

walk. bike. roll. ACTIVE MODES PLAN

Active modes of transportation include walking, bicycling, rolling (wheelchair use), and micromobility (scooters and skateboards).

Vision

Active transportation is an integral part of daily life and the local cultural experience. Fort Collins is a place where walking, bicycling, and using other active modes are safe, accessible, convenient, joyful, and desired by people of all ages and abilities.

Goals

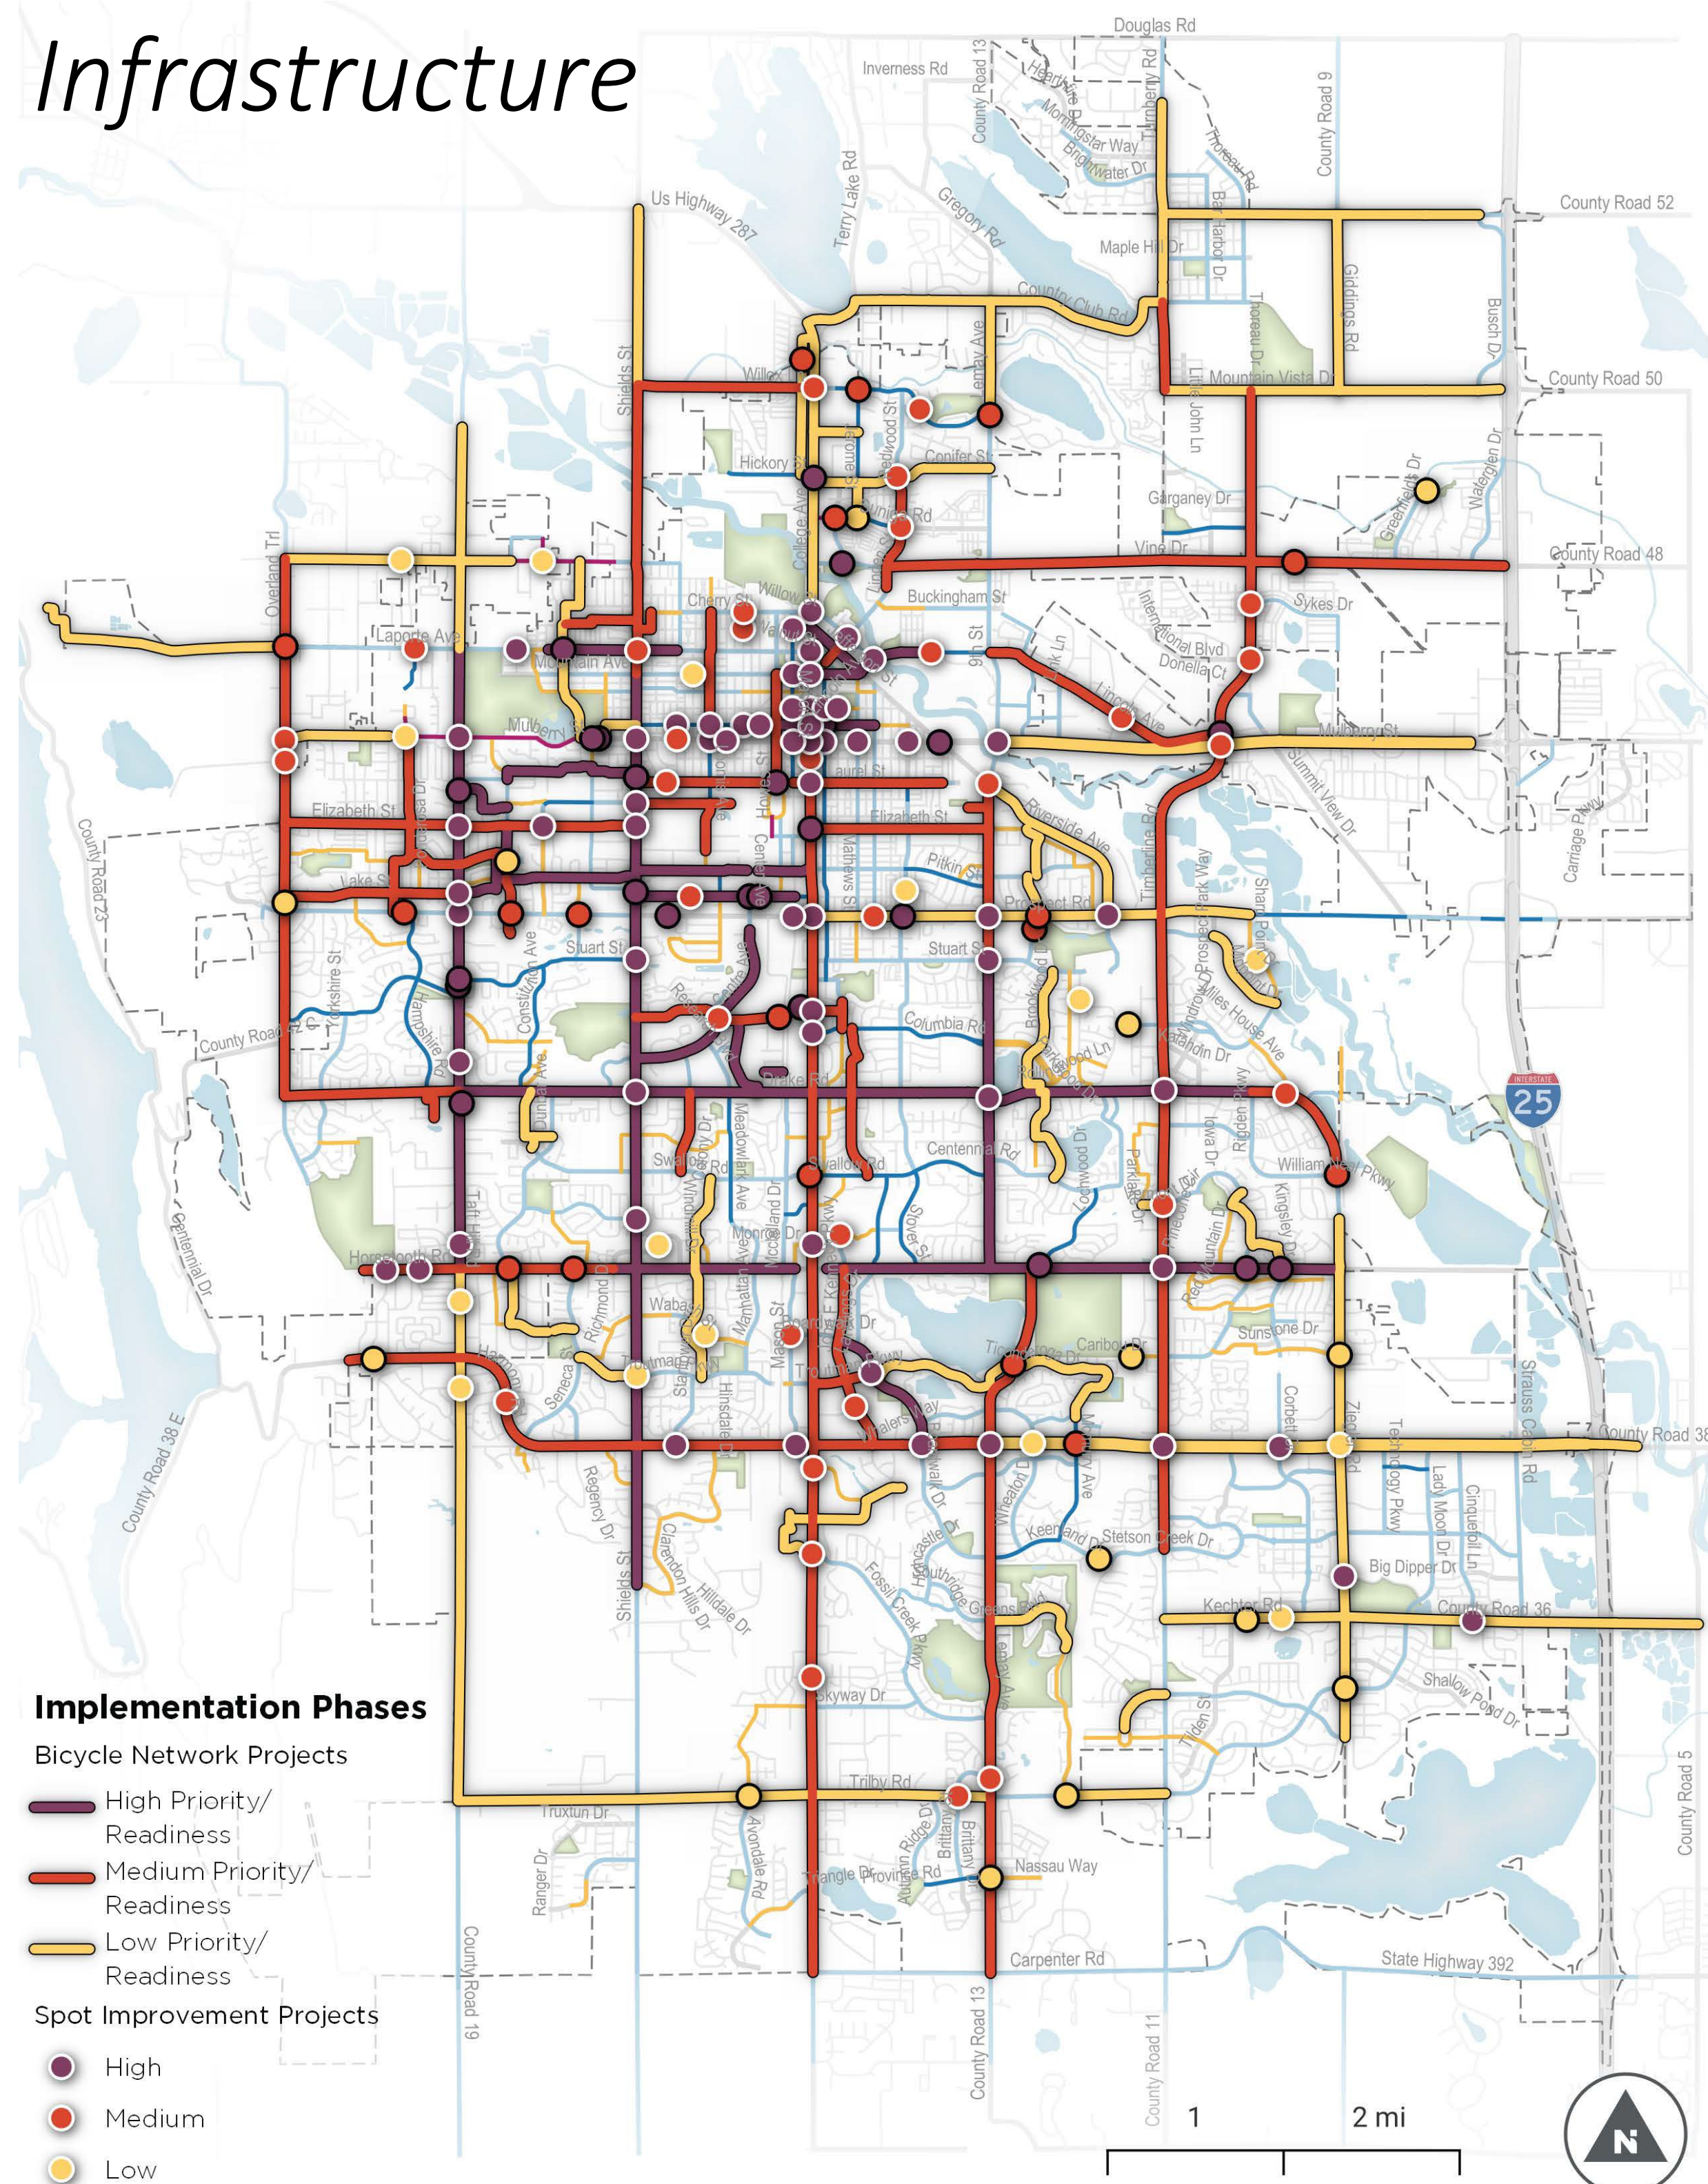

- Achieve 50% active mode share of all trips by 2032
- Eliminate active mode fatalities and serious injuries by 2032

Recommendations

Policies and Programs

- Prioritize active modes
- Update land use policies to support active modes
- Align standards with active mode goals
- Expand and create programs that support active modes
- Engage communities authentically around active modes
