

Eagle View Natural Area

Not yet open to the public, this 90-acre site provides an important buffer from development for bald eagles and waterbirds on Fossil Creek Reservoir. Open fields attract birds of prey and the Fossil Creek Reservoir Inlet Ditch provides sheltered open water for ducks, grebes, coots, and herons.

10-Year Site Management Objectives

- **Protect and enhance wildlife use on the adjacent Fossil Creek Reservoir.**
- **Begin grassland restoration efforts.**
- **Pursue wetland habitat restoration.**
- **Provide trails and other recreational amenities.**
- **Promote on-site educational opportunities.**

Do you feel that the proposed zoning and recreational use for Eagle View are at appropriate levels?
