

MARCH 9, 2018

Walnut Street Water & Sewer Rehabilitation Project

Project now is complete - Thank you for your cooperation!

The project team at Fort Collins Utilities thanks you, the Walnut, Pine and Linden street businesses, for your patience, cooperation and positivity during this project. Your willingness to work with us and Connell Resources is very much appreciated. Because of you (and a mild winter), the project was completed quickly with very few issues. We sincerely thank you!

PROJECT RECAP

At the request of downtown businesses to accommodate impact concerns, Utilities divided this critical infrastructure project into three phases over 2017 and early 2018.

- **Phase 1** Sewer line replacement in Walnut Street and Seckner Alley was completed in April 2017.
- **Phase 2** New waterline in Pine Street was completed in September 2017
- **Phase 3** began Jan. 2 and was completed March 5, 2018. New 8-inch waterline was installed from College Avenue to Linden Street, including additional fire protection. The complete rebuilding of Walnut Street, including the discovery and removal of old trolley tracks, was not in the original scope or timeline, but work was still completed almost a month ahead of schedule.

We need your feedback to HELP US IMPROVE

To help us improve for future projects (and there will be more), we'd like your input about how Utilities worked with you regarding communications about the project, access for customers and deliveries and project updates.

Please take this short, anonymous survey:

[fcgov.com/Walnut-survey](https://www.fcgov.com/Walnut-survey). We'll get back to you but only if you request it. Thank you.
