

How to Create a Zoom Account on an iPhone or iPad

1. From the app store, download the **Zoom** app. (It may be listed as Zoom Cloud Meetings.)
2. Once installed, tap the **Zoom** icon.
3. Tap the **Sign Up** button.

4. You'll be prompted for your date of birth. (They just want to make sure you're over 16, feel free to exaggerate.) Tap the **Confirm** button.
5. Enter the email address and first and last name that will be associated with your Zoom account.
6. Tap the **Sign Up** button.

7. A confirmation email message will be sent to the email address you entered in step 5. Open your email, look for a new message from **Zoom**, and click the **Activate Account** button.

8. Once you've activated your account, another Zoom window will open. Enter your first name and last name, set a password, confirm the password, and click the **Continue** button.
9. At this point, Zoom wants to schedule a meeting using the browser. I suggest closing the browser window and opening the Zoom app on the iPhone or iPad.
10. Instructions continue in the document [How to Schedule a Zoom Meeting on an iPhone or iPad](#).
