

FOSSIL CREEK TRAIL CONSTRUCTION NOTICE

CONSTRUCTION TO BEGIN IN JULY 2016

FOSSIL CREEK TRAIL CONSTRUCTION

A major construction project will soon begin on Fossil Creek Trail. Phase one of the project is scheduled to begin in July and is anticipated to conclude January of 2017. The project will be focused on a section of Fossil Creek Trail near Redtail Grove Natural Area and the BNSF Railway. Phase one of the project represents a major step in connecting the City's paved trail system. Phase one will create a pedestrian tunnel under the BNSF Railway. Once the tunnel is completed the City can begin phase two, trail connectivity. The trail connection phase is expected to be completed in fall of 2017.

Please avoid this work area during construction and allow crews to safely complete the project. Crews are expected to remain in the work area until the project is completed. Work zones will be clearly identified for your safety. Thank you for your patience and cooperation as we complete this major trail construction project.
