

College and Horsetooth By Tim Upham / 2018

Fort Collins artist Tim Upham is installing *Horsetooth Towers* on both sides of the bridge on the west side of the College and Horsetooth intersection.

Tim worked with the Project Team to develop light towers created from stainless steel frames and river rock gabion bases that act as beacons on the Canal Bridge on Horsetooth Road. These vertical elements bookend and accent the railing design that alludes to Horsetooth Rock. The upper portion of towers create a puzzle pattern with buff and dark red sandstone while other sections are translucent with polycarbonate and crushed glass.

Design Concept

Tim Upham in his workshop during fabrication of the towers.

A detail of Tim's tower concepts.
