

APRIL 7, 2017

Walnut Street Water & Sewer Rehabilitation Project

WEEK #3 CONSTRUCTION UPDATE

Construction in Seckner Alley is progressing better than expected. Installation of the new sewerpipe is complete and all services in the alley have been reconnected. Manholes are being set Friday and Monday. All work is on schedule as described in the calendar on the back.

WHAT'S NEW? Walnut Street should be backfilled by next Friday, but not yet open due to safety reasons. We are on track for completion and opening the street by April 20.

Setting the trenchbox to begin service connection and manhole work near Prost at the end of Seckner Alley.

Bursting rods are pulled from Walnut through the alley for the new sewer main.

Sewerpipe being lowered into pit to be pushed through for new main.

Setting one of three new manholes to connect to the new sewerline.

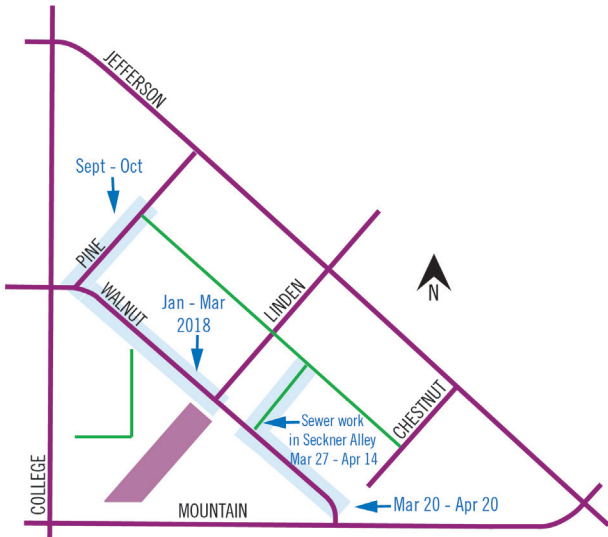

THE SCHEDULE

Sewer line replacement in Walnut Street and Seckner Alley

Utilities will abandon the old clay sewer pipe and install 306 lineal feet of new 8-inch sewerline in Walnut Street from Mountain Avenue to Seckner Alley.

The old 6-inch clay sewerline in Seckner Alley also will be replaced beginning March 27 with an 8-inch sewer. A trenchless technology known as ‘pipe bursting’ will be used because open excavation in such a narrow alley is very difficult. Spot excavations will occur to identify and reconnect active sewer services, with no expected service disruptions to businesses.

- Work on the hotel frontage will not extend beyond its boundary fencing during our construction timeline.
- Walnut Street will remain open. Westbound traffic on Walnut will be closed from Mountain to Linden – no right turn from Mountain onto Walnut.
- Sewer systems for businesses in the area will not be affected.
- Pedestrian access will remain open at all times.
- Signage will be placed and labeled as needed for safety of crews, business owners and the public.

CONSTRUCTION SCHEDULE

JOB ACTIVITY	3/20	3/27	4/3	4/10	4/20
Traffic Control/Setup	■				
Jobsite Fencing	■	■			
Remove Asphalt	■	■	■		
Install Sewer		■	■	■	
Service Connections			■	■	
Install New Manhole			■	■	
Repair Concrete Panels			■	■	■
Remove Traffic Control					■
Seckner Alley Sewerline		■	■	■	■
Replace Asphalt					■

WHAT YOU CAN EXPECT NEXT

- **September–October 2017**
In Pine Street from the alley to Walnut Street, Utilities will replace the existing 4-inch waterline with 400 feet of new 8-inch waterline.
- **January–March 2018**
Utilities will abandon two old water lines in Walnut Street and install 550 feet of new waterline from College Avenue to Linden Street.
