# Platte River Power Authority Overview

City of Fort Collins

Climate Action Plan Citizen Advisory Committee

June 12, 2014

# Platte River Power Authority History

 We exist to serve the needs of our member/owner communities –

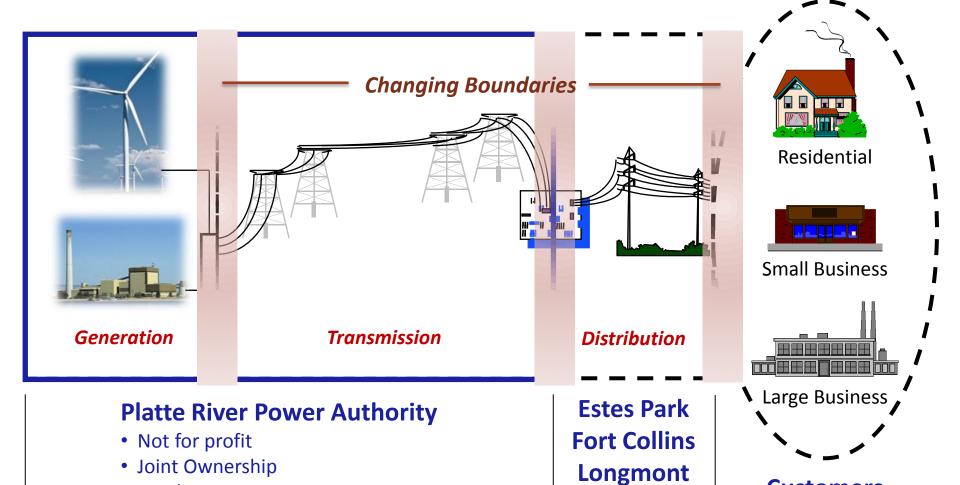

- Formed in 1973 in response to a U.S.
   Bureau of Reclamation announcement that it would be unable to supply enough hydropower to meet cities' future need
- Contracts executed with each of the cities and among the cities – term to 2050

# Local Electric System Partnership

# Strategic Initiatives

# Why Diversify?

- Reduce emissions
- Lower risk of effects from new legislation/regulation
- Increase fuel supply flexibility
- Improve resource optimization to serve Municipal loads
- Reduce financial risks
- Integrate more renewable energy
- Participate in new electricity markets
- Support preferences of the Municipalities

# Diversify Energy Supply Portfolio

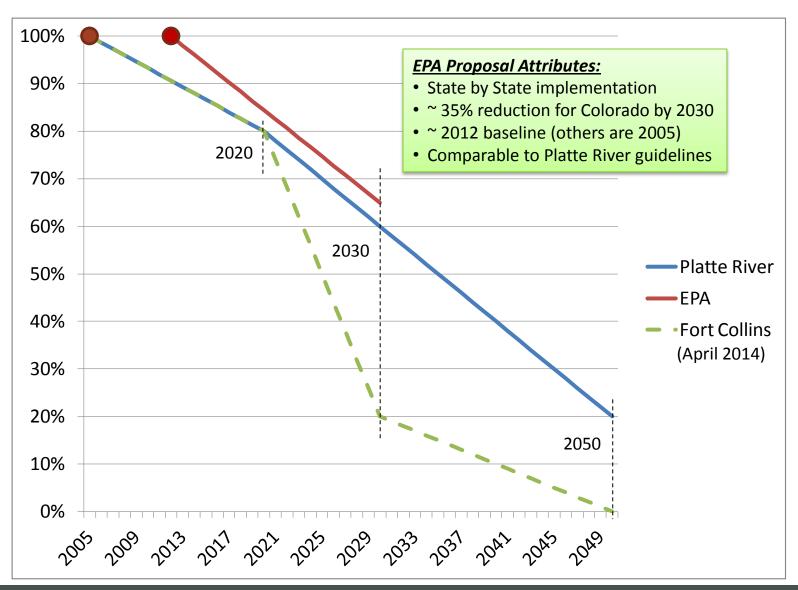

#### **STRATEGIC PLAN DIRECTIVES/GOALS:**

- Investigate options to reduce our carbon footprint:
  - $\checkmark$  CO<sub>2</sub> emissions 20% reduction by 2020 as a guideline (80% by 2050)
- Study expanded use of renewable resources:
  - ✓ Colorado Standard (qualified sources) 20% by 2020 as a guideline
- Evaluate natural gas combined cycle generation:
  - ✓ Fuel diversity/reduced emissions/renewable source integration
- Analyze benefits & costs of more distributed resources

Maintain position as lowest cost wholesale supplier in Colorado

#### Greenhouse Gas Reduction Guidelines

# Analysis for the City of Fort Collins

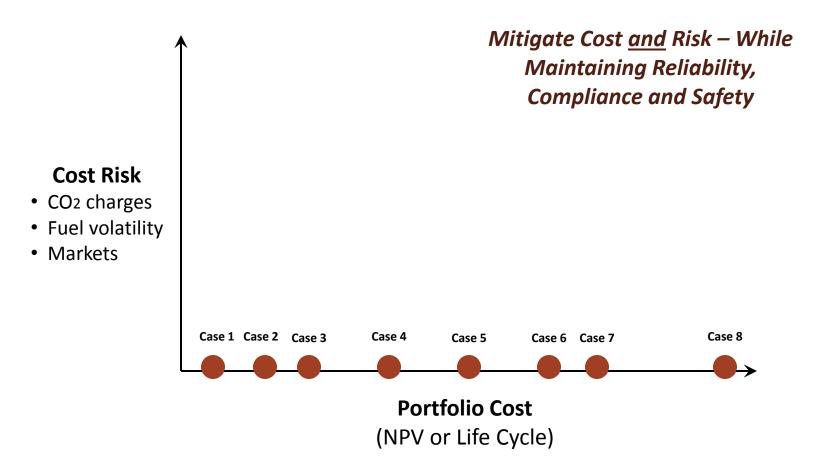

- Council approved Resolution 2014-028 on April 1, 2014
- Platte River is partnering with Fort Collins Utilities to develop a set of electricity resource planning scenarios to support Fort Collins' Climate Action Plan
- An Intergovernmental Agreement was approved June 3, 2014
- Project plan (charter) is being developed to clarify details

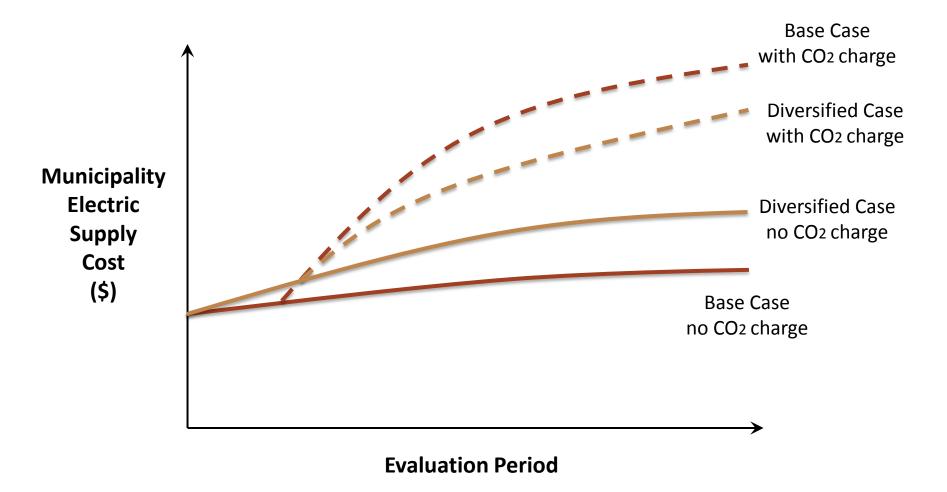

## Resource Planning Focus

Considering two primary factors – *Cost and Risk* 

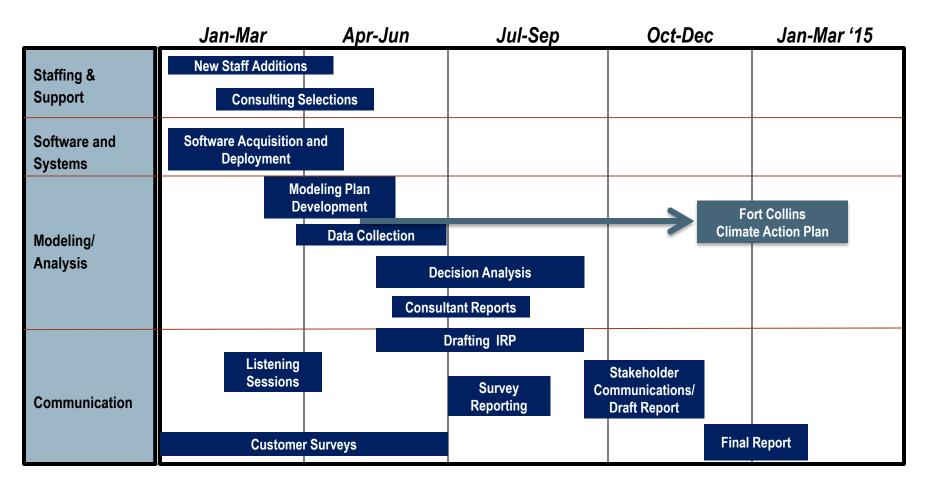

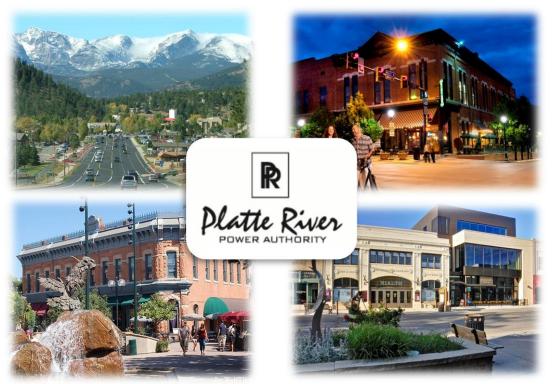

## Risk Mitigation Example – Illustrative

#### Schedule
