

Transportation safety is always a priority for the City. In 2016, the City of Fort Collins became the first public local entity to join the Colorado Department of Transportation’s **Moving Towards Zero Deaths** initiative.

Making progress towards Vision Zero requires a multifaceted, focused effort. It includes collecting, compiling, and analyzing reported traffic crashes to identify crash types, trends, patterns, locations etc. that can lead to mitigation strategies. Safety improvement efforts involve engineering solutions, enforcement efforts, educational outreach, and more.

## Recent/Upcoming Safety Related Projects

### Signal Projects (Installed Flashing Yellow Arrows)

College and Mulberry  
College and Swallow

### Pedestrian Safety

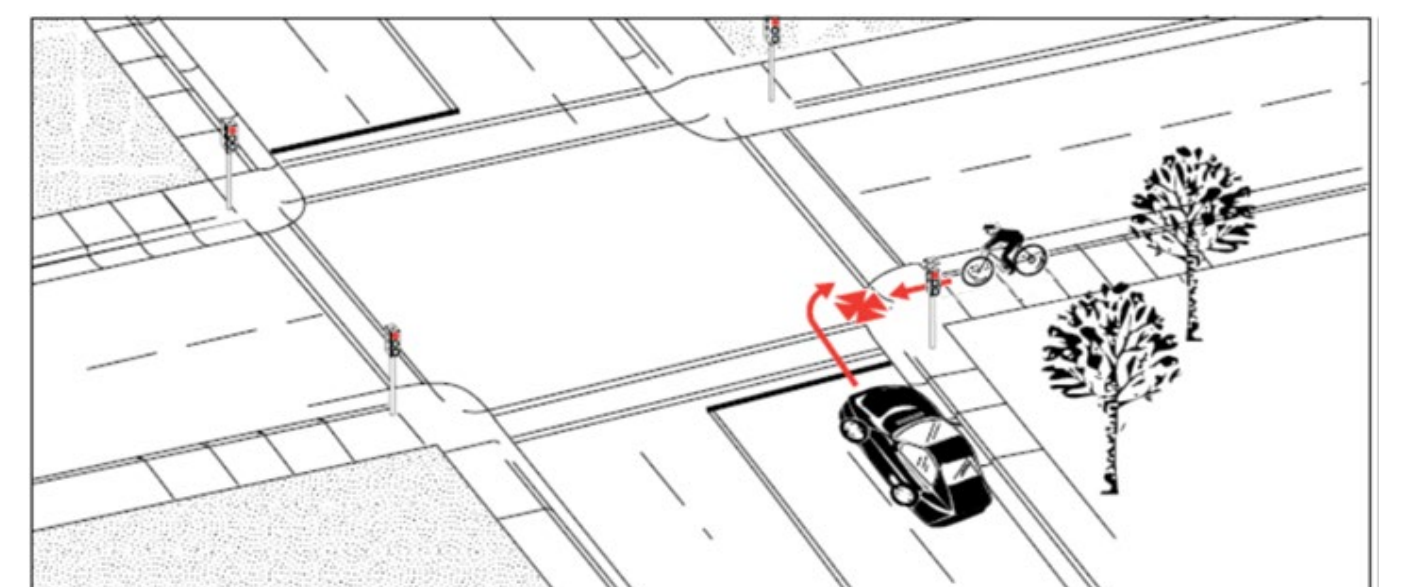

Protected pedestrian intervals signalized intersections.  
Snow Mesa and Harmony  
Lemay and Magnolia  
College and Cherry  
College and Conifer

### School Flasher Upgrades (Upgrade clocks and communications for remote access)

30 School Zones in 2023

## Roadway Safety Reminders

### Right Angle crashes

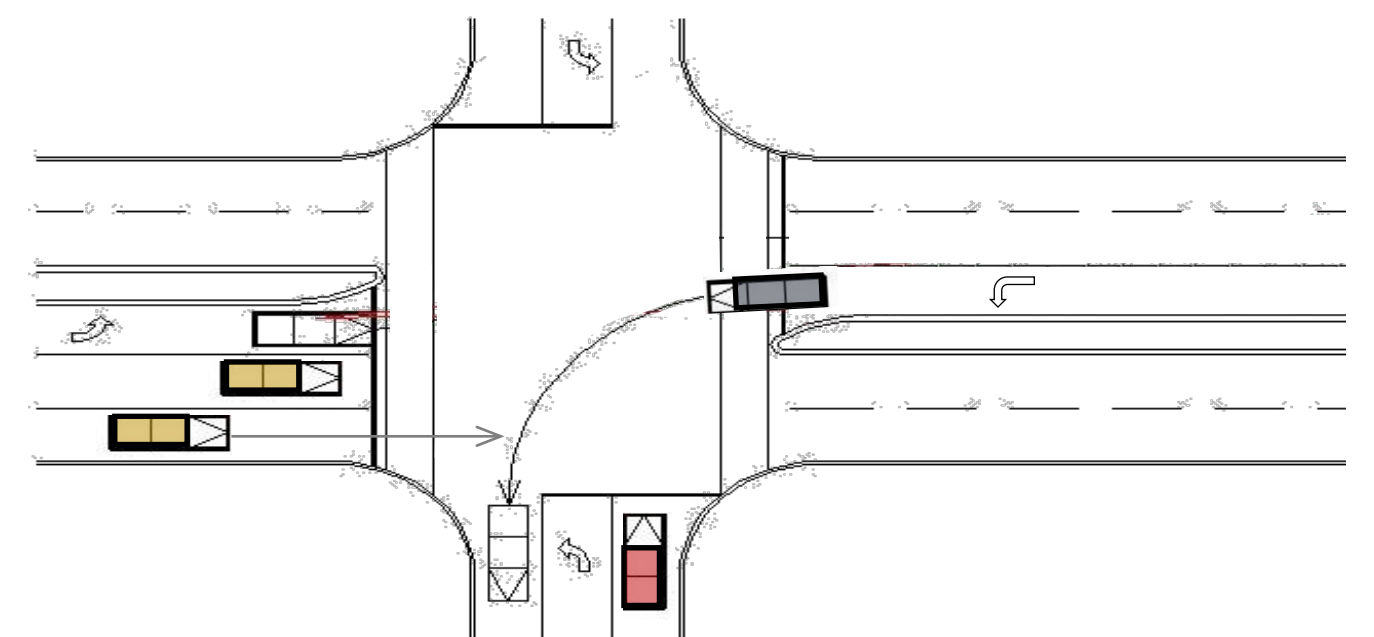

- Make up more than half of all bike crashes.
- 38% of right-angle crashes involve a cyclist riding against traffic (in road or on sidewalk)

Motorists: look to the right before turning right

Cyclists: do not ride against traffic

### Approach Turn crashes

- Are often severe
- 75% of approach turn crashes occur at signalized intersections

Motorists: Do not go if you cannot see!

Motorists: As the light changes, wait to ensure that opposing vehicles are stopping before crossing roadway
