

2011 Residential Environmental Program Series.

Smart Meter Fort Collins: A foundation to support, inform and empower our community.

**Wednesday, April 27, 7–9 p.m.
Drake Centre, 802 W. Drake Rd.**

(Pre-registration is not necessary for this free program.)

Right now, it's fairly basic.

Through the Smart Meter Fort Collins project, Fort Collins Utilities will be upgrading meters in homes, schools and businesses to enable two-way communications between you and the utility. Installation will begin in early 2012.

Once installed, smart meters will help Utilities achieve immediate system and operational advantages. Over time, more direct customer benefits will emerge, including increased flexibility and options.

Smart meters:

- make utility operations even more efficient and cost-effective
- provide timely customer service solutions
- harness information to maintain high system reliability
- prepare Fort Collins Utilities and the community for the future.

The City of Fort Collins will make reasonable accommodations for access to City services, programs and activities and will make special communication arrangements for persons with disabilities. Please call (970) 221-6700 or TDD (970) 224-6003 for assistance.

Smart meters will provide timely customer service solutions and prepare Utilities and the community for the future.

For more information, visit fcgov.com/smartmeter, e-mail utilities@fcgov.com, call (970) 212-2900 or TDD (970) 224-6003.

Please help us make this a zero-waste event.

Series sponsored by Fort Collins Utilities and Natural Resources Department
