

Spaghetti Diagram

A Spaghetti Diagram is a tool used to see the flow of objects, information, or communication within a process.

When to Use It:

1. Map the movement of an employee to complete a building permit application
2. Map the route of staff mowing parks
3. See a visual representation of the movement to perform routine maintenance on a city bus
4. View the communication flow between a new hire and various city personnel

EXAMPLE: Municipal Court Pre-Security Updates

EXAMPLE: Municipal Court Post-Security Updates
