

# Using Pandora on Facebook Portal

When using Pandora on the Facebook Portal, anything you've set up in your Pandora account will be carried over to the Portal.

## Creating a Pandora account on Facebook Portal

If you haven't already created a Pandora account, you can create one using the **Browser** app on the Portal. These directions are specifically for the Portal, but you can create the Pandora account on any device. Here's how to create it on the Portal:

1. Open the **Browser** app and enter [www.pandora.com](http://www.pandora.com).
2. Once the Pandora screen opens, tap the **Sign Up** button near the top of the screen.
3. Enter your email address, a password, a birth year (they just want to make sure you're over 16), your zip code and gender.
4. Then tap the **Sign Up** button.

## How to add artists to Pandora

1. Once your new Pandora account opens, tap the **Browse** button. In the search field, enter the name of an artist you enjoy.
2. In the list of items that appears, click on the picture or the name of one that you're interested in adding. It'll usually say **Artist** or **Station** under the artist's name
3. The artist's picture will appear in a larger circle towards the left side of the screen. Directly under the picture, click the button for **Start Station**.  
It looks like this: 
4. The new artist will now show up under **My Collections**. And when you open the Pandora app on the Portal, you'll see the new artist.
5. Add as many additional artists as you like. And you can always go back to [www.pandora.com](http://www.pandora.com) to add more!
6. You can also use a "Hey Portal" command to listen to a particular artist. For example "Hey Portal, play Taylor Swift". As long as you've set up a Pandora account, the Portal will begin to play music by Taylor Swift.

**NOTE:** With the free version of Pandora, not ALL music will be by the particular artist you've requested, but Pandora will play music of that genre.
