

## **City Manager's Declaration and Order to End the Voluntary Water Shortage Watch for Fort Collins Utilities Water Customers**

The City Manager of the City of Fort Collins hereby makes this *Declaration and Order to End the Voluntary Water Shortage Watch for Fort Collins Utilities Water Customers*, pursuant to Fort Collins City Code Section 26-167(a) and the Water Shortage Action Plan (WSAP), dated April 2020.

A Water Shortage Watch was declared in the *Declaration and Order of Voluntary Water Shortage Watch for Fort Collins Utilities Water Customers*, dated April 29, 2021 (*April Order*). The potential for water shortage as described in the *April Order* has ended because of reduced water demands due to the irrigation season coming to an end and water resources being adequate to supply water for the remainder of the year. The voluntary Water Shortage Watch for Fort Collins Utilities water customers shall therefore cease as of **October 1, 2021**.
