Mobile Stage Helpful Information

Lighting:

The Mobile Stage comes with 2 rows of fluorescent lighting, and square tube ports for theatrical lighting, provided by the user.

Electrical Supply:

The Mobile Stage has an electrical distribution panel set up for a 50 amp supply. This supply can come from one of three sources:

1. City power from a normal 110 volt outlet. The number of amps is restricted to the circuit that it is supplied from. Usually this is a 20 amp circuit. (i.e., one microphone). Electrical support is charged a per hour fee.
2. 50 amp twist lock configuration. This needs to be setup ahead of time since the connection is unique for the showmobile. We have two of these connections in our system: City Park and Fossil Creek.
3. Our on-board generator or an outside generator which has the twist lock setup must be placed in a way to accommodate the use of a grounding rod for safety purposes. Grounding rod requires a UNCC locate; so advance notice is needed.

Bands require a 50-amp supply *minimum*. Applicant can rent the generator or supply their own, or if at a park that has a nearby 50-amp supply, like City Park, they can hook up to that port.
