

Flores del Sol Natural Area

A 2016 acquisition, the west side of this 152-acre agricultural site will be accessible via the multipurpose Colorado Front Range Trail in 2018. The vision for this site is buffers of native wildflowers and grasses around community agricultural fields to enhance the site for native pollinators (e.g., bees, moths, birds).

10-Year Site Management Objectives

- ♦ Provide recreational amenities and open site to the public.
- ♦ Promote research, educational opportunities, and community building around conservation agriculture, resource protection, and local food access. Enhance the site for pollinators and other wildlife.

Do you have suggestions for future community agricultural uses or wildlife enhancements on Flores del Sol?
