MEMORANDUM

DATE: July 6, 2021

TO: Water Commission

FROM: Susan Smolnik, P.E., Water Resources Engineer

Donnie Dustin, P.E., Water Resources Manager

RE: June 2021 Water Resources Division Staff Report

Purpose

This memorandum is intended to update the Water Commission on water resource conditions for the City of Fort Collins Water Utility (Water Utility) over the month of June and provide updated future outlook information. For additional information, please refer to the City's website: https://www.fcgov.com/utilities/water-status

Water Resources Summary

Supply and Demand Projections for the remainder of WY2021

- Water Supply- The supply outlook continues to improve. In June, the Water Treatment Facility treated Poudre River water at flow rates exceeding projections. The Windy Gap project pumped this spring, increasing the City's Horsetooth supplies.
- Water Demand- Demands for the month of June were slightly below projected. Please refer to the attached graphs and tables. Water demands within the Water Utility service area for the month:
 - Water demand for June: 97.6% of the projected demand.
 - Water demand for calendar year: 94.8% of the projected demand.

Weather: https://climate.colostate.edu/

The conditions measured at the Fort Collins weather station for June:

- Mean daily high temperature recorded for the month: 86.4 °F.
 - Long term average daily high temperature for the month is: 79.5°F.
- Total recorded monthly precipitation: .48 inches.
 - Long term average precipation for the month: 1.78 inches.

Reservoir Storage: (See attached sheet from Northern Water)

- Colorado-Big Thompson project reservoirs (Granby, Carter, and Horsetooth): 89% full
- Horsetooth Reservoir: 95% full.
- Joe Wright Reservoir: 100% full (100% of average based on 13 years of data).

Poudre River flow: Graphical data for the Poudre River is available on-line at:

- Cache La Poudre River at the Canyon Mouth https://dwr.state.co.us/Tools/Stations/CLAFTCCO?params=DISCHRG
- Cache La Poudre River at Fort Collins
 https://dwr.state.co.us/Tools/Stations/CLAFORCO?params=DISCHRG

Drought Monitors:

- Larimer County and Colorado https://climate.colostate.edu/drought_info.html
 Larimer county is no longer in a drought due to the rainfall events of April and May
- Colorado and the USA https://droughtmonitor.unl.edu/ The Colorado River basin remains in drought.

Climate Outlook: https://www.cpc.ncep.noaa.gov/

National Oceanic and Atmospheric Administration (NOAA) climate outlooks for the northern Front Range and northern mountains, over the next three months:

- Below normal precipitation.
- Above normal temperature.

Other Water Supply Considerations:

- Utilities staff continues to monitor the impacts to the Poudre River basin from the Cameron Peak fire and impacts to the Upper Colorado River basin from the Troublesome fire.
- The Colorado River basin remains in drought. The lack of winter snow is translating into well below average streamflows and drops in reservoir storage levels. For this water year, the City has sufficient Colorado River supplies already delivered and available in Horsetooth Reservoir.
- Due to the improved supply and demand outlook, Utilities staff is recommending that the voluntary Water Shortage Watch be recinded.

City of Fort Collins Utilities

ASSUMPTIONS

• Values look at remaining demands and supplies through the end of the Water Year (Oct 31)

DEMANDS (treated only)

- Average Demand is projected demand
- Low Demand is projected Average Demand reduced by 10%
- High Demand applies a monthly worse case factor to projected Average Demand

SUPPLIES

Poudre

• High Supply is a fire impacted Poudre that is 62% of the annual average. Monthly percentages of average are Nov-Mar 95%, Apr 85%, May-Jun 5%, Jul 25%, Aug 60%, Sep 70%, Oct 80%. Medium Supply is 95% of the fire impacted Poudre (or 59% of annual average) and Low Supply is 90% (or 56% of annual average).

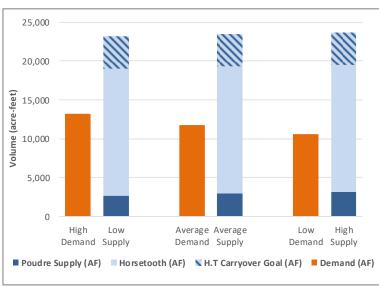

Horsetooth Reservoir

- Horsetooth Supplies include CBT, NPIC MU & Windy Gap
- CBT supply is 70% quota, 2.50 NPIC MU allocation/share
- All remaining Horsetooth raw water obligations have been deducted. A 1,500 AF exchange of Joe Wright water for CBT is included

Horsetooth Carryover Objective

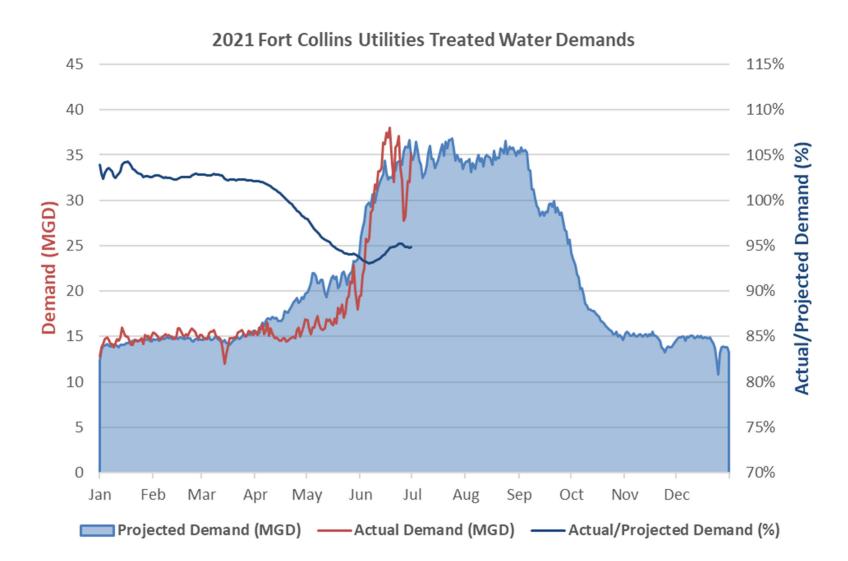

- Amount from this years Horsetooth supplies to carryover for next year
- \bullet Max amount allowable is 4,190 AF before 10% shrink

Remaining Water Demand and Supply from Jul 05 - Oct 31, 2021

Scenario	Demand (AF)	Poudre Supply (AF)	Horsetooth (AF)	H.T Carryover Goal (AF)				
High Demand Low Supply	13,229	2,695	16,347	4,190				
Average Demand Average Supply	11,724	2,994	16,347	4,190				
Low Demand High Supply	10,603	3,152	16,347	4,190				

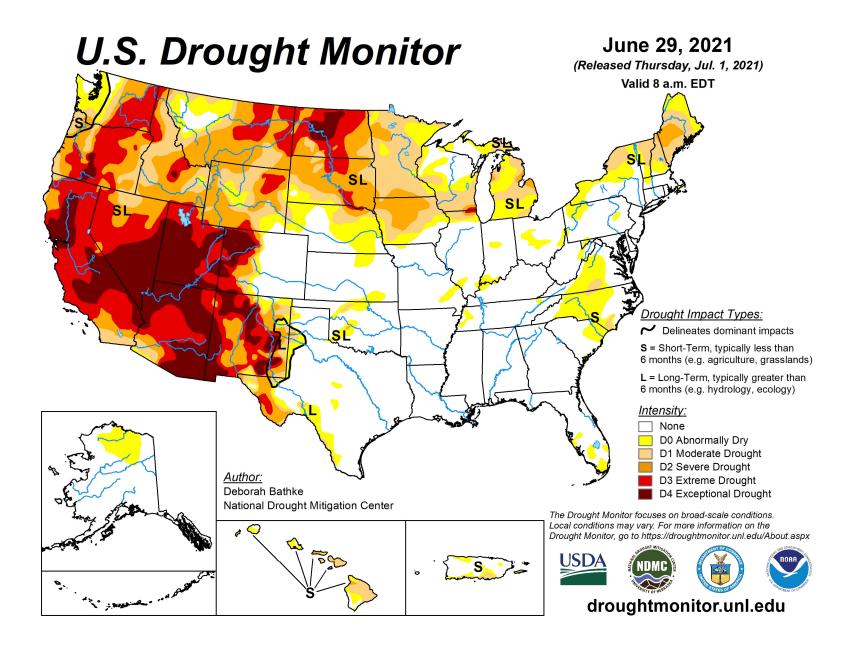

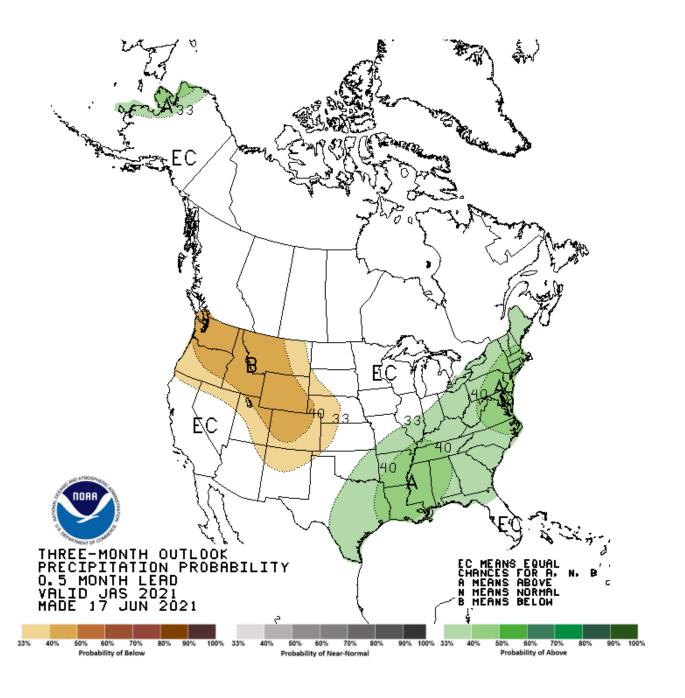

City of Fort Collins Utilities Treated Water Monthly Summary 2021

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Year to Date
WTF Water Supply (MG)													
From Poudre	304.5	290.0	288.6	155.0	275.5	403.0							1,716.6

C-BT Project Storage

July 1, 2021

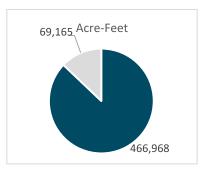

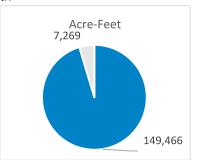

Lake Granby Storage in Lake Granby increased 65,701 acre-feet last month

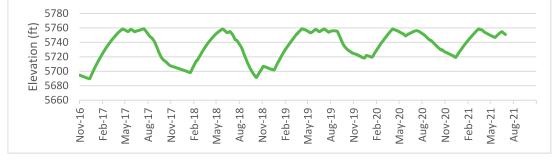

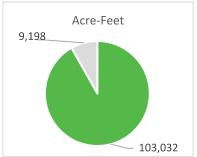

Horsetooth Reservoir Storage in Horsetooth Reservoir decreased 4,186 acre-feet last month

Carter Lake Storage in Carter Lake increased 165 acre-feet last month

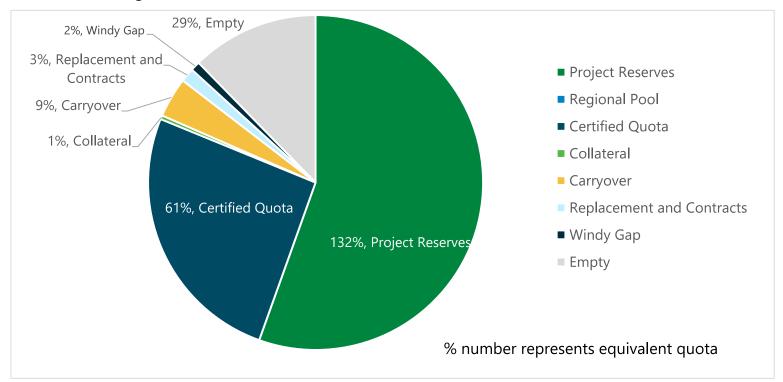

C-BT Project Allocated Water

July 1, 2021

Northern Water

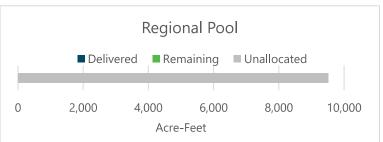

C-BT Active Storage

C-BT Delivery Obligations

50,000

40,000

60,000

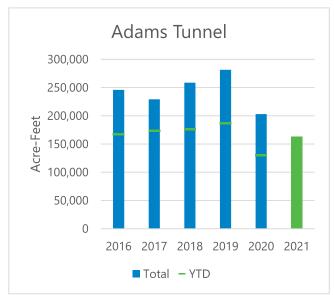

Notes:

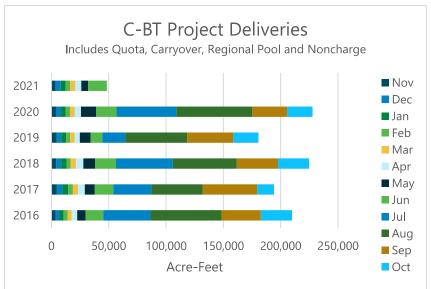

- 1) Quota set at 70%
- 2) Carryover Entites certified 55,240.5 Acre-Feet of Carryover for WY2021.
- 3) Regional Pool Additional water acrued to the Regional Pool on April 30, 2021. There is 9,510.3 Acre-Feet in the Regional Pool for WY 2021.
