardless of whether Dial-A-Ride service is available or fixed route bus service is running. Currently, Dial-A-Taxi trips must originate in the Dial-A-Ride service area, but can end at any destination. The subsidized voucher pays for up to $20 on the taximeter and the customer is responsible for any overage. The Dial-A-Taxi program has been instrumental in allowing Dial-A-Ride passengers more flexibility and freedom than allowed in a standard Americans with Disabilities Act (ADA) paratransit service program. Contractually, each voucher costs $20 regardless of the trip length.

The Dial-A-Taxi program is currently being funded by a federal grant and the current level of funding only provides 20 Dial-A-Taxi trips per day. Passengers are allowed to book trips one day in advance. The program has gained popularity and the available trips for the day are regularly reserved within the first 10 minutes of the reservation window opening. For example, by 8:10 a.m. on Saturday all of the available Sunday trips were booked. Requests for additional Dial-A-Taxi services have been made frequently throughout the past year. City staff is concurrently working on several other program changes to maximize the effectiveness of the Dial-A-Taxi program.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- TRAN 6.3 - Improve transit availability and grow ridership

**Additional Information**

- 441 (or 32%) of the 1,417 Dial-A-Ride clients use or have used Dial-A-Taxi.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $109,500
**Offer 45.10: ENHANCEMENT: Dial-A-Taxi Increase Service Availability**

**Scalability and explanation**

The offer requests funding for fifteen additional Dial-A-Taxi trips per day for Dial-A-Ride customers. This offer could be scaled to provide more or less Dial-A-Taxi trips.

**Links to Further Details:**

**Offer 45.11: ENHANCEMENT: Electric Bus Pilot**

2019: $880,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund the purchase of one electric bus (zero tailpipe emissions) and charging infrastructure for an electric bus pilot project. Transfort has secured a Congestion Mitigation and Air Quality (CMAQ) grant for $775,000 to purchase one 35-foot bus and one depot charger; this offer would be used as a local match. The pilot program will help Transfort analyze the transit system’s variables and operational characteristics to determine the feasibility of transitioning Transfort’s fleet to electric.

The purchase of zero-emission vehicles furthers the overall City goals of reducing greenhouse gas emissions and will allow for significant savings in maintenance and fuel costs moving forward. The cost of the bus is approximately $850,000 and the charger and related infrastructure is $250,000, making the total project cost $1.1M. The funding needed less the CMAQ grant is $325,000. Of that $325,000 in City funds, $220,000 in funding is already appropriated in the CCIP Transfort Bus Fleet Replacement project. The remaining $105,000 will be funded by General Fund reserves that have been dedicated for Transfort bus replacement. The net request in this offer is $880,000 for the remaining appropriation needed.

This bus would be primarily used on the Horn campus shuttle, which serves the university population but also encompasses student housing and residential neighborhoods (including single-family homes, townhomes and apartment buildings), and connects east/west commuters in this area to the north/south Bus Rapid Transit (MAX) line.

Altoona Test Reports demonstrate electric buses see energy efficiency in the amount of 7.70 kWh/mi, equivalent to 22.14 MPGe (Miles per Diesel Gallon equivalent). This fuel economy would be nearly a four-fold increase in efficiency over the average of Transfort’s feet (a mix of CNG and diesel transit vehicles), which is currently 4.06 MPGe.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- ✓ TRAN 6.3 - Improve transit availability and grow ridership  
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals  
- ENV 4.2 - Improve indoor and outdoor air quality

**Additional Information**

- This project is consistent with the Colorado Department of Transportation (CDOT) Statewide Transit Plan to reach CDOT’s System Preservation and Environmental Stewardship objectives.
**Offer 45.11: ENHANCEMENT: Electric Bus Pilot**

- This project is consistent with the North Front Range Metropolitan Planning Organization’s (NFRMPO) Regional Transportation Plan by helping to further the region’s air quality goals.

- This pilot program will determine the feasibility of transitioning to a zero-emission fleet. If the Transport campus circular route was entirely run with electric buses, the total reduction of annual CO2 emissions would be over 300 tons.

- Electric buses produce on average, 28 less decibels than diesel buses. Excessive noise exposure can lead to hearing loss, a negative cognitive and emotional response and a disturbance of activities, sleep and communication.

- Proterra, a bus manufacturer, estimates that over a 12-year lifetime, an all-electric bus will save its operator $448,000 as compared to a traditional diesel vehicle, and $408,000 as compared to a CNG vehicle.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $0

**Scalability and explanation**

This offer is scalable to add more buses, but the offer cannot be scaled down.

**Links to Further Details:**

- [https://nfrmpo.org/wp-content/uploads/2040-rtp-amended-june.pdf (chapter 5 - Environmental Profile)]
- [https://www.codot.gov/programs/transitandrail/plans-studies-reports/statewidetransitplan/statewide-transit-plan/view (pages 124 & 128)].

**Linkage to Strategic Objectives**

(**the primary objective is marked with a ✓**)

✓ TRAN 6.3 - Improve transit availability and grow ridership: Electric buses have the potential to improve customer experience (less noise and air pollution) and reduce long-term operational costs.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: The purchase of zero emission vehicles furthers the overall City goals of reducing greenhouse gas emissions and would determine the feasibility of transitioning to a zero-emission fleet.

- ENV 4.2 - Improve indoor and outdoor air quality: Electric buses emit zero tailpipe emissions. In addition to the elimination of CO2 emissions, there will also be the elimination in the emission of NOx, SO2, Low-Level Ozone and Particulate Matter criteria pollutants in association with this service when the project is implemented.

**Performance Metrics**

- TRAN 1. Transport Fixed Route Passengers per Revenue Hour
**Offer 45.11: ENHANCEMENT: Electric Bus Pilot**

Offer 45.12: ENHANCEMENT: 8.0 FTE - Bus Operators - North College Corridor Transit Improvements

2019: $1,260,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $564,606 and 8.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide additional fixed-route transit service and enhancements along the North College corridor, resulting in expanded transit service on and east of North College.

The specific request is to fund two additional buses exclusively operating on North College with 10-minute frequencies, realign Routes 8/81 to east of College, expand Route 81 days/hours of service with 20-minute headways (60-minute on Sundays), and add shelters to existing bus stops.

Since 2015, stakeholders along North College have requested enhanced transit service. Routes 8/81 have the fastest-growing ridership in Transfort’s system with approximately 25K passenger boardings/month. A steady increase in ridership is projected over the next five years. Expanded bus service would be an incremental step toward the enhanced travel corridor concept with bus rapid transit as identified in the Transportation Master Plan and prioritized by Council.

The primary markets for the current routes are clients of social service agencies and residents of mobile home parks. The North College area is evolving with more business growth and new housing development. The demand for social services remains high. A dedicated transit route on North College will support the vision for area revitalization and growing ridership, while providing a viable mobility option to all potential transit users. Improved transit service contributes to higher ridership, ultimately reducing single-occupant vehicle travel on North College.

Due to the 18- to 24-month timeframe to purchase and build buses, enhanced service would begin in August 2020, and operating costs for 2020 are pro-rated to reflect that start date. To expedite the start of the service, a portion of fixed route service could be contracted out temporarily to a transportation provider.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
✓ TRAN 6.3 - Improve transit availability and grow ridership
- TRAN 6.1 - Improve safety for all modes of travel
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

Additional Information

- Service would begin in August 2020 (pro-rated cost $565K, on-going annual cost $1.16M). No additional Dial-A-Ride service is needed.
Offer 45.12: ENHANCEMENT: 8.0 FTE - Bus Operators - North College Corridor Transit Improvements

- Capital costs include purchase of two buses 2019 ($1.12M), and 14 shelters at $280K ($140K per year).
- The North Fort Collins Business Association (NFCBA) has communicated strong support for this offer.
- Ridership is projected to increase 30% on weekdays, 34% Saturdays, and 72% Sundays.
- Additional offer 6.12 Enhancement for a long-term mobility/Enhanced Travel Corridor plan for N. College is also being submitted in the 19-20 BFO Cycle by FCMoves. A long-term plan is crucial in establishing a corridor vision of transit-supportive development to support high-frequency transit.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $1,161,774

Scalability and explanation

This request is the most robust option. A scaled option would be to reduce the number of buses from 2 to 1, halving the operating and capital costs. Scaling back could affect one or more of the following elements: hours of operation, frequency of service, weekend service.

Links to Further Details:

Linkage to Strategic Objectives

(the primary objective is marked with a √)

√ TRAN 6.3 - Improve transit availability and grow ridership: Offering a reliable, safe and frequent transit service supports growing ridership and attracts a greater breadth of people to use transit, like the MAX.

- TRAN 6.1 - Improve safety for all modes of travel: This will be achieved through the implementation of safety measures on buses and at stops.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

Offer 45.13: ENHANCEMENT: Regional Transit Service Partnership from Greeley to Fort Collins

2019: $0 and 0.00 FTE, 0.00 Hourly FTE
2020: $100,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will allow the City to contribute to regional transit service between Greeley and Fort Collins operated by Greeley-Evans Transit (GET). Travel between Northern Colorado communities has been growing and it is estimated that more than 14,000 people commute daily between Fort Collins, Windsor and Greeley. The high level of in-commuting has a significant impact on congestion and quality of life for residents and travelers.

Regional services are a key mobility option that help address the negative impacts of in-commuting. Following the successes of FLEX, a regional service operated by Transfort that connects communities along Highway 287, and Bustang, a Colorado Department of Transportation (CDOT) service between Fort Collins and Denver, GET proposes a new express route between Greeley and Fort Collins. The service is anticipated to operate seven trips per day between Greeley and Fort Collins, with stops at Colorado State University (CSU), University of Northern Colorado (UNC) and Windsor. The alignment in Fort Collins is proposed to include I-25 from Highway 392 to Highway 14 with a stop at the Harmony Transfer Center (HTC), and along Highway 14/Mulberry to the CSU Transit Center. Passengers would be able to make transfers to other routes at the CSU Transit Center and MAX, and make transfers to Bustang and Transfort’s Route 16 at the HTC.

Based on a recent survey, almost 3,000 faculty and students commute between Fort Collins and Greeley, and many others in nearby communities indicated a desire for regional transit service. The result of such a service would be a reduction of intra-regional commuting by single-occupant vehicles, air quality improvements and reduced greenhouse gas emissions, less congestion and higher quality of life for commuters and residents. The proposed funding partners include CDOT; the cities of Greeley, Evans, Windsor and Fort Collins; and CSU and UNC.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.3 - Improve transit availability and grow ridership
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

Additional Information

- Provides expanded mobility options for commuters traveling to Fort Collins.
- Strengthens regional partnerships along the front range, including Windsor and Greeley.
**Offer 45.13: ENHANCEMENT: Regional Transit Service Partnership from Greeley to Fort Collins**

- Leverages City dollars towards a broader transit network across multiple communities.
- Reduces traffic congestion from commuters traveling into Fort Collins.
- Provides a direct transit link between Colorado State University and University of Northern Colorado.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  - $100,000

**Scalability and explanation**

This offer is scalable and the offer assumes funding commitments by the cities of Greeley, Windsor, and Fort Collins, and CDOT. City funding would be reduced if additional partnership funding is secured, such as from Colorado State University or University of Northern Colorado. The City’s portion could also be pro-rated if service started later in 2020.

**Links to Further Details:**

- North Front Range MPO Regional Transportation Plan: https://nfrmpo.org/rtp/
- Statewide Transit Plan: https://www.codot.gov/programs/transitandrail/plans-studies-reports/statewidetransitplan/statewide-transit-plan/view

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

✓ **TRAN 6.3 - Improve transit availability and grow ridership:** This offer directly supports this strategic objective by providing another mobility option for commuters traveling between Greeley, Windsor and Fort Collins. The regional route will grow ridership, and 657 respondents to a survey said they would take the service three to five days a week.

- **TRAN 6.2 - Manage traffic congestion and improve high-priority intersections:** A regional route connecting Fort Collins, Windsor and Greeley will remove single occupancy vehicles from highly congested corridors in these areas, including I-25, Hwy 392, Hwy 14/Mulberry and Harmony. The proposed regional route will be aligned to optimize the number of people who can access and take advantage of Transport's MAX route, bringing commuters and shoppers to Midtown and Old Town.
**Offer 45.13: ENHANCEMENT: Regional Transit Service Partnership from Greeley to Fort Collins**

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

**Performance Metrics**

**Offer 45.14: ENHANCEMENT: West Elizabeth Enhanced Travel Corridor Implementation Plan**

2019: $150,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund the next steps of the West Elizabeth Enhanced Travel Corridor (ETC) Plan (adopted in 2016 by City Council) and coordinate the effort among City departments and potential partners, such as Colorado State University (CSU).

The ETC Plan envisions efficient, high frequency bus rapid transit-like service on West Elizabeth, extending onto the CSU campus and Downtown, with connections to MAX. The planned enhanced level of transit service addresses demand generated from the densely populated corridor and the large employment center, CSU. Implementing the ETC also addresses heavy transit loads/passengers left behind and infrastructure needs for travel by bicycle or foot. The ETC Plan recommended the following steps to get to a shovel-ready project: coordination of incremental projects, completion of 35% project design, providing environmental assessment work and entering into the project development process for state and federal capital funding. The Plan also recommends a phased approach to implementation. These steps are similar to those used for the MAX project and are typical for a large-scale project.

There are several local, state and federal capital funding sources that could be able to pay for the estimated $18 million capital costs of the project. However, to be considered for funding, projects must be “shovel-ready.” A number of key questions must be addressed in order to prepare this project for funding, such as:
- What are the specific steps needed to advance the project forward?
- How do planned West Elizabeth capital projects fit within the larger project scope and how do approved/planned development projects affect the implementation?
- What specific funding sources are available, including a CSU partnership, and what are the steps to entering the process?
- Are some of the larger elements, such as the roundabouts, bicycle improvements at intersections, and transit signal priority feasible?

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓):*

✓ TRAN 6.3 - Improve transit availability and grow ridership
- TRAN 6.1 - Improve safety for all modes of travel
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

**Additional Information**
**Offer 45.14: ENHANCEMENT: West Elizabeth Enhanced Travel Corridor Implementation Plan**

- Provides funding for a study providing a scope of work, phasing, funding opportunities and process, timeline, and feasibility of key West Elizabeth ETC Plan elements. ($150K in 2020)
- Provides an incremental step towards full implementation of the ETC Plan.
- Key first step in accessing large sources of capital to fund the project.
- The West Elizabeth ETC Plan details a vision and implementation strategy for multi-modal improvements in a key transportation corridor.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

This offer is scalable and $150K is estimated to be a minimum amount to move the project forward. Additional funding could increase progress.

**Links to Further Details:**

- West Elizabeth Enhanced Travel Corridor Plan: [https://www.fcgov.com/westelizabeth/](https://www.fcgov.com/westelizabeth/)

**Linkage to Strategic Objectives**

*the primary objective is marked with a ✓*

✓ TRAN 6.3 - Improve transit availability and grow ridership: The W. Elizabeth ETC Implementation Plan guides the City’s next major transit project and results in a significantly higher level of service through a MAX-like bus rapid transit system. The high demand for transit along W. Elizabeth, heavy existing bus loads, and the high number of passengers left behind are indicators of the need for more robust transit service.

- TRAN 6.1 - Improve safety for all modes of travel: The ETC plan envisioned safety improvements for transit, bicyclists, pedestrians and autos such as enhanced pedestrian crossings, protected intersections, and buffered bike lanes.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

Offer 45.15: ENHANCEMENT: Transfort Capital Asset Repair and Replacement

2019: $2,387,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $937,500 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will provide the funds for Transfort to repair, replace and maintain its capital equipment and facilities in 2019 and 2020. This offer is requesting appropriations totaling $2,387,000 in 2019 and $937,500 in 2020. This offer provides funding for capital repair, technology, bus/vehicle and equipment replacement items.

For 2019, Transfort was awarded $1.35 million in Congestion Mitigation and Air Quality (CMAQ) grants for the purchase of three compressed natural gas (CNG) buses to replace diesel buses that are past end-of-life. This award requires $424,000 in local match, of which $280,000 is already appropriated in the CCIP Transfort Bus Fleet Replacement project. This leaves $144,000 to be funded by General Fund reserves that have been dedicated for Transfort bus replacement. The net request for this offer is $1,494,000 for the remaining total appropriation needed.

Transfort receives annual federal formula grant funding (5339) for capital repair, replacement and enhancement. In 2019, Transfort anticipates $540,000 in 5339, which requires a $135,000 local match. In 2020, Transfort anticipates $550,000 in 5339, which requires a $137,500 local match. Transfort receives $200,000 annually in Colorado Department of Transportation (CDOT) capital grant money. A $50,000 local match is required. 5339 and CDOT capital grant money is used toward facilities, rolling stock and equipment.

Transfort annually receives federal grant funding to repair and replace its capital equipment and facilities. Over time, federal funding has allowed Transfort to replace its aging fleet; repair and renovate its existing maintenance facility, bus stops and transit centers; and implement new technology that benefits Transfort and its customers. In total, funding this offer will allow Transfort to leverage $2.09 million in grant funding with a $609,000 local match in 2019 and $750,000 in grant funding with a $187,500 local match in 2020.

Total appropriation requested in this offer is $2,387,000.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):
✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information

- Leveraging of local funds for federal grants.
**Offer 45.15: ENHANCEMENT: Transfort Capital Asset Repair and Replacement**

- Pays for needed replacement and repairs of capital facilities, and equipment.
- Necessary for future federal capital funding.
- Contributes to bus fleet upgrades to replace buses that have met or exceeded their useful life.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

Any scaling of this offer could result in the loss of grant funding.

**Links to Further Details:**

**Linkage to Strategic Objectives**

*(the primary objective is marked with a ✓)*

✓ TRAN 6.1 - Improve safety for all modes of travel: Improve safety for all modes of travel including vehicular, pedestrian and bicycle. This offer provides funding to maintain Transfort assets in a state of good repair and allowing for safe travel and access of Transfort facilities.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: Fill the gaps for all modes of travel and improve the current transportation infrastructure while enhancing the aesthetic environment. This offer provides funding to build, repair and maintain Transfort infrastructure and facilities. This offer will also provide the necessary resources to continue upgrading Bus Stops to be accessible and meet Americans with Disabilities Act design standards.

**Performance Metrics**

- TRAN 1. Transfort Fixed Route Passengers per Revenue Hour

Offer 45.16: ENHANCEMENT: 6.0 FTE - Bus Operators - Lincoln/Downtown/Colorado State University Transit Service through Partnerships

2019: $1,170,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $326,290 and 6.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will assist in establishing partnerships to contribute to a shuttle route linking three important activity centers: Lincoln Corridor, Downtown and Colorado State University (CSU). Transfort has been approached by entities to explore the possibility of a jointly funded service to link Lincoln with CSU. To further pursue new partnerships, Transfort will need to initiate an outreach program directed toward potential funding partners, and provide funding for Transfort’s share of the new service. Potential partners for the service include student housing project owners/managers, Lincoln Corridor businesses and employers, Downtown businesses and employers, CSU and Associated Students of CSU.

The Lincoln Corridor/Downtown/CSU route fulfills a need that was identified in the Downtown Plan, the Lincoln Corridor Plan and the Transfort Strategic Operating Plan. The new transit route connects these major activity centers, which together boasts more than 35,000 jobs. In addition, the Downtown area has more than 14,000 residents, the majority of which are age groups that trends have shown are more likely to use alternative modes of transportation (Fort Collins Market Assessment Downtown Plan, 2015).

This route will provide a frequently requested direct connection between the CSU Transit Center and Downtown. Currently, this connection is made only through a transfer between the HORN on-campus shuttle and MAX, or the infrequent service on Route 10.

Funding in 2019 would pay for contract assistance to work with potential partners and solidify funding. The goal would be to begin service in August 2020, and reach a 50% cost share between the City and other partners (approximately $450K City, $450K partners). If the goal for partner funding is not met, service would be delayed until sufficient funding is committed or reduced in span or frequency.

Ridership is projected to be approximately 560 daily passengers or 24 passengers per revenue hour, exceeding Transfort’s goal of 20 passengers per revenue hour.
**Offer 45.16: ENHANCEMENT: 6.0 FTE - Bus Operators - Lincoln/Downtown/Colorado State University Transit Service through Partnerships**

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- ✓ TRAN 6.3 - Improve transit availability and grow ridership
- TRAN 6.1 - Improve safety for all modes of travel
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

**Additional Information**

- Costs in 2019 include hiring of contractor ($50,000) and purchase of 2 buses ($1.12M). Costs in 2020 include operations beginning in August 2020 ($330K) Ongoing annual cost is $892K.

- Service could potentially be contracted, and vehicles would be leased or owned by the contractor.

- Diversifies Transfort’s funding with new community partnerships and provides a new model program to support transit system expansions.

- Service to operate every 15 minutes weekdays from 7 a.m.-8:30 p.m. and every 30 minutes Saturdays from 10 a.m.- 8:30 p.m. between the Lincoln Corridor, Downtown and CSU.

- Would allow other Transfort routes to operate more efficiently, and eliminate overlapping public and private transit services.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $892,506

**Scalability and explanation**

This offer is scalable; any decreases in funding would make it more difficult to develop partnerships. In addition, reductions in frequency and/or hours of service would result in a loss of ridership potential.

(*the primary objective is marked with a ✓*)
Offer 45.16: ENHANCEMENT: 6.0 FTE - Bus Operators - Lincoln/Downtown/Colorado State University Transit Service through Partnerships

- TRAN 6.3 - Improve transit availability and grow ridership: The offer expands transit availability along the Lincoln Corridor and between Lincoln, Downtown, and CSU, and grows ridership through a new partnership model.

- TRAN 6.1 - Improve safety for all modes of travel: This will be achieved through the implementation of safety measures on buses and at stops.

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

Data As Of: 3/7/19 at 3:03:35PM
**Offer 45.17: ENHANCEMENT: 13.0 FTE (12 Bus Operators, 1 Supervisor) - Improved Service and Increased Frequency to Existing Routes**

2019: $1,805,617 and 3.00 FTE, 0.00 Hourly FTE
2020: $833,895 and 13.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will provide increased frequencies and more reliable service to several existing Transfort routes.

(1) Routes 6 (Taft Hill) & 12 (Horsetooth) are among the system’s worst performing due to poor reliability, with just 50% of trips on time, and this is a contributing factor to low ridership. Two options are available for fixing the problems: One is a cost-neutral option that realigns the routes but eliminates service in some areas; the second (captured in this offer) requires funding to support the current service with an additional bus, adds service to the Foothills Mall/Harmony area and has more transfers to MAX. Stabilizing these routes is expected to increase daily ridership by approximately 200 trips. Includes one bus ($560K) and ongoing service ($600K).

(2) Provide high-frequency, 15-minute service on Route 7 (Drake), a key east-west MAX connector. Robust connections are an important element of Transfort’s strategic plan, and high frequencies provide freedom to passengers by providing service when people need it, reducing wait times, increasing the availability of bus transfers and improving reliability. This enhancement may also reduce the demand for parking spaces at the Drake Station. Weekday ridership is projected to increase by 38% with these changes, from 589 to 812 daily passenger trips. Includes two buses ($1.12M) and ongoing service ($748K).

(3) Increase frequencies on Route 19 (Shields) to enhance customer access along Shields and to Colorado State University (CSU), Front Range Community College (FRCC) and Rocky Mountain High School. Since Route 19 runs every 30 minutes only during peak hours, when CSU is in session, the offer would pay to increase service from 60 to 30 minutes at all other times, and 60-minute service on Saturdays. Residents regularly request more service on this route. Transfort projects that this enhanced service will increase weekday ridership by 36% while providing a higher level of reliability for the route. Includes ongoing service ($346K).

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- ✓TRAN 6.3 - Improve transit availability and grow ridership
- ✓ TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- ✓ ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals

**Additional Information**
**Offer 45.17: ENHANCEMENT: 13.0 FTE (12 Bus Operators, 1 Supervisor) - Improved Service and Increased Frequency to Existing Routes**

- Routes are evaluated annually using Transfort’s performance metrics. The most problematic routes are identified for improvement through this assessment.

- Route 6 & 12 improvements could start in August 2020 (pro-rated annual cost $222K, ongoing cost $600K).

- Route 7 improvements could start in August 2020 (pro-rated annual cost $277K, ongoing cost $748K).

- Route 19 improvements could start in August 2019 (pro-rated cost $128K, ongoing annual cost $346K).

- Includes 3 new vehicles; no additional Dial-A-Ride para-transit is needed.

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $1,694,072

**Scalability and explanation**

This offer can be scaled by providing greater or lesser fixed route frequencies, resulting in ensuing ridership increases or declines.

**Links to Further Details:**

- [http://www.ridetransfort.com](http://www.ridetransfort.com) – Transfort homepage

**Linkage to Strategic Objectives**

( the primary objective is marked with a ✓)

- **TRAN 6.3** - Improve transit availability and grow ridership: This offer directly supports this strategic objective by addressing key reliability issues and providing more transit service where demand exists. Increasing frequencies is the most effective way to grow ridership as high frequencies overcome many of the inconveniences experienced on public transportation.

- **TRAN 6.2** - Manage traffic congestion and improve high-priority intersections: This offer increases the capacity of roadways and intersections by converting single-occupant vehicles into bus passengers. Buses provide much needed increase in intersection throughput without costly, short-term infrastructure upgrades.
Offer 45.17: ENHANCEMENT: 13.0 FTE (12 Bus Operators, 1 Supervisor) - Improved Service and Increased Frequency to Existing Routes

- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals: A single person, commuting alone by car, who switches a 20-mile round trip commute to existing public transportation, can reduce his or her annual CO2 emissions by 4,800 pounds per year, equal to a 10% reduction in all greenhouse gases produced by a typical two-adult, two-car household.

Offer 45.18: ENHANCEMENT: Microtransit Pilot

2019: $100,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $196,248 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will fund a feasibility study of City support for a privately operated, flexible transit service, referred to as “microtransit,” and a pilot program to provide a new microtransit service beginning in August 2020. Microtransit is a niche service that can address transit needs in unique situations, such as lower-ridership neighborhoods and other hard-to-serve areas, first-mile/last-mile connections, and service to special populations (e.g., seniors). While microtransit can take many forms, stop locations and schedules are more flexible, ridership on these services are generally lower than fixed-route transit, buses are smaller and carry fewer passengers, fares tend to be higher and ride requests are typically made by smartphone.

Programs providing public funding for microtransit partnerships are growing throughout the country. Most operate as a shuttle service, picking up riders along a flexible route to one or more destinations using vans or similar small transit vehicles. Experiences throughout the country have been mixed and public support for such services has raised several issues, including ADA accessibility, redirecting resources to lower ridership services, equity around cost and access, and high cost per passenger trip.

To understand if microtransit is appropriate for Fort Collins, a feasibility study needs to be prepared. Such a study would establish program goals; analyze demand; identify a candidate service area; investigate regulatory issues, capital and operating costs; and recommend an appropriate operations and marketing plan. The funding would also provide a public process for gathering community input on microtransit in Fort Collins. Pending the results of the study and a recommendation to proceed, the offer would fund a pilot microtransit service to begin in August 2020. This special service would be set up in a viable candidate area using a privately contracted model and vehicles leased or purchased by Transfort.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

- TRAN 6.3 - Improve transit availability and grow ridership
- ENV 4.1 - Achieve Climate Action Plan (CAP) 2020 goals and continue progress toward the 2030 goals
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

Additional Information

- Funds feasibility study in 2019 ($100,000) and operating costs for August 2020 start ($196K; ongoing annual cost $530K).
- Provides direction on a potential innovative approach to public transportation and includes a public-private partnership model.
Offer 45.18: ENHANCEMENT: Microtransit Pilot

- Potentially increase the flexibility of public transportation services.
- The August 2020 start date provides time for completion of the feasibility study and a Request for Proposal (RFP) process for hiring a contractor.
- Research is needed to determine the feasibility of introducing microtransit in Fort Collins.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $530,400

Scalability and explanation

This offer could be scaled up or down. If scaled down, it is recommended that funding be retained for the feasibility study and the microtransit pilot be considered in a future budget cycle.

**Offer 45.19: Colorado State University Football Game-Day Transit Services**

2019: $150,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $150,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will enable Transfort to continue to provide enhanced transit routes during Colorado State University (CSU) football games.

These services are provided before, during and after football games hosted at CSU's Canvas Stadium. CSU and the City work together to design the service; the City is reimbursed for actual costs.

The City of Fort Collins and CSU have entered into an Intergovernmental Agreement (IGA) to fund these services. CSU funds the entire cost of this offer. Additional expanded service on game days necessary to fund community-wide increased demand is funded in Transfort’s ongoing core services offer.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- ✓TRAN 6.3 - Improve transit availability and grow ridership
- - NLSH 1.3 - Improve accessibility to City and community programs and services to low and moderate income populations  
- - CR 2.3 - Provide enhanced opportunities for arts and culture throughout the City

**Additional Information**

- 85,209 passenger boardings during 2017 season service.  
- 4 minute MAX frequency during peak periods.  
- Transfort operates up to 50 buses, contracts an additional 5 buses.

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives**

(*the primary objective is marked with a ✓*)

- ✓TRAN 6.3 - Improve transit availability and grow ridership: Service levels focus on areas of greatest ridership demand and productivity, in accordance with the transit policies. Recent expansions of service requires work to optimize and improve service.
- - NLSH 1.3 - Improve accessibility to City and community programs and services to low and moderate income populations: Public transit provides equal opportunity to people of all income levels to enjoy efficient and safe transportation to community programs like sporting events.
**Offer 45.19: Colorado State University Football Game-Day Transit Services**

- CR 2.3 - Provide enhanced opportunities for arts and culture throughout the City: Colorado State University football is an integral part of Fort Collins culture. Funding this offer will support access to CSU home games, thereby contributing to attendance and overall enjoyment of the new stadium.

**Improvements & Efficiencies**

- Customer service representatives and other departmental employees provided direct support, on-site at MAX and transit center locations to help customers navigate the system. The net effect for the customer was improved utilization of the transit system in a well-planned, organized manner.

Offer 45.20: KFCG ENHANCEMENT: Bus Stop Improvements/Upgrades

2019: $361,890 and 0.00 FTE, 0.00 Hourly FTE  
2020: $364,730 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide the necessary resources to continue upgrading bus stops to be accessible and meet applicable federal regulations and design standards. Transfort estimates an average of 25 bus stops to be upgraded each budget year.

KFCG funding of $363,287 in 2019 and $366,173 in 2020 is proposed for ongoing bus stop enhancements to meet applicable federal regulations and design standards, and for concrete repair and maintenance.

The bus stop replacement program is proposed to be funded from two sources (KFCG and CCIP) and totals approximately $465k each year. This offer proposes the KFCG portion; and Offer 45.21 proposes the Community Capital Improvement Program (CCIP) portion.

Transfort annually receives federal grant funding to repair and replace its capital equipment and facilities. This federal funding is critical to maintain Transfort’s assets in a state of good repair. However, a majority of this funding goes toward vehicle fleet replacement and is not sufficient to adequately maintain and upgrade the bus stops. As a result, KFCG and CCIP funding has been used to address bus stop accessibility deficiencies.

Additional bus stop improvements and upgrades are proposed in Offer 45.21.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:

- TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.3 - Improve transit availability and grow ridership

Additional Information

- Upgrading bus stops to be accessible and meet applicable federal regulations and design standards

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:

  $0

Scalability and explanation

This offer is scalable to be reduced to fewer bus stop improvements.
Offer 45.20: KFCG ENHANCEMENT: Bus Stop Improvements/Upgrades

Offer 45.21: ENHANCEMENT: CCIP - Bus Stop Improvements

2019: $100,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $100,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide the necessary resources to continue upgrading bus stops to be accessible and meet applicable federal regulations and design standards. Transfort estimates an average of 25 bus stops to be upgraded each budget year.

Ballot-mandated funding of $100,000/year in both 2019 and 2020 is proposed for ongoing bus stop enhancements to meet applicable federal regulations and design standards, and for concrete repair and maintenance.

The bus stop replacement program is proposed to be funded from two sources (KFCG and CCIP) and totals approximately $465k each year. This offer proposes the CCIP portion; Offer 45.20 proposes the KFCG portion.

Transfort annually receives federal grant funding to repair and replace its capital equipment and facilities. This federal funding is critical to maintain Transfort’s assets in a state of good repair. However, a majority of this funding goes toward vehicle fleet replacement and is not sufficient to adequately maintain and upgrade the bus stops. As a result, KFCG and CCIP funding has been used to address bus stop accessibility deficiencies.

Additional bus stop improvements and upgrades are proposed in Offer 45.20.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✅):

✅ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.3 - Improve transit availability and grow ridership

Additional Information

- Upgrading bus stops to be accessible and meet applicable federal regulations and design standards.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $0

Scalability and explanation

This offer is ballot-mandated and cannot be scaled.

Offer 46.1: Parking Services

2019: $2,374,867 and 15.41 FTE, 0.00 Hourly FTE
2020: $2,432,414 and 15.41 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will continue to provide the core functions and mission of Parking Services including managing public parking, creating on-street parking space turnover, providing parking for those with long-term parking needs, contributing to safe and orderly traffic flow, and enhancing neighborhood quality by enforcing parking regulations. This offer is 100% funded from ongoing Parking revenues.

Parking Services' primary divisions consist of customer service, enforcement, Residential Parking Permit Program, community parking management solutions and facility operations. Parking Services manages the daily operations of the structures, lots and pay machines; parking enforcement and citation management; and administering the sale and renewal of monthly and annual parking permits. Funding continues the operations and maintenance to manage the Civic Center and Old Town parking structures, as well as multiple surface lots, and maintains an existing level of service for the Residential Parking Permit Program (RP3). In addition, Parking Services provides community parking management solutions to address CSU home football games.

Parking Services supports the economic vitality of Downtown Fort Collins by creating on-street parking space turnover by monitoring and enforcing parking time limits and providing parking structures as an alternative. Parking Enforcement contributes to safe and orderly traffic flow and neighborhood quality through the education and enforcement of parking regulations.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- NLSH 1.6 - Protect and preserve the quality of life in neighborhoods

Additional Information

- Creates parking space turnover in Downtown by monitoring and enforcing parking time limits.
- Provides parking structures as long-term parking alternatives for those who need them.
- Manages the limited public resource of on-street parking and creates safe conditions.

Offer 46.1: Parking Services

Linkage to Strategic Objectives
(see primary objective is marked with a ✓)

✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods: This offer creates on-street parking space turnover by monitoring and enforcing parking time limits and provides parking structures for long-term parking.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Parking services reduces traffic congestion and contributes to safe and orderly traffic flow.

- NLSH 1.6 - Protect and preserve the quality of life in neighborhoods: Parking enforcement contributes to safe and orderly traffic flow and neighborhood quality through the education and enforcement of parking regulations.

Improvements & Efficiencies

- Provided same level of management and enforcement for an increasing number of RP3 zones (10 in 2017).

- Converted all intra-departmental (parking and transit) forms from paper and Word Document processes to a fully integrated, web-based forms portal. No additional purchases were required.

- Implemented 2 self-service kiosks allowing customers to pay for permits and citations in the Parking Services office.

- Collaborated with Municipal Court to create simpler, streamlined, customer focused process to contest a citation, and offer an online option.

- Coordination with other departments to create a smoother on-street permit process.

- Automated invoicing and recurring payment options for permit users.

Performance Metrics

- TRAN 48. % of residents responding very good/good - Availability of parking Downtown in Fort Collins

Offer 46.2: Firehouse Alley Parking Structure Operations and Maintenance

2019: $255,156 and 0.39 FTE, 0.00 Hourly FTE
2020: $261,448 and 0.39 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will provide the necessary operations and maintenance funding to manage the Firehouse Alley Parking Structure. Additionally, this offer will fund the requirement to maintain a reserve for major maintenance in the structure.

The City owns the structure in partnership with the Downtown Development Authority and the Bohemian Foundation. The City’s portion of this offer is 100% funded from ongoing Parking revenues.

Services provided by this offer include landscaping and snow removal, facility maintenance and repair, security service, parking technology, video surveillance system and creating reserves. This offer is necessary to properly manage and maintain this City asset that is critical to the long-term sustainability of Downtown, and is consistent with the Parking Plan and Downtown Plan by facilitating infill and redevelopment.

Since the structure opened in December 2017, use is steadily increasing by 5% on average per month as customers become more aware. Currently average use on weekdays is 45% and is 55% on weekends, with max periods on weekends that reach 90%.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

 ✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
 - SAFE 5.8 - Improve security at City facilities and properties

Additional Information

- Provides an alternative to on-street parking Downtown for those with long-term parking needs.
- Manages the limited public resource of downtown public parking and creates safe conditions.
- Supports the City's continued effort to work with public and private partners to address parking needs Downtown.

Links to Further Details:

- Parking Plan http://www.fcgov.com/planning/parkingplan

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)
**Offer 46.2: Firehouse Alley Parking Structure Operations and Maintenance**

- **TRAN 6.7** - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods: This offer maintains a recent increase in downtown parking supply and provides an alternative to on-street parking Downtown for those with long-term parking needs.

- **SAFE 5.8** - Improve security at City facilities and properties: Perception of safety of Transport/Parking Services has a high impact on residents’ use and enjoyment of the services. This offer funds maintaining video security equipment and managing on-site security services in evening hours.

### Improvements & Efficiencies

- Innovative payment, navigation systems, and technology for customers.
- Improved security infrastructure including 27 cameras and 6 emergency call boxes.
- Fully integrated Fort Collins Police Services Community Services Officers to use Parking Services’ smartphone app for parking citations. The net effect of this enhancement is an increase in data quality and a reduction in voided citations.

### Performance Metrics

- **TRAN 48.** % of residents responding very good/good - Availability of parking Downtown in Fort Collins

Offer 46.3: ENHANCEMENT: Parking Capital Equipment

2019: $230,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $10,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will support the growth of Parking Services infrastructure management and enforcement. This request is for funds entirely from the Parking Services reserve fund.

The Residential Parking Permit Program (RP3) has grown exponentially in the last two years from 822 parking spaces in 2015 to 4,180 in 2017. Projections show similar growth in the next two years, including the enforcement of Colorado State University stadium events. Additionally, Parking Enforcement Officers are now more actively managing and enforcing areas at Downtown's periphery such as the River District, Canyon Avenue, University North and the Mason Corridor.

Funding requests for this offer include replacing two enforcement vehicles equipped with License Plate Recognition (LPR) technology totaling a one-time expense of $190,000 ($95,000 per vehicle) in 2019. Additionally, replacement signage for Downtown extended parking enforcement hours will total $30,000 in 2019. The total cost for RP3 signage will be $10,000 in 2019 and $10,000 in 2020.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- NLSH 1.6 - Protect and preserve the quality of life in neighborhoods

Additional Information

- The Residential Parking Permit Program has grown from 822 parking spaces in 2015 to 4,180 in 2017.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $0

Scalability and explanation

The offer is scalable and could be scaled down to one vehicle with LPR and less signage replaced.

**Offer 46.4: ENHANCEMENT: Citywide Parking Master Plan**

2019: $250,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer will fund the development of a Citywide parking plan. The plan will incorporate parking as a critical element of the transportation system.

The recently adopted 2017 Downtown Plan identifies the need for a Citywide parking plan to include a menu of parking options and address funding mechanisms, organizational structure and stakeholder involvement (e.g., parking benefit district).

Questions this plan will address are:
- How does parking support the City's transportation system goals?
- How can parking policy support the Climate Action Plan?
- How do the City's parking policies address innovations in transportation technology?
- How can the City resource parking services for future growth?

Parking plays a significant role in shaping the community, environmental quality and transportation choices. Aligning parking strategies with policies adopted in City Plan, the Climate Action Plan, and Transportation and Transit Master Plans will be crucial to the success of implementing these plans.

Currently, the City only has policies addressing parking Downtown and for the Residential Parking Permit Program (RP3). Development and economic growth continue to occur throughout commercial corridors. Parking Services is being asked to manage more parking in ways similar to Downtown with limited resources and no policy guidance. A parking study will address these issues and determine future policy.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

- TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections

**Additional Information**

- Development of transit park-n-ride policies.
- Create policies for public-private partnerships to develop new infrastructure.
- Build parking revenue and management models.
**Offer 46.4: ENHANCEMENT: Citywide Parking Master Plan**

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

**Scalability and explanation**

Boulder did a multi-district parking study for $225,000. River North (RiNo) district in Denver did a parking study for $125,000. Cheyenne Wyoming did a downtown parking study for $100,000.

This offer can be scaled but it would limit areas being addressed or the depth of the analysis.

**Links to Further Details:**

Offer 46.5: ENHANCEMENT: MAX Parking Improvements

2019: $700,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $10,400,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding from this offer will improve parking supply at MAX Bus Rapid Transit (BRT) stations.

Presently, the City is using a $40K 5304 FTA grant to identify opportunities for investment in park-n-rides near MAX stations. The study will identify opportunities for parking easements, lease agreements, shared parking and fee-simple purchases.

The highest-demand park-n-ride for MAX is the Drake Station, which has a 60-space shared parking easement and an additional 18 spaces along the guideway. However, demand far exceeds the capacity with spillover into the former Kmart parking lot averaging 250+ occupancy. The former Kmart is in the process of redevelopment to become a King Soopers grocery store (anticipated groundbreaking in 2019) and will no longer allow spillover beyond the 78 dedicated spaces. The City contracted a feasibility study to develop a parking structure in the easement area and the property owner has expressed willingness to participate in the needed restructuring of the easement agreement.

This request is to fund the entire $11.1 million, ~300 space parking structure ($37,000/space). This funding request can potentially be reimbursed, in part or in entirety, by the Urban Renewal Authority through Tax Increment Financing, which will be proposed for this purpose.

The initial phase of this project is to design the structure (architecture and engineering) and procure a long-term lease agreement with the property owner. Based on the cost of the Firehouse Alley Parking Structure in 2017, the cost to design and engineer is estimated at $600,000.

The recently adopted 2017 Downtown Plan identifies park-n-rides as a key strategy to get people to Downtown without driving and recommends exploring additional parking opportunities outside of Downtown for transit routes that serve Downtown. It also recommends actions to develop station area plans for all MAX stations and identify funding mechanisms for joint development/shared-use opportunities (e.g., public/private partnerships).

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓): ✓TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
- TRAN 6.3 - Improve transit availability and grow ridership
- ECON 3.4 - Foster infill and redevelopment that enhances the community
**Offer 46.5: ENHANCEMENT: MAX Parking Improvements**

**Additional Information**
- MAX Park-n-Ride lots are full during most weekdays and on summer weekends. The MAX Drake station parking lot consists of 78 spaces and is not sufficient for the demand. Currently, over 200 cars park in and around the lot, impacting private businesses.
- This offer supports the City's continued effort to work with public and private partners to address parking needs along the Mason Corridor.

**Impact to Ongoing Expenses**
- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $200,000

**Scalability and explanation**
This offer can be scaled significantly. The offer is written to fully fund a structure, but smaller amounts could pay for collaboration, leased spaces, or the City’s share of a public/private partnership.

The parking structure at the Drake Station funding request could be scaled down to include only the $600,000 for design and the $57,815 for the initial lease agreement; or

The funds could be granted contingent upon a certain amount of reimbursement by the URA.

**Links to Further Details:**
- Parking Plan: Downtown and Surrounding Neighborhoods (2013)  

**Linkage to Strategic Objectives**

(the primary objective is marked with a ✓)

✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods: This offer directly resources the acquisition, lease, or creation of parking on the MAX corridor.

- TRAN 6.3 - Improve transit availability and grow ridership: Additional parking availability at MAX locations will increase ridership on the MAX by meeting the parking demand.

- ECON 3.4 - Foster infill and redevelopment that enhances the community: MAX is an important public investment that support infill and redevelopment, and public/private parking solutions help foster these projects.

Offer 46.7: ENHANCEMENT: 0.5 FTE - Systems Specialist - Parking Services Technology and Support

2019: $136,646 and 0.50 FTE, 0.00 Hourly FTE
2020: $107,127 and 0.50 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will support the growth of Parking Services infrastructure management and enforcement by funding an additional 0.5 FTE for internal technical support and provide a parking communication plan and implementation. This request will be funded from ongoing Parking revenues.

Parking Services is implementing the 2017 Downtown Plan by installing new technology in the Old Town and Civic Center Parking Structures, installing more than 3,000 on-street parking sensors, extending on-street enforcement to later hours and introducing a pay-to-stay program in two-hour spaces (requiring 400 signs). With the introduction of these systems, internal technical support for hardware and software is critical to ensure continuity of operations and high-quality service delivery. The additional 0.5 FTE will be used to increase an existing 0.5 FTE to 1.0 full-time support.

Perceptions of parking and safety were identified as the two biggest challenges to doing business in the Downtown Business Association's Strategic Plan. In the strategic planning process, more than 180 business and property owners were engaged through outreach meetings and surveys. Although Downtown is the primary location in need of parking communication, this funding will also assist in communicating about RP3, MAX park-n-rides and CSU Stadium parking restrictions.

The Residential Parking Permit Program (RP3) has grown exponentially in the last two years from 822 parking spaces in 2015 to 4,180 in 2017, and projections show similar growth in the next two years, including the enforcement of CSU stadium events. Parking Services is now more actively managing and enforcing areas at Downtown’s periphery such as the River District, Canyon Avenue, University North and the Mason Corridor.

Targeted audience development strategies, coupled with annual, seasonal and Downtown-based messaging, will educate Downtown stakeholders and patrons about upcoming parking changes that directly impact Downtown business owners and the Downtown patron experience.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods

Additional Information
Offer 46.7: ENHANCEMENT: 0.5 FTE - Systems Specialist - Parking Services

Technology and Support
- MESSAGING: The content will focus on how the City is working to align parking and transportation initiatives noted in the Downtown Plan's strategic development goals. Messaging will include a consistent call-to-action with multiple levels of engagement ranging from a simple link to a website to parking education seminars for Downtown employers and their employees.

- CONSISTENCY: Recognizable branding and messaging will be used to communicate to all audience segments (visitors, employees, residents, etc.).

- FREQUENCY: Top-of-mind messaging and regular communications reflect environmental scans and contextualization of the City's larger transportation goals.

ANCHORING: Compelling calls-to-action through visual communications and content creation.

- ADDITIONAL COMMUNICATIONS:
  In addition to an updated website, e-blast(s) and active engagement through social media, the following communication tools will be useful for sharing information and engaging diverse user groups: Downtown Ambassadors; Downtown Business Association; Downtown Development Authority; Visit Fort Collins; Fort Collins Chamber of Commerce.

- Interactive Website to include: 1. Distinct sections tailored to target audience categories; 2. Fresh & pertinent content, including timely announcements and upcoming projects; 3. User-generated self-selection of information; 4. Technology explanations; 5. Promotion of multi-modal transit and ride-sharing availability.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  
  $123,000

Scalability and explanation

Funding requests in this offer are scalable to two distinct support options. (1) One 0.5 FTE IT Technician position to support new technology totaling $56,285 (2019) and $58,159 (2020) and (2) marketing and communications support totaling $65,000 (2019) and $65,000 (2020).

Offer 69.1: ENHANCEMENT: I-25 Improvements Local Funding Match

2019: $1,125,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $1,125,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer provides a $2.25 million local match contribution to necessary improvements of the Interstate 25 (I-25) Corridor in Northern Colorado. Improvements will be made by the Colorado Department of Transportation and Federal Highway Administration. Local agencies in the Northern Colorado region, including Loveland, Larimer County and Windsor, are contributing funds in hopes of matching federal grant opportunities including TIGER and FASTLANE applications submitted in the spring of 2016. The region’s goal is to raise $23 million in local matching funds to help accelerate needed infrastructure improvements to improve safety and reduce congestion.

This is a one-time offer requested by the City Manager and City Council. This offer is fully funded by a General Fund reserve assignment for this intended purpose, which is now being used to fund this offer.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✔):

✔ TRAN 6.4 - Support, enhance and accelerate I-25 improvements according to the multi-modal environmental impact statement

Additional Information

- Efforts, initiatives, and actions have been taken to urge the Colorado legislature and Colorado Department of Transportation (CDOT) to accelerate improvements to Interstate 25 (I-25). Plans for road capacity and transit improvements were identified in the North I-25 Environmental Impact Statement (2011), but funds needed to make these changes are not identified by CDOT in the foreseeable future.

- I-25 is the key interstate linkage in Northern Colorado, and serves as a major freight route as well as traveler connection between the Denver metro area to the south. Current infrastructure deficiencies, combined with increasing travel demand on the corridor result in safety and congestion issues along the Northern Colorado I-25 Corridor

- This item supports the adopted recommendations of the 2011 North I-25 Environmental Impact Statement (EIS), and also supports Council priority for I-25 funding

- Metrics have not yet been identified for this Offer.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0
**Offer 69.1: ENHANCEMENT: I-25 Improvements Local Funding Match**

**Scalability and explanation**
Scaling down the City’s contribution may further delay the region’s ability to accelerate needed I-25 infrastructure improvements. Scaling up the City’s contribution may increase likelihood of infrastructure improvement in the next 2-4 years.

**Links to Further Details:**
- [http://www.nfrmpo.org/Libraries/FIX%20I-25/North%20I-25%20Funding%20Options_April%202016.sflb](http://www.nfrmpo.org/Libraries/FIX%20I-25/North%20I-25%20Funding%20Options_April%202016.sflb)

Offer 69.2: ENHANCEMENT: Regional Contribution to Larimer County for North I-25 Improvements

2019: $460,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $470,000 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer meets the requirements of an Intergovernmental Agreement (IGA) between the City of Fort Collins and Larimer County.

In 2015, City Council adopted Resolution 2015-100 stating its support for a Larimer County proposal to use increased County mill levy funds as a method to facilitate funding Interstate 25 (I-25) improvements. This is a five-year regional contribution of local matching funds for CDOT’s North I-25 Improvements Project. With Resolution 2016-077, Council authorized Mayor Troxell to enter into an IGA with Larimer County and participating local agencies, including the City, to contribute local matching funds for this purpose. 2019 and 2020 will satisfy the third and fourth annual installments of these payments to Larimer County.

These funds are estimated to generate a total of $10 million over the course of the five-year period. The increase in the County Road and Bridge Mill Levy revenues received by the City and the other municipalities will be available to fund construction of roads and streets within their boundaries, making funds from the City's General Fund or other funds available for contribution to the I-25 improvements. The County proposed using these contributions for improvements and local match opportunities on the I-25 Corridor within Larimer County. All eight Larimer County municipalities passed resolutions supporting the proposal.

Fort Collins’ total contribution to this five-year funding commitment is $2,229,731. Fort Collins’ annual share of funds is approximately $450,000 in each of the five years. In 2017, Fort Collins paid $445,946; in 2018 Fort Collins paid $453,157.

The local share of Larimer County Road and Bridge Levy funds received by Fort Collins in 2017 was $1.09 million, reflecting an increase of approximately $509,000 over that received in 2015 (pre-IGA). The increase in Road and Bridge Funds received covers the amount of Fort Collins' annual contribution, with no negative financial impacts to the City.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

 ✓ TRAN 6.4 - Support, enhance and accelerate I-25 improvements according to the multi-modal environmental impact statement

**Offer 69.3: ENHANCEMENT: Debt Service for Prospect & I-25 Interchange**

2019: $1,377,500 and 0.00 FTE, 0.00 Hourly FTE
2020: $1,376,500 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer supports the construction of the I-25 and Prospect interchange as part of the overall North I-25 Improvements Project. The interchange at Prospect Road and I-25 is aging infrastructure that is currently beyond its lifespan, and is failing in level of service (congestion) at peak periods of travel. Existing and planned development in the area are exacerbating congestion and safety issues. The interchange and Prospect Road are a critical gateway into central Fort Collins, as well as into Timnath. The Colorado Department of Transportation (CDOT) will begin constructing the overall North I-25 Improvements Project in late 2018 or early 2019, contributing $12M toward the total interchange project budget of $31M. The construction of the I-25 and Prospect interchange is expected to take place from the summer of 2019 to the summer of 2021. The $17.6M portion of the offer (as stated above for General Fund) will be funded through debt financing. This offer will also include an appropriation of $1.4M from the Transportation Capital Expansion Fee (TCEF) program.

City Council on Jan. 2, 2018, approved an Intergovernmental Agreement (IGA) to fund $17M of the remaining project cost in partnership with property owners and the Town of Timnath, which includes $5M for urban design improvements. An additional $2M is needed to complete the urban design and irrigation/landscaping after the CDOT project is completed. This partnership agreement with CDOT allows improvements to the I-25 and Prospect interchange to be accelerated by as many as five to ten years. The City has also reached a partnership with adjacent property owners to reimburse $8.25M of the total contribution over 20 years. On March 6, 2018, City Council approved the financial agreement with the adjacent property owners for the construction of I-25 and Prospect, as well as the establishment of a Metro District to leverage revenue sources for repayment over 20 years.

This Offer supports the following Strategic Objectives (*the primary objective is marked with a ✓*):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.4 - Support, enhance and accelerate I-25 improvements according to the multi-modal environmental impact statement
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- The primary traffic benefits from an updated interchange include:
  - Replacement of the current bridge over I-25 which is structurally deficient.
  - Enables the interchange to increase from two lanes to four lanes, as the current two-lane configuration experiences failing level of service (congestion) at peak periods of travel.
  - Provides bicycle and pedestrian facilities on Prospect Road over I-25.
Offer 69.3: ENHANCEMENT: Debt Service for Prospect & I-25 Interchange

- The interchange and Prospect Road are a critical gateway into central Fort Collins, the CSU campus, as well as Timnath.

- Funding sources for this $31M project:
  - TCEF - $1.4M
  - Debt Financing - $17.1M
    - Town of Timnath - $2.5M
    - Property Owners - $7.1M
    - Fort Collins - $7.5M
  - CDOT Contribution - $12M
  - City ROW - $0.5M (non-cash)

Total project cost (including principal and interest) - $41.4M
Total cost to City (including principal and interest) - $19.8M

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $1,400,000

Scalability and explanation

$2 million of this offer is for urban design and irrigation/landscaping to be completed after the Prospect Interchange is constructed by CDOT and is therefore scalable. $17 million of the overall $19 million included in this offer will be in an IGA to CDOT and paid over a 3-year period.

Linkage to Strategic Objectives

(the primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel across the newly constructed Prospect Interchange. Current conditions are not safe, due to failing level of service (congestion) at peak periods of travel, and this project will greatly improve the flow of traffic which will also improve safety.

- TRAN 6.4 - Support, enhance and accelerate I-25 improvements according to the multi-modal environmental impact statement: This project is a great example of how we are improving the flow of traffic on I-25 (and access to it) via collaboration with regional, state and federal partners. With these improvements to the interchange, as well as enhanced pedestrian and bicycle access across I-25, we help enable regional alternative modes of transportation to safely cross the busy thoroughfare.
**Offer 69.3: ENHANCEMENT: Debt Service for Prospect & I-25 Interchange**

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: The current Prospect Interchange is aging infrastructure that is currently beyond its design lifespan and is structurally inadequate. This project provides a new Interchange to address this high priority deficiency and greatly enhance the safety of the travelling public.

Offer 69.4: ENHANCEMENT: Prospect Road Improvements – Sharp Point Drive to I 25 Frontage Road (Design and Right-of-Way)

2019: $2,000,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

Funding this offer will complete the design, final construction estimate, and right of way acquisition for construction of the four lane arterial standards of Prospect Road from Sharp Point Drive to the I 25 Frontage Road.

This high priority capital improvement project would complete an important gap in the transportation network, and have significant connectivity and mobility benefits for pedestrians, bicycles and vehicles. Currently, this stretch of Prospect is congested with substantial back ups and delay during peak travel times, and is lacking adequate bicycle and pedestrian facilities.

With past planning and construction efforts along this regionally significant corridor, the City has acquired a majority of the rights of way, has constructed four ultimate width bridges in the Poudre River and Boxelder Creek areas, and is currently collaborating with the Colorado Department of Transportation (CDOT) and adjacent landowners at Prospect/I 25.

CDOT’s current schedule for the reconstruction of the Prospect and I-25 interchange is from summer 2019 through spring 2021. This offer proposes to complete the design of Prospect in conjunction with the CDOT design-build project.

Current traffic volumes on East Prospect warrant the need for a four lane roadway, with volumes expected to increase upon completion of the interchange and the development of several large scale parcels adjacent to the interchange.

The total project cost for this section of Prospect Road has a concept-level estimate of $6.2M. Of this, $2.0M is eligible for construction funding through the TCEF program, which is the maximum development contribution and would be appropriated with this offer. The project team will complete the design, final estimate, and position the project for construction in the 2021 / 2022 budget cycle.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

Additional Information
Offer 69.4: ENHANCEMENT: Prospect Road Improvements – Sharp Point Drive to I 25 Frontage Road (Design and Right-of-Way)

- Expected deliverables for this project include: completing the design, final construction estimate, right of way acquisitions, and coordination with CDOT.

- Current levels of daily traffic volumes have triggered the need for the 4-lane improvements, and traffic volumes are expected to grow after the completion of the Prospect/I-25 interchange completion.

- This project will address the lack of adequate bicycle and pedestrian facilities, specifically in the area of Summitview to I-25.

- Four bridges have been built along this corridor with past projects. All four bridges are wide enough to accommodate the proposed 4-lane roadway section.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

Scalability and explanation

This offer includes the planning, design, right of way, and CDOT coordination funding for the project. If the offer is scaled, then the right-of-way purchases will be delayed.

Links to Further Details:

Linkage to Strategic Objectives

(The primary objective is marked with a ✓)

✓ TRAN 6.1 - Improve safety for all modes of travel: This project will provide quality infrastructure for all modes of travel. Vehicular traffic warrants the need for the ultimate 4-lane improvements. Bicycle, pedestrian, and potential transit improvements will be provided in a context sensitive manner along this corridor.

- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections: Traffic can routinely back up Prospect in peak travel times. The project will resolve this issue by: addressing intersection improvements between Sharp Point and the I-25 frontage road, adding or extending turn lanes where applicable, and capacity along the corridor.

- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins: This project is a high-priority transportation project for the City’s prioritized Capital Improvement Plan. This project will address the lack of transportation infrastructure for approximately 1.5 miles of the Prospect corridor.

**Offer 69.5: KFCG ENHANCEMENT: Prospect Road Improvements  Sharp Point Drive to I 25 Frontage Road (Construction)**

2019: $0 and 0.00 FTE, 0.00 Hourly FTE
2020: $4,200,000 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

Funding this offer will complete the construction of the four lane arterial standards of Prospect Road from Sharp Point Drive to the I 25 Frontage Road.

This high priority capital improvement project would complete an important gap in the transportation network, and have significant connectivity and mobility benefits for pedestrians, bicycles and vehicles. Currently, this stretch of Prospect is congested with substantial back ups and delay during peak travel times, and is lacking adequate bicycle and pedestrian facilities.

With past planning and construction efforts along this regionally significant corridor, the City has acquired a majority of the rights of way, has constructed four ultimate width bridges in the Poudre River and Boxelder Creek areas, and is currently collaborating with the Colorado Department of Transportation (CDOT) and adjacent landowners at Prospect/I 25.

CDOT's current schedule for the reconstruction of the Prospect and I 25 interchange is from summer 2019 through spring 2021. This offer proposes to complete the Prospect improvements by the end of 2020, before the interchange improvements are complete.

Current traffic volumes on East Prospect warrant the need for a four lane roadway, with volumes expected to increase upon completion of the interchange and the development of several large scale parcels adjacent to the interchange.

The total project cost for this section of Prospect Road has a concept-level estimate of $6.2M. Of this, $2.0M is eligible for construction funding through the TCEF program, which would be appropriated through a separate offer (69.4). The remaining $4.2M would need to be funded through a capital project (this offer).

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓):*

✓ TRAN 6.1 - Improve safety for all modes of travel
- TRAN 6.2 - Manage traffic congestion and improve high-priority intersections
- TRAN 6.5 - Improve aging and/or missing transportation infrastructure that serves Fort Collins

**Additional Information**

- Expected deliverables for this project include: completing the final design and right-of-way acquisitions in 2019 and completing construction by the end of 2020.
Offer 69.5: KFCG ENHANCEMENT: Prospect Road Improvements Sharp Point Drive to I 25 Frontage Road (Construction)

- Future, ongoing operations and maintenance costs are estimated at $16,000 per year and include: pavements, sidewalks, utilities, traffic signals, traffic signs and striping, snow clearing operations, and landscaping / urban design improvements.

- Current levels of daily traffic volumes have triggered the need for the 4-lane improvements, and traffic volumes are expected to grow after the completion of the Prospect/I-25 interchange completion.

- This project will address the lack of adequate bicycle and pedestrian facilities, specifically in the area of Summitview to I-25.

- Four bridges have been built along this corridor with past projects. All four bridges are wide enough to accommodate the proposed 4-lane roadway section.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:
  $16,000

Scalability and explanation

This offer includes the construction funding for the project. If the offer is scaled, landscape and urban design items would be removed from the project.

Offer 93.1: ENHANCEMENT: New Block 32 Parking Structure Design

2019: $1,500,000 and 0.00 FTE, 0.00 Hourly FTE
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

Offer Summary

This offer will fund the design of a new Downtown parking structure. The Downtown area needs additional parking, particularly in the area where the City offices are located. This new four-level garage is planned for 245 N. Mason St., and would replace the surface parking just north of the 215 N. Mason St. facility.

The new 400-space parking structure would have one level below ground, which would contain mechanical equipment and parking stalls for City Fleet vehicles. The remaining three levels would allow parking for both the public and City staff working in the Downtown area. It will include a solar photo-voltaic (PV) system on the top level to offset the building’s energy use, and may also include some retail space to be leased.

This new parking structure is also a part of the Block 32 master plan, which includes a new City Hall if funding is available.

This Offer supports the following Strategic Objectives (the primary objective is marked with a ✓):

✓ TRAN 6.7 - Address parking needs Downtown, along the MAX corridor and in residential neighborhoods
- ECON 3.3 - Enhance business engagement to address existing and emerging business needs

Additional Information

- This offer is funded by General Governmental Capital Improvement Fund.

- The master plan sequence is to build the Utilities Administrative Building, then the parking structure, and finally the new City Hall.

Impact to Ongoing Expenses

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of: $0

Scalability and explanation

This offer cannot be scaled as it is design only.

Links to Further Details:

**Offer 94.1: ENHANCEMENT: Traffic Signal on Drake west of Lemay**

2019: $150,000 and 0.00 FTE, 0.00 Hourly FTE  
2020: $0 and 0.00 FTE, 0.00 Hourly FTE

**Offer Summary**

This offer is for the installation of a traffic signal on Drake Road west of Lemay at the entrance to the Woodward facility. Woodward is in the process of remodeling their campus adjacent to the Drake/Lemay intersection. Once complete they anticipate increasing the number of employees working there. Egress from the campus - especially to head north - is challenging. With added employees, there is a desire to signalize an access to allow easier egress. Signalizing the driveway on Drake will allow easier left turns onto Drake and access to the existing signal at Lemay/Drake in order to go north on Lemay.

This Offer supports the following Strategic Objectives *(the primary objective is marked with a ✓)*:  
- ECON 3.3 - Enhance business engagement to address existing and emerging business needs  
- TRAN 6.1 - Improve safety for all modes of travel

**Additional Information**

- Not applicable

**Impact to Ongoing Expenses**

- Funding this Offer will increase future ongoing expenses by an estimated annual amount of:  
  $3,900

**Scalability and explanation**

This offer is not scalable.

**Links to Further Details:**

- Not applicable

**Linkage to Strategic Objectives** *(the primary objective is marked with a ✓)*

- ECON 3.3 - Enhance business engagement to address existing and emerging business needs:  
  Woodward is expanding the use of their Lemay/Drake campus warranting signalization at one access location.

- TRAN 6.1 - Improve safety for all modes of travel: Woodward has emphasized the need for safe and efficient access to the public street system from their campus at Lemay/Drake. This signal would provide such at their access to Drake Road.
Offer 94.1: ENHANCEMENT: Traffic Signal on Drake west of Lemay
